MISSIONS AND ENEMY TRADING ACT -In May 1918, the following notice regarding Mis sions was published in the "Gazette of India — "The following missions or religious associations ar declared companies under Act 2 (the Enemy Trading Act) of 1916 — The Leipzig Evangelical Froding Act) of 1910 — The Leipzig Hvangeness Lutheran Mission, Madras, the Hormausberg Evangelical Lutheran Mission, Madras, thu Schi swig Holsk in Evangelical Lutheran Mission, Madras, the Gosner Evangelical Lutheran Mission of the United Provinces and Behar and Orises, the German Evangelical Lutheran Mission of Banchi, Behar and Orises Tho Governor-General in Council notifies that the powers conferred under Section 7 of the said Act shall extend to the property, movable and immovable, of these missions or religious associations"

In June, 1919 the Government of India stated — Effect is already being given to the suggestion that enemy missions in Iodia should be taken over by British societies. The proper the sact over oy missis someties. In proper ties and notertaking of hostile missions have been vested in the Provisional Gustodian of Enemy Property with a view to their transfer to beards of trustees composed partly of non-official members nominated by the National Missionary Connell of India with the approval of the Government of India and narrily of of the Government of India and partly of Government officials, and these Boards of Trus-tees will in due course transfer the undertakings THE INDIA MISSION OF THE EVANGELICAL LUT- and properties to a missionary society to be HERAM SYMOD OF MISSOURI, OHIO AND O.5 'is selected by them with the approval of the

# Methodist Societies.

The Mathodist Episcopal Church is the organization in the United States of America which grew ont of the Wesleyan revival in England and her American colonies during the latter part of the eighteenth century. This Church began its work in India in 1856, at first confining its activities to what is now the United Provinces From that centre it spread until the outposts of its work were found in Bainohistan, Burma, Majaysis, Netherlands Indies and the Philippine Islands In 1920 a rearrangement of the mission field of the Church separated india Burma and Baiuchistan into what is now known as the Southern Asia divi lon Within this present field the Chnr.h now has a total baptized Christlan community of 444,128, of whom 37 750 were added the year ending with 1924

The avowed task of the Church has been the uplift of the depressed classes, and its work has been largely among that class As a matter of fact, however, it has large numbers who came from the Mohammedans and the caste Hindus, and among such its influence is extend mg

The educational work of the Church is extensive it having in this area a total of 1 627 schools of all grades, including three colleges, twenty-two high schools, and numerous normal training and the logical institutions registered attendants in these schools number 46,750

Special effort is made for the instruction and development of the young people of the Church, there now being 987 chapters of the Epworth League with 46,035 enrolled members, and 6,469 organised Sunday Schools with an sproiment of 20 ).968

The publishing interests of the Church are represented in two presses at Madras and Juck now, the former doing work in four vernaculars and the latter in six The periodicals issued cover the interests of both the evangelistic and the educational field, the Indian Witness, the Junior Mcthodist and Methodist Education being in English while the Kankab-i Hind, the Rafiq I Niswan the Bal Hit Karak, and other pariodicals for women and children are issued in several of the vernaculars, as are lesson helps of various grades for the Sunday Schools

The governing body of the Church is the General Couler nees held quadrennially, in which the ten conferences now existing in ludia are represented by twenty six delegates the polity of the Church in India looks forward to complete independence under the general governing body, there at present being but about three hundred and fifty American and women as compared to 480 ordained and 5,162 unordained Indian and Burmese workers At present the area is divided into seventy three districts each in charge of a superintendent and among whom are many Indians The work und among whom are many Indians. # Laws and the Administration of Justice.

The indigenous isw of India is personal and The Indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Mahomedan Both systems claim divine origin and are instituted in the control of the third the tendency of the English was to make their law public and territorial, and ou the establishment of the Snyteme Court at Calcutta in 1773 and the advent of English lawren as judges, they proceeded to apply it to to Europeans and Indians silks. This will be a control of the Snytem to the Snytem of the was rectified by the Decision, Act of 1750, but you have Parliament declared that as against a Hindu the Hindu law and usage, and a against a Mahomedan the laws and contains of lalam should be applied. The rules of the Bhastras and the Koran have been in some condend desirable by the enactence of the Bhastras and the Koran have been in some condend desirable by the enactence of the Bhastras and the Koran have been in some condend desirable by the enactence of the Bhastras and the Koran have been in some condend desirable by the enactence of the Bhastras and the Koran have been the conditions resulting found for the first duty undertaken by the Caste Diasolilities Removal act of 1860, the Hindu Widows Remarkage /ct, 1855, and other Asta and Codes. To quote the Imperial of the Proposition of the Proposition of the Caste Bhastras and Codes. To quote the Imperial of the Battle Book and this Government of the Rajish actuation and evidence of the Caste Bhastras and Codes as permanent feature of the legislative are to a limited extent still in force in the Fresidency Towns as applicable to Europeans, still proposed, and the Government of the Caste Bhastras and the Battle Book and this Government of the country are to a limited extent still in force in the Fresidency Towns as applicable to Europeans, still proposed, and the Government of the Caste Bhastras and the Battle Book and the Government of the Rajish country of the country are to a limited extent still in force in the Fresidency Towns as applicable to Europeans, still proposed the still proposed to the Caste Bhastras and the Battle Book and the Government of the Rajish country of the Country are the Battle Book and the Government of the Rajish country are to a limited extent still in force in the Fresidency Towns as applicable to European Rajish and the Caste Bhastras and the Battle Book and the Government of the Caste Bhastras and the Battle Book and the Government of the Caste Bhastras and the Battle Book and the Government of the Caste Bhastras and the Battl sidency Towns as applicable to Europeans, while much of the old Hindu and Mahomedan watte much of the old Hindu and Mahomedan, law is everywhere personal to their native fallow subjects, but spart from these, and from the enatomary law, which is as far as possible recognised by the Courts, the law of British india is the oreation of statutory enactments unade for it either at Westminster or by the authorities in India to whom the necessary law giving functions have from time to time been delegated.

#### Codification

Before the transfer of India to the Crown Before the transfer of India to the Crowns the law was in a state of great contusion. Sir Henry Cunningham described it as 'hope leasy unwieldy, entangied and contusing The first steps toward general codification were taken in 1835, when a Commission was appoint ed, of which Lord Macaulay was the moving spirit, to prepare a penal code. Twenty-two years elapsed before it became law, during which period it underwent revision from his successors in the Law Membership, and espe cially by Sir Barnes Peacock, the last Chief Justice of the Supreme Court of Calcutta The Penal Code, which hecame law in 1860, was followed in 1861 by a Code of Criminal Procedure Substantially the whole criminal law of British India is contained in these two Codes One of the most eminent lawyers who Codes One of the most entinens sayyers ware ever came to India, Sir James Stephen, said "The Indian pensi code may be described as the criminal law of Engiand freed from all technicalities and superfluties, systematically arranged and modified in some few particulars

### Statute Law Revision

the preparation of a Bill consolidating the exist-

#### **European British Subjects**

Whilst the substantive criminal law is the Whilst the substantive oriminal law is be same for all classes, eritain distinctions of procedure have always been maintained in regard to oriminal charges against European British subjects could only for European British subjects of the High Courts it was then enacted that European British subjects should be liable to be tried for any offences by magistrates of the highest class, who were also justices of the place, and by judges of the Seasons Courts, but it was uncessary in both cases that the but it was uncessary in both cases that the man British hitles to all thisself be a European British hitles. pean British subject In 1883 the Government of India announced that they had decided settle the question of jurisdiction over Europeau subjects in euch a way as to remove from the subjects in such a way as to remove from the code at once and completely every judicial disqualifaction which is based merely on race libert Bill, aroused a storm of indignation which is still remembered. The controversy ended in a compromise which is thus aummarised by Sir John Strathey ('India')' Too controversy ended with other the virtual, though controversy ended with the virtual, though not avowed abandonment of the measure proposed by the Government Act III of 1884. proposed of the tovernment Act III of 1884, by which the law previously in force was amended, cannot he said to have diminished the privileges of European British subjects charged with offences, and it left their position as exceptional as before The general disqualificathe criminal law of England freed from all ocytional as before. The general disqualifon-technicalities and superdicties, systematically the of native jodges and magnitates ermains, arranged and modified in some few particulars but if a native of india he appointed to the post (they are surprisingly few) to suit the circum-district magnitate or sessions jodge, his stances of British India. It is practically impossible to misunderstand the code 'The Ritish subjects are the same as those of an India of Civil Procedure have been embodied in the Code of Civil Procedure The Indian provides however is subject to the condition. The Indian provides however is subject to the condition of the Code of Civil Procedure and the Code of Criminal Procedure is that every European Printish subject herought in 1908 and the Code of Criminal Procedure is due to the Code of Criminal Procedure is due to the Code of Criminal Procedure is the code of the Indian to be tried by a jury of which

not less than half the number shall be Euro-; sessions division has a court of session and a peans nr Americans was made in the powers of district magistrates, the law in regard to other magistrates remaines; maltered." Since 1836 no distinctions of rachave been recognised in the civil courts through out India.

After a discussion on this subject in the Legislative Assembly in September 1921 the following motion was adopted — That in order to remove all racial distinctions between Indians and Europeans in the matter of their trial and punishment for offences, a committee trai and pulliament for onences, a commutee be appointed to consider what amendments should be made in the provisions of the Code of Oriminal Procedure, 1898, which differentiate between Indians and European British subjects and American and Europeans who are not British subjects in criminal trials and proceed ings and to report on the hest methods of giving effect to their proposals

### Righ Courts

The highest legal tribunals in India are the High Courts of Indicature These were consti tuted by the Indian High Courts Act of 1861 for Bengal, Bombay and Madras, and later for the United Provinces and the Punjah superseding the old supreme and Sudder Courts The Judges are appointed by the Crown they hold office are appointed by the Crown they hold office during the pleasure of the Boversign, at least one-third of their number are barrieters, one third are recruited from the judicial branch of the Indian Civil Service, the remaining places being available for the appointment of Indian lawyers Trial by jury is the rule in original criminal cases before the High Courts, but juries are never employed in civil suits in

For other parts of India High Courts have been formed under other names The chief difference being that they derive their authority from the Government of India, not from Farlia ment. In Burma there is a Chief Court, with ment. In Burna there is a Cuter Court, with three or more judges, in the other provinces the chief appellate authority is an officer called the Judicial Commissioner In Sind the Judicial Commissioner is termed Judge of the Sudder Court and has two colleagues

The High Courts are the Courts of appeal from the superior courts in the districts, crimi from the supernor courts in the mercies, criminal and civil, and their decisions are final except in cases in which an appeal lies to His Majesty lo Council and is heard by the Judiciol Committee of the Privy Council in England The High Courte exercise supervision over all the subordinate courts Returns are regular the smordinate courts Acturns are regular ty sent to them at short intervals and the High Courts are able, by examining the returns, by sending for proceedings, and by calling for explanations, as well as from the cases that come before them in appeal, to keep thouselves to some extent acquainted with the manner in which the courts generally are discharging their duties

#### Lower Courts.

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magis

Whilst this change seesions judge, with assistance if need be district magistrates, These stationary sessions courts take the place These acationary sessions courts take the place of the English Assistes, and are competent to try all accused persons duly committed, and to inflict any punishment anthorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the province Magistrates courts are of three classes with descending lowers Provision is made and largely utilised in the towns, for the appointment of honorary magistrates, in the Presidency towns Presidency magistrates deal with magisterial cases and benches of Justices of the Peace or honorary magistrates dispose of the less important cases

Thail before courts of session are curve with assessor or juries Assessors saist, but do not blind the indge by their opinions on juries the opinion of the majority prevails if accepted by the predding Judge The Indian law allows considerable latitude of appeal The prerogative of mercy is exercised by the Covernor-Georal in-Council and the Local Governor-Geoeral in-Council and the Local Government concerned without prejudice to the superior power of the Crown

The constitution and jurisdiction of the inferior civil courts varies Broadly speaking one district and sessions judge is appointed for each district as District Judge he presides in its principal civil court of original jurisdiction, his functions as Sessions Judge have been de as remounts as sessions judge nave been de scribed For these posts members of the Indian Civil Service are mainly selected though some appointments are made from the Provincial Next come the Subordinate Judges and Munsifis, the extent of whose original and mustain, the extent of whose original jurisdiction varies in different parts of India The civil courts below the grade of District Judge, are almost invariably presided over by Indians There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs 500 In the Presidence money suits up to Rs 500 In the Presidency Towns, where the Chartered High Courts have original jurisdiction, Small Cause Courts dis-pose of money suits up to Rs 2,000 As In solvency Courts the chartered High Courts of Calcutts, Sommay and Madres have jurisdiction in the Presidency towns In the motussil similar power were conformed on the District Courts by the Insolvency Act of 1906

Coronere are appointed only for the Presi-dency Towns of Calcutta and Bombay Else-where their duties are discharged by the ordi nary staff of magistrates and police officers unaided by jurors

## Legat Practitioners

Legal practitioners in India are divided into Barristers at Law, Advocates of the High Court, Vakils and Attorneys (Solicitors) of High Courts, and Pleaders, Mukhtiars and revenue agents. Barristers and Advocates are admitted by each Barristers and Advocates are admitted by each High Court to practise in it and its shordinate courts, and they alone are admitted to prac-tise on the original side of some of the chartered High Courts. Valids are persons duly qualified who are admitted to practise on the appellate side of the chartered High Courts and in the Courts subordinate to the High Courts. Attrakes Every province, outside the Fresi torneys are required to quality before samission described in the sessions divisions to practise in much the same way as in Engiand consisting of one or more districts and every The rule that a solicitor must instruct oounsel

Legal and professional lawyers as the barristers precising in each High Court, ment Advocate and Assistant Government Advocate and Assistant Government advocate and a legal Rea and its functions are to watch the interests Justice Government Advocate and a struction are to watch the interests Justice Government Advocate and Burms at the highest Allabahad, Labor, Nagrora, and Rangson as the Labor, Nagrora, and Rangson as imilar Bar Committee exists, but the electorate is extended to include the wakils or native pleaders, and the president is either the senior practicing member of the Professional Lawyers as the control of the High Council Sheriffa are attached to the High Council Sheriffa are at Advocate In the larger Districts and See sions Courts, an organisation representing the Bar is usually to he found, and in the sub-ordinate Courts, including the Revenue Courts, similar machinery is generally in use Pending The Indian Law Reports are published is an opportunity of detailed inquiries in India, four series—Calcutta, Madras, Bombay, and these general descriptions must suffice

#### Composition of the Bar

a consumeranc quarge is occurring in the committee on appeal from the particular High composition of the Indian Bar. The following Court These appeals raise questions of very stract from an informing article in the Tunes great importance, and the Council of Law (May 25, 1914) indicates the character and Reporting for England and Wales show their incidence of this development During the appeciation by grinting the Indian Appeals Inst Intry years, a striking change has taken in a separate volume, and have also compiled place in the professional class. The bulk of la digest of Indian Appeals covering the period practice has largely best character in the professional class. Indian unada, while, as the same time, the have series of reports ame timbers and scales proteston bes grown to an enormous extent wither of the Judiciary or the Sake One typical liustration may be quoted Attach do to the Bombay High Court, in 1871, there were 88 solicitors, of whom 10 were Indian and 28 English, and 24 advocates, of whom 70 were Indian and 17 English In 1911, attached to the same High Court, there were 150 soll citors, of whom more than 130 were Indian and the remainder English, and 250 adve cates, of whom 16 only were English and tho romainder Indian

#### Law Officers

# Bengal Judicial Department

Sanderson, The Hon'hle Sir Lancelot . - Chief Justice. Chatarji, The Hon'hle Sir Nalini Ranjan, Kt., Richardson, The Hon'hie Sir Thomas William, 108, Bar-at-Law Walmaley The Hon ble Mr Hugh 108.

Calentia, Madras and Bombay They are appointed by Government, selected from non-officials of standing, the detailed work being done by deputy sheriffs, who are officers of the Court

### Law Raports.

Allahahad, under the authority of the Governor-General in Council. They contain cases de-termined by the High Court and by the Judicial A considerable change is occurring in the Committee on appeal from the particular High composition of the Indian Bar The following Court These appeals raise questions of very

The supreme power of Parliament to legislate Intersuptions power of raturantes to expanse for the whole of India cannot he questioned in practice, however, this power is little used, there being a majority of officials on the Imperial Legislative Council—a majority deliherately reserved in the India Councils Act of 1909—the Secretary of State is able to impose his will on the Government of India and to secure the passage of any measure he may frame, Law Officers

The Government of India has its own law rittles Legislative Councils have been estabcolleague in the Legal Member of Council | lished both for the whole of India and for the colleague in the Legal Member of Council libbed both for the whole of India and bor the All Government measures are drafted in this principal provinces. Their constitution and department Outside the Council the principal provinces. Their constitution and department Outside the Council the principal council and the Council the principal council to the Advocate-General of Beugal, who is (q v) To meet emergencies the Government Suppointed by the Crown, is the leader of the General is vested with the power of Issuing local Bar, and is always nominated a member ordinances, having the sams force as Acts of the Provincial Legislative Council In in Legislature, but they can remain in force and the Government Solicitor There are used. Hxcluding the towns of Calcutta, Bombay and Rangoon The figures include the Ballway police, but not Military police

# Organisation of Police.

Superior to the Sub-Inspector is the Inspec-r who holds charge of a Circle containing 4 or 5 Police Stations. His duties are chiefly those of supervision and inspection. He does not or supervision and inspection He does not ordinarily interfere in the investigation of crime unless the conduct of his subordinates renders this necessary

which the Police can arrest without a warrant from a Magistrate, which coor within his intraction, he is also had responsible for the intraction, he is also had responsible for the vention of orime. From the point of view of the Indian Byot, he is the most important Police Officer in the District and may rightly be considered the backbone of the Force. Superior to the Sub-Inaspector is the Inspec-Inspector-General, an officer selected my a Deputy Inspector-General, an officer selected from the ranks of the Superintendents. At the head of the Police of each Provence is the Inspector-General who is responsible to the Local Government for the administration of the Provincial Police.

rendes this accessary

The Inspector is menally a selected and coperienced Sab-Inspector. Each District coperienced Sab-Inspector. Each District coments of Sab-Inspector. Each District comen

standing of a Deputy Inspector-General. The School, and, after examination, appointed Cristianal Investigation Department, assually direct to Prolice Stations to learn their work by scaled the C i D, is madnly concerned with south at-prefence. It is too early to judge this political inquiries, sectition cases and ordines system by resalis, but it has no doubt great with smallestation over more than me District of indevantages and undetected crimes to India or which are considered too important to leave. It is a line the hands of the District Folice. It is a small force of Sub-Inspectors and Inspectors who have shown their ability and intelligence when working in the mofusil and forms in each

### JAHLS

Jall administration in India is regulated generally by the Prisons Act of 1884, and by rules laused under it by the Government of India and the local governments. The punishment anthorised by the Indian Penal Code for convicted offenders include transportation, penal servitude, rigorone imprisonment (which may include abort periods of solitary combes ment), and simple imprisonment Accommodation has also to be provided in the jalls for o'lvil and under-trial prisoners.

The origin of all jail improvements in India in recent years was the Jail Commission of 1889. The report of the Commission, the consisted of only two members, both official sorting under the Government of India, its creaments of the store of the comment of the continuous of the comment of the continuous of the comment of the comment of the commission's recommendation have been accept ed and adopted by Local Governments, but in various matters, mainly of a minor character, their proposals have either been rejected to state a unsited to local conditions, abandously the comment of the continuous conti

The most important of all the recommendations of the Commasion, the one that might in fact be described as the corner stone of their report, is that there should be in each Presi dency three classes of jails in the first place, large central jails for convicts sentenced to more than one year's imprisonment, secondly, district jails at the head-quarters of districts, and, thirdly; subsidiary jails and lock-ups." for under-trial prisoners and

Motivelys. To mole-train prisoners and convicts aenteneed to short terms of imprisonment. The juil department in each province is under the control of an Inspector-Ceneral, he is generally an officer of the Indian Medical Service with juil experience, and the Superintendents of certain juils are unually recruited from the same service. The district juil is under the manner of the first product of the indiant product of the district magiatrats. The staff under the Superintendent inclind s, in large central juils, a Deputy Superintendent to superinse the juil manufactures, and in all central and district juils one or more subordinate and district juils one for more subordinate and district juils one or more subordinate and employed of all central and district juils, as a complete of the superintendent for superintendent house is and the superintendent have been repeatedly revised and aftered in recent years. But the Department is not at all attractive in its lower grades. The own was epote in the juil administration at the own was epote in the juil administration at the sufficient waters.

Employment of Prisoners.—The work on which convicts are employed is mostly carried on within the jall walks, but extramural employment ou a large scale is somenumber of convicts were employed in excevating the Jielum Canal in the Punjah. Within the walls prisoners are employed on jail service and repairs, and in workshops. The main principle laid down with regard to jail manufactures is that the work must be penal and industrial. The industries are on a large scale, multilations in the penal principle in the penal principle in the penal principle with local traders. As far as possible industries are adapted to the requirements of the consuming public departments, and principle, tent-making, and the manufacture of clothing are among the common est employments. Schooling is consumed to the penal principle of the pen

The conduct of conviots in fall is generally good, and the number of desperate characters among them is small. Failing to perform the allotted task is hy far the most common offence. In a large majority of cases the punishment inflicted is one of those classed as "mmor" Among the "major" punishments fetters take the first place of the convergence of the

Juvenile Prisouers.—As rogards "youther ind oftenders —As, those below the age of 16—the law provides alternatives to imprisonment, and it is strictly enclosed that boys shall not be sent to fall when they can be dealt with other wise. The alternatives are detention in a reformatory school for a period of from three to seven years, but not beyond the age of 18, discharge after admonition, delivery to the parent or guardian on the latter accounting a parent or guardian on the latter accounting of the outprit, and whipping by way of school discibiline.

The question of the treatment of "young adult" pissoner has in recent years received much attention Under the Prisons Act, prisoners below the age of 18 must be kept separate from older prisoners, int the recognition of the principle that an ordinary jail is not a fitting place for adolescents (other than youthful habituals) who are over 16, and therefore ineligible for admission to the reformatory school; has led Local Governments to consider subsense for going beyond this hy treating young adults of the propersion has been made in this direction. In 1906, special class for salected juvestles and

iall in Bombay, in 1968 a special invenies all was opened at Alipore in Bengai, in 1969 the Matkiths tail in Burma and the Tanjore sail in Madras were set saids for adolescents, and a new jail for invenile and 'invenile adult' convicte was opened at Barelly in the United Frovinces, and in 1910 it was decided to constate adolescent in the Punjah at the Labore District jail, which is now worked on Bornial lines Other measures had previously system for 'invenile adult' had, for example, been in force in two central jails in the Punjah since the early years of the decade and 'Bornial encourses' had been established in some iails in Bengai But the punjic is alow to appreciate that it has a durty towards prisoners, and but little progress has been made in the formation of Prisoners' Aid Societies except in Bombay and Calentas, though even in these class attentions and the content of t

Reformatory Schools.—These schools have been administered since 1899 by the Roft action department, and the authorities are directed to improve the industrial education of the lumates, to help the boys to obtain employment on leaving school, and as far as possible to keep a watch on their careers

Transportation.—Transportation is an old pmishment of the British Indian criminal law, and a number of places were formerly appointed for the reception of Indian transported convicts. The only penal settlement at the present time is Port Blair in the Andaman Islands

Commission of Enquiry 1919—A committee was appointed to investigate the whole system of prison administration in India with special reference to recent legislation and experience in Western countries. Its report published in 1921, was summarised in the Indian Year Book, 1922 (pages 670 071) original to mancial stringency, it has not yet hean possible to introduce some of the more important of them.

Fines and Short Sentences—Those socious of the Indian Penal Oode, under which imprisonment must be awarded when a conviction occurs, should be amended so as to give discretion to the court Sentences of Impri somment for less than twenty eight days should be prohibited.

The Indeterminate Sentences —The sentence of every long term prisoner should be brought under revision, as soon as the prisoner should be brought under revision, as soon as the prisoner has served half the sentence in the case of the nabitual, romission exmediate of the habitual, romission exmediate the carried out by a Revising Board, composed the inspector General of Prisons, the Service of the Inspector of

slons Judge and a non official In all cases, the release of a prisoner on parcels should be made subject to conditions, breach of which would render him liable to be remanded to undergo the full original sentence. The duty of seeing that a prisoner fulls the conditions on which he was released should not be impresed upon the police or apon the village basedman, but special officers, to be termed parole officers, should be appointed for the purpose Ilbeet and the property of contractions, though not necessarily a university degree, and should both protect and advise the released prisoner and report breaches of the conditions of release

Transportation and fhe Andamans—II any fresh attempt at colonisation is made, it should be in an entirely new locality. A fresh attempt at colonisation in the Middle Andaman is not recommended. The retention of the settlement at Port Balls on the Protein Islands in not recommended. The retention of the settlement at Port Balls on the present lines is not the Andamans as a place of deportation is not recommended. Deportation to the Andamans should cease, except in regard to specially dangerous prisoners and any others whose removal from Indian jalls is considered by the Government to be in the public interests. The extinction of the control of

Criminal Tribes —The first essential of ances in dealing with the criminal tribes is the provision of a reasonable degree of economic comfort for the people it its therefore of para mount importance to locate settlements where a smitclent work at remunerative rates is available. Large numbers of fresh settlers should also be a superstanding whether the settlements where the constitution of the contraction of

The variations of the jall population in British India during the five years ending 1922 are snown in the following table.—

The total daily average population for 1922 was 1,0788 the total offences dealt with by criminal courts was 390, and by Superintendents 126,967 The corresponding figures for 1920 were 99,641,735 and 127,595 respectively

The total number of corporal punishments invoked in increase of t., from 284 for 850 in 152 the admissions to The total number of cases in which penal dict with and without solitary confinement was invoked with and without solitary confinement was increased of the transfer of size rose from 28 22 to 594 2 The prescribed was 7,227 as compared with 6,037 in the re-resolution was respectively.

Total expenditure increased from Rs 1,67,64,616 to Rs 1 94,20 282 and total cash earnings decreased from Rs 28, 67,629 to Bs 2634877 there was, consequently an increase of Rs 2898937 in the net cost to Government

### The Laws of 1924

## RATANLAL AND DHIRAJLAL THAKOR.

Editors, "Bombay Law Reporter".

The Indian Cotton Cess (Amendment) act—This Act amonts the principal Act in two particulars First, it provides for the levy of cess on cotton experied by land from British India to any foreign territory (sections 3 and 4) Secondly the power to collect the cess throughout the Presidency, which was hitherto vested only in the Collector of Bombay has been decentralised, and now vests in any of the District Collectors within whose district the Mill may be situated (section 2)

The Cantonments Act -The law governing Cantonments was to be found in two mea sares (1) the Cantonnent Act of 1910 and (2) the Cantonnent Code of 1912 Te find out the law on a particular point, one had to look into both the measures. This was not very convenient to the executive officers of was einply puzzling to laymen The legislature has therefore, boiled down the two enactments, and replaced them by the present consolidated Act of legislature The main changes effected in the law are that the Govern meet of the bome affairs of every Cantonment is more monicipalised than before The old and familiar Cantonment Committee has been constituted in its place The members of the new board will, in some measure, be elected Our Iriend, the Cantonment Magis trate, has gone for good his place is taken by an "executive efficient, but the new officer has been relieved of all fuderal powers or functions. The Cantonment That has more accounted to the control of th ment of the bome affairs of every Cantonment necome the local time vested in the Candonment authority. The Military Authorities do still retain special rowers as regards the health, welfare and discipline of troops in short, new Cantonment Boards will be ministractives or local fund boards. The Act starts off with definitions which are largely copied out from Municipal Acts (section 2) The Second Chapter aims at definition and delimitation of Cantonments The Cantonment Anthorities and Cantonment Boards are treated amagnasse and canoniment noarrie are treated of in the next Chapter There shall be a Can tonment authority for every Cantoniment (section 12), and so also, an executive officer, appointed by Government (section 17) In some appointed by Government (section 17) in some of the Cantonments there shall be also Cantonment Boards, which shall consist of (a) Com manding Officer of the Cantonment, (b) a First Class Magistrate, (c) the Health Officer, (d) the Executive Engineer, (e) Military Officers not more than four in number, and (f) as many not more than four in number, and () as many elected members as to equal the members under (i) and (c) (section 14) The duration of a Cantonment anthority is three years (section 15) Every member of it has to take an eath of allegiance on first taking office (se tion 18) The Commanding Officer of the Cantonment is the

is to be by election (section 21) The daties of the President Vice-President and the Executive Officer are defined (sections 22—24) Detailed provisions are made for election of members rections 2c.-31 The qualifications or otherwise (sections 2c.-33) The rust of the Chapter is (sections 32-36) The rust of the Chapter is taken up with provisions for procedure at neetings (sections 37-56) Detailed provisions h we been made for sale and possession of apirituous liquore and intoxicating drugs (sections 56-59) (hapter V contains rules for imposition and collection of taxes Savings from the taxes go to make up the Cantonment fund which is defined in S 106, which in its administration and vesting is likened to a local fund It is within the power of the Cantonment authorities to enter into and perform all contracts under the Act (sections 112—115) The duties and discretionary functions of the Cantonment authority are more than ever likened to municipal obligations and enumerated in sections 116 and 117 The work that the Cantonment authorities may be expected to do is then described The suppression of nuisances (section 118), the elimination of traffic (Section 119) the regulation of traffic (Section 119) 120) and the prevention of fire, etc (sections 121 to 127) are the main amongst their functions They are also charged with sanitation and the rincy are also charged with sanitation and the prevention and treatment of diseases. These include Conservancy and Sanitation (sections 145—149) burial and burning grounds (sections 145—149) prevention of infactions and contagious diseases (sections 150—170), hospitals and disponaries (sections 171—170), control of trains for hygienic purposes (section 177)
It is also the function of these bodies to regulate construction of buildings (sections 179—190) to look after streets (sections 191—193), and to attend to houndaries and trees (sections 191—197) The regulation of markets (sections 198—201) slaughter houses (sections 202—208), trades and occupations (sections 209—211) and import of cattle and flesh (section 216) form the subjects of their attention. Tho questions of water-supply (sections 217—226) and drainage (sections 227—234) are next dealt with. The Cantonment authorities are also armed with powere to remove and exclude any person from Cantonments to suppressexual immorality (sections 335-240) Fro-vision is also made for defining their powers and procedure is finitely napped ont A scale of penalties to be inflicted for breach of provisions is laid down , and a scheme of appeals is provided for sections 241—279) The cantonment authorities, like their prototypes of municipalities, are given very wite powers to frame bye-laws on numerous subjects 'sections allegiance on first taking office (ac tion 18). The 280—285) Thus, this Act furnishes a configuration of the Cantonnent is the predefinite code of tribe for the municipal Predefinit (code) and the Viole-Trestlent (operations and the Viole-Trestle

Immigration into India Act —This is an Act of reciprocity almost at those possessions of the Crown that do not give reciprocal advantages to Indian immigrants: It enables the Governor General in Council to make rules to secure that persons, not being of Indian origin demicibed in any British possession, shall have no greater rights and privileges as regards entry into and residence in British India, than are accorded by the law and admil nistration of such possession to persons of Indian domicile section 3.

Central Board of Revenue Act —As recommended by the Indian Betweehment Committee, 1922 28, this Act provides for the creation of a Central Board of Revenue, which not only absorbs within itself the present Board I Island Revenue but also sweeps in Customs Sait, Oplum, Excise and Stamps so far as the Central Government is concerned

The Repealing and Amending Act—
This is a measure of usual ventilation it
removes words and phrases that have become
useless or redundant in existing Acts of legislature either by effux of time or by virtue of
other repeals and amendments

The Indian Finance Act —Early this year, the Legislative Assembly of India threw ont the draft of this enactment and declined to Pass it into law The Governor-General,

therefore, found it necessary to certify it under the powers reserved to him in that behalf. It keeps in tact the scale of certain harms levied by the Finance Act of 1983 The Inhand postal rates and the rates of Income-Tax remains as they were

The Sea Customs (Assessment) Astro-This amendment arrise out the recommendation made by the Iroles with the commendation made by the Iroles will be levied aste on goods belonging to Government. The Indian Tariff (Assendment) Astro-This Act remedies a leakage discovered in the Iodian 1 ariff act it enables Government

The indian Tariff (Amendment) Asti-This Act remedies a leakage discovered in the Indian Tariff Act It enables Government of India to key customs duties on any articles imported or exported, as the case may be, by land from or to any territory outside British India which is declared to be foreign territory for the purposes of the Act (section 3)

The Indian Colume (Amendment) Acturate the present Colume Act, whenever Government found counterfeits of any comment is except the gold coin, it had the power to call in the coin This meant that the coin ceased to be issued from Government treasuries and currency officer, but still the coin retained its especiation of created in the coin retained its especiation of created in the coin retained its especial of created in the coin retained its especial of the contract of the coin retained in the coin counterfact of the coin retained in the coin less it members which the coin less it members where for the coin retained in the coin less it members where for the coin retained in the coin less it members where the coin retained in the coin less it members where the coin retained in the coin less than the coin retained in t

The Income Tax Assendment Ast—Experience discovered four loopholes of casespe in the provisions of the Income Tax Act (inhs or Associations, which so far excepted taxation, are now brought under the Act similarly, private Prioritent Funds are sow made amenable to the provision of considerable of the sessement of a business profession or vocation which was in existence at the commencement of the Act but on which no tax was charged under the Income Tax Act of 1018 A period of air months has been to the light Court for the suce of a mandamus under Section 66 (3) of the Act.

Indian Soldiers (Litigation) Act —This Act amends Section 11 of the Act of 1918, hy substituting "is or has been 'for "is"

Stamps (Specified Instruments) Act—II 1923 the Samp Act was amended as regarde Promissory Notes Formerly, all snob prontess were stamped with one anna stamp Under the amendment, all pro-notes up to Rs 250 in value must be stamped with one anna stamps, that those in value ranging from anna stamps, that there is value ranging from anna stamps, the those in value ranging from anna stamps (that is, the revenue stamps of 0 1 0 or 0 0-0 issned by Post Office), and all promissory notes above Rs 1,000 in value became chargeable with four annas stamps (i.e., Revenue Stamps). The Act came into force on October 1, 1923 it would be too much to expect that the provisions becamp affented. A very large number of promisory affented. A very large number of promisory notes continued to be passed on one anna

stamps irrespective of the value. They all became invalid and irremediable under the been added to the Act, which empowers it Amended Act. This Act is, therefore, passed to validate all such promissory notes passed between October 1, 1923 and December 31st, between October 1, 1923 and December 31st,

The steel Industry (Protection) Act— With a view to provide for the fostering and development of the Steel Industry in India, this Act has been passed It enables the Gover-nor-General of India in Connoil to levy pro tective daty of such articles of steel manufac tured shroad and imported into British India as might render ineffective the protection granted to similar articles manufactured in this Country (section 2) It also provides for the grant of bountles on steel rails and fish plates, at the following rates —Rs 82 per ton on manufactures completed up to April 1, 1925 Rs 26 at the same rate on those completed in the next year, and Rs 20 at the same rate on articles completed in the year following (section 3) It also provides for hountles of sams not exceeding seven lakhs of rapees in a year, for iron or steel wagons manufactured in this country (section 4)

Indian Motor Vehicles (Amendment)
Act—It has been held by the fligh Cont of
Bombay in Emperor v Sherston Rater (Bom
BAY LAW BEPORTER, Vol XXIV, page 50)
that as the Act contained no provisions, the
rule made by the Bombay Government regarding annual re registration of motor vehicles was ultra vires. The Act is now so amended as to iegalise the renewal of registration of motor vehicles on payment of requisite focs

Indian Post Office (Amendment) Act — Recently the Indian Postal Dopartment has introduced into this Country the use of stamping machines It enables the user of the machine to impress postal articles with a given number of impressions direct from a stamping machine in lien of affixing postage stamps. This faci-litates the work of persons who have a large number of letters to post. The object of this Act is to invest the machine impressions with the sanctity of postage stamps and to protect them from counterfeiting

Imperial Bank of India (Amendment) ct —When the Alliance Bank of Simia falled Act — When the Alliance Dank or Dubla and a some time ago, the Imperial Bank of India rushed to its rescue and proposed a scheme for the relief of its constituents. This, tho Imperial Bank was unable to do, and sanction for the step was obtained from the Government facilitating the winding up of any such concer not only against its securities, hat also again its assets generally

Indian Criminal Law (Amendment) Act The protection of minor girls against immor surroundings has long been engaging the atter tion of the Legislature The scope of Section 372 and 878 of the Indian Penal Code, which refer to selling or buying minors for purpose of prestitution, is much enlarged. It is no penal to sell or huy a person for the aforesai purposes though the purpose of prostitution may not be carried out till such person attain majority Two explanations are added t Section 372 The first one lays down the when the selling is to the keeper of a brothe it will be presumed, unless the accused prove the contrary, that the saic was with the inten-that the minor would be used for the purpes of prostitution A similar explanation added to Section 373 also The powers while Magistrates possess of restoring custody of abducted temales, is now made to extend t minors of the age of sixteen (section 552 of th Criminai Procedure Code)

Criminal Procedure Code)
The Land Customs Act—There was g far no All Isulis Act on land customs. Borbia had its local Act XIXIX of 1807, and which the control of the control of the control of the were very old and experience had discovered a number of defects in them. The two loca Acts are repealed and replaced by one all com-prehensive India Act. Recently, a Centra Board of Revenue has been constituted an Delth in with Lake here of the Land recently in for the whole of India, and check effectively the extensive smuggling that has been going on for some time past over the land frontier in India. The machinery provided by the Act is first the appointment of Land Customs. Officers (section 3), and secondly, establishmen of land customs stations and determination of routes (section 4) It imposes the necessity on every person of taking out a permit who wishes to pass across frontier goods dutiable or not (section 5) Personal luggage of a person is entitled to pass free of duty (section 6).

Any person who attempts to pass undutiable goods across a frontier is liable to pay a fine of Rs 50, and one attempting to smuggle dutiable for the step was obtained from the Government to Hs. 1000 (section ?) The goods, except of India. Even then the action of the Imperement personal luggage, cannot be allowed to cross Bank was called into question by a suit filled a land troubler on public holdingsy or os days a the High Court of Bontey, but the suit notified by the Chief Customs Anthority albeit in the Court of Appeal, and the action (section s) goods can be penalised with a fine extending

## Labour.

Various causes have combined to give added resulted in the passing of a new Act which aportance to the great group of buman acti- limited the bours of labour in 1911 With the tics concentrated under the generatorare of Labour constitution of the League of Nations, India as a Various causes have combined to give added importance to the great group of human activities concentrated under the generic term of Labour India is still a predominantly agricultural country and more than seventy per cent of its people are dependent on the soil for their livelihood. Nevertheless a process of individual to the country and formbay are great manufactured and formbay are great manufactured and the control of the country of t other manufactories Another considerable manufacturing centre has developed at Cawn pore, with cotton, wool and leather factories The textile industry of Bombay has overflow ed into the motumil, and Ahmedabad and Sholapore are considerable centres of manufacture with a lesser one at Broach. In the Central Provinces the cotton mills of Nagpur are famous throughout India The Province of Bihar and Orises is the centre of the great coal mining trade, having absorbed the hnik of the coal mines formerly included in the Province of Bengal It also embraces the most remarkable example of scientific industrialism in India in the works of scientific industrialism in India in the works of the Take Iron and Steel Company at Jamabed par, where in what was jungle filteen years ago produce over a million tone of steel a year, and house subsidiary industries which combined with the iron and steel works will probably main tain a city of a quarter of a million in the near ituting. The railway works of the North Western Railway form the core of the industrialism ern Kallway form the core of the industrials of the Punjab, where other manufactories, note ably of cement, are developing. The industrial expansion in Incla may be judged from the number of factories coming under the operation. of the Indian Pactories Act of 1911 as amended by the Act of 1922 which amounted to 5 144 for the whole of British India The number reported as working during the year was 5,028 or 98 per cent The average daily number of prisone employed amounted to over a millon and a quarter and rose from 1,361,000 in 1921 to 1,286,000 in 1922 At the moment of with on 1,200,000 in 1922. At the moment of whe ing no official figures are available in respect of the statistics for the whole of British India hut it may safely be predicted that the number of factory workers at the beginning of this year must be very near a million and a ball. The (rovernments of India are now each faced with a vivid and growing industrial question

### Social Conscionsness

Side by side with this industrialization

aignatory thereto became a participator in the algadory thereto became a participator in the decisions of the Lague on Labour questions. India was represented at the International Labour Coulerence held in Washington in 1919 and it became obligatory on her to enact legislation giving effect to the decisions of the Conference Another International Labour Onference Another International Labour Onference was held at Genon in 1920 to consider a number of questions relating to seamen, such a the hours of labour, manning scales, accom-modation, the provision for finding employment and other cognate questions and the Third and Fourth Sessions of the Conference were held as Genevan 1921 and 1922 The Fifth Session of the Conference assembled on 22nd Oct 1928 and dealt with only one item of importance—factory inspection The Sixth Session of the Interna-tional Labour Conference was held in Geneva from the 16th June to the 5th July 1924 Forty countries were represented at the Conference The agenda of the Conference comprised (1) Development of facilities for utilisation of workers leisure, (2) Equality of treatment for worker' lateure, (2) Equality of treatment for national and foreign workers as regards com-pensation for accidents, (8) Weekly suspension of work for twenty-four hours in glass mann-facturing processes where tank furnaces are not suppressed to the lateur of the con-traction of the contract of the con-traction of the contract of the con-cident by experts appointed by the Lague of Nations India, therefore assumes responsa-tions of the contraction of the contraction of the Conference. There has been a considerable extension of what is known as Weifare Work, and although this so far deponds on the individual extension of what is known as wellare work, and although this so far depends on the individual activities of employers of labour, the work is progressing well Further there is the nascent Trade Union movement in India. This movement ites rather more on the surface than is ment les rather more on the surface than is deep roots, but it flares up in tities of labour names and is nominally at all womat formats frequency of strikes, and the lack of any means to hasten a solution have given rise to caveful investigation of the possibility of establishing Boards of Condilation and Arbitration The increase of industrial unrest in the winter of increase of industrial unress in the winter of 1920 21 led to the stimulation of public interest in labour question. The fact that several of the more protracted strikes occurred in public utility services strengthened the demand that some efforts should be made towards a solution Side by side with this industrialization some efforts should be made towards a solution there has grown an increased social consolous— the problem in nearly every strike or lockness of the responsibility of the community out of importance which has occurred in the last towards Labour The Government of all and all and the control of the strike of the

### INDUSTRIAL SAFETY AND INSPECTION.

The conditions of factory labour until 1913 were regulated by the Indian Factories Act of 1881, as amended in 1891. The chief provisions of the amended Act were Local Governments were empowered to appoint image-creating as to the age of children. A mid-day stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited, subject to certain exceptions. The biblied, subject to certain exceptions. The biblied of rest amounting to at least an hear and a half, their employment between 9 p.m. and 5 a.m. was prohibited, subject and the subject of work for children between 9 persons below the age of 14) were consistent was forbidden, children below the age of size were not to be employed. Provision was made for the fencing of machinery and fer the promulgation of rules at to water supply, ventilation, the prevention of over troowling, coto.

### Hours Fixed

The next Factory Act was finally passed into law as Act XII of 1911

The new act extended the definition of factories so as to Incide seasonal factories working for less than four months in the year, shortened the hours within while children, and, as a general rule, women, may be employed, and further restricted the employment of women by night by allowing it only in the case of cotton-ginning and pressing factories. It also contained a number of new provisions to sourcing the health and sately of the operaction of the Art. The most important feature of the Art, however, was the introduction of a number of appeals provisions applicable only to testile factories. The report of the Factory Commission showed that accessive hours were not worked except in textile factories that the Art for the first time applied a statute of the males by laying down that, subject to certain categories "no person shall be employed in any textile factory for more than twelve hours in any one day," It is also provided in the case of textile factories that no child may be employed for more than its hours in any one day, and that (subject to certain exceptions, among which are factories worked also also or after 7 pm. (the new limits laid down generally for the employment of women and editions).

### The Act of 1922

The scooptance by India of her obligation under the International Labour Conference of Washington in 1919 necessitated the further amondment of the Factory Act in 1922

In the following pages it is intended to give the present law on the subject by combining the act of 1911 with that of 1922. The Amendment Act of 1922 came into force on 1st July 1922, and it extends to the whole of British India, findnding British Baluchistan and the Sonthal Parganas.

### Hours of Employment

Rest periods in factories —In every factory there shall be fixed.—

- (a) for each person employed on each working day—
  - (i) at intervals not exceeding six hours, periods of rest of not less than one honr, or
  - (4) at the request of the employees concerned, periods of rest of not seen than half an hour each to arranged that, for each period of six hours, work done, there shall be periods of rest of not less than one hour's duration in all, and that no person shall work for more than five hours continuously, and
- (b) for each child working more than five and a half hours in any day, a period of rest of not less than half an hour

(2) The period of rest under clause (b) shall be so fixed that no such child shall be required to work continuously for more than four hours

Limitation of Working Honrs per Week

No person shall be employed in a factory for
more than sixty hours in any one week

Limitation of Working Hours per Day No person shall be employed in any factory for more than eleven hours in any one day

### Exceptions

Where it is proved to the satisfaction of the Local Government-

(a) that any class of work in a factory is in the nature of preparatory or comple mentary work which must necessarily be carried on outside the timits laid down for the general working of the factory .

(b) that the work of any class of workers is essentially intermittent, or

- (c) that there is in any class of factories any work which necessitates centinuous production for technical reasons . or
- (d) that any class of factories supplies the public with articles of prime necessity which must be made or supplied every day . or
- (e) that in any class of factories the work performed by the exigencies of the trade or by its nature, cannot be carried on except at stated seasons or at times dependent on the irregular action of natural forces.

the Local Government may, subject to the con trol of the Governor General in Council, by notification in the local official Gazette, exempt on such conditions, if any, as it may impose.

The system of inspection is being steadily improved by the appointment of more whole-time inspectors with good technical qualifications in the principal industrial centres

Further legislation is contemplated dealing with other important issues A Bill is in preparation for the registration and protection of Trades Unions and the Government of India hope to be able to introduce a Bill early in 1924.

The Government of India have also decided to repeal the Workmen's Breach of Contract Act of 1859 with effect from 1st April 1924.

The Indian Mines Act 1923 -The Indian Mines Act, 1923, received the assent of the Governor-General on the 23rd February 1923 Is extends to the whole of British India, including British Baluchistan and the Bonthal Parganas, and comes into force on the first day of July 1924 By thie Act the definition of a mine was made clear, and the weekly hours of employment were limited to 60 hours for work above ground and 54 hours for work below ground.

### INDUSTRIAL HOUSING

of which about 3 900 were let The total number of which about 3 900 were let The total number of chawle completely ready at the time when this section was compiled was 28, but 60 additional chawles with a provision of 4,800 tenments were also completed except for drainage and water supply The Directorate bave four schemes in progress at present constituting of 211 chawle containing 16,880 tenments These are expected to be completed by the end of the year 1925 Government baye decided that until these are completed no additional land is to be taken up for Industrial Housing and that no new schemes are to be embarked upon without Government approval

The average economic rent of the chawls works The average economic rent of the chawls works to tat Es 14-6-0 per month per tenement with a first tenement with a first tenement with a first tenement with a first tenement, with and without first average maximum rent fixed for the resent, per month, for each tenement, with and without a Nobewin Is at 11 and Es 10 respectively. On this basis there is a loss of Es. 54 per tenement and this is being most from the oction creat

The City Improvement Trust in Bombay have also made very good progress in the direction

In most industrial centres in India the question of proper and adequate housing is engaging the attention of all public bodles and govern ments to an increasing evtent Employers
themselves are becoming increasingly alive to
this burning question and whenever finances
permit tenements are constructed for the bousing of the workmen In cases where housing is provided the amounte charged for rent are inst sufficient to cover the interest charges on the capital outlay In Bombay City, where the housing question was one of great difficulty a few years ago, the City Improvement Trust and the Development Directorate of the Government of Bombay bave done much useful work in indeavouring to solve the problem. The scheme originally ontlined by the Development Directorate for Industrial Housing aimed at a con struction programme of 50,000 tenements pro-viding accommodation for a quarter million people and to be completed within a period of eight years. This scheme was conceived in the boom period when labour conditions in Rombay were probably abnormal By the end of September 1924 the Directorate had 5,120 tensments completely ready for occupation out

Labour. 454

of providing industrial bousing The Trust Improvement Trust Chawl works out at its o-to had a total number of 5,800 tenements ready at but the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at but the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at but the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements ready at life the actual rents vary from Rs 3 12-0 had a total number of 5,000 tenements rents vary from Rs 3 12-0 had a total number of 5,000 tenements rents vary from Rs 3 12-0 had a total number of 5,000 tenements rents vary from Rs 3 12-0 had a total number of 5,000 tenements rents vary from Rs 3 12-0 had a total number of 5,000 tenements rents vary from Rs 3 12-0 had a total number of 5,000 tenements rents vary from Rs 3 12-0 had a total number of 5,000 tenements rents vary from Rs 3 12-0 had a total number of 5,000 tenements vary from Rs 3 12-0 had a total number of 5,000 ten tenements were let for living purposes, 103 as shops, 51 as godowns and 15 as schools 31 Mnoodams, for offices and stores, and as approximately more repetition by Mnoodams, for offices and stores, and as appenintendents Quarters. The floor area of each tenement inclusive of a small verandah varied from 125 square feet to 176 square feet but the majority of the tenements were provided with the maximum floor space allowed Three additional chawis providing a total of 811 tenements with a further increase in the floor space to a maximum of 185 square feet per tenement are expected to be completed by the end of 1924 The average rent for a tenement in an Bombay must be regarded as considerable

to Rs 115-0 The maximum permissible population in adults for a total of 5,511 tenements has been fixed at 23,404 The actual population living in these tens. population living in these tenements in January 1923 was 18 322 or 16 362 when equalised to adults The average population living in these chawls during the year ending 31st March 1924 amounted to 21,958

When it is considered that the number of industrial workers living in these chawls by the end of the year 1925 will amount to nearly 100,000, the progress made in connexion with keeping down the death rate of these classes in

### INDUSTRIAL

statistics in connexion with Industrial Diaputes are not available for the whole of India The increasing importance that is being attached to the weapon of strike by the workmen lu this country may be gathered from the figures given below in respect of the industrial disputes in the Bombay Presidency for which statistics have been collected during the year ending 31st March 1924 This was the

### DISPUTES

worst year in the history of Industrial Relations in the Presidency Although the number of disputes only amounted to 64 the number of factories and industrial establish ments affected was 199 the approximate number of workpeople involved 261,923 and the number of working days tost 10 237,823 The following table shows the number of disputes by localities and classes of concerns -

Locality	Cotton Spin ning and Weaving Mills	Bailway Workshops	Railway Others	Others	Total
Bombay Ahmedabad Sind Gujarat	42 20 2	2	2 1 1	11 1 4	57 21 5 3
Total	64	2	4	16	86

Out of these 86 disputes, four were general strikes two of which call for special mention on account of their magnitude

The general strike in Ahmedabad which affected 56 out of 61 cotton mills in that locality commenced on the 1st of April and continued till the 4th June The reasons of the strike were (1) the announcement that the millowners in Ahmedabad would reduce wages by 20 per cent with effect from 1st April 1923 and (2) the alleged non payment by many mills of the bonus on the precise terms agreed on by arbitrators to whom a settlement of this question was referred. The number of workpeople affected was 49,113 and the total time loss amounted to 2,370,933 work ing days This strike lasted for 64 days, the men were almost completely defeated and on the 4th June a compromise was arrived at by the terms of which (1) wages were to be reduced by 15f per cent. instead of by 20 per cent and (2) the question of the interpretation of the last bonus award was to be again referred to arbitra-tion. The President of the Millowners Associa tion also gave an assurance that wages would not be reduced again for at least alx months from the date of the compromise

The other and perhaps the largest of all industrial disputes in the Presideny was the general strike in the cotton mills in figure (ity at the beginning of the year

1924 It had its origin in the no bonus decision of the Millowners in Bombay The men had been paid a bonus regularly for five years and had come to regard its payment as an aunual affair In view of its regularity it also came to be considered as deferred pay. The bouns was usually paid in the middle of January in each year along with the pay due for the month of When the bonus was not paid at December pay time in January, the operatives of one mill demanded the payment of bonus on the 17th January and on its being refused went on strike The strike fever soon spread and in about a week almost all cotton mills in Bombay had to close down On the 22nd February 1924 His Excellency the Governor of Bombay appointed a Committee of Enquiry with the Hon Sir a Committee of Enquiry with the Hon Sir Norman Macleod Rt, Chief Justice of the High Court in Bombay, as Chairman to enquire into the dispute The terms of reference were (1) to consider the nature and basis of the bonuwhich was granted to the employees in the cotton mills of Bombay since 1919 and to declare whether the employees established any enforce whether the employees established any enforce-able claim, outsomary legal or equitable, and (3) to enquire into the profits made in each yea-since 1917 with a view to comparing these pro-fits with the profits made in the year 1935 and to report on the contention of the milliowner that the grant of a bomes such as was given in previous years was not justified by the profit

of the mill industry as a whole in 1923 The lowners that the profits did not admit of the findings of the Committee on these points were submitted to Government on the 11th March, and were (1) that the mill workers had not establish were (1) that the fill workers fixed not establish end any enforceable claim, customary, legal or equitable to the payment annually of a horus, and (3) that the results of the working of the mill industry as a whole for the year 1923 were such as to justify the contention of the mill

payment of a bonus. The strike, however, did not terminate till the 25th March when work was resumed in almost all the mills although with considerably reduced staff due to the fact that there was an almost general exodus of all np-country workers to their homes before the strike ended

The number of workmen affected and the number of working days lost classified by localities and classes of concerns are set out in the two tables below ~

Number of 11 orkmen Affected

		*,			
Locality	Cotton Splu ning and Weaving Mills	Railwav Workshops	Rallway Others	Others	Total
Bombay	202,298	5,560	181	5,068	213,107
Ahmedahad	46,220			25	46,245
Sind			91	929	1,020
Gujarat	1 328		223		1 551
Totai	249,846	5,560	495	6,022	261,923
			·		

Number of Working Days Lost

	21167901	r of Dorking L	rape 1 oat		
Locality	Cottor Spin ning and Weaving Mills	Rallway Workshops	Railway Others	Others	Total
Bombay	7 697,667	9,770	333	14,214	7,805,984
Ahmedabad	2,378,456	ſ		60	2,378,516
Sind			162	6,781	6,948
Gujarat	45,084	i	1,316		46,380
Total	10,121,187	93,770	1,811	21,055	10,237,823

The next table shows the cause of disputes by localities -

	Numb	er of disputes assignable	le to the follo	wing causes.
Locality	Pay	Dismissal or re instatement of individual	Bonus	Conditions of work, discipline, etc
Bombay	33	16	8	5
Ahmedabad	5	7	1	8
Sind	4	!!!		1
Gujarat	3	1		
Total	45	23	4	14

Disputes regarding remuneration occupied the predominant position but disputes in respect of include with include both demands for dismissal of a particular individual and demands for the reinstatement of an individual but he employer socoustic as considerable number of disputes.

The following table summarises the results of disputes classified according to localities —

Results by Causes of Disputes

		Result	
Locality	Entirely favourable to the worker	Mainly favourable to the worker	Entirely unfavourable to the worker
Bombay	4	6	47
Ahmedahad	4	1	16
Sind	1	1	3
Gujarat	1	2	1
Total	9	10	67

It will be seen that in the Bombay Presidency 86 disputes, only 19 were actited in favoor of as in other countries the majority of disputes the employees while 67 or nearly 78 per cent caded unfavourably to the attiens. Out of were cettled in favour of the employers

### CONCILIATION AND ARRITRATION

Of recent years much attention has been paid to the settlement of industrial disputes. The benfing character of such disputes is that they are so often sporadic, breaking out without warning, grievances being formulated after striking instead of before. When such strikes occur there is no organised body of workers with the control of 
lavoured the appointment of a panel on which the Local Government could draw when conethicities a Board to eaquire into any disprict. The Bombay Government which had already explored the ground informally, appointed a similar committee in November 1921, which reported in February 1922. As the Committee aurveyed the position is one detail, and its report constitutes the latest contribution to the latest contribution to the latest contribution to the latest contribution and are applicable with medifications to sub-local conditions, to most industrial centres in India conditions, to most industrial centres in India

# SUMMARY OF THE REPORT OF THE INDUSTRIAL DISPUTES COMMITTEE

The industrial Situation—Industry in the Bombay Presidency is mainly confined to the three centres of Bombay Ahmedabad and Sholapur with a factory population of some 200,000, 55,000 and 20,000, respectively

Of the workers of Ahmedabad and Sholapur' 44,000 and 20,000, respectively, are dependent on the textile trade Those in Bombay may be divided into—

- (1) Textile operatives
- (2) Transportation service workers (incind ing Railways and Docks)
- (8) Gas and electric light workers municipal employees, Mint and Government Press workers, customs, postal, telegraph and telephone employees and inferior Government employees generally

The Operatives —The general body of this working population was accurately described by Mr O N Wadia, O.1.8, in 1919, as 'agri culturists first and agriculturists last." They come to Bownbar-as a rule without their families—and work till they have funds enough to

return to their villages in the textile trade and amongst the general labourers simoes all the operatives copy of the second of

Characteristics of Strikes —Certain characteristics are common to most of these atrikes —

- (a) The frequency of the strike without notice
- (b) The absence of any clearly defined griev
- ance before striking and sometimes the extravagance of the claims put forward after the strike has begun.

- (d) The absence of any effective organisa-tion (except perhaps at Ahmedabad) to the formulate the claims of the operatives and to secure respect for any settlement which may be made
- (s) The increasing solidarity of employers and employed and the capacity of the operatives to remain on strike for con siderable periods despite the lack of any visible organisation

The Prevention of Strikes -Amongst the employers of labour there are strong organi sations and the present tendency is for them subscribed to become more and more reprocentative, but employers associations have not yet evolved any standard scales of wages and individual employers are natually ignorant of how their rates compare with the wages given by others. The uncorrelated raising of wages in one factory is almost invariably select upon as a grievance in other factories of the rame class, and instances of strikes caused in this way are within the me mory of ell The attempts made to standardise wages on a definite principle have hitherto been largely ineffective

Trade Unions —Amongst this beterogeneous is bour force, there have in Bombay and Ahmedahad, gradually developed the beginnings of e Trade Union movement In most cases the Unions are little more than strike committees consisting of a few officers and perhaps a few paying members around whom the rest rally in times of trouble After work is resumed the union dwindles, and in most cases disappears According to data published by the Labour office, Bombay, in the Labour Gazette, the number and membership of trade unions known to be actually in existence in the Bombay Presidency for the quarter ending September 1924 were as follows:— Bombay City and Island 8 unions with a mem bership of 21,659, Ahmedabad 7 unions with a membership of 17,200, and in other parts of the Presidency 6 unions with 8 383 members. The totals for the Presidency wers, therefore, 21 unions with 47,242 members in September 1924 as compared with 19 unions and 41,646 members in September 1923

The evolution of any means of preventing or adjusting strikes and trade disputes in such a floating and illiterate body, lacking any homogeneity, is exceedingly difficult and we put for-ward such recommendations as we make with full recognition of their indecisive character In the forefront of these recommendations we place a wise and statesmanlike attitude towards the nascent Trade Union movement

We are fully aware that the early days of a Trade Union movement ere aften full of difficulty Strike committees arise calling themseives Trade Unions and demanding the privileges of Trade Unions without any means thereof of discharging the responsibilities thereof Sympathetic friends unconnected with the industry or any industry, and consequently knowing nothing of the special difficulties involved, spring into notoriety Strike isaders appear claiming the right to bargain but with no power to make the bargain respected But these are the growing pains of Trade Uni-onism, it is far better to treat than to inflame them We therefore express the very sincers

As soon as a sentine Trade Union organization emerges it should be officially recognized as the channel of communication between employers and employed We are strongly in favour of the compulsory registration of Trade Unions under a broad and spectrum Act. Such registration should name at least strict acherence to the channel of the computation of a definite code of my substantial association of a definite code of my substantial association. of a definite code of rules, regular office bearers properly elected and an accurate register of subscribing members. But we are strengly opposed to conferring on Trade Unions any spe-cial privileges outside the ordinary law of the land or, on the other hand, any special respon

Most of our witnesses have agreed that Works Committees promise to discount that absence of personal relationship between operatives and employers, which is inevitable in large factories owing to the numbers of the men employed. We also agree that they may have an educative vaine among the operatives themselves

Welfare Work -Next to Works Committees we place the large group of bumanistic activities known as Welfare Work. Here we wish to make an explanation We were greatly impressed by the evidence which declined to accept the term Weifare 'as accurately as accurately defining these energies and classed them as "efficiency work because they had such a direct reaction on the physical contentment and efficiency of the operatives, that economically they justified the expenditure thereon.

The Settlement of Industrial Disputes,— So far we have devoted our attention to a conelderation of the means which will contribute to the prevention of industrial disputes, it remains to suggest the methods of settlement, when such disputes either develop irreconcilable differences between capital and labour or elas be come a menace to the community

There are some who hold that the State has no right to intervene in industrial disputes. To that position we cannot subscribe

But we ere agreed that no outside agency, and in particular the agency of the State, should be used until all other means have been employed and failed, or nniess it is invited by one or other of the parties to the dispute, or unless the eluation is such that peace, order and good government are prejudiced. If such conditions should arise, then there should be formed an should arise, then there should be formed an industrial court of Inquiry, to be followed, if necessary, by an Industrial Court of Couldistion We deliberately place the function of inquiry first and separate from the role of conciliation, for we desire to avoid the facile opportunism which seeks to patch up an industrial disputs by proposing a compromise between the views of the two parties without Soing down to the economic principles which soing down to the economic principles which are at stake.

Constitution of the Court The con-stitution of the Court should be as follows— (s) A chairman selected by the members of the Court from a panel maintained in the Labour Office,

- (b) Three members representing the em- | then be ployers in the industry concerned .
- (c) Three members representing the operatives in the industry concerned.

A bare majority of our number is of opinion that the public should not be represented on a Court dealing with nn industrial dispute, but should be represented when the Court is inquiring into a dispute affecting a Government Departinto a dispute affecting a Government Department or a public utility company or corporation. Whitse we are divided on this point, we are un animous in the conclusion, that when a Government Department, or public utility company, or corporation is concerned in an industrial dispute demanding the constitution of an Industrial Court the general public should be represented in equal proportion to the parties directly con-

- (i) A chairman chosen from the panel
- (ii) Three representatives of the Government Department, or public utility company or corporation concerned
- (iii) Three representatives of the operatives (iv) Three representatives of the general
- public The epecial reasons which have induced us to

recommend the representation of the general public in such cases, are that the whole cost of any increase in wages le at once passed on to the public either in increased charges for an essential public service or else in a diminished revenue to the State, which is taxation in another form We recommend that the representatives of the general public should be selected from the panel

### TRADE DISPUTES LEGISLATION

The valuable suggestions made by the Committee have been considered both by the Govern ment of Bombay and by the Government of India. On the 14th March 1923 the Hon Sir Maurice Hayward, Home Member of the Bombay Government, made a statement in the Bombay Legislative Council to the effect that details were being worked out by the Government of Bombay in connection with the drafting of a Bill to give effect to the recommendations of the Committee, and that, as soon as Govern mant were satisfied on these points, logislation would be introduced in the Local Council as early as possible after the sanction of the Govern ment of India had been obtained. The big strike which occurred in the Bombay Cotton Mills on the question of the Bombay Cotton Mills on the question of the Bonna Dispute at the beginning of the year 1924, precipitated analys and the Government of Bombay decided to introduce a Bill in the Local Council to provide legislation on this subject in the second session of the Council which met at Poonn in July 1924 In accordance with this decision the Government of Bombay drafted a Bill for this purpose and this was published in the Bombay Government Gazette of the 30th May 1924. The Bill was a simple one and was meant in the first instance to cover manual and clerical employment Persons working in the capacity of members of His Majesty's forces and Govern ment servants were excluded The main object of the Bill was the appointment of a Court of Enquiry to which any trade dispute that either existed or was epprehended could be referred to on the motion of the Governor in Council The function of such courts was to enquire into the causes and circumstances of each such trade dispute and to make reports, interim or final, as the Court thought fit. The proceedings of as the Court thught in the proceedings of these Courte of Enquiry were to be conducted either in public or in private as might be deter mined by n particular court. A second object of the Bill was to make provision for Voluntary Arbitration Where, n trade dispute existed or was apprehended the Governor in Council was to be empowered (1) to take such steps as might

for settlement to the arbitration of one or more persons appointed by him, or (3) refer the matter for settlement to a Board of Arbitration consisting of one or more persons nominated by or on behalf of the employers concerned, an equal number by or on behalf of the employees equal number by or on behalf of the employees concerned, and an independent chairman to be nominated by the Governor in Council Panels were to be constituted from which the members of such Boards could be nominated from time to time

In July 1934, the Government of Indla informed the Government of Bombay that as they considered that this subject was one for All-Indla legislation, the Government of India were themselves preparing a Bill for early intro-duction in the Legislative Assembly and that the Local Government should not introduce the Bill which it contempleted doing in its own Council

The Government of India, prepared a Bill to make Provision for Enabling the Investigation nand Settlement of Trade Disputes and this was published in August 1924. This Bill may be considered as being very wide and comprehen sive in scope and extent. It covers all workmen incinding employees of the Government of India and of any Local Government An important distinction is made between the general body of workmen hy dividing these into employees in Public Utility Services and other employees In the case of public utility services and in those services specially notified as such by the Governor General in Council, it is provided that it shall not be lawful for any employer to declare or enforce a lockout or for any workman to take part in a strike on account of any dispute unless due notice of the proposed lockout or strike has been sent to the prescribed officer Such etrikes or lockouts are not permitted until the expiry of thirty days after notice has been served in cases where no order has been made for reference of the dispute to a Board and until the exptry of ninety days after notice has been seem outputshirt for the purpose of cuabiling the species to a dispute to meet together with a view made to deal alique to meet together with a view in the samicable settlement of the dispute, or, if both parties concent, (2) to refer the matter; like two dates may be earlier

There is no separate prevision in the Bill for and (3) persons to be appointed as Chalrmen. Courts of Enquiry, Board of Arbitration or for The Guvernment of India and each Local Government of Challes and each Local Government of Local Government

### TRADE UNION LEGISLATION

the following resolution regarding the Registra-tion of Trade Unions in the Legislative Assembly -

"This Assembly recommends to the Governor-General in Council that he should take stops to introduce, at an early date in the Indian Legislature such legislation as may be necessary for the regulation of trade unions and for the protection of trade unionists and trade union officials from civil and oriminal liability for bonafide trade union activities

The Government of India accepted this Resolution after amending it in the following form.

"This Assembly recommends to the Governor General in Council that it should take steps to introduce as soon as practicable, in the Indian Legislature, such legislation as may be necessary for the registration of trade unions and for the protection of trade unions"

In September 1921, the Government of India asked all Local Government to address all public bodies, employers and workers accels tions and prominent persons within their respective serviciones to furnish their respective serviciones of furnish their views directly the public of the control of the public of the control o legislation with particular reference to (1) Com pulsory or optional registration, (2) the extent to which objects should be specified, (3) recogni tion of strikes, (4) the extent to which the domestic affairs of trade unions should be brought under the law (5) recognition of poli tical objects, (6) recognition of picketing, (7) age qualification, (8) protection of Trade Unions from Civil and Criminal Lishility, (9) management of Unions, and (10) Trustees and Trust

The Government of India after examining the views of the Local Governments and the replies received from various hodies and persons pre pared a Bill to Provide for the Registration of Trade Unions and in cortain respects to Define the Law Relating to Registered Trade Unions in British India This Bill has been directaled to the Local Governments for the purpose of obtaining the views of public bodies and employers and employees associations before it is introduced in the Legislative Assembly

With regard to the question of registration, the Government of India are nf opinion that optional registration aftords the only sound basis for legislative action. The main anxiety of man; of the advocates of compulsory regis 1925

On the 1st March 1921 Mr N M Joshi moved | tration appeared to be to place restrictions on the following resolution regarding the Registra- | trade unions, whereas the objects which Government have in mind is to grant to trade unions a position in the eyes of the law which shall be a position in the eyes of the law which shall be at once definite and privileged. Compuls on would necessarily involve penalties for evasion and as the penalization of the Unions that did not register would be both unjust and unequit able it has been decided to conduct the privileges which such legislation will allow to registered unions naly These privileges include a con-siderable measure of immunity from civil suits and criminal prosecutions directed against trade unions and other members Officers and members of trade unions who induce workmen to break their contracts with their employers will be saved from being sned in the Civil Courts and protection will be afforded from oriminal liability by amending the law relating to conapiracy

No direct restrictions have been placed in No direct restrictions have been placed in the draft hill on the objects which a trade union may pursue but it will be left to the Registrar to refuse registration to an organi cation which chooses to claim the title of a Trade Union without including in the sphere at Trade Union without including in the sphere at the artivities born size trade union objects of the strain these including the political of first automat these including the political of jects among those upon which funds can be expended received careful consideration, and, following the great majority of the replies received, the Government of India decided to exclude such objects from the list of objects which Trado Unions would be able to draw up to define the scope of their activities. This, Government believe, will not prevent trade unions or their leaders from advocating politi cal policies, but it will ensure that funds contributed primarily for trade union purposes are not expended on causes in which the bulk of the members have little interest

The Bill makes adequate provision for safe guarding the rights and investments of memguarding the rights and investments of mean-bers by ensuring (1) a regular audit of the funds of registered milons, and (2) a proper and effective control of their own affairs by the workers themselves by making compul-sory a proper representation of the members of such trade votions on their executive committees As regards picketing, the Govern-ment of India have not seen the necessity of imposing any general restriction on picketing and the Rill, therefore, does not make picketing which may be confined to systematic persuasion, and which does not degenerate persuasion, and which

This Bill introduced in the Delhi Session of the Legislative Assembly held early in

### WORKMEN'S COMPENSATION

The Workman's Compensation Act of 1928 | For a minor who is killed, the compensation received the ament of the Governor-General on the 5th March 1928 The Act extends to the which of British India including British Baluwhich of British India including article man-chisten and the Bonthal Parganas and came labé force on the first day of July 1924. It contains two distinct parts Chapter II which lies conside the general scheme for componentian, con-tains previsions modifying the ordinary law in res-pect of employers liability and making it easier for injured workmen to oue their employers for damages in the Civil Courts. These clauses damages in the civil courts. These causes apply only to workmen, who come under the workmen's compensation provisions, so that, although they omit the limit to damages which governs their counterpart in England, they are not likely to be much used Ton classes of workmen are covered by the bill Some of these, such as members of fire brigades, telegraph and telephone lineamen, sewage workers and tramwaymen, are small, and as the defini-tion of seaman is limited to those employed on certain inland vessels, only a very small proper tion of Indian seamen will benefit by the bill The five important classes are the workers in factories, mines, docks and on railways, practically all of whom are included, and those engaged in certain types of building work, notably the construction of industrial and commercial buildings, and any other buildings which run to more than one storey. The most 'important consenses excluded altogether are segricultural workers and domestic correction. Non manual labourers getting more than Ea. 300 a month are onto a month as the contract of The five important classes are the workers in excluded, except on the railways Power is taken to include other hazardous occupations by notification from time to time Compensation is to be given, as in the English Act, for personal injury by socident arising out of and in the course of supplyment. It is also to be given for di os embrynents, at a saiso we given for diseases have been so framed that if a certain class of workman contracts a scheduled disease, it will usually be extensely difficult for the employer to deleat a claim for compensation. On the other hand, other workman will find it equally difficult to get compensation for disease, as they will have to prove that the disease arises "solely and directly" from the employment The diseases scheduled at present are anthrax, lead poisoning and phosphorus poisoning, but the list is made capable of extension

Scales.-The scales for compensation are more generous in every way than those originally suggested by Government, they are based on the unanimous recommendation of a Committee which met in June Adults (1 o, persons over 15) and minors are distinguished through out and compensation is subject to upper limite in every case. For death the relatives receive 36 months wages of the deceased workman, subject to a maximum of Re 2,500 if he was an adult

For a minor who is killed, the compensation payable is the fixed sum of Re 200 if a weighnen is completely disabled for life, he gets 42 months' wages if he is an adult and 64 months' wages if he is a minor, subject in each case to a mar-num of Re. 5500 if he sustains permanent injuries that do not completely disable him, he gots proportions of the above sums, and for ne gess proportions or the above sums, and torecriain clearly recognizable injuries, like the loss of limb, those proportions are specific Thus a workman, who lost his right arm below the elbow would receive 60 per cont of the sums. epecified above, subject to a maximum of Rs 2,100 If his pay was Re 30 monthly, the sum would come to Rs 756 All these payments are lump sums Of much greater importance are the provisions for the minor and more common injuries Statistics based on experience of industry generally in other countries indicate that 50 per cent of injuries from accidents cause disablement for not more than ten days, 44 per cent cause disablement lasting more than 10 days, but ultimately disappearing, 5 per cent result in permanent injuries and 1 per cent end resure in purmanent injuries and 1 por cent and a fatally A large proportion of cases will be excluded by the provision that no compensation is to be paid on account of the first ten days of disablement. The great majority of the remaining cases will fail under the scale for termaining cases will fail under the scale for termaining cases will fail under the scale for termaining cases. maning cases wit fair finer to be water for some porary disablement. The rate of payment for temporary disablement is half wages for adults and two-thirds wages for minors, subject to a maximum of seven years, and for minors, two-thirds wages or whole mouthly wages after they have attained the age of 15 years, enbject in each case to a maximum amount of Rs 30, in each case to a maximum amount of years and to a maximum period of 5 years. This maximum of 5 years is not of great importance, as experience shows that the number of such cases which last more than six months of the same of the sam is insignificant During the first six months of these payments they can only be commuted to a lump sum if both parties agree, after payments have gone on for six mouths, either party can apply for commutation in its treatment of the difficult question of dependents the Indian bill allows only husbands and wives, parents and minor children to claim compensation and it makes the compensation a fixed sum independent of the number of those relations The administration of the Act and the settlement of disputes is entrusted to special Commissioners, with a very simple procedure wide powers and restricted opportunities for wide powers and restricted opportunities for appeals The successful operation of the act depends largely upon the choice of suitable officers as Commissioners All local Governments and administrations have, therefore, been addressed by the Government of India to consider the question of the applintment of Commissioners under Section 26 (1), of the

### Act WAGES IN AGRICULTURE.

There is much discussion, with no very de ances into the wages of labourers mainly in finite conclusions, as to whether wages have agriculture. The Labour Office of the Govern kept pace with the cost of living Conditions men of Bombay published a Roport in 195 kept pace with the cost of living. Conditions and recommendations are supported by the cost of living to markedly between Province and Province that it is difficult to give exact figures Different Provincial Governments publish, from blick gave the average daily examing of three between the results of diminental Con and and fine labour, rest, akilled labour, provincial control of the cost of t

the 26 districts of the Bombay Presidency, separately for urban areas and rural areas, and for each of 28 years from 1900 to 1922 The wages prevailing in other provinces for similar types of labour do not compare un favourably with wages in the Bombay Presidency for any particular year for which a comparison is made This statement requires comparison is made this scatterest requires an important qualification. It is not meant that the money amounts actually paid are similar. The rates of wages in different provinces vary according to the extent of their ladustitalisation and money wages in Provinces which are mainly agricultural are on a second lower level than the money wages in Provinces which are highly industrialised ie in Bomhay which are highly industrialized at a In Hombay and Bengal But there is no doubt whatever that wages have risen markedly in all parts of India during the last ten years and that the general condition of the Indian labourer has improved The construction of a real wage index number is not always indicative of the general material condition of any group of workers The utility of such an index number is only confined to a particular comparison with any given date, and provided always that the two sets of figures showing money wages and the cost of flying at two particular dates are accurately compiled the real wage lader number at the later date as compared (lackuling Slad) 1913=100

with the condition of the workman at the former date gives an accurate reading of the position of his purchasing power in comparison with that date Indian publicists constantly aver that the condition of the Indian labourer avoid that the condition of the main scheme. The true fact is that since wages and prices are both variables, "real wages" being a func-tion of two variables, could only remain at the same level if the two factors vary proporthomstely But this does not happen and wage changes always lag behind price changes When prices rise real wages rise only slowly to the original level, and when prices fall real wages fall slowly Consequently the labourer is sometimes better off and sometimes worse is sometimes better off and sometimes worse
off Comparison of conditions in India to-day
with the pre war year show that during this
particular period the condition of the Indian
labourers has undoubtedly improved. This is
amply proved by the figures given below showing the index numbers of daily average wages
of skilled labourers, ordinary labourers and
field labourers, for urban areas and for rural
larges for the Romban Pacadidana. areas for the Bombay Presidency

### Agricultural Wages (Nominal)

Index Numbers for the Bombay Presidency

	,	Urban Areas		:	Rural Areas	
Year	Field labour	Ordinary Isbour	Skilled labour	l fold labour	Ordinary labour	Skilled labour
1921 1922 1923	170 189 200	184 192 200	180 195 196	150 170 171	148 162 171	166 179 189

to correspond with the index numbers of nomi hal wages given above is not possible on account of the inapplicability of any general cost of living index number for a particular group of wing, mace nonner for a particular group of workers in a particular centre to the Presidency as a whole But it is possible, however to calculate the rise or fall in the purchasing power of agricultural labourers in terms of the six principal food grains—Rice, wheat, jowari injri, turdal and gram Tho I abour Office of the Government of Bombay has compiled com Presidency in terms of posite index numbers for annual averages by foodgrains only 1913=100

The construction of accurate real wage figures | taking the monthly prices of each of these six foodgrains in each of the 26 districts of the Presidency If these index numbers are applied to the nominal wage index numbers given above, a set of real wage index numbers is arrived at showing the purchasure power of agricultural lahourers for the whole Presidency These figures are of considerable interest

### Agricultural Wages (Real )

Real Wage Index Numbers for Bombay Presidency in terms of purchasing power for

		Urban Areas			Rural Areas	
Year	Field labour	Ordinary labour	Skilled labour	Field labour	Ordinary Jabour	Skilled labour
1921 1922 1928	88 107 144	91 108 144	89 110 141	78 ¥7 123	78 92 128	82 101 135

The above figures show that the condition of [3] the average monthly earnings per head is all agricultural labourers in India must have August 1923 as compared with May 1921 were been bed with the high prices of 1921 there years at the same level in Bombay, slightly over 1 ago in 1922, price tell considerably whereas Ahmedabad and lower in Sholayur, Barod wager showed a large increase. The result of State and Other Centres in the Presidence. been bed with the high prices of 1921 curve years ago. In 1923, prices fell considerably whereas wages showed a large increase. The result of this is apparent—a considerable improvement in real wages and a general improvement in the condition of the labouring classes. Some modification of the apparent rise in real wages would however be obtained if the prices of clothing and other non food articles were taken into the calculation But this modification would not reduce the 1923 Index Numbers to below 100

In the Cotton Mill Industry —An enquiry was held by the Labour Office of the Government of Pombay into Wages and Hours of Labour in the Cotton Mill Industry for August 1923 which covered a total number of 251 219 workpeople in 186 mills in the Bombay Presidency and in the 8 states within its teritorial limits The important results of this torial limits The important results of the enquiry were (1) a decline in the number of children employed owing to more rigorous factory inspection under the new Factory Act, (2) an absentceism figure as high as 10 4 per cent for all work people, 9 2 per cent for men, 14 7 per cent for women, 9 8 per cent for time workers, and 11 2 per cent for place workers | groups -

(4) the potential monthly earnings for all work people in the Presidency would have amounted Bs 32-10 per head per month had all work people worked for a full working month of 2 days at the rates of average daily earnings which prevailed in Angust 1923-the difference between prevailed in Angus. 1923—the universities coeweed this and the actual monthly earnings amount ing to Rs 3-8-0 or 12 per cent. (5) the tota Wagoz Bill in the cotton mill industry in August 1923 amounted to Rs 72,25,000 for the number of workpeople covered in the enquiry, (6) the average hours of labour per day amounted to 10 hours and 5 minutes for men, 9 hours and 35 minutes for women and 5 hours for half timers or children, (7) the number, of holidays recommended in the Bombay Mills by the Millowners.

Association during the year 1923 amounted to 57, and (8) except in Sholapur no bonuses were paid for service in the year 1923

The following table shows the daily average earnings, per capits, of work people in different occupations classified according to age and sex

### OFFICIAL ORGANISATION.

When the importance of the labour movement | Gazette which is a journal for the use of all interforced itself on the attention of the Government it was found necessary to establish an organisa-tion to deal with it There was created with the Government of India a Labour Bureau, which collecte information on Labour conditions, keeps in touch with Labour organisations in other countries, and systematically gathers statistics regarding strikes, tock outs, wages and tost of living Several of the Local Govern ments have set up special machinery for dealing with Labour issues, and there are Labour officers with the Governments of Bengal and Madras whilst the Bombay Government, on the advice of the informal committee whose recommendations have been mentioned above, constituted a special Labour Office in the Secretariat

In a resolution of Government in the Home Department, dated 29th April 1921, the func-tions of the Labour Office were set ont as follows --

LABOUR STATISTICS AND INTRLLIGENCE -These relate to the conditions under which labour works and include information relating to the cost of living, wages, hours of labour, family budgets, strikes and lock-outs, and similar matters .

(u) INDUSTRIAL DISPUTES -As experience and knowledge are gained and the activities of the Labour Office develop, it will promote the settlement of industrial disputes when these arise . and

## Domestic Servants.

The relationship of master to servant in India is a subject to which attention is frequently directed in the Press by complaints about the alleged deterioration of domestic servants and alleged deterioration of domestic servants and the hardality to which employers are subjected by the boycotting action of discharged servants. The remedy most commonly propounded for misbehaviour on the part of servants is regis-teration with a view to checking the use of fains testimonials, and to enabling the common of the common they armined the com-tained to the common they armined on the character of the persons they employ This mode of procedure is of German origin, for the old Prussian Servants' Ordinances (Gesindeordold framah servance Urunances (seennecorn-nums) were supplemented in 1866 by a law-applying only to agricultural labources and domestic servants, which punishes breach of contrast, and since then various stee laws dealing with domestics or vants has We been passed in Germany The conditions are not, however, analogous for the servant keeping class in India is

or receiving monthly wages, and the word 'servant' means and loclodes head and under-'servant' means and loclodes head and under-servants, female servants, cooks, coschman, hersekopers and house and gardeo coolles! The Acc came into operation in levra and em-received the servant of the servant of the still plant of the servants, and em-site lakand or for any town or district, to which the Ordinance is made applicable, a registrat of domestic servants, who is to be ander they enersi approvision and control of the impector-denersi of Police A registry is kept in heavy of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of the servants of ployed within his town or district, and he has to enter therein the names of all the servants, to enter therein the names of all the servants, the capacities in which they are employed at the times of such registration, the dates of their several engagements and such memorandum of their previous services or antecedents as they may desire to have recorded in the register all these details, satisfy humself as for the capacity that they details as they have the capacity that the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity humself as for the capacity all these details, astary himself as to the credi bility of the statements made to him Any person, who may not have been a domestic servant before, but who is desirous of entering domestic service, has to anbmit an application to the registrar, and if the registrar is satisfied that there are reasonable grounds to believe that the applicant is a fit and proper person to enter domestic service he shall enter his name in the register, recording what he has been a bie to learn respecting the persons antercedents together with the names of any persons who are willing to certify as to his respectability. If the applicant is unable to produce actisfactory or assistent evidence as to his fitness for domestic safficient evidence as to his fitness for domestic, base to pay one rupee for the lames of a duplicate service, the register at my grant him "provident at "registeration, to be therester converted into a part of the subsequent service. If the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at the register at

Every person whose name has been registers: in the general registry is given a pocket registe-containing the full particulars of the record made in the general registry. No person case engage a servant who falls to produce his pocket register own whose pocket register does not record the termination of his last previous service, it any. One negaging a servant the master has to enter forthwith in the pocket register the date once for the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the Every person whose name has been registered the registrar's office to have such entry inserted in the general registry Similarly, in case the master discharges a servant he must insert in the pocket register the date and cause of his discharge and the character of the servant Provided that if for any resson he be unwilling to give the servant a character or to state the cause of his discharge he may decline to do so But in such a case he must furnish to the registrar in writing his reasons for so refusing analogous for the servant keeping class in India is registrar in writing his reasons for so relating proportionately larger than in Europe, as also is it the servant on dismissal fails to produe his the number of servants kept by each individual. The first attempt in the East to deal with the fact to the registrar Whenever any fresh problem by logislation was made in Ceylon, only is made in the pocket register the servant extension by logislation was made in Ceylon, only is made in the pocket register the servant extension in the control of the registrar as offset to have control of the registrar of softset to servants in that Colory is comprehensively so that the control of the registrar of softset to have control of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of the Color of th not under the operation of the Ordinance, at tend personsilly at the centret police station on his entering or leaving such service and produce his pocket register to the principal of flower of police at such station in order to antible the police officer to record the commencement or termination of the service. The police officer that the policy officer is the policy of the policy officer of the termination of the service. The police officer that the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the termination of the service. The policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the policy of the poli the town or district to which such servant was originally registered

Various penalties of fine as well as of imprisonment are imposed for violation of any of the acts required to be done or duties imposed of the acts required to be one or unuses imposed by the Act on the various persons mentioned below As respects masters if they fall to fulfil any of the duties imposed on them by the Act they expose the master set os a liability of their between and to the extent of Be 20. Similarly a servant, who falls to fulfil any of the duties imposed on him by the Act is liable to pay a fine not exceeding Rs 20 But in case be gives any tales information to the registrar or to any other person on matters in which be is required by this Ordinance to give information, he is its ble to a fine out exceeding Rs 50 or to im prisonment, with or without hard labour, not a recoding 3 months. A fee of 25 cents is charged to the master on engaging a new servant, a like ice of 25 cents is charged to the servant on his provisional registration, or on registration being confirmed, or for registration of previous service or antecedents. But in case of loss or destruction of the pocket register the servant has to pay one rupee for the issue of a duplicate

nd he operation has been intuited to study local areas on as may be declared by the Governor in Council, his and the application within such areas has been of restricted to the class of householders who are a waveful to the class of householders who are

## Routes between India and Europe.

The Indian port for the direct journey to and [ The Indian port for the direct journey to and from Europe is Bombay There are ordinarily five lines of steamers by which the journey to and from the West to Bombay can be performed, either by sea all the way, or—and in some cases only—by see, part of the way and by rail across Europe They are the P & O. the Anchor Line, the City and Hall Line, the Lloyd Triestino and the British India line. The Natai line steamers are available for Western Natai line steamers are available for Western passages only, the steamers sailing round the Cape on their Eastward worsees Terrary and the Cape on their Eastward worsees Terrary Calentia and approximately ourrent rates of exchange—

the West, by steamers sailing roundCeylon, and several lines connect Colombo with Europe and several lines connect Colombo with Europe Of the latter the Orlent, the Messagaries Maritimes the Bibby Lines N Y K , Australian Cum monwealth, & Boyal Dutch Lines are the chief besides the P & O The Bibby and Honderson services extend to Rangoon The new rallway between India and Ceylon greatly increases the Interportance of the Orlenth Power Countries of the Colombo Countries of Court Persons (Contries of Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Countries Co India The shortest time between London and Bombay is 15 days vis Marseilles. ### THE SUEZ CANAL

At the General Meeting of the Suos Canal Company, held in June, 1924, the Chairman add that the progress of the shipping traffic which they had recorded since 1919 continued last year, and the net tonnage was nearly 10 per cent more than that of 1923. This constant improvement occurring in apite of economic decumentances of all kinds which had affected and the supplied of the supplied that the supplied that the supplied that the supplied that the supplied the supplied that the supplied the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the supplied that the sup

Under the double influence of the growth of traffic and of the increased proceeds from the transmission of iunds from Egypt and England to France, the profits for the year had proved to be considerably larger than those of the previous year, enabling the board to consider an important increase of the dividends a Accordingly they proposed to fix the new larger of the province of the province of the theorem is a second to the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the pr

Conforming to the liberal principles which Mears Aired Holt and Cohad always been held, they, in view of the company and China Muttail growth of trafts during the year, had lowered the tenants due by 25 contines as from inner of passengers who per a contine to the contine of passengers who per January 1. They were, in fact, still convinced canal in 1023 was 246,831, to

still weighed heavily on the maritime transport industry, and consequently favouring thereby the development of navigation, they had served the shareholders own interests not less than those of the shipowners

Financial Position —The total receipts for the year 1923 amounted to 419,250,419 65f, showing, as compared with those of the year 1922, an increase of 113,794,810-93f

The ercess of receipts over expenditure in 1923 after deductions for depreciation and other charges, was 255,690 8987, and with the balance from the previous year, the total available for distribution was 287,797,3197. After the payment of the proposed dividends the sam re maining is 23,735,3477, of which 20,000,0001 is to be added to the Extraordinary Reserve Fund constituted in 1980. The balance to carried forward is therefore 3,735,3477.

Transit and New jastion —The number of vessels which passed through the canal in 1923 was 4,621, porpresenting \$2,780,162 tons gross Vessels flying the Eritish flag number vessels making the Eritish flag number vessels were the second farget users of the canal, thoir number was 451 and net tonnage 3,178,668. Frouch vessels came third in the list with 259 and net tonnage 1,294,400. Fourth place in point of tonnage vessels were taken by German vessels of which be the point of tonnage vessels with net 256, with net tonnage 1,042,754.

256, with net tonnage 1,042,754
Among Fittish users, the P and of companies occupied the first place, with of companies occupied the first place, with place with 1,750,000 tens. The British Tanker Company was third, with 1,559,000 tens, and Mesers Alfred Holt and Co (Ocean Steamhip Company and China Mutual Steam Navigation Company) outh with 1,560,000 tens. The canal in 1953 was 246,331, as compared with 274 631 for the previous year.

Improvement Schemes.—It was announced in 1914 that from and after January 1st, 1915, the maximum draught of water allowed to ships going through the Sacz Canal would be increased by 1ft, making it 30ft English.

The maximum permissible draught of abpsusing the Canal was 24 4 feet in 1870, in 1880 ships drawing 25 4 feet could make the passage, and during the following 24 years the increase has been at the average rate of about 1 foot every six years, thus bringing the maximum draught anthorised to 29 feet

The scheme of improvement adopted by the Company on the recommendation of the international Consultative Committee of Works, the British representatives on which are Sir William Matthewe and Mr Anthony Lister, is a comprehensive one, and the detaile suggest that it will meet the needs of the fig ship

A 40 feet Channel —The declared policy of the Canal for Company in regard to the deepening of the Canal is to offer a alightly greater depth of water than that swallable in ports each on of Sydney, there is no cestern port which at low tide has a greater depth of water than that now provided in the Canal throughout the full length of nearly 105 miles in any case the work in hand shreld meet the needs of any during the next of the canal throughout the full capth of nearly 105 miles in any case the work in hand shreld meet the needs of any company of the canal throughout the full capth of next few Years.

When the Canal was opened in 1869 the width was 72 feet and the depth about 25 feet 2 luches in June, 1913, the width at a depth of 32 feet 8 luches had been increased to a mirihum of

147 feet 6 inches over a length of about 85 miles, and to a width of 825 feet over a distance of about 80 miles. The latest scheme makes provision for a depth of 40 feet throughout and for a widening up to 186 feet 8 inches in the south section, and the cutting of an appropriate number of sidings in the north and central excitons, where a minimum width of 147 feet 6 fuches is believed to be sufficient for the recultivenest of the limediate future.

The work of enlarging the capacity of the Canai presents no special difficulty on the enginering and a good deal of sand is occasionally encouraged at a good deal of sand is occasionally etc. A good deal of the sand is occasionally etc. The sand is sufficient to the sand is sufficient to the sand is sufficient to the west breakwater by about 2,700 yards at a cost of over £6,000,000. The construction of this extension, which has been in hand for the past two years, is making salis factory progress. The Sines Roads are being factory progress. The Sines Roads are being agreement between the Egyptian Government and the Company

Almost up to the end of 1915 the works for extending the jett; to the west of Fort Said, work as of apital importance for the protection of the entry to the Canal, were pushed on uninterruptedly In November, however, for some the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the contraction of the Channel is thue secured, and there is no need for any apprehension as to its future

## Travel in India.

Thirty years ago a tour in India was possible only to the westity, the learned and those only to the westity, the learned and those of the sourney was very high, the methods of transportation were very slow, and the facilities for travel were so indifferent that he was a bold man who consigned himself to the mercal of the country without a sheat of letters of introduction. Now the India which is the same who will be a supported by the same route and with the same speed as the mail A doen lines have covered the sea route between Europe and India and Ceylon with a plexus of regular sorvices. The indian Railways provide fact in the same speed as the mail A doen lines have covered the sea route between Europe and India and Ceylon with a plexus of regular sorvices. The indian Railways provide fact in the same speed in the plant of regular sorvices are supported to the indian Railways provide fact in the same speed in the same continuation of the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed in the same speed

In the touring season, which extends from November to March, there is the attraction of a perfect elimate. It is never very hot, in the North indeed it is rasily cool, it is always fine and fresh and bracing. If there is country in the world to whilst that clustve term applies, here we have at the season when the property of the season when the season when the season when the season when the season when the season and the own atton and never will be. Its peoples are wide as the Poles sander, each has its own art, its own arthitecture, its own customs and its own of villustion at certain superfection of the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season with the season will be season will be season will be season with the season will be season with the season will be season with the season will be s

The Grand Tour—People com ng to India for the first time so often ask — Where shall I go?" Well, wherever else the tourist may go whatever else he should leave out, he should emit anothing on the Grand Tour. It is the solisia existen avowdays to meer at those who follow the beaten tracks, but the vinitor who solinow the beaten tracks, but the vinitor who solinow the beaten tracks, but the vinitor who solino the part of the orthodox journsy across India misses what nothing abor can repay the part of the orthodox journsy across India misses what nothing abor can repay in the part of the part of the most cities in the prists Empire, and here the travelier can best complete his outst and arrangements. From Foundary stores in the solinow and the solinow are transferred to the possess of the product of the Foundary and the product of the Frovince of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the mutinous hordes at bay, and finally drove the product of the product of the product of the product of the mutinous hordes at bay, and finally drove the product of the product of the product of the product of the product of the product of the product of the mutinous hordes at bay, and finally drove the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product of the product

It is the the great charm of the Grand Tour is that it incre who reveals the best that India on show This intion who may be seen as a repay to the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the test of the tes

### SPECIMEN TOURS.

## The New Capital.

The New Capital.

The transfer of the chylial of India from calcutta to Serial was amounced at the Delhi Durber on December 12, 1911 It had long board recognised as becauser, in the interests of the whole of India, to de-provincialise the series of the whole of India, to de-provincialise the series of the whole of India, to de-provincialise the series of the whole of India, to de-provincialise the series of the whole of India, to de-provincialise the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of the series of make I manufactor Tower of the seat of vene-rable Empire should at once enforce the con-tinuity and promise the permanency of Bri-tiah sovereign rule over the length and breadth of the country." of the country

The foundation stone of the new capital were laid by the King Emperor on December 15, 1911, the finally selected site being on the eastern alopes of the hills to the south of Delhi, on the frings of the tract occupied by the Delhis on the frings of the tract occupied by the Delhis of the past The land chosen is free from liability to flood, has a natural drainage, and is not manwors. It is not cumbered with monuments and tombs needing reverent treatment and the site in sax the present centre of the same of Delhis 1.00 minutes consisting the same of Delhis 1.00 minutes consisting the same of Delhis 1.00 minutes consisting the same of Delhis 1.00 minutes consistent of the same of the same of the comparative one to the North of the existing city Their report, dated 4th March, 1913, states that "the Committee, after giving full consideration to the various point discussed Government of India that no doubt case said Government of India that no doubt case said to the superior healthlines of the southern as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site"

The Town Plan and Architecture.—A report by a Town-Planning Committee, with a plan of the lay-out, was dated 20th March, 1913 work was begun in accordance with it and its main lines have been followed throughout. The central point of interest in the lay-out, which gives the motif of the whole, is covernment flowe, and two large blocks of Secretariats. The former building will was the control of the secretariate with the secretariate was given in the original despatch of Various they covernment flowe, and two large blocks of Secretariats. The former building will were informed by Gevernment Secure and K. Edward Baker press since the various the control of the secretariate. The former building will were informed by Gevernment on 23rd March,

building of the new capital an area was selected, along the Alpir Road, between the existing civil station of Debt and the Ridge. The architecture and method of construction are similar to those adopted in the exhibition buildings at Albirabed in 1910, but the buildings will outlast the transitional period for which they are intended They will subsequently be an asset of Sums value

value

In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chief Commissioner This enclave was entirely taken from the Delhi district of the Punjeh and its totel area is 573 square miles. On the basis of the Census of 1911, the population of the area originally included in the Province was 3,08,259 and of the new area 1,55% or as total of 4,12,831. The population of the he immirpal town of Delhi more area 1,50% or a total of 4,12,831. The population of the New 1900 of the New Condon 11st present population is approximately 40,000 lits present population is approximately 40,000 lits present population is approximately 40,000 slites have been allotted for forty Euling Princes and Chiefe to build bouses for their own occupation during belir visits to the New City. occupation during their visits to the New City

There was, as regards architecture, a pro-longed battle of the styles" over Dehic Finally, to use the language of the architect, it has been there are not express within the steril, the least of the state of the steril the steril the kleat and the fact of British rule in India, of which the New Dehli must ever be the monnent." The inspiration of the designs is mani-festly Western, as is that of British rule, but they sombine with it distinctive ladian features without doing whence to the principles of riroctural sitness and artistic unity

1921, that the revised estimates then amounted to 1,307 lakhs of rupess. This amount includes allowances for building new Legislative Chambers anowances for omitting new legislative (nameers and Hostels for Members of the Indian Logis lature, which were not allowed for in the earlier telimates. The New Capital Enquiry Committee, in its report jublished in January 1928 ostimated the total expenditure at Es 1292 lakes leading Rs. 42 lakes for loss by Ex. change This figure still stands

The Project Betimate contains certain items such as land, residences, water supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes will, in addition to meeting current expenditure, partially at any rate cover the interest oo the capital outlay whilst there are other items on which some return on account of the sale of leases, general taxes and indirect receipts may

Progress of the work.—The construction of New Delhi has made satisfactory progress, having regard to the curtailment of the Budget naving regard to and currentment of any possible assistance of the war and the return of officers and other establishments to their civil work has made possible a consider them civil work has made possible a consever able speeding np of constructional operations provided money can be provided to pay for them. The Secretariate are so for advanced that there were transferred to them from Calcutta in October 1924 the offices of the Accountant General, Central Revenues The residential buildings for Government officers and staff of various grades have been completed and the Engineers hope to have the Secretariats and Parliament house ready for occupation in 1925 and Government Houseln 1926

Spinion of the Legislature—Considerated discussion regarding the new works took place in the Assembly in 1921 The following unofficial resolution has carried—This Assembly recommends to the Governor-General in Council that in the interests of economy and of general convenience alike the execution of the programme of New Delhi works may be expedited and the necessary funds provided or raised so that the Secre tarist and Legislative hulidings and connected works including residences may be completed as early as practicable

A non-official Member in the Legislative Assembly on 28th September, 1921, at Simia, moved a recommendation to Government mored a recommendation to Government, to appoint a Committee to inquire into the possibility of establishing a permanent Capital of India in a place possessing saturitous and temperate elimate throughout the year." This proposal was ridicated by several of his non cellular colleagues and was eventually rejected without a division

H.E.H the Duke of Counsught, on 12th February, 1921, iaid the foundation stone of a large group of parliamentary buildings on a site close to the south east of the Secretariate The buildings will be an imposing pite circular in shape, coasisting in the main of three horse should be about the coasisting to the main of three horse should be sufficient to the coasisting the state of the coasisting that the main of three horses are the coasisting to the coasisting the coasisting the coasisting the coasisting that the coasisting the coasisting the coasisting the coasisting that the coasisting the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasisting that the coasis

All India War Memorial—H R H the Duke of Connaught on 10th February, 1921, laid the foundation-stone of an All India War Memorial at the southern end of the Central Vista The place chosen is a fine position in the centre of the circular Princes' Park

The Memorial will take the form of a triumphal arch spanning Kingsway, the avenue running down the centre of the Vista It will generally be similar to the Arc de Triomphe in Paris, be similar to the Art of Trompuse in Fars, but will be simpler in a way which will probably increase its grandeur and dignity. The monument will reach a height of 100 feet and the inner height of the arch will be 87 feet 6 inches and its breadth 70 feet. Over the arch on both and its breadth 70 feet. Over the arch on both fronts will appear in a spiral interest the single fronts will appear in the spiral interest the single side by the initials MCM = \$1000, and the spiral inmediately below them on the 'set-hand will be the initials XIV (i.e., 14) and on the opposite side the figures XIX (i.e., 14). Above the Arch will be a circular atom bowl 11; Above the Arch will be a circular atom bowl 11; and the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content of the spiral initial content in channeer This is intended to be filled with hurning oil on great anniversaries and other occasions so that there will be a shaing fire by night and a column of smoke by day. The memorial is solely Indian in purpose and will bear the names of Indian regiments only

Educational Institutions —It was proposed during 1914 that a higher college for Chiefs should be established at Debhi and in this connexion a conference of Chiefs and Political Officers was held at Debh at which the Viceroy presided The proposal is still under considers tion To implement it would require a capital outlay of Rs 121 lakhs

The Government of India further in the Spring session of their Legislature in 1922 introduced and carried a Biliforthe establishment of a unitary, teaching and residential university of Delhi, the buildings for which would he orected in the new capital. It is intended to provide a local university on the model recommended for Dacca University by the Calcutta University Commission

The provision of funds for the complete realisation of the university must be a matter realisation of the university must be a matter of time and it was, therefore, decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify their organisation Dr H S Gour, M L A, was in 1922 appoint ed first Vice-Chancellor of the new university and the initial work of organisation was quickly effected by the Executive Council Unfortunateenected by the bablity of the Government of India to allot considerable funds was a severe hands-cap it was hoped that H E. the Vicerone of the would he able to lay the foundation-stone of the mount ne ante to say the round manners than or the miveracty shildings in November, 1922, but this proved impracticable, and the site for the new buildings required has not yet been settled Government and the University Authorities are a sales, commenting the main or three norse above shaped, commenting the University Authorities are prices. Council of State and Legislative examining this point in consultation, partialized assembly respectively and surmounted by a cally with reference to question whether to large dame over a Central Library connecting all three Chainbers,

Botanical Survey — The Botanical Survey Department of the Government of Indla is noter the control of the Director who is assisted by three other officers. They are engaged in the examination and identification of plants and the study of forus. The Director is also in charge of the cinchons plantations in Borma.

the connection with the general angletion in post-war industrial policy, the Government of India decided in 1916 that every effort should be made to extend the area under einchona in India, and deputed Colonel A. T. Giage, late Director of Botanical Survey of India, to explore land suitable for cinchona cultivation A. T. Giage, late the suitable of the commendations made in a servent of his recommendations made in a servent of his recommendations and has a servent of the servent of the recommendation and the first plantations were started there in 1920 A programme was adopted for planting 600 mere annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per annually which would produce 90,000 lbs per event produce 90,000 lbs per event produce 90,000 lbs per event produce 90,000 lbs per event produce 90,000 lbs per event produce 90,000 lbs per event produce 90,000

At the infance of the Retranchment Committee the area to be planted during the first four years has been limited to 250 acres per annum, which will give an annual outsire of more than 45,000 lbs from 1930. The Government of Bengal and Madras are also at the instance of the Government of India extending their cinchona plantations, and it is proposed that Bengal should continue its sequence of planting 200 acres ever year with cinchona, Madras 230 acres annually. The total estimated out turn from this area is 1,20,000 lbs as against a total Indian consumption of 1,60,000 lbs

The actual demand for the drug in India is difficult to estimate Eight million cases of malaria fever go to the hospitals and dispensaries every year. If each of these is treated with 110 grains of quinine, which may be taken as the minimum for the cure of a pacysism, the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the con

Geological Survey —The ultimate aim of the Geological Survey of India in the preparation of a geological map of India to the preparation of a geological map of India upon the accuracy of which the solution of most geological probleme ultimately depends Maps accompany the reports on the various areas in the publications of the Department and surge amount of information is made available to the publications of the Department and surge amount of the Information is made available to the publication is made available to the publication is made available to the publication of the publication of the publication of the publication of the publication of the publication of the publication of the publication of the mineral discovered Collections of minerals rocks and discovered Collections of minerals rocks and discovered the public galicies of the Indian Maseum Theological Survey also undertakes the examination of the public galicies of the Indian Maseum Theological Survey also undertakes the examination and the Memoirs Records and Palsonto-logical modes.

tha between 1911 and 1920, partly by subscriptions from the Society's members, contributions from Indian Princes, and grants from the Indian Government, the Government of Burms, Ceylon, Malay States, and the Provincial Governments. Subscriptions were also received from a few Learned Societies and Institutions in England and America By the outhreak of the war the Survey had been carried on over large areas of Western India a portion of Sind, the whole of Gujarat, Kutch and Kathlawar, the Southern Maharatta country and Kanara in Sonthern India, in Coorg and Mysore, in the centre large tracts of the Central Provinces and come districts of Bengal and Behar, in Northern India the Scotety's collectors had, worked over Kumaun, Darjeeling and Sikkim and the Bhutan Duars In Burma, collections were made along the Chindwin river, in Central Burma and in the Shan States, Pegu and a portion of Tennaserim The whole of Ceylon was also systematically surveyed

The material, which up to the outbreak of War comprised some 17,000 specimens, was consistent of the control of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency of the consistency

will be issued in 1925

When demohilization rendered it possible the work of the Survey which had been in abov-ance during the war was resumed and a collector Mr C Primrose, was sent to Assam and the Mergui Archipelago and Mr Oldfield Thomas the mergul arcenpesses and arr content prometal has written very appreciatively of his work among those islands. Mr Primrose then began working inland that owing to the impracticability of continuing his work in Burma during the monsoon, he was transferred to Gwalior where II H the Maharaja kindly accorded permission to work in his territories

After working a portion of the Eastern Ghats the next move was to the Kangra District in the North West Himalayas and then on to the Punjab Salt Range Two other collectors worked in Southern India Permission was once more obtained from the Nepal Government for a collector to resume the Survey work in that collector to resume the survey work in the country. The work in Nepal was brought to a successful close early this year with a representative collection of interesting mammals and birds

The Survey now has only one collector who is collecting in the foot bills of Himalayas and the Pindari Valley

The Board of Scientific Advice.— This Board in accordance with a recommend-This Board in accordance with a recommendation of the Incheape Refreentment Committee is in abeyance it consisted of the heads of the Metoorological Geological, Botanical, Fornest, and Survey Departments, representatives of the Agricultural and Civil Veterinary Departments, and other adentific authorities whose special attainments may be useful. It was established in 1902 to co-ordinate official actentific in quiry, the matter that many the same of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the in 1802 to 00-ordinate omeas scenation inquiry, to ensure that research work is distributed to the best advantage, and to advise the Government of India in precenting practical research into those questions of economic or applied edence on the solution of which the apputed enterior on the softion of which was agricultural and industrial development of the country so largely depends. The programmes of investigation of the various departments were annually automitted to the Board for discossion and arrangement, and an annual report was publabed on the work done

The Secretary to the Government of India (Department of Revenue and Agriculture) was ex-officio President of the Board, which The material, which up to the outbreak of was ex-offsio President of the Board, which was comprised some 17,000 specimens, was anduced the Director-General of Observa-forwarded to the British Museum where the locality of the Sarah of the British Sarah of the British Sarah of the British Sarah of the British Sarah of the British Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah of Sarah

The Universities Conference representing all Indian Universities, which met in Simia list summer, recommended the revival of the Board

The Indian Research Fund.—The propress of this Fund and its Association like the Hoard of this full and its Assonation the the same of Scientific Advice, has seriously been affected by the policy of retrenchment enforced in pursuance of the recommendations of the Inchespo Committee Scientific research work is rapidly developing in India In 1911 the som of 5 lakhs (£83,000) out of the surplus opinm revenue was set aside as an endowment for research into epidemic diseases in connection with the Central Research Institute at Kasauli It was hoped that this sum might be largely augmented by private aubscriptions An Indian Re search Fund Association was constituted, and a good deal of work was undertaken Its objects were defined as "the prosecution and assistance of research, the propagation of knowiedge and experimental measures generally in connection with the causation mode of spread and prevention of communicable diseases Fresh investigations into kala azar and cholers were inaugurated, and an officer was deputed at the expense of the Fund to study yellow fever in the regions where it is endemic, with a view to taking steps to prevent its introduction into India A further grant of 6 lakhs (£40,000) was made to the Central Research Fund from the opium surplus of 1011 12 It was decided to devote to research and anti-malarial projects 5 lakhs (£33,000)a year from Imperial revenue commenc ing in 1913 14 4 new periodical." The Indian ing in 1913 14 A new periodical" The Indian Journal of Medical Besearch," was instituted in 1913 for publication four times annually as the official organ of the Research Fund The jour nal was designed to deal with every branch of research directly or indirectly connected with medical and sanitary science, and form a record of what was being done in India for the ad vance of this work. In 1922 it was decided to devote the capital funds at the disposal of the Association to the erection of an Imperial Medical Research Institute and to the formation of a fund for its endowments. In the same year valuable results were achieved by Dr Nishi Kanta De

Survey of India —The work of the Survey of India Department falls under various heads.

ment of India, Public Works Department, and namely, the trigonometrical survey, topogra-the Director of the Botanical Survey of india paical and forest surveys, special surveys and who was Socretary to the Board of Scientific expositions, and map production Galastral Advice

The Universities Conference representing all Land Records and Sectionant Departments.

In 1904 attention was drawn to the defective state of the topographical survey maps, and a Committee was appointed to re-port on the subject. To overtake the arrears of revisional survey and to secure that the map of India should be brought up to date and revised at proper intervals, they recommended a considerable increase of establishment and an increased expenditure of Re 2,10,000 a year for the next 25 years They also made recommenda-tions for altering the size and improving the quality of the maps. After further in quiry the Government of India decided that a scale of 1 inch to the mile would ordinarily be sufficient, reserved forests and special areas belog surveyed on the scale of 2 in ches to the mile, and the 1-inch scale employed for waste and barren tracts. The work of the Department has in recent years greatly been hampered by the general need for retrenchment in expenditure

Indian Science Congress — The Indian Science Congress was founded largely owing to the effects of Dr J L Simonson and Mr P S Macmahon, the present Honorary General Secre-taries of the Congress The Asiatic Society of Bengal undertakes the management of the Congress finances and publishes annually the proceedings of the Congress The objects are (1) to encourage research and to make the results generally known among science workers in India (2) to give opportunities for personal intercourse and scientific companionship and thus to over come to some extent one of the chief draw backs in the life of workers in science in India (3) to promote p bile interest in science for this end the Congress a held at different centres annually, and evening tectures open to the public form an important part of the proceedings of each Congress

The Congress which is progressive and vigor ous meets in January each year, the procee-dings isst for six days The Head of the Local dunga assister six days the result of the Local flowtrament is Patron of the Congress, the Congress seesion is opened by a Presidential Address delivered by the President for the year The President is chosen annually, the results were schieved by Dr Nishi Kania De working in Calciuta on the chemistry of drugs direct sections oblig represented in turn used in treatment of leprosy and on the chemistry of the blood of lepres and resistent autumals. The treatment of cancer, of inducenta, of pueru monia, the histolicy and pathology of deficiency discusses and special problems concerning Indian Calciuts, chalcast, the action of quintum the calciuts, chalcast, the action of quintum the collection meet separately such oscillations and the subjects of investigations specially dealt with by various research experts in 1922

Sarvey of India—The work of the Survey of India Paratment falls under various have been defined to place of interests in the evenings public of India Paratment falls under various area. lectures are delivered

## Posts and Telegraphs POST OFFICE.

The control of the Posts and Telegraphs and of the larger of the other head post offices of India is vested in an officer designated Di-restor-General of Posts and Telegraphs who The Presidency Postmasters, indeed, have works in subordination to the Government one or more Superintendents subordinate of India in the Department of Indiation and them, who the details of the Postmators Labour The superior staff of the Direction, in addition to the Director-General himself, con-sists on the postal cide of two Deputy Direc-tors, deneral (who are officers of the rank of Postanester-General), and aix Assistant Direc-tors-General (whose status is similar to that of Deputy Postmasters-General)

For postal purposes, the Indian Empire is divided into nine circles as shown below, each of the first eight is in charge of a Postmaster General and the Sind and Baluchistan Circle ie controlled by a Deputy Postmaster-General -Bengal and Asam, Ethar and Orissa, Bombay, Burma, Central, Madras, Punjab and North-west Froutier, United Provinces and Sind and Balochitae The Central Circle comprises roughly the Central Provinces and the Central India and Rajputana Agencies

The Postmasters General are responsible to the Director General for the whole of the postal arrangements in their respective circles, the exception of those connected with the con veyance of mails by railways and inland steam-ers which are entrusted to three officers bearing the designation of Deputy Postmaster General, Railway Mail Service All the Post-masters General are provided with Postonal Assistants, while those in charge of the largest circles are also assisted by Deputy Poctmasterscircios et also assisted by Deputy Potenastors, io not autordinate to General The nine Postal Circles and the The Accountant-General Instalctions of the three Deputy Postmasters, Accountants General, Esilway Mail Service, are divided encountants General, as Blway Mail Service, and Carlot Clarks, intendent of Post Offices or Eslawsy Mail university of the Service as the case may be sed each Super lotendent is essisted by a certain number of most open in force since it

one or more Superintendents successed them When the duties of the Postmaster unable to perform them fully himself, a Deputy Postmaster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Portmasters are emp The more important of the offices subordinate to the head office are designated sub-offices and are usually established only in towns of some importance. Sub-offices transact all classes of postal business with the public, submit accounts to the head offices to which they are subordinate, nonpostage therein the accounts of their hinocroperstage therein the accounts of their braceh offices, and frequently have direct dealings with Government local sub-treasuries. The officer to charge of such an office works it either single handed or with the assistance of one or more clorks according to the amount of business

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental with officers on small pay or of extraneous agents, e con such as school masters, shopkeepers, land-team-holders or cultivators who perform their postal

holders or cultivators who perform their persons duties in return for a small remuneration. The audit work of the Post Office is entrust-ed to the Accountant-General, Posts and ed to the Accountant-General, Posts and Telegraphs, who is an officer of the Finance Department of the Government of India and pepterment of the Government of India and ie not autordinate to the Director-General The Accountant-General is assisted by Deputy Accountants General, all of whom, with the necessary staff of cierks, perform as separate bacdquarters to actual audits work of a certain

## Sanitation.

The nistory of the sanitary departments in India goes back for about fifty years. During that period great improvements have been effected in the sanitary condition of the towns, though much remains to be done but the pro-gress of rural sanitation which involves the health of the great bulk or the population has been slow, and incommensurate with the thought been slow, and incommensurate with the thought and labour bestowed on the subject. The reason lies in the spathy of the people and the reason lies in the spathy of the people and the customs injurious to health. While the inhalitants of the plains nf India are on the whole distinguished for personal cleanliness, the sense of public cleanliness has ever been wanting freat improvements have heen effected, in Great improvements have need network in many piaces, but the village house is still often ill ventilated and over populated the village stte dirty, crowded with cattle, choked with rank vegetation, and poisoned by stagnant pools, and the village tanks polluted, and used in discriminately (in bathing cooking and dirighting That the way to improvement lies through the education of the people has always been recognised."

recognised "Of recent years the pace has been speeded and as education progressed, education developed, and funds were available. In a resolution issued in May 23rd, 1914, the Government of India summarised the position at that time, and laid down the general lines and advance. This should be therefore the second progress of the state of the Government of India threated by all who wish to under stand the attitude of the Government of India Luwania antitation unto in the passing of towards sanitation prior to the passing of the Reform Act of 1919. It will be found summarised in the Indian Year Book of 1922 (page 475 at see ) and sariler editions One of the

greatest changes effected by the Reform Act of 1919 was the transfer of sanitation to the provinces making it a subject directly responsi-ble to local control through Ministers. It is ton early yet to attempt to indicate the effects of this change. In the official report of sanitary work in India during the year 1921 22 the general position is indicated by the Public Hesith Commissioner with the Government of India, in the following terms 'There is unfor India, in the following terms 'There is unfor tunately little reason to suppose that the transfer of Sanitation to popular control will usher ier or santation to popular control will users in the millendum at an early date. When all allowances are made for financial strigency it cannot be said that the Reformed Provincial Governments have thrown themselves entime! astically into the struggle with disease. The assument into the struggle with disease. The daily press however shows that popolar interest in the problems of sanitation is slowly increasing which of itself is a good thing. One of the encouraging features of the period has been the increasing number of local associations. whn are taking part in sanitary work Volnn-tary agencies have multiplied, and private generosity both in money and service increases removes not in money and service increases, the next annual report by the same official note in made that the death rate for British India in 1922 was 23 02 against a quiaquen nial mean of 38 42. This mean was high because of the indiuense epidemic in 1918 but in cause of the inducenae epidemic in 1918 but in 1022 there were 1 million fewer deaths than in 1921 I he report continues, 'I' caunch in 1921 I he report continues, 'I' caunch in that there is no reason why this economy in life shannd not continue and be improved on 116, for which health is a prime necessar, is purchasable, and ie the greatest asset any nation may acquire. In order to open the may acquire

types of the public a campaign of colighicanum; and to make definite recommendation requirement of India to-day, when Indian politicians desire to create a strong nation, life is tandard of health. The ways is the appointment of a Commission to inquire into the actual health conditions of the people into the actual health conditions of the people

Taking India as a whole, the Public Health |
Commissioner reported, the ryot during 1922, third of the infantile deaths occur in the first correctioned furly normal seasonal climatio seek Mortality at this period is associated conditions for the second year is succession, more than at any other time with maternal which might wall be reflected in merivality and conditions, which in their turn are inseparably which might well be renoused in incurating same mortality statistics. Except in Madras and Bombay there was a reduction of deaths in all provinces compared with the quinquental mean Compared with 1921, there were slight increases of deaths in Debh., Bihar and Oriesa, Madras and Lower Burnes.

Birth registration is notoriously defective and the registration of female births probably suffers more than that of males Rirths exceed ed deaths in all areas except Coorg

The general figures are regarded as indicating that the population in the absence of conditions havourable to epidemicity responded steadily to the improvement in conditions consequent npon two successive good seasons

Statistics from only a few Indian States are received by the Public Health Commissioner and It is evident from them that much requires to be done in the States to improve registration Thus Mysore returns a birth rate of 17 91 and a death rate of 14 52 (despite epidemic prevalence of small pox, plague, malaria and relaysing fever)

The Public Realth Commissioner reports that deaths during the first year of life were 23 2 per cent, of the total deaths against 20 8 in the preceding year 'infant mortality is a semative index of the health conditions, connected with the nature of the environment and the liability to contagion"

and the isolity to coursgion

As regards general mortality and particularly
that from malaris, the Public Health Commissioner in his annual report quotes with approval
the following opinion by Dr Pais —"Malaria
impresses not only physical marks but above
all physical degeneration on the race it emittes
Distrust towards works of a social character
disculated will power diminished liking for
disculation of the commission of the commission of the
mean of life, are special characteristics of those
with chronic malaria and of the peoples who have
loss sufficient of the incremental consumers of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the propile of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the commission of the c long suffered from the infection Dr Bentley who has made an expert study of malaria in various parts of the world and has in recent years specially devoted himself to it in India, gives reason for considering that in Bengal alone there are every year 28,300,000 cases of makeria requiring treatment if this estimate be applied to the whole of India the number of cases requiring treatment throughout the land would he about 100,000,000

The known results of vaccination in the The known results of vaccination in the prevention of small pox are an indication of the facility with which mortality can he prevented when the people accept with comparative readness the scientific advice given them in health matters, as they do in regard to this measure. Had the average mortality from a mail pox during the decade 1685-1877 pertained separative anticons and a second continuous properties of the people live it is these conditions which require attention if any real influence on linfant mortality and on the facility of the people in the people live it is these conditions which require attention if any real influence on linfant mortality and on the facility of the people is the people in the last quinquennum the average annual mortality and on the facility of the people is the people in the last quinquennum the average annual mortality and on the facility of the laster period from this because of 48 per out of the infantile deaths occurred the recorded figure of 8,338

#### THE HEALTH OF THE ARMY

British —The average strength of European Troops, Regulars and Territorials, in India during 1922 was 80,166 as compared with 58,681 in 1921 The following table shows the main facts as regards the health -

Period	Average strength	Admissions	Deaths.	Invalida sent home	Average constantly slok.
1910-14 sverage	69,440	39,389	308	488	2,094 57

Worked out on quinquennium aggregates

The main features of the tables are the progres elve rise in the general sick rate during and after the Great War and the sudden drop in 1922 The causes of deterioration in the first case have The causes or deterioration in the first case have fully been discussed in previous annual com-ments. The improvement, though apparently sudden, was really gradual in its onset, making itself more and more feit as the year progressed, an unusually mild hot weather and low incidence of malaria specially helping. The statistics here dealt with do not contain figures concerning troops in Waziristan because the conditions affecting them are special

for a healthy life in the tropics, with little or no | before the war

leavening of older hands to teach them and generally with officers as ignorant on these generary with omicers as ignorant on these
matters as themselves. The medical officers
included many unfamiliar with the practical
details of tropical sanisation and inexperienced
in the ponce administration of hospitals and
troops in barracks Consequently there had
to be an educational period and a conviderable
weeding out of unful The improvement in the health returns marks its progress Detail ed tables show that the improvement in health among the troops was not confined to any one disease but was apread over them all with the During the war sanitary supervision in can tonusents nanvolably detariorated, with the result that many ordinary measures for the preservation of health fell into abeyance proper-war garfason consistent of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contro post-war garrison consisted of young and nu-trained troops ignorant of the rules necessary is the cause of the level now heing higher than

Indian —The average strength of Indian troops excluding those on field service and in stations outside India (but not excluding those at Aden and Bushire) was 147,840 in 1922, as compared with 176,394 in 1921.

The following table gives the actuals and ratios of sickness, deaths, and invaliding for the quinquennial periods 1910-14 and 1915 19 and for the years 1920 to 1922 inclusive -

					stell Admis-	Rati	o per 1,00	0 of streng	<b>t</b> h
Period.	Average strength	Admis- sions	Deaths	In- valids		Iu valids	A verage con stantly sick.		
1910-14 (average)	130,261	71,218	578	699	2,662	544 6*	4 39*	5 4*	20 7
1915-19 (average)	204,298	161,028	9,485	4,824	7,792	788 2	16 81	28 6	88 1
1920	216,445	164,984	2,124	4,564	9,265	762 8	9 81	21 1	42 8
1921	175,884	119,215	1,782	3,638	6,081	679 7	10 16	20 7	84 4
1922	147,840	77,468	1,014	2,659	3,689	524 0	6 86	18 0	24 6

The factors that exercised an adverse influence on the health of British troops during stroops is the sholltion of the old system of and after the war size affected Indian troops, regimental rationing and its replacement by a but the bad effect was much less marked, proont are used enter was mutur less marked, pro-bably became the new were not in the same need of acclimatisation and the recovery hegen earlier and has been carried further. The introduction of the station hospital system has probably tended to produce algohy increased ratios for admission to hospital and average constantly sick

The ratios per thousand deaths and invaliding, though satisfactory when compared with those for 1921 are still much higher than the pre war average The high death rate 1s almost entirely caused by respiratory diseases in the causation of which infinenza has probably taken part, while the invaliding is regarded as the aftermath of the heavy maiaria incidence of the past few years. There has been an incressed incidence of venereal disease.

drawn up on a scientific hasis so far as caste requirements permit

The improvement in health of troops was not confined to any particular group of diseases. The figures concerning veneral disease are more than double the pre-war rate and the commands situated wholly in India show a much higher rate than those which include many frontier stations within their houndaries. This is regarded as indicating an increase of venereal disease among the civil population

Statistics analysing the distribution of disease

#### MORTALITY FROM WILD ANIMALS

The total number of persons killed by more than accounts for the increase in the total wild animals in British India during 1928 number of deaths. The variations in other amounted to 3,605, as against 8,528 in provinces do not call for special comment for 1,693 deaths, leopards for 64, welves for 8.65, hears for 79, elephants for 70 and hyomas for 18 Deaths were highest 1,500 Decreases occurred in Bangai, Bhar and Form selphants in Morras, from the Bhar and Orises, and from elephants in Assam Of the 446 deaths from "other animals" about 101 are aestinged to wild bears In Bluer and Other delta the mother and and pige and 218 to croodies and alligators and pige and 218 to croodies and alligators. The highest number of the transfer of the tra There has been an abnormal increase of 418

Animals Destroyed —23,911 wild animals were destroyed in 1928 of which 1 686 were tigers, 5,247 leoperds 2 548 bears and 1,687 wolves A sum of Rs 1,85,887 was paid in rewards, against Rs 1,85,785 in the previous year The number of anakes destroyed increased year The number of snakes userus paid for from 58,370 to 59,545 and the rewards paid for Rs 817 ss against deaths, chiefly from wolves, in the United Provin their destruction were Rs 817 ss against ces over the previous years figure, and this Rs 1,250 in the previous years

#### MEDICAL INSTITUTIONS.

There were in 1922-23 in India 3.454 States public, local fund and private aided civil hosplates and dispensaries and the number in 1022 was 3 535 The number of patients treated in them was 36 875,229 lu 1922 against 37,137,200 in 1921

Medical Colleges — There are seven medical colleges (Bombay, Madras, Calcutta, Belgachis, Labore, Delhi and Lucknow) There are also 18 medical schools There is an X ray institution at Dehra Dun

Pasteur Institutes.—There were Pasteur Institutes for anti-rable treatment at Kasauli (Punjab), Coonoor (Madras), Shillong (Assam) and Rangoon (Burma)

Lunatic Asylums -The treatment of lun atics at asymms prevails on a comparatively small scale but the asymm population is sman scare but the asymmic population is steadily increasing. The number of asymms in 1952 was 22. The number of patients admitted was 2 106 in 1922 against 2,234 in 1921. The total asymm population of the year was 9.919

0,010
Leper Asylums — There are many teper asylums among which may be mentioned the Madras Government Leper Asylum, the Matungs Leper Home, Bombay, the Thrandrum State Leper Asylum and the Calcutz Leper Asylum and the Calcutz Leper Asylum There are also many asylums of bomes, frequently under acone acrt of Govern ment supervision, including about 50 asylums of the Missian to Leper.

#### LEPROSY IN INDIA.

It is exceedingly difficult to give anything more than the more advanced cases and possi-approaching an accurate estimate of the total by a majority of this number are the begging number of lepers in the Indian Empire to-day and paper lepers who are seen all over the The census figures of 1921 give the total as country Dr K Mur, the Laproxy Research 102,518, as against 109,004 in 1911 But it is Worker at the Calcutta School of Tropted doubthigh this figure represents anything Medicine, may that "we blank that it would

Transment —In a recent article on this subject by the Secretary to the Mission to Lepers the position is summed up as follows —

tres and the treatment provided free. And, lastly, an educational campaign abould be commenced as soon as possible, and information about the disease itself—how it is spread and Voluntary segregation is the right thing to select the segregation and the efficacy of the letter treatment to myolary segregation is the course to follow in the case of those who persist in mixing with the healthy population and thus spreading the disease, as it to use it is the case with paper and begging lepts a which papers and begging lepts a who persist in the second of ladia.

#### CHILD WELFARE MOVEMENT.

Amongst the most pressing problems of In hy the Seva Sadan Society Certain of these dia's health is that presented by the appalling infant mortality. It has been calculated that every year no fewer than 2 million Indian babies die, while many others survive only to grow bles die, while many others survive only to grow weak and feeble from nuhygienic surround ings during lainancy A not-worthy feature has been the further progress of the infant welfare movement, which owes much to the All-India Maternity and Onlid Welfare League laiti-seed by Ledy Chelmatord and also to the infant Bed Cross Society, which sime at gradually establishing a network of colid welfare centres in most of the larger towns in India In all the great centres of population, work is now being done for the training of midwives for the ins-truction of mothers and for the care of balle-truction of mothers and for the care of balle-training centres for Indian and Angio-Indian women have been opened in order to spread the elements of infantile bygiene to other parts of India Most bopeful sign of all, Indian ladies are beginning to interest themselves in this work in large numbers But such is the mag nitude of the field, that consistent and widenitude of the field, that coolstent and wide-spread effort on a scale hitherto impossible must be undertaken, if any appreciable redno-tion is to be made in the appailing mortality of young children. The admirable work done-year by year by the National Association for supplying Female Medical Aid to the Women of the Legislative Assembly to grant an increas-tion of the Legislative Assembly to grant an increas-Government subsidy to the figure of €25.000

Centres of Activity —The Child Weifare Directory gives the following list of places where the movement is already at work

Bombay —The centre of much active and cuthusiastic welfare work, the Lady Willingdon Maternity Homes near the people's chawis being unique of their kind in India The Bom-bay Infant Welfare Society founded by Lady Ladyd has siready established 8 Infant Welfare

Child Welfare centres are subaldized by the Bombay Branch of the Red Cross

Surst.—The Henderson Ophthalmic Scheme for treating Ophthalmia Reomatorum and stemming" the enormous amount of preventible and curable biladness that is laying its shadow over the health, happiness and usefulness of this great portion of our Empire"

Bijapur - Mr Henderson, 10.8, has now started the same beneficent work for blind babies as in Surat

Dharwar -

Daim — Work was started in 1914 by two lady health visitors brought out from England by the Government of India. Their salaries are now met by the Delni Municipality, a substantial grant being paid towards them by Government, three infant welfare centres have been cetablished and a comprehensive scheme for the training and supervision of indigenous data is carried on A training school for health visitors and midwife eupervisors has been established in councetion with this sobeme and is financed by the Lady Chelmsford League The Secretary of this school from whom all particulars may be obtained in Mrs Young, M B, 1, Ludlow Castle Road, Delhi

Madras —Under the Provincial Branch of the Lady Cheimaford League and of the Bed Orose Scolety a number of Infant Welfare Centres have been opened in the City, also a school for training health visitors under Mrs Chinappi, MB, the Medical Superintendent of the Co-oper ative Midwives Scheme, by means of which trained midwives are provided for the City and much autenatal maternity and infant and much antenatal maternity and infant weifare work is carried on There are also local centres of both the Red Cross and the Lady Chelmsford League in the Madras mofustil

Punjab.—The Punjab Branch of the Lady Chalmaford League was founded in 1921 and has established an Infant Welfare Centre and Lioyd has already established S Infant Welfare Oentres where prenatal, maternity and collid Chemister Course was founded in 1931 and welfares work is being carried on a The work has established an infant Welfare Course and excited ont by the Bers Bedan Society of a shoot for training health wistors in Labor Poons deserved special mention in this connection, the second of the proposal mention in this connection, the second of the second in the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the sec United Province:—A Branch of the Ledy Chelmsford League was established in 1923 and is at present mapping out its course of

Abmadabad.—Three Maternity Homes, and five creebes in mills

Celeutts.—Six Midwife Supervisors and six Health Vinitors with subordinate assistants and six Red Cross Child Welfare centres

Daces —A scheme for the training of indigenous dats was opened in 1921 and is meeting with marked encouse

Lakors.-Baby Welcome and 2 English Health Visitors

Lyallpur -1 Welfare Centre

Simis -1 Welfare Centre and Health Visitor employed by the Simla Municipality

Ludbiana -- Moch good work under W C M College

Stalbot -

Dehra Ismail Khan --

Lucknow -- Municipal Scheme and Midwife Supervisor

Agra —Training of date under Victoria Memorial Scholarship Fund

Allahabad -Three Red Cross Child Welfare

Barelly,-Maternity Scheme opened by Mrs Stubbs in 1922

Shahiahanpur --

Gorakhpur, Hardwar, Almora -Jubbulpore, Nagpur, Bhopal, Kapurthale, Medak -

Bangalors - Creche, two English Health Visitors and 7 Midwives

Quetia .- Two Red Cross Child Welfare centres Pashawar.-One Red Cross Child Welfare contro

Indors -One Red Cross Child Welfare centre

Secunderabad -One Red Cross Child Welfare centre and a Convalescent Home for Mothers, three Red Cross Child Welfare centres for Bri tish Children

Coorg -One Red Cross Child Welfare centre So far all the schemes have devoted their attention to combating the prejudices of the mothers in respect of new born children. In a land of so many languages and superstitions progress will uccessarily be slow and India has yet to decide whether she will work intensively yes to decide whether she will work intensively and try to rear a few well developed children as far as adolescence or extensively attempt to bring a large number of infants through the first critical months, only to have them perial at a later stage from the many like that childbood is hely to line land of great poverty onder-non rishment, epidemics and famine in Westers tands the Child Welfare Movement has no more marked characteristic than its inability to stor expanding Its ramifications know no bounds Its inevitable corollaries are endless, and like the banyan tree it will no doobt in India also develop innumerable freeh roote, medical soper vision, dental clinics, better hoosing, open an playgrounds, etc. etc. But these are not yet Its preliminary task is to educate the mothers of India to the enormity of allowing two million babies to perish every year and to convince them of the equally important fact that a high death rate always spells also a high damage rate of sickly, under-developed, incompetent citizens

#### INDIAN RED CROSS SOCIETY.

When the war first broke out, what is generally termed Red Cross work was undertaken in India and Mesopotamia by the St John Amhulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the John War Committee of the Order of St John of Jerusalem Committee of the Order of 85 John of Jerusalem and the British Red Gross Society. The final report of that Committee shows that up to The State of the Committee shows that up to The State of the Committee shows that up to The State of the Committee shows the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Committee of the Co It closed its career in June 1920 under the

in a world wide League of homanitarian societies A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Im-perial Legislative Council in March 1980, and duly passed into law as Act Xv of 1990. The Act handed over the balance of the John War Committee to the new Scolety, and amborised it not only to direct the nillization for war purposes of the capital rands at its disposal bat also to devote the interest, as far as possible, for evit purposes. The Act allows the constitution of anticomolecular to the Act allows the constitution of the Council of the Act and the Council of the act and the Council of the Act of the Council of the heat the task lies of organizing and stimulating the new civil activities of the Ead Cross through-out India. Provincial Societies have now been constituted in all provinces, Central India, and was introduced by Sir Claude Hill in the Imconstituted in all provinces, Central India and Delhi, in Bengal the Society was constituted by a special Act of the Bengal Legislature

soldiers and saliors, whether they have con tracted the disease on active service or not

Child welfare

4. Work parties to provide the necessary garments, etc., for hospitule and health institutions in need of them.

Assistance required in all branches of amuseuro required in all branches of nursing, health and welfare work, ancillary to any nrganisations which have or may come into being in India and which are recognised by the Society

6 Home Service Ambulance Work

7 Provision of comforts and assistance to members of His Majesty's Forces, whether on the active list or demobilised.

Constitution—His Excellency the Viceroy is President of the Society The Managing Body ardinarily coastist of a Chairman to be assumed to the Society of the Society of the Managing the Society of the World of the Society of whom 12 are the vice-President and 25 members of the Society of whom 12 are the Vicerophical or State Branches, Selected by Provincial or State Branches, Selected by the Society at the Annual General Meeting from among the members of the Society and 5 nominated by the President

The present Chairman of the Managing Body is the Hon ble Sir Frederick Whyte, Kt and the Organizing Secretary, Lieut Colonel H Ross, cash balance of Rs 59 074

Finances.—The operations of the Joint Wal Committee were brought to a close in Jame 1920 with a capital investment of the face value of \$2.50,000 and \$2.50,000.00 in Gooting and fixed deposit accounts. The Society has since invested further funds in various securities and its finances in July 1921 stood at a capital investment of the hace value of Ba 6,25,000 and about Ba 65,000 in first and finances of the Society (which is \$1 lakes at present after providing for certain liabilities of the Central Society is distributable under the Act to the Provincial Branches in proportion to their contributions to the Central "Our Day" and its finances in July 1921 stood at a capital Fund in the year 1920, partly owing to the Central Society's heavy commitments on the North West Frontier, and partly due to the fact that the Provincial Branches had not been lact that the frounds irrances had not seen fully formed, only a sum of Rs 32,090 was distributed. In the year 1921, however, Rs 12 lakb was set aside for distribution to Branch Societies, in 1922 Rs 2 lakhs, and in 1923 Rs 22 lakhs. At the end of the year the Society possessed Government Securities of the face value of Rs 66 35,000, the market value of which was quoted at Rs 63,37,428-8-0, also a

#### St. JOHN AMBULANCE ASSOCIATION

The St John Ambulance Association was founded in 1877, by the Order of the Hospital of St John of Jerusalem in England, and has for its objects -

(a) The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured.

(b) The instruction of persons in the elemen tary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick

(c) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, fac-tories, and other centres of industry and traffic,

(d) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps,

(s) And generally the promotion of instruc-tion and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class, nationality, or denomination

An Indian Council of the Association was constituted in 1910 It has since issued 96,910 certificates of proficiency in First Ald. Home

Nursing, Home Hygiene and Sanitation and 4,536 tokens such as Vouchers, Modallions, Labels and Pendants for special proncincy in those subjects. The object of the Association is not to rival, but to slid, the medical man, and the author matter of instruction given at the classes qualifies the pupil to adopt such mea sures as may be advantageous pending the doctors arrival, or during the intervals between his visits

In 1923 the Indian Council spent Rs 39 465-11 0 in furthering its objects and closed the year with Govt securities of the face value ot Rs 85,000 and a cash balance of Rs 1,912 8 0 Of he So,000 and a casa Dalance of he 1,912 S U The Association has five grades of members namely, Patrons, Honorary Councillors, Life Kembers, Annual Members and Annual Asso-clates Their respective subscriptions are Rs 1,000, Rs 500 Hs 100, Hs 5, and Rs 2

Their Excellencies Lord and Lady Reading and General Lord Bawlinson as President, Lady and General Lord Rawlinson as President, Lady President and Chairman, respectively, with 17 members formed the Indian Council in 1923 The general business of the Indian Council is conducted by an Executive Committee with the Hou bie 5tr Prederick Whyte, Kt. as Chairman and Li-Colonnel H Ross, O.I.E., O B R. I.M S., as organising Secretary

## LUNACY AND ASYLUMS IN INDIA.

The accommodation for mentally afflicted treatment of the issane, is still worse as no persons in British India is, like that for those Asylume axist there at all, so that those whose afflicted bodily, very inadequate. In the nutsidy is such as to remder their freedems a Mative States, the condition of affairs as regards public menace, see for the nest part condition the provision of institutions for the care and in the local jakis.

in the United Kingdom the proportion of imane to sane is roughly 40 per 10,000, while

According to the Census Reports of 1911 in New Scaland it is as much as 45 per 10,000 out of a total population of 315,156,396 (India In reviewing these figures it must be beare it man Burma), there are 61,000 persons incases making a proportion of issues to same of 5 per 10,000 in the United Kingdom and New Zealand include the "feeble-minded," term that is not included in the figures for the United Kingdom the proportion of British India.

#### INDIA.

Eccuritment of the service I Indian For the Council which includes the Director General, Indian Medical Service, the Honorary Secretary to the Council and the Ohiel Medical Officer, Women's Medical Service, (b) in England, by a sub-committee, including a medical man and two medical vomes obstantiatives performed online of a medical board examining candidates for physical fitness, and for return to othy after invaliding.

The Council determines what proportions of the members of the Service is to be recruited in Bingland and in India respectively In the original constitution of the Service, duly qualified medical women who are in the service of, or who have rendered approved service to, the Countess of Dufferia's Fund, are to have the first claim to appointment, and thereafter apocial consideration is to be paid to the claims of candidates who have qualified in local institutions and of those who are natives of India.

Qualifications.—The qualifications are that the candidate must be (a) a British Colony or in British Colony or the British Colony or the British Colony or the British Colony or the British Colony or the British Colony or the British Colony or the British Colony or the British Colony or the Colonia Colony or the Colonial Colony or the Governor-General of India. of through any Governor-General of India or through any Governor-General of India or through any Governor-General of India of India. (b) Must be between the ages of twenty-four and thirty at entry (c) She must be the Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial Colonial

Pay -The rates of pay are as follows -1st to 3rd year Rs 450 per month 4th to 6th 500 ,, 9th 550 ٠, \*\* 600 10th to 12th ., .. ,, 18th to 15th 16th to 18th ,, 650 ٠ ,, 700 19th to 21st 750 .. ٠. 24th ,, •• 25th and after 850

also an oversess allowance of Es 100 per month to those below 12 years' service and Rs 150 per mouth to those of 12 years' service and over Bat no member can be confirmed in the 500-rupee grade unless she has passed an examination in ruch vernacular as the Pro vincial Committee shall prescribe. In addition turnished quarters are provided free of rent or a honse rent allowance to be determined by lieu of it.

Officers of the Service are permitted to engage in private practice provided it does not interfere with their official duties, and the Provincial Committee has the power to deter mine whether such duties are thus interfered with Except in very special cases retirement is compulsory at the age of fifty five Anoficer whose appointment is not confirmed, or who is dismissed, is granted an allowance sufficient to pay her peasage to England

Leave Rules — (a) Casual Leave, which is occasional leave on full pay for a few day, and is not supposed to interrupt duty (b) Leave on swrage pat is granted up to 2.11 of an officer speriod on duty, according to Fundamental Eules More than eight months leave the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of the suppose of t

There is also a Provident Fund, each member contributing monthly hereto resident sealors, the Association contributing contributing monthly hereto resident sealors, the Association contributing association to the sealors of the Association of the Association of the Association of the Association of the Association of the Association without risk to the funds of the Association.

The officer losse her contributions if she resigns (except on account of ill-health) before completing five years' service, or in the even of damissal. On retirement after approved service the aum which has secumulated to the credit of the subscriber is handed over to her

The Lady Hardings Medical College — The Ledy Hardings Medical College, Hospital, and Training School for Nurses and Compounders Training School for Nurses and Compounders are intended to commensurate the visit of Her Imperial Majesty to India in 1911. The foun dation stone was laid by Lady Hardings on March 17th, 1914, and after her death three months inter it was sutgested by Her Imperial Majesty that the institution should serve as a incomorfial of its founders and be called by her name. The of the founder and the cashet by the mane the college was opened by Lord Hardlings in Febru ary 1918, and the Hospital by Lady Chelmaford in March 1917. The College is managed by a Governing Body, of which the President is the Director General of the LMS, and the members include the Chief Commissioner of Delhi the Chief Engineer of Delhl, the Chief Medical Officer Chief Enginer of Deini, the Chief Reducal Omer's Women's Medical Service, a representative elected by the All-India Association of Medical Women and a representative of the Educational Service, also co-opied members of the Indian Legislature The Homorary Secretaries, who are also members of the Governing Body are the Surgeon to His Excellency the Vicercy and the Surgeon to his excemence the viceroy and the Deputy Secretary in the Department of Educa-tion and Health The Deputy Accountant General, Central Revenues, acts as Honorary Treasurer

The main object of the Institution is to provide complete courses of instruction to Indian women who wish to qualify for a University degree in medicine or to receive a full training as Nurses or Compounders

An additional object is the provision of medical, surgical and obstetrio treatment for women, having a due regard to paralah and caste customs. The patients are either treated in the Hospital Wards or are permitted to reside with their families in separate cottages built for the purpose

The National Association for Supplying Medical Aid by Women in India was founded by the Countess of Dufferin in 1886 the object being to open women's hospitals and women's wards in existing hospitals to train women doctors, nurses and midwives in India, and to bring these ont when necessary from Europe An endowment fund of about 6 lakhs was obtained by public subscription In addition Branches were formed in each Province, each Branch having its own funds and each having a number of Local Committees and Zenana Hospitals amliated to it

The Central Fund gives grants-in-aid to several Provincial Branches, it gives Scholarships to a number of women atodents at the Medical schools of Bombay, Calcutta, Madras and Delhi, it gives post-graduate scholarships for study in the United Kingdom It has in the past brought from England a certain number of Eoropean medical women It has assisted by grants-in

#### NITESING.

Whilst India cannot show the complete chain of efficiently-nursed hospitals which exists in England, there has been a great device of the control of the control of the control of the control of the control of the Engla, Madras, and Bombay Presidencies, where the chief hospitals in the Presidency towns are well nursed, and where large private staffs are maintained, available to the general public on payment of a praceribed scale of feet. These hospitals also set as training in the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the c

State Registration of Nurses for all India is much required A meeting was held in Rombay in 1923 when Nurses from the Presidency met to discuss the question. It is desired that india should have its own State Register as in the unioud five its own State Register as in the United Kingdom, South Africa, New Zealand, Answalls, Canada und Burms, and that the curricula and examinations should be brought into time with these countries. Government has proposed to establish a Provincial Register preparatory to an All-India Register.

The first steps were taken on the initiative of Mr L. B. W Forest at 8: George's Hospital, Bombay, where a regular nursing coder for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar mover cases. This was followed by a definite mover wards approach to other hospitals in the Presidency Ultimacily, the Government laid of own a definite principle with regard to the financial sid which they would give to such institutions, agreeing to contribute a sum equal to that raised from private sources. Afterward, as the work grew, it was decided by Government that cach maring association attached to a that each nursing association attached to a hospital should have a definite constitution and consequently these bodies have all been registered as Associations under Act 21 of 1880 By degrees enbetantial endowments have been by degrees our annual manual mayor bulk up, although the Associations are still largely dependent upon annual subscription towards the maintenance of their work. Ahmednagar Civil Hospital Nursing Association Hon, Secretary Civil Surgeon,
Ahmednagar

After further experience it was feit that it is undestrable to have a considerable number of undesirable to have a considerance unmore detached and independent numing associations, training and certifying nurses, without any common standard of entrance examination, or common standard of entrance examination, or common standard of entrance examination, or common standard of entrance examination, or common standard of entrance examination, or common standard of entrance examination, or common standard of entrance examination, or common standard of entrance examination, or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or common standard or comm continuation It was therefore decided to establish the Bombay Presidency Nursing Association which came into existence in the

The principle on which the Bombay Presiden of Nursing Association works is a central system of examination, certification, registration and control. It is now the only nursing, examining, registering and certifying body in the Bombay residency. At the same time, the local associations retain entire charge of their local much excepting. Provident funds which have been transferred to the Central fund, and she entire control of the nurses when they are in their employment Proposals are now before Government for absorbing the personnel of the local associations into a Presidency Nursing Associ-ation This will not however affect the indi viduality of local associations which will continue to control their own funds and to exercise control over local establishments, subject in the latter case to such limitations as a revision of

the nature in question will require.

The association commenced its operations on the lat April 1911 The institutions recognized under the by laws for the training of nurses at present are-set, decure's Hountal, J. J. Hospital, Cama and Albless Hospital, Bai Motiabai Hospital, Cama and Ables Hospital, Bai Modishal Hospital, Bombay, Hutsching and Premabai Civil Hospital, Ammedabad, Civil Hospital, Surat, Karachi, Saspam, Morarbhal Vrijbankhandas Hospital, Surat, Karachi Civil Hospital, Karachi, Saspam, Hospital, Poona, State General Hospital, Surat, Karachi Civil Hospital, Karachi, Saspam, Manghal, Poona, State General Hospital, Sholapur Sant he following for the training of Midwives M. Address—The Secretary, Bombay Presidency ursing Association, Secretariat Bombay

Mon Heeretary, Lt. -(c) B B Paymaster, Lytisteron, Lady Heisen Munro Frequesc Abmedinagar Civil Hospital Nursing Associ atlen Hon, Secretary Civil Burgeon, by her indefatigable efforts, is truly emittled by her indesargance errors, is truly emissioned to be regarded as the pioneer of a trained nursing system throughout the greater part of india The late Lady Curson worked energistically to provide an enlarged Nursing organisation, but mainly owing to financial reasons, she was unable before she left Ludia to bring she was unable before she left Ludia to bring the scheme to fruition The Home Committee of the existing Association, recognising the need for expansion, consented to take over the present Association and approached Lady Minto before she left England in 1905 for cooperation towards this project, and after much consideration and discussion with the Government of India, Lieut -Governors and Commissioners of Provinces, the present Association was established An appeal by Lady Minto, addressed to the public both in England and India, was responded to most generously, and sufficient funds were collected to form an eadowment fund, which has in spite of fluctua-tions increased a little with time. The assistance of a Government grant is much valued, as it enables Homes for the Sisters to be kept up in six Provinces in India and in Burma. At the request of the Home Committee the enlarged Association was renamed the "Lady Minto a Indian Nursing Association"

The duties of the Home Committee are, as before, largely concerned in dispatching required—suitably trained and carefully select Nurses for service on the staff of the Association in India Thus, Europeans who are members of this Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient The boon of obtaining good nursing at moderate terms is much appreciated the rates of subscrpitions being really an insurance against limes Her Majesty the Queen is a Patron of the Association Her Excellency the Countess of Reading is President of the Central Committee

#### THE WOMAN SUFFRAGE MOVEMENT.

Within the abnormally abort period of position of exclusion by British law from any seven years the Woman Suffrage movement has rise in India, swept through the country interpreted to go their own sex, Mr. Beanz, sympathetically and achieved the political stimulated political activity and political self-suffragablesment of women in four of its most conclusions amongst women to a very great progressive Provinces and in four Indian

Three fundamental causes have led to this remarkable encoses first, the deep veneration that is given by the Hindn and Muhammadan religions to the feminine aspect of life equally with the masculine as shown by the import ance of goddesses, hy the necessity for the presence of the wife at all ceremonics performed by a Brahman by the idea of the sacred mystery of womanhood implied by the pardab and hy the general veneration of motherhood Secondly, the time was psychological, for a new era was beginning for the Indian people by the intro-duction of a Scheme of Esforms in Indian government which was planned to give a basis of representative government on a much extanded seed. The door was being opened to complete Self government and only men were being invited to enter through it although being invited to enter turough it attought women compose half the people of the country and it had been by the joint effort of men and women that the agitation for reform in the government had been made. The men and women of India were too awake and too just to allow this injustice to remain unredres sed Thirdly, the long and strennous agi-tation for the vote hy women in Britain and America and their recent victories had brought vividly to the consciousness of ell educated Indian men and women the whole question of the inclusion of women in public life, and it was also a national and international necessity that Indian women should be given as high a status as women in other parts of the Empire

Though the Municipal franchise had een granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so ilmited in numbers that it did not make a large impact on women'e consciousness and indeed no protest was made when it was sudindeed no procest was made when he was soundedly withdrawn from Madras women come years later. Over 1 700 women are qualified to vote for the Bombay Corporation and a fair percentage of these have polled at each elec-tion, and similarly in other Municipalities in that Presidency women have exercised their work responsibly and intelligently Since 1922 twenty two women have become Municipal Councilions end members of Lood Government Housele, four of whom were clerked by Bombay

extent The moment for the ripe public expresof State for India came to India to investigate and study Indian affairs at first hand in 1917

During the Hon E S Montagu's visit only one Women's Deputation waited on him but it was representative of womanhood in all parts of India, and it brought to his notice the various reforms which women were epecially desirous of recommending the Government to carry out

The first claim for women suffrage for Indian women was made in the Address presented to Mr women was made in the Address presented to Mr Montagu at this historic Ali-India Women's Deputation which waited npon him in Madna on the 18th December 1917. The section refer ring to entranchisement merits rull quotation Our interest, as one hall of the people, are directly affected by the demand in the uniformal filled is said in Restoral scheme (I 2) that "the

(Hindu Muslim Reform) scheme [1 3) that "the Members of the Conneil should be elected directly by the people on as broad a franchise as possi-franchise should be broadened and extended directly to the people". We pray that, when ench a franchise to being drawn np, women may be recognized as "people," and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men In agreeing with the demand of the abovementioned Me morandum that" a full measure of Local Self Government should be immediately granted." we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self Government elsewhere in the British Em pero The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which eince its inception women have voted and hear delegates and speakers, and which the year finds its dimax in the election of a woman as its President. Thus the votes of India approves of its women being considered responsible and acknowledged ditisens, and we urgently claim that, in the drawing np of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public

The year 1919 was devoted to converting the They were, the others having been nominated.

The was owing to the rise of the political agriation for flows Rule between 1914 and 1917 proved a more difficult matter. It was distinct women began to wake up to their appointment first that though the Scorelary of State had given a sympathetic reply to the Ail India Women's Deputation yet when the Scheme of Reforms, drawn up by him and Lord Cheimsford as the outcome of his visit to India was published no meution of women was made, was purmaned to incurred of women was made, though the widening of the electorate was one of the reforms suggested. When the South borough Franchise Committee was formed to investigate the suggestions regarding the investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee ell the evidence which showed the need for and the country's support of the included of women in the new franchise

After the introduction of the Government of India Bill into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parilament which had been appointed to place the Reforms on a workship basis Mrs the Beforms on a workable basis Mrs Annie Besant Mrs. Sarojiul Naldu aud Mrs aud Miss Herabal Tata were the women who were heard by the Committee in support of the extension of the franchise to women in

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should decide by a Resolution in favour of women's franchise, women should be put or the electoral register of that Province This was the only provision regarding franchise matters which might be changed before a 10 years time limit Until after that period women are incligible for election as Legislative

Councillors Travancore, a very progressive Indian State, was the first to grant the Legislative vote to women at the close of 1920, and it was promptly followed by the Indian State of Jhalawar In the first session of the Legislative Councils in 1921 it is gratifying to record that a motion was tabled by Dewan Bahadur Krishnan Nair of Malabar that he would bring forward a Resolu tion in the Madras Legislative Council to remove the disqualification of sex existing in regard to the Legislative Council franchise During the mouth that must legally intervene between the tahling of a Woman Suffrage motion and its lutroduction for Debate the Madras women under the leadership of the Women's Indian Association carried on all forms of public propaganda and canvassed the important members of the Council The Debate took place on April 1st and after a short discussion, lu which it was let and after a short discussion, in which it was ordent that opposition came only from the Muhammadan members, the debate itself became only an accumulation of appreciation of womanhood and an expression of faith in its future whose the division was taken, it resulted in the Besolution being carried by a majority of the division was the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division of the division o

Council during the same session but some irre-gularity in its wording caused it to be pronousced out of order In June that subject was tabled again and champloned by Rao Sahab Harilel Deschibal Desai of Ahmedabad, Deputy President of the Council As in Madras the ultravening mouth was filed with suffrage activity by the women of the Presidency and accavity by the women of the Freshuency and was remarkable for a large joint meeting of Bombay city women at which 19 Women s Scolettes took part, and for a suffrage meeting of Marathi and Gujerati women in Poona when over 800 women showed the greatest enthuslaam for the movement

The Bombay Conucil Debate ou Woman Suffrage took three days and the subject was Suffrage took three days and the subject was very fully discussed most by over 40 members. The result was satisfactory to the suffragists, the voting being 62 in favour, 25 sgainst and 12 neutral. Thus Madras and Bombey Predi-Jondies gave the lead to the other Provinces In September, 1922, Mr. 8 M. Bose, in the Bengai Countle, moved a Woman Suffrage Reolution, which was delated for three days but finally defeated by 56 to 87 votes, a bloc of 40 Muhammadan members voting solidly against

Mr Devaki Prasad Sinha's similar Resolution la the Bebar and Orissa Legislative Council

was defeated by only a 10 votes majority These Debates proved so educational to their respective Provinces that Bihar Provinces has since granted qualified women the Municipal vote and women have also been included as voters in the new Calcutta Corporation Act

In February 19°3, a world enfirage record was made by the unanimous vote of the United Provinces Legislative Council in favour of

Woman Suffrage
The new Beform Bill for Burma has included the grant of woman suffrage to the qualified Burmese women, and further made provision for their election as Councillors if the Council passes a Resolution desiring their admission and if that Resolution is approved of by the Governor

In April 1922, the Mysore Council unanimously passed the Woman Suffrage Resolution The vote for the Representarake also outlon The volt for the Representa-tive Assembly of Mysore was granted to women in October, 1922 The vote for Mysore Legis-lative Franchi e was granted to the Mysore women by H H The Maharaja and His Privy Council lu Tuue 1923

There is little doubt that it will be only a few years at most before all the provinces of India will have granted woman suffrage, and the right to vote will advance the interests of women immensely along the lines of education,

women immediately along the fines of enterstand, health housing, morality and social outsions. The Indian Native States of Cochin and Rajkot are the only places in India where the sex dis-qualification has been completely removed from the statute book. These have allowed women the right to stand for election for the Legislative in the Resolution being carried by a majority of the could as well as the right to to the first Province in British India to entrauchise its women, and it has done to ungrudetnisty and unhestlatingly and in the broad spirit of the couldity of the saxes, as it grants the vote to women on the same terms as it has been granted to men.

But Trivedi brought forward a Woman is the same than the same term as it has been granted to men.

Mr Trivedi brought forward a Woman is the same than the same term as the same term as the same term as the same term as the same term that the same term to the same term as the same term that the same term to the same term as the same term to the same term as the same term to the same term as the same term to the same term as the same term to the same term as the same term to the same term as the same term to the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same term as the same

right remciss as a further objective of the woman in the contract of the country as a further objective of the country as well as those who meetings have been held old-ning the right of women of the country as well as those who women to corry of the Legislatures. A dapar tested of the country of the Legislatures and the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the the Madrie Governor and their claims were supported by him and by his Government. The Imperial Legislative Assembly and the Council of State have been accorded the power to spant women the franchise for Chair messablikes also by resolution, but out for messablikes also by resolution, but out for the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the council of the counc Assembly has passed by a large majority a Resolution granting the Assembly franchise to the women of such Provinces Accordingly in November 1928, women in India voted for the first time for the elections of both Provincial first time for the elections of both Provincial Legislative Councillors and members of the Legislative Assembly The number of women who voted in the large Cities was surprisingly large in Bombay and Matrias Presidencies and

Council elections

Though the Women's Indian Association is the only defined Suffrage Society almost all other women's organisations have combined all other women's organisations have combined in special efforts for the gaining of municipal and legislative rights and the following ladies have identified themselves specially with the movement Lady D Tata, Lady A Bose, Lady T Sadasivater, the Begum of Cambay, Krs Sarojini Natius, Mrs Julii Johangir Petit, Mrs Tata, Mrs Wedla, Mrs Jinarajdasa, Mrs munities and cases and com Mrs Tata, Mrs Wadia, Mrs Insangir Petit, a Beant, Mrs Wadia, Mrs Insangiadasa, Mrs Tata, Mrs Wadia, Mrs Insangiadasa, Mrs Tata, Mrs Wadia, Mrs Insangiadasa, Mrs Tata, Mrs Wadia, Mrs Insangiadasa, Mrs I

#### PUBLIC SERVICES COMMISSION

On January 25, 1928, the intention of Government to appoint a Royal Commission on the Services in India was announced in the Legislative Assembly On the following day Myschell Airst moved the adjournment of the House to consider the announcement, and was House to consider the announcement, and was strongly supported among others by Sir Deva Frased Servatchikary, Dr Gour and Mr Jain-nadas Dwarkadas A remarks ble feature of the debate was the unanimity between the Ludian and the European elected members. Both Mir Speace and Sir Montagu Webh con-damned the Commission. The only non-official supporters of the Commission who golds was Colonel Ofting's and Khan Bahadur golds was Colonel Ofting's and Khan Bahadur Zahiruddin Ahmed In justifying the appointment of the Commission Sir Malcolm claimed Eahrddin Ahmed In justifying the appointment of the Commission Sir Malcolm claimed that it had the support not of an "utra-conservative Of State" but that of the Montage Interest that the State is that of the Montage Interest that of the Montage Interest carefully through the reasons which had led to the appointment of the Commission, and constuded that a very thorough investigation by a fair and independent body was essential to adjust the various questions, some of them conflicting, that had assentiate, as many them to the service of them conflicting, that had assentions, some of them on one of the service and the service and the service and the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of the service of

majority in spite of Government opposition The item has since been restored

The terms of reference, announced in March, 1928, are as follows -

A Press Note legued in November, 1914, states -The Government of India have recently states —The Government of India have recently bed under consideration the question of the position in which ministeries of Indian titles should be worn, and have decided that they should be worn on the self, breast latence by a ribboo as prescribed in the case of the Badge Itself When the ministers are worn in conjunction with other decorations, they should be placed immediately after the Kalser-Hillad Michael.

Indian Distinguished Service Medal.—This medal was instituted on Juno 28th, 1907, by an Army Order poblished in Simla as a reward for both commissioned and one commissioned officers of the regular and other forces in India It bears on the obverse the bust of King Edward VII, and on the reverse a laurel wreath energy ing the words For Distinguished Service The medal, 13 inches in diameter, is ordered to be worn immediately to the right of all war medals

announcement in the pay of the recipions, and in the event of Durker in 1911, it is death the allowance is continued to his order period of the granted to the state of a state of eight points, 1 in in dissenter, that is not a state of eight points, 1 in in dissenter, that is not be expected as a good of each buse a good of each buse constions were wreaths of laurel in gold. The Scored Class concerd hall be a gold, and the Pairel Class entirely of allowing the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control in width with red edges, bearing a gold or silver buckle according to class

Order of British India, -This order was toetituted at the same time as the Order of Merit, to reward native commissioned officers for long and faithful service in the Indian Army for long and faithful service in the indian Army Since 1878, bowers, any person European or native, bolding a commission to a native regi-ment, became eligible for admission to the Order without reference to creed or colour The First Class consists of a gold eight-pointed radiated star 11 in in diameter The centre is radiated star 14 in in diameter. The centre is cocopied by a lion statust gardant upon a ground of light-blue enamel, within a dark blue and inserted Order of British India, and endriedd by two laurel wreaths of gold. A gold loop and ring are attached to the crown for suspension from a broad ornamental band (a in in diameter, through which her ribben, from the order of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the common of the comm or is formed of an ormanental gold loop. The reverse is plain in both classes. The First Class carries with it the title Birdar Bahagur, and an additional allowance of two repees a day and the Second the title of Bahadur, and an

and the Second the title of Sensaur, and an extra allowance of coor pupe per day.

Indian Meritorious Service Hedal.—This was instituted on July 27th, 1886, and on receive of the medal the order states "a con-commissioned officer must sorrender his Long Service and Good Condoct medal" but on best was the property of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control

# THE KAISAR-I HIND MEDAL.

This decoration was instituted in 1900, the adequate means whereby We can reward presemble to the Royal Warrant—which important and machin services rendered to was amended in 1901 and 1912—being as Us in Our Indua Rmpfre in the advancement follows:— Whereas We, taking into Our of the public interests of Our add Empire. Royal consideration that there do not exist and taking also into consideration the ex-

posissory of distinguishing such services by Calman, Denis somes mark of Our Royal invour Now for Campbell, Oxionel Str. with him all day and night In the early morn with him all cay and night. In the early morn jot use useful are possessive states as well ing of the 26th September, in misty weather, he verifies his message although on each occasion brought him out through the German wire, and, his horse was shot, and he was compelled to leaving him in a place of comparative safety sinth the journey on foot secogn aum out surrough the terman wire, and, his horse was enot, and he was compeled to saving him in a place of comparative salety finish the journey on foot second the saving him in a place of comparative salety finish the journey on foot second carried to the saving saving the saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving saving

be dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded he had already bandaged four wounded me. After bandaging his wounds he heard alles from the Adjutant of his own Regiment who less lying in the open severely wounded. The answer was lying in the open severely wounded The casemy were not more than one hundred yards dissuits, and it seemed occitain death to go out then the ary fire from both flanks, he opened fire in that direction, but Lance-Raik Lais issuised and knocked out the cosmy machine gun crew dissuits, and offered to fire. He key his gun in action, and showed the casemy bomber to him Adjutant,, and offered to fire. He key his gun in action, and showed the case which we had to be partially all the second of the way for from the casemy bomber to this was not permitted, be stripped off his own this was not permitted, be stripped off also was also shaped with him till just before dark when

The amouncement, made at the Delhi Durbar he returned to the shelter. After dark he carried in 1911, that in future indians would be eligible the first wounded officer back to the main for the Victoria Oross gave assistated which which trends, and then, returning with a stretches was increased during the War and afterwards by carried beet his Adjutant. He set a magnitude with the control of the deceased of the carried beet his Adjutant. He set a magnitude of the carried beet his Adjutant. He set a magnitude of the carried beet his Adjutant. He set a magnitude of the carried beet his Adjutant.

Sepoy Chatta Singh, 9th Bhopal Infantry For most conspicuous bravery and devotion to duty in leaving cover to sesist his Commanding officer who was lying wounded and helpiess in the open Sepoy Chatta Singh bound op the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very beavy rifle fire For five hours until nightfall be romained beside the wounded officer.

first to jush round each successive traverse, in macono-gun section in an exposed possions a-the face of severe fire from bombs and rifed at the face of severe fire from new line with-the closest range.

### PASSPORT REGULATIONS.

#### A .- British Subjects.

- 1 British Indian passports are only issued to British subjects and to British protected
- 2 The Indian Passport Regulations do not require persons to obtain passports before embarking from any port in British India, hat as practically every other country requires travelers to be in possession of passports for landing, travellers are therefore advised to have passports before embarkation Members of Hie Rightly 8 Navil, Military or Air Forces or of the Royal Indian Marine Service travelling on day when twevelling to the United Kingdom on Military entitled passages need not have passports
- 3 Passports are not required for journeys by ses from Bombsy to British ports in India or to Burms or Ceylon, nor are passports required by British Indian subjects travelling to the Federated Malay States or the Straits Settlements, unless they propose to continue their journey onward
- 4 As a passport is valid for two years, there is no objection to anyone applying for a passport weeks or even months in advance of the date of saling, and much inconvenience will be avoided by sarry application. A notice of at least four days should be given for the preparation of a new passport and at least two days for an endorenesses, renewed or visa.
- 5 in order to obtain a pasport an application form showing among other things, the caseons for the proposed journey, must be filled up by the applicant and certified by a Political Officer, Magistrate, Justice of the Peace, Folice Officer not bolow the rath of Superintendent, or Notary Public resident in India Copies of this form can be obtained from any District Magistrete, from the Commissioner of Police, Bombay, by post from the Pasport Officer to the Government of Bombay, by personal applications of the Covernment of Bombay, by personal applications of the Covernment of Bombay, by personal applications of the Covernment of Bombay, by community of the Covernment of Bombay, by personal application and a fee of Ra. 8 should be autumitted with the application form Fees are not accepted in stamps or by cheeper.
- 6 The application form when filled up should either be posted with the photographs and fee to the Passport Officer to the Government of Bombay, or should be presented in person at the Passport Office, Bombay
- 7 The Passport Office in Bombay is situated in the Civil Scoretariat The office is open from 11 a.m. to 4 p.m. daily, except on Saturdays when it closes at 1 p.m. and on Sundays and public holidays when it is not open at all
- 8 The Passport Officer cannot issue passports outside the working hours shown above, and the preparation of a passport takes time. Applicants, therefore, who postpore application to the last moment do so at their own risk;

Iraa

- 9. Members of His Majesty s Naval, Military or Air Forces or of the Indian Forces in uniform, and bona fide, Muhammadan pilgrims travelling in organised perties and holding a pilgrim pass do not require passports for the fourney to Iraq Ali other travellers must be Faitney to Iraq All other travellers must be a possession of passports, which, except in the case of bona fide representatives or firms, will as the granted without the previous permits alon of the local authorities in Iraq The Pass port Officer will on request, ask for this permits of the property of the permits of the local authorities in Iraq The Pass port Officer will on request, ask for this permits of the permits of the deray the cost of a telegram by cable Appli following countries of not require a British cants must state clearly the nature of their visa for travelling to the United Kingdom business and dive one or more references in 16th accounts a subules to certain nationals.
- 10 Eastriction also exist our ravel to various parts of the British Empire and to certain foreign countries. Amongst those may be men foreign countries. Amongst those may be men foreign countries. # The Public Trustee.

The office has been a great success, in the seven years that it has been open the value of the trusts in course of administration have smounted, in round figures, to £50,000,000, while the estimated value of Wills lodged in

me insources assumed by the state for breach of trust. In accordance with this minual principle the fees have already been reduced from their original scale, and the cash surplus of fees over expenses, regarded as the nucleus of a reserve fund for all contingencies, is now

The main fees are of two kinds-a fee on capital and a fee on income The fees on capital are taken in two instalments—an instalment of half taken at the beginning, and an other instalment of half taken at the end of a trust—each instalment being calculated at the following rates -

On the first £1,000, fifteen shillings per cent.

On the excess of £1,000 to £20,000, five shillings per cent.

On the excess of £20,000 to \$50,000, two shillings and six pence per cent

On the excess of £50 000, one shilling and Where the income is paid through the Department then the fee is we per cent, np to \$500 a year, and one per cent on any excess of \$500 a year, and one per cent on any excess of \$500 a year, and the per cent on income of excess of \$5,000 a year. The fee on investment is per cent, the Public Travice, out of this fee paying the brokerage. There is power to vary these fees to meet the peculiar circumstances of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period of the period o

who missed. In round agrees, to \$50,000,000, while the estimated vains of Wills lodged in the Department which have yet to mature is put as some \$59,000,000, showing a total value of bestness of all kinds negotiated at \$10,000,000.

Fees chargesbla—The office is now entrely self-supporting and is no charge upon the tax-payer A provision of the Statute declares that the Office is to make no profit but to charge only such fees as may provide the working early such fees as may provide the working processes also consisted to the declares of the constitute of the working of the working early such fees as may provide the working processes also consisted the charge of the working early such fees as may provide the working processes also consisted the working early such fees as may provide the working processes also found that the services of the Department in extending the processes and of the cash surplus of fees over expenses, regarded as the nucleus of fees over expenses. has been found to commend (said to the circumstances of a very large dried of persons similarly disadvantaged. A Declaration of Trust is an inexpensive form of trusteeship by virtue of which the owner practically retains full control over his capital. The property is made over to the Public Trustee either in the form money to be invested or epecifie securities or money to be invested or epecifie securities. Public Trustee executes a short droupon the securities of the property of the property of the securities in trust for the transferor. The result of this is that income, as it accross. The result of this is that income, as it accrues, In the result of the law that income, as is accurate, is paid to the owner or to any beneficiary as he may direct. A wide field of investment is may permissible, as the trust provides that the funds may be invested as the owner may from time to time direct. As the pamphlet sets out interest at the rate of at least 4 per cent is to be included for moder the ashmen from investments. three pences per cent. The Fee an integrated interest stire section to the pences per cent. If, as is susual, the income looked for under the scheme from investment be paid direct from its source to the of a non-speculative character It should be person entitled, on any income in screen understood that this form of trusteeship is not established, on any income in screen understood that this form of trusteeship is not established to the contract of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the stat understood that this form of trustesship is not analogous to a bank deposit, where she return of the capital at par, given the setteness of the bank; is expected. Investments are selected with the greatest care in consultation with the Public Trustes does not accept responsibility for any fluctuation of any of the investments chosen. The fees payable for this scheme of trustesship, so far as the capital fees are concreted, are half those payable in the case of an ordinary settlement. The other fees are the same as the ordinary fees.

The appointment of the Public Trustee secures certain definite advantages inasmuch as he is by Act of Parliament a Corporation Sole and thus it is said the Public Trustee never dres, so that the arpense of appointment of other Trustees is paramently availed. His

integrity is guaranteed by the State, while the vides that strict scorecy shall be observed measure of his success would indicate that he respect of all trusts administered in the Dep is mecessarily experienced and skilled in his mea. duties.

Gose personal attention is given by the Public Trustee and his senior officers to the details of every trust, and as regards the work of investment, a large organisation has been set up to give the best consideration not only to the selection of investments but to the duty of keeping them under frequent observation

As Advisory Committee or men of recog-nised and the property that the second of the special property of the second of the second product by the Lord Chancellor to sasist the Public Trustee by a quarterly review of the Investments made. In the last annual Report the Public Trustee speaks of having secured a return of £3-10-4 per cent. upon his trustee investments and a return of £4-10-1 per cent. upon his non trustee investments

The success of the Department would seem to show that there is a widespread public need in England for such an Office, and the energy and efficiency with which the Department has been constituted and conducted has been a great factor in commending it to the public.
The State Guarantee is also doubtless a factor of great importance. A statutory rule pro-

rved is

The administration is subject to an audit by the Controller and Auditor-General (the Government Auditor), while the internal organisation has been built up upon the principle of a check and counter-check upon the administration.

An important section of the Statute gives the Public Trustee power to direct an audit and investigation of the condition and accounts

Officials in India will doubtless tend to make an increasing use of the Department. As a Government Office, its stability will commend itself to them as a medium to safeguard their interests under Wills or Settlements which can be entirely relied upon, and free from the risks and expense attendant upon any other forms of trusteenip.

Further information upon details and copies of the official pamphlet, reports and rules, etc, can be obtained of the official agents to the Department, ws.—Mesers, Ring, Hamilton & Oo, Calcutt and in Bombey, Mesers, King, & King & Co, whose head office is Mesers. Heavy S King & Co, 55, Combill, London, E.

## THE ADMINISTRATOR-GENERAL.

In India the functions of a Public Trustee are divided in each Province between two officials, the Administrator-General and the Official

The office of Administrator-General was first constituted by Indian Act VII of 1849. There were several later enactments on the au blect, all of which have ceased to be in force. The present law is to be found in Indian Act III of 1913, which contains the following provi-sions—There are three Administrators-General in each of the Presidencies of Bengal, Madras, in each of the Presidencies of Bengal, Madras, and Bombay Their combined jurisdiction covers the whole of British India. The Admini-trator-General is entitled to letters of admini-tration when granted by a High Court, unless they are granted to the next of kin in the other Courts he is entitled to letters in profer-ence to a creditor, a legatee other than a univer-sal legatee, or a friend of the deceased

If any person who is not an Indian Christian, a Hindu, Mohammedan, Peraian, Buddhist dies leaving within any Fresidency assets exceeding the vanc of Bs 1,000 and if no person to whom any Court would have jurisdiction to commit on any Court would have jurisdiction to commit mouth freen his death, applied in such Fresidency for probate or letters of administration, the Administration-flowers is required to apply for letters of administration in case of appelented danger of amenappropriation, deviced in the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contro

General have effect throughout the Presidency but the High Court can direct that they have effect throughout one or more of the other effect taroughout one or more or the con-presidencies. A private executor or adminis-trator may with the assent of the Adminis-trator-deneral transfer the assets of the estate to the Administrator General There are provisions in the Act with regard to the revoca-tion of grants and the distribution of assets When the assets do not exceed Rs. 1,000 in value, the Administrator General may, when value, the Administrator General may, when no probate or letters of administration have been granted, give a certificate to a person, claiming otherwise than as a creditor to be interested. claiming otherwise than as a creditor to be interested in such assets, ontilling him to receive the assets. There is also power in certain events to give such certificate to a creditor. There is a further power to send the resistent of the assets to the country of domiciles of the deceased. The Government of India is required by the Act to make good all sums for which the Administrator General. would be personnelly accept where the Administrator General would be personnelly accept where the Administrator-General and the officers have in no way contributed to the liability. Hability

liability

Fees both on capital and on income are payable out of the estates taken charge of by the Administrator-General. The fees on capital vary from 3 per cent on the gross value in the case of small estates to S per cent, in the case of large cetates. The fees on income vary in the case of large cetates. The fees on income vary in the case of one or eable property from 3 per cent, by the property from 3 per cent, the capital control of the case of the description of the court of the description of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of the case of th

measure compared with what it would be if better and larger boats were available and possible. The West coast is more favoured. From September till April, weather conditions are good enough to permit even diagout cances to the daily. The people of this coast are fond of fish and, as no difficulty is found in beaching cances and so no difficulty is found in beaching cances and boats throughout this scane, the faining population is a large one. The 1021 Comms and conjunction with the Rights. The west coast at more havoured. From September till April, weather conditions are good enough to permit even dugort cances to fish and, as no difficulty is found in beaching cances and boast attroughout this season, the fahing population is a large one. The 1021 Cennus gave 05,684 adults as substitute on shing in gave 00,084 adults as subsisting on manning in dustries in Malabar and S Kanara, a small number after all, considering the immense wealth of these seas. The chief fishes are sardines, of these seas. The chief fishes are sardines, nackerel, eatfishes and jowfishes (bors or got) the two first overshadow all others. So greatly in excess of food requirements are the catches o sardines that every year large quantities are turned into oil and mannre. Fishing ontside the 5 fathom line is little in evidence, save hy the o inclumine is nittle in evidence, save by Rombay boats (Rainaghti) which are engaged in drift notting for bouito, seer and other medium-stized fishes These strangers are an terprising fishers and bring large catches into Malpe and Mangalore and other convenient confres, the material is largely cured for ex-

Fish-curing is practised extensively every where on the finding consts, its present success in due primarily to Dr Francis Day who, after an investigation during 1869-71 of the fisheries of the whole of India, pressed for the grant to fishermen of duty free sait for curing purposes within fenced enclosures. He advocated much cise, but the time was not ripe and the sait congenitors and honourable enforce. His said suggestions and from 1868 a gradually increasing number of yards or bonded enclosures were opened at which sait is issued free of duty and often at rates below the local cost of the sait to Govern ment. At present about 100 of such yards are ment At present about 106 of such yards are scattered along the coast and over 55,000 tons of wet fish are annually oured therein

The pearl and chank fisheries in Palk Bay and the Gulf of Mannar are Government monopolics. The intamed fisharies of Madrus compare
unfavourably with those of Bengal. Many of
the rivers dry np in the hot season and few
of the many thousands of Irrigation tank
throughout the province hold water for more
than 6 to 9 months. As a consequence inland
flasheries are badly organited and few men devote
themselves to fishing as their sole, or even main,
compation. The custom is to neglect planer
the fishery value of these threams and tanks are
there as they are full of what to the top of dide
to the owners or lesses of the their right
tarn out to exist fish. The result is a dearth
of fish throughout the generic part of the year,

Game Association maintain a batchery at Ava-ianche, where quantities of fry are hatched and reared for the replenishment of the streams of the platean

of the plateau

The Madras Department of Fisheries—
As Government ettention has been given in
Madras over a longer period to the improvement
of fisheries, and a larger staff concentrated upon
involved than elsewhere, this or issueries, and a larger stan concentrated upon the problems involved than cleawhere, this Presidency has now the prond position of know-ing that her fisheries and collateral industries are better organized and more progressive than those in other provinces. The credit for the wonderful success which has been achieved and the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the s Suprintendent of Post's and Chank Fisheries, we Assistant Directors, a Master Fisherman and a Cannery Superintendent These are respectively in charge of (a) the departmental scheries (pearling, chantra booke-de-mer, etc.), (b) the co-operative and socio-economic side of the Department's operations, (a) initial pistedulure, and (c) the experimental and demonstrational fish cannery at Chalyam in South Malbater Other officers. have charge respectively of sections dealing with education and industrial work, which include a Training Institute for village teachers, the curing yards, and oil and guano factories

public adultrium, post-pond owing to war con-ditions but subsequently abandoned in Madras the Department controls a small public aqua-rum, deservedly popular as the first and only one on the Asiatic mainland.

Fishing rights in the large irrigation tanks were transferred from Government to local authorities many fears ago these tanks are now being resoquired by Government in order that they may be restocked periodically by the Department, the results so far have shown a proper meet to the restrict so far have shown a profit on the operations. To breed the necessary try, three fish farms are in operation and the construction of three more is in progress. In these the chief fish bred are the Gourami, obtained from Java, the Murrel and Etropius suratessis, which has the excellent attribute of thriving and breeding as well in brackish as in fresh water, all three protect their eggs while developing a useful habit, both the Goarant and Etrophus are largely vegetarian in diet. A further activity is represented by the breeding of small falses specially addicted to feed poor the aquatic larves of mosquisces. These are supplied in thousands to municipalities and Miner local authorities at a nominal price, for introduction into magnifer hands are supplied in thousands to make the development of the supplied in the supplied of the supplied in those places where the local authorities have given more attention to the breeding as well in brackish as in fresh water, successful in those piaces where the local au-thorities have given proper attention to the directions given. The educational work of the Department is becoming one of its most im-portant branches whether it being specially training technes for schools in fathing villages, in training men in the technology of curing, canning, and oil manutacture, in co-operative propaganda and in the supply of scoologies specimens for the use of college classes and spreaments are one use or codege classes and museums. The last named has filled a long felt want and is contributing materially to the advancement of the study of soology throughout lasts. , there is now no need to obtain speci-India mens from Europe.

The development of deep-sea fishing is engag-ing the attention of Government , splending travel promote are inclused of Gape Goundent in the season of the season of the season of the sales , other promising areas are known clea-where, but so far the institute income are the lack of cold storage accommodation at any port in the Freitiency, and the want of a deep-water harbour in the south, where steam-trave-tures are the season of the season of the season of the next in door sea faithing made, recentive serve an discourse direct into sorre. An experi-ment in deep sea flaing made recently with the help of a motor launch and Danish Sein net failed due to the unautability of the launch employed. The purchase of a regular Daulish outer for this purpose and a trayler for other works besides is under the

The pupil teachers under training are familiarised with the work carried on in the fishery stations at Tanur and Challyam. They are given practical instructions in fishing, a boat having been purchased for the purpose By the end of June 127 schools for the fisherfolk were being maintained by the deportment on the west coaches the villagest themselves that the the schools and then handed them over to the department. In other blaces schools were consend by the other places schools were opened by the dopartment at the request of the fishermen Local men are appointed as honorary managers of schools,

# Bengal & Bihar & Orissa.

The fishing value of this extensive deltaic region lies primarily in the enormous area occu-pied by inland waters—rivers, creeks, heeks, and swamps, to say nothing of paddy fields and tanks. These swarm with fish and, as the Hindu tanks. These swarm with fish and, as the Hindu population are free to a large extent from the aversion to a fish-diet which is widely preva-ient among the better castes in the south the demand for fish is enormous. Elce and the demand for fish is enormous. Elce and has re-indeed the principle, mainstays of the population and not less thin 60 per cent. of the people consume fish as regular flour or continued to the people continued fish as regular flour or continued to the property of the people continued fish as a regular flour continued trades, a percentage that rises to 2 6 in the Presidency, Raj Shahi, and Dacco Divisions of trades, a percentage that rises to 2 6 in the Presidency, Raj Shahi, and Dacco Divisions of the continued trade and the president of the percentage of the percentage that the president of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the percentage of the pe with the help of a motor launch and Danhals. Seen not failed due to the nautability of the Launch employed. The purchase of a fresh-water fisherman the Bengall is not strawier for other works besides is moter the consideration of Government.

Weifarse Work—A remarkable feature in the consideration of Government.

Department is best on the Madras Fisherien Department in the work of the Madras Fisherien Department is discountly which it devotes to the limprovement of the consideration of the fishericht. On fir Fromment is described by the consideration of the fishericht. On fir Fromment is the consideration of the fishericht. rivers. Other valued and abundant fabes are the rules (Lashe schills; jawa the Intia (Lashe schills; jawa the Intia (Lashe schills; jawa the Intia (Lashe schills; jawa should everywhere. Of important should the great path of the International Integration in the lower reaches of the rivers and in the great pathwork of one-jampad expendingly and the nullets are the most externation of the Integration of the Int

Following the inquiry begun in 1986 by Sir K G Gupta, an investigation of the steam trawl potentialities of the head of the Bey of Bengal was undertaken, the trawler Golden Crown being employed for the purpose. The results showed that there are extended a state a suitable for trawling and capable of yielding large quantities of high clear fish. Moch attention was drawled out these trawler cruises to the acquisition of increased knowledge of the contract of the contract of the contract of the security of the second of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the cold storage facilities and the loss of time in volved by the travier having to bring her catches to Calcutta instead of sending them by a swift tender, the experiment was financially a fullire and was dropped. With ever-increasing demand for fain in Calcutta and the concurrent rise in prices, the prospects of remuterative states while as more much more promising states and the convention as the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the steam tawling are now much more promising and there seems a prospect of one or more steam trawling companies being foated in the immediate future. The trade is a difficult one to organies and without a rare combination of technical fabour knowledge and far sighted and comprehensive organization the danger run by the investing public will be considerable. Originally one Fisheries Department served that one of the province of Bengal and Bihar and Ories. Separation was effected in after and Ories. Separation was effected in after and Ories. Separation was effected in after the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the province of the Department of Industries form a section of the Department of Industries. Industries

Government has ordered that the Bengal Fisheries Department be reconstituted on an improved basis as soon as funds permit. A Bengal Flaheries Department has of necessity a Rengal Flaheries I pepartment has of necessity a more limited scope for its activities than to the case of Madras. Practically no coastal minor industries exist, nother do the natural conditions load us to suppose that any on the created without extreme difficulty and the created without extreme difficulty and the created without extreme difficulty and the created without extreme difficulty and the conditions load us to suppose that any on the created without extreme difficulty and the conditions load us to suppose that any on the conditions load us to suppose that any on the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load us to suppose that any of the conditions load and the conditions load and the conditions load and the conditions

ning and once a few nodesites can be made successful, the news of the beneats conferred on the mesters will constitute the best possible form of propagands. The temporary abolition of the Hengal Picheries Department we repretted by many and it is hoped that it will soon a revived The fashery wealth of Bengal is conrasons and nothing but good can come of intensity since tight on an orman and the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of t intensive investigation and propagands

Fresh-water museels are used extensively at Daces in the manufacture of chesp pearl button a. The Daces hangle factories carry on an important local industry of very ancient standing, their material is almost entirely obtained from the South Indian and Oxylon chank faheries stready alluded to.

In the Gulf of Kntch two pearl shortee crist, one for the true pearl oyster, the other for the window pane oyster. The former is carried on by His Highins the Maharis of James the Wall of the Administration of His Highness the Maharis of Highness the Maharis of Baroda The latter industry owes to local existence to the enterprise of the Baroda Government which in 1905 obtained the services on deputation. In 1905 obtained the services on deputation in 1905 obtained the services on deputation. In 1905 obtained the services on deputation in 1905 obtained the services on deputation. In 1905 obtaining the Marine potentialities of the Baroda territory in Mathawar. One of the consequences was the discovery of large deposite of pearl-bearing wisdow-pane oysters, until then nature of naturally from Ea 15,000 to 18,000 to 18,

have had two officers trained in the Madras Fisheries Department and now employ them in development work on the Baroda coust.

Experiments in canning are now in progress at one of the chief fahing centres on the Southern Kathlawar coast and already promise considerable success particularly with regard to pomirets

## Burma.

The exclusive right of fashing throughout the province of Burms blongs by enakom of the country to Government and the Burms Fisheries Art provides for the protection of this right and for conceding the opportunity of the tright and the tright and the tright and the tright and the tright and the tright and the tright and the tright and tright and tright and tright and the tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and tright and

TRITERIUE—The economic value of any modustry or tract of country can, to some extent, be gauged by the revenue it yields the observed that the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state

The Delta consists of a series of saucer-shaped islands, many of which have gmbankments round the greater part of them along the north seast and west in the hollows of those stands most of the fish come into spawn, and with the floods which overflow the embankment during October the young fry come down-country from Upper Burnas.

The principal kinds of fish caught in nets on the sea-coast are (1) Kakkuyan, (2) Katha baung, and (3) Kathamyin, These are generally made into sait fish which found Rs. 2 to Rs. 3 per viss. The creek and fresh water fish from fisheries are generally ngakin, ngayan and ngagy!. Most of them are sold fresh, but some are converted into salf fish. The fish caught in the rivers are generally ngathalauk, ngagyin, and ngamyinyin, the predaceous fish.

Fees for not licenses are charged according to the size of the nets Fisheries which consist of lakes, pools, and streams are put up to auction, but as no Burman fisherman has ever been known to keep a proper system of accounts, he seldom or never can gauge the real worth of the fisheries, this coupled with his impulsive nature frequently results in his bids at auction exceeding the value of the fisheries, several fishermen have thus not only brought ruin on themselves but also on their sureties who have themselves but also on their surveys who in-not infrequently been sold up Until these fisheries are brought under some settlement watern for revenue assessment, bona fide system for revenue assessment, bona fide fishermen must suffer from time to time Moreover, the local authorities demand more than adequate securities and the furnishing co well as the verifying of these consistes invariably mean much unnecessary expenditure of time and money both to the fisherfolk and to the Government staff With a view to ameliorate uneconomic conditions by ren dering the provisions of security easier, as well as to facilitate collection, Government recently as to Tacilitate collection, Government recently introduced what is known as the group system whereby the value of the fisheries is fixed at a reasonable read, and, lastead of an individual system of furnishing security, the group hold themselves severally responsible in order to enable the poorest of the actual workers to reap the benefit of their labours nothing short of a co-operative system would be of any avail, this co-operative system is been tried in Tharrawaddy District with some success, by this system overly labour man unphycod in actuary becomes a particular to the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contra sweat the bona fide fisherman, poor though he be The group system, though an improvement on the individual system of bidding and furnish-ing securities does not do away with the sweating system With the gradual introduction of the co-operative system, which is an urgent necessity in the Delta District, the poorest fisherman of every fishing village and hamlet, after gradual every fishing village and hamlet, after gradual and systematic training will, in course of time be able, not only to reap the full benefit of their labours, but also by mutual control and aid to develop into a more useful and contented peasanty. Fishery leases for three to five years are now being granted instead of leases for only one year and sharems obtained in the content of the second property one of the content of the content of the second property of the falleries by clearing the used of improving the falleries by clearing the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second property of the second prop

streams and pools of that Burma post—the water hyacinth—and other weeds.

The principal articles of manufacture are ngapl (fish paste) and salt-fish, the amautalousing methods are primitive and with more industrial education and capital, these could be considerably improved

## The Punjab.

A Punjab Pishories Department came has being as an exterimental measure in 11st and received the official sanction of Government \*\*s revular department of the Punjab in April 1918 it operates under a Warden of Fisheries, nucler control of the Financial Commissioner During the first three years the Department was almost entirely concerned with preliminary work, consisting largely of investigations and experiments in the Beas and Eavi Rivers.

These rivers were examined with a view to assortain the indigenous species which consider the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the

Tront culture flourishes in the hill streams, good sport being enjoyed by anglers in the Kuhr Valley where operations were first initiated. The Kangra streams are now receiving attention, various consignments of own always been sent there, successfully latched out, and turned into mittable waters

#### Travancore.

This State has affiliated Fabories to the Department of Agriculture and with the help of two officers trained in Madras, the Department has already accomplished a notable amount of development work. Special attention has been deven to the regulation of fabories in backwaters to the establishment of no-operative scotistics among the fabing community and to the introduction of improved methods of sautine of a second second of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control o

# The Forests.

Even in the earliest days of the British occurpation the destruction of the forests in many parts of India Indicated the necessity for a sestern limits of the Shan States, there is, as parts of India Indicated the necessity for a sestern limits of the Shan States, there is, as many he imagined, an infinite variety in the scaling administrator resulted the importance of the forests to the physical and economic welfare of the country the fact remains that listle or nothing was done. The year 1855 marked the commencement of a new ran in the history of forestry in India, for it was been that Lord Dalhound ald down a detailed in the India Company of the Shan States, the following main the history of forestry in India, for it was been that Lord Dalhound ald down a detailed part of forest ambinished and the south of Ealyntana, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the Mutter, progress was delayed for a time by the were the new duties of the forms Department Work on these lines, which is not yet completed in the more backward parts of the country, has been pursued etaedly from the commence ment, and in consequence large tracts of forest ment, and in consequence take trace of large have been eaved from ruin and are gradually being brought under efficient management Whatever may have been the opinious held in some quarters half a century ago as to the need for a policy such as that expressed in Lord Dalhousie's memorable enunciation of 1855, there is no longer any doubt that results have amply justified the steps taken, and that in her forests India now possesses a property of constantly increasing vaine, the inture im-portance of which it is hardly possible to over-

Types of Forest—More than one-fifth of the total area of British India (including the Shan States) is under the control of the Forest Department These areas are classified as reserved, protected or unclassed State forests In the reserved forests rights of user in favour of individuals and the public are carefully recorded and limited at settlement while the boundaries are defined and demarcated, in the boundaries are drilled and demarcated, in the protected forerast the record of rights is not so complete, the accrual of rights after settle-ment not being prohibited, and the boundaries are not always demarcated, while in the un-classed forest no systematic management is astempted, and as a rule the control amounts to nothing more than the collection of revenue to nothing more than the collection of revenue until the areas are taken up for cultivation or are converted into reserved or protected forests The total forest area of British India (including the Shan States) in 1920-21 was \$23,704 square miles, or \$0.5 of the total area. This was chased as follows Reserved 199,623, Protected 7,85, Unclassed State

- (3) Evergreen forests —These occur in regions of very heavy rainfall, such as the west coast of the Penianula, the existen sub-Himalayan tract, and the moister parts of Burma and are characterised by the great variety and insuriance of their vegetation
- (4) Hill forests—In these the vegetation varies considerably according to elevation and rainfail In the Eastern Himalays, Awam and Burma, the hill forests are characterised by various oaks, magnoliss and laurels, while in Assam and Burms the Khasla pine (Pissus Abaya) grows gregariously at elevations of 3,000 to 7,000 foot in the North-Western Himslays the chief timbet tree is the deadar Clearus decdara), which occurs most commonly at elevations of 8,000 to 8,000 feet, and in association with oas or hive pine (Pasus groeles), towards its upper limit the decdar merges into very large areas of spruce and silver fir, while below it are found extensive forests of the long needled pine (Pinus longifolia) which is tapped for resin
- (5) Littoral forests—These occur on the sea coast and along tidal creeks The most characteristic trees belong to the mangrore family (Rhicophoraco) Bedind the mangrore helt is an important type of forest occasionally inundated by high tides, in which the most valuable species is the "wandri" (Hartiera valuable species is the "wandri" (Hartiera valuable species is the "wandri"). fomes)

Forest Policy—The general policy of the Government of India in relation to forests was definitely laid down in 1904 by the classification of the areas under the control of the Depart-ment into four broad classes, namely—

223,704 square miles, or 20 3 of the total area. This was deased as follows: Reserved 199,529, Protected 7,188, Unclaused State area smally situated in hilly country, where the 115,548 region of the 115 forms are smally situated in hilly country, where the Throughout this vast forest area, scattered over the length and breadth of India from the Throughout the vast of the rainfall and on the prevention of creations of the storage of the rainfall and on the prevention of creations.

Forests. 547

(b) Forests which afford a supply of valuable tey receive whom anorm a supply of valuable timbers for commercial purposes, such, for example, as the teak forests of Burms, the sal forests of Northera, contral, and North-Eastern India, and the deodar and pine forests of the North-Western Himslaya.

(c) Minor forests, containing somewhat inferior kinds of timber, and managed for the production of wood, fodder, grasing and other produce for local consumption, these forests are of great importance in agricultural districts

(d) Pasture lands -These are not "forests" in the generally understood sense of the term hat grasing grounds managed by the Forest Department merely as a matter of convenience

These four classes of forest are not always sharply divided from each other and one and the same tract may to a certain extent he managed with more than one object

Administration —The forest husiness of the Government of India is carried out in the Department of Education Health and Lands Inspector-General of Forests is the head of the Forest Department and is the technical adviser to the Government of India in forest matters

matters
Territorial charges — The various provinces
are divided into one or more Forest Circles,
each in charge of a Conservator of Foreste,
provinces containing three or more circles also
have a Onler Conservator who is the head of the Department for his province of friends are divided into a number of frorest Divisions, in charge of members of the Imperial or Pro-vincial Forest Service, these Divisions in most cases correspond to civil districts. Each Division cases correspond to civil districts. Each Division contains a number of Ranges in obarge of Janior members of the Provincial Service or Jonior members of the Provincial Service or Divisions are also sometimes divided into Subdivisions are also sometimes divided into a number of beats or protective danges beld by Forest Cuarta or in some cases hy Foresters.

Non-territorial charges -Apart from territo-Non-territorial charges — apart from territorial charges there are various important posts of a non territorial nature connected with Forest Research and Education, the preparation of Forest Working Plans, and other special

The Forest Service -The Forest Service ing the course comprises three hranches -

(1) The Indian (Imperial) Service with a total personnel of 339 officers consisting of the Inspector General of Forests, Chief Conserva tors, Conservators, Deputy and Assistant Conservators Of these 296 have been recruited direct to the service and 43 promoted from the Provincial Forest Service The officers of this service are recruited as probationers -

(a) by direct appointment in the United Kingdom and India, and

(b) hy promotion from the Provincial Forest Service in India

Recruitment in the United Kingdom and in Ranger is carried out in various local forces appointment is carried out under regulations laid down by the Secretary of State for India and the Gevernment of India, respectively classified for direct appointment in the United Standards for direct appointment in the United Standards for direct appointment in the United Standards for direct appointment and the Gevernment of India, respectively considered the standards of the Georgian of forcer research, and thus to co-edizate and alternative the standards for the research and the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constitution of the Constituti

with honours in some branch of Natural Science in a University of England, Wales or Ireland, or have passed the final B Sc examination in Fure Solence in one of the Universities of Scotland Adagree in Applied Science is not considered as fulfilling these conditions Candidates are required to produce evidence that they have a fair knowledge of either German or French Weight is attached to the possession of a dintoma or degree in Forestry

Candidates for direct appointment in India are required to possess an Honours or a first class degree in Science or an M Sc degree of any class of a University incorporated by law in India

Probationers are at present trained at a University possessing a forest school approved by the Secretary of State (Oxford, Cambridge and Edinburgh at present), this training being supplemented by a practical course, partly on the continent of Europe

(2) The Indian Forest Engineering Service —This service was created in 1919 and at present consists of 17 Forest Engineers

(3) The Provincial Service—Formerly it consisted of Extra Deputy and Extra Assistant Conservators of Foresta All Extra Deputy Conservators who were considered to be fully qualified to hold a major charge were transferred to the Imperial Forest Service in 1920 Except for five unpromoted officers the class of Extra Deputy Conservators has been abolished and the service now consists of Extra Assistant Conservators only The fixation of the strength of the personnel of the service rests with the local Governments

Governments
Officer of this service are eligible for promo
tion to 123 per cent of the posts in the Indian
Forest Service, such promotion being made by
local Governments
These officers are recruited
and trained in India their recruitment being a
matter for the local Governments
A certain
number of posts in this service are filled by the promotion of specially promising Rangers A two years course of training for the Provincial Service is conducted by the Government of India at the Forest Research Institute and College. Dehra Dun and it is open to local Governments on payment of prescribed fees to depute candidates to undergo that course provided they are qualified for admission under the rules govern-

ing the course

(4) The Shobrdinate Service, consisting of
Forest Rangers (about 840), Deputy Rangers
(about 800), Forestors (about 2,000) and Forests
present trained at three different centres—
the Forest College at Deliver Dun (for provinces other than Burma, the Central Provinces Rangers of the College at the College at Deliver School at Primanas
(for Burms), and the Madras Forest College at Colmbolor (for Madras and the Central ProColmbolor (for Madras and the Central Provinces) These three institutions were established in 1878, 1898 and 1912 respectively. The training of subordinates below the rapik of Eanger is carried out in various local forest schools and training classes

Forest Industries.—The important role which the forests of a country play in its general commercial welfare and in providing employment for its population is not always fully recognised Tifecen years ago it was estimated that in Germany work in the forests provided that in Germany work in the forests provided that in Germany work in the forests provided a 3,000,000 persons, estanting 250,000 000 a year, were employed in working up the raw makerial yielded by the forests. If accurate estimates were available for India, they would no doubt show that apart from the Jungle and country of the provided provided to the provided provided to the provided and other awyers, carters, carriers, rathemen and others working in and near them, employment on an agreement's castle in provided to pursons engaged in working up the raw products. Among wheelving the coupers, bost-buildent, sameers, respectively.

and many other classes of skilled labourers. The Indian cosum of 1911 gave 1,191,867 people and their dependents so employed in British India, and a further 384,007 in Native States, but these are prohably below the actual; as much forest labour is not whole-time labour. devoting seven or eight months in the year to forest work and the rest to agriculture With the opening up of the forests, the extension of aystematic working, the wider use of known products, and the possible discovery of new products, a steady and extensive development of industries dependent on the forests of india may be confidently anticipated in the traure

Financial Results.—The steady growth of forest revenue, expenditure and aurplus during the part 50 years is shown in the fellowing statement, which gives annual averages for quinquencies periods—

Financial Results of Forest Administration on British India from 1884-85 to 1918-19 (in lathe

Quinquennial period	Gross revenue (average per annum)	(Expenditure average per annum)	Surplus (a verage per annum)	Percentage of surplus to gross revenue

to group revenue was about 28

Prospects. - The past work of the Forest Department has already horne fruit, not only in a steady rise of revenue but also in the in a secary in so it revenue but also in the improved condition of the forests resulting from careful protection and tending Much has been done in the way of opening up the forests to regular exploitation, but there is still room for commons development in this respect, for there are extensive areas of valuable forest as yet almost untouched, and these represent a at capital locked up and not only lying idle but even deteriorating Perhaps the two most pressing needs at present are the introduction of improved sylvicultural systems and the extension of roads end other export works to facilitate and chespen extraction. These two must proceed simultaneously since they are inter-dependent, for it is obvious that timber and other produce can be extracted far more economically if it is available in large quantities within a limited radius than if it is scattered in email quantities over large tracts of country, indeed this question must often decide whether extraction is possible or not Sylviculture teaches us how to effect this concentration and is therefore the bed-rock on which future results, financial and otherwise, must rest, it is of little avail to seek and develop new markets for timbers and other products if these cannot be produced in regular and sufficient quantities and extracted at a reasonable cost

Forest Products Exploitation —The exploitation by the Forest Department, as a Commercial Department on husiness lines, of the great timber forests which are among the most valuable natural assets of the country, continues to attract the special attention of the various local Governments In Madras, for instance, the working of the Forest panchayat system whereby the increased knowledge of the difficulties of forest administration which the villager obtains when he has a voice in forest management is hringing home to him an understanding of the necessity for that administration A further important step taken in regard to forest exploitation was the recruitregard to forest exploitation was the recruitment of a Chief Forest Engineer and a Logging and other publications has been issued by the Ragineer from America. In Burms the week Persis Besserts institute, and of these a list under way in the Government Timber Depot and be obtained from the Buyerntendent, Go-st Hangson proves to be of great value to versioner Printing, India, Colorated.

The financial year 1922-23 showed a total (Sovernment from the point of view of revenue revenue of Ra 5,52,14,072, su expenditure and of considerable importance to the public of Ra, 3,95,72,604, and a surpha of from the point of view of industrial develop-Ra 1,55,41,66 The proportion of surphia of from the point of view of industrial developtimbers has been started and results promise to be of great value have already hear obtained Experimental work on the manufacture of furniture and in other similar direc tions are expected to give a value to a number of different timbers which are at present more or iese unknown. The Mytimaka River Train-ing Worke started in 1905, and which have since then been continued for the sale of Government teak timber are of more than department interest. These works have also proved great value to tocal people inasmuch as the have lod to the reclamation of a very considable amount of land which was previously too low lying and awampy to be fit for cultivations. In the United Provinces, the institution of the Government Sawmill and Turnery the Govern-ment Central Wood Working Institute and the Resin Distillery have led to important results These, and many other examples which could be quoted, go to show that local Governments are fully alive to the importance of exploiting their forest resources to the fullest possible extent for the benefit of the country

execution to comment of the country

Commercial Accounts.—The question of
the institution of a commercial system of
accounts for forest enterprises is engaging
attention and the system has aireedy been
introduced in regard to certain forests in Madrai

Descentible of the throughtened. Proposals for its introduction in the Burna.
Forest Utilization Circle and in the Punjab
Forest Department are in hand and its extension. to the Andamans Forest Division is also likely to he made at an early date

to he made at an earry mate

Agoncies—An agency has been established
in India by the Government of India for the sale
of Government timber and it is at present held
in Mesars Martin & Co. Calcutta The Governhy Mesers Martin & Co , Calcutta ent of India have also appointed Measts W Howard Bros, London, as their agents in England for the sale of Indian timbers. Local Governments, and the Andamans esp make full use of these two agencies for the mis of their woods and the London agency has in addition been the direct means of bringing to the notice of outside countries the immense possibilities of India's wealth in this direction

## RUBBER CULTIVATION.

The most important rubber-yielding tree old subtration abandoned to 1,424 acres, showing found growing naturally in the Forests of India in the increase of 2,820 acres, and raising the interest of the increase of 2,820 acres, and raising the increase of 2,820 acres, and raising the increase of 2,820 acres, and raising the increase of 2,820 acres, and raising the increase of 2,820 acres, and raising the increase of 2,820 acres, and raising the increase of 2,820 acres of 1,820 acres of 2,820 acres of 1,820 acres of 2,820 acres of 1,820 acres of 2,820 acres of 1,820 acres of 2,820 acres which rubbet can be collected on terms quotec, 250th in Travancore, 103, as against 104th. In by Government Attempts have been made in the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the season of the sea in Burms than the rest of India.

The production of rubber in India is confined to Assam, Burma, and the Madras

to foreign countries during 1923-24 amounted to 15,000,000lb showing an increase of 23 per cent is as compared with the preceding year

confined to Assam, Burns, and the Madras
Proddenry
The number of rubbor plantations in 1921 and the bridged edition of the same published roadily in Southern India and Burns, was 972 toward and a reas of 1967 Se acres, in 1922 and the abridged edition of the same published to 6,000, with an area of 1961,267 acres, in 1922 and the area of 1961,267 acres, in 1922 "Commercial Guide to the Forest Economic New lands planted with rubber in the estates durling 1923 amounted to 4,244 acres, and the area of 1918.

## MATCH FACTORIES

Imports of matches before the war averaged (for the two years 1912-13.1913-14) 14; million gross. This figure has been failing during the past three years and in 1923-24 was about 11; million gross, valued at Es. 14,5,92,000 templified gross, valued at Es. 14,5,92,000 templified gross, valued at Es. 14,5,92,000 templified gross, valued at Es. 14,5,92,000 templified gross and the Indian match industry which appeared in the Indian match industry which appeared in the Indian and the Indian match industry which appeared in the Indian and the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match industry which appeared in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian match in the Indian mat

## PAPER MAKING.

There are five large paper milis in the country working on np-to-date Weetern lines, etc., at mental paper making plant has been installed Present, Excalinars and Eaniganj in Bengal, at the Covernment of India Prota Research the Beay Mill at Poona. There are also two smaller mile at Bombay and Surat which make fairly country paper, and there are one or two only country paper, and there are one or two only country paper, and there are one or two other miles which recently were not working, rices paper said filter are validable. The five large inline have a large Govern—over vast forest and fill areas in India and assess consorded, as the greater part of Gov- Jeurna, and thus concurage the establishment

After many delays the Carnatic Paper Mills | In the "Report on the investigation of Bamboo Expany commenced operations as Rajab- or Production of Paper-pulp," published undry, on the Godavari river, during the year, in 1911, Mr R. S Pearson of the Forest After many delays the Carnatic Paper Millis Company commoned operations at Rajab-mundry, on the Godavari tiver, during the year, and it is estimated that the daily output will be ten tone of pulp and five tone of paper made tone of the constant produced the constant paper of the constant paper and the constant paper and the constant paper and the constant paper and the constant paper and the constant paper per day, while in Amami a new company has been formed and its said to be writing for the arrival of its plant. At Christopous a new plant for manufacturing of the constant paper per day, while in Amami a new company has been formed and a said to be writing for the arrival of its plant. At Christopous a new plant for manufacturing operations will an other constant paper per day of the paper per day in the proper paper. in the Punjab and is erecting a factory near the headworks of the Western Jumna Canal, about 200 miles from Lahore

The possibility of utilising the dense growths of bamboo in the hinterland of ('uttack has again been under consideration during the year, and the project has been investigated afresh by Mr Raitt on behalf of the Government of Bihar and Orless Mr Raitt estimates that in this area alone there is sufficient raw material for an output of 10,000 tons of paper palp per ahnnm

Raw Materials —The existence of the local industry depends chiefly on the supply of Sabal grass which on account of unfavourable seasons sometimes yields short crops It is of importance, therefore, to look for mat materiale according a constant outturn, and various reports have been published on the available paper making materials Considerable attention bas maxing macerists. Considerable according to been devoted to Bamboo, since 1275 when it was found that this plant—of which there are four chief varieties in India—rieded a fibrous paper stock which made a quality of paper superior to expurio grass and at a counderably less cost. It was at that time estimated that one acre of bamboo would yield 10 tons of dried shems equivalent to 6 tons of merchantable callulose in 1905 Mr B W Slodall was invited by Government to visit Burma with a view of enquiring into the possibility of mann-facturing paper pulp His report on the subject appeared in March 1906 He made numerous experiments with bamboo and woods of Burma experiments with bamboo and woods of the and hald down lines along which further enquiry should be made. Subsequently Mr W Rattt a pulp expert, was engaged at the Forest Re-search Institute in conducting tests on the treatment of bamboos by the sods and sulphate processes, the treatment of bamboo before boiling, with remarks on the utilisation of nodes and internodes His results were embodied

or Production of Paper-pulp," pursussens in 1911. Mr. R. Parson of the Forest Service, Dehra Dun, as the outcome of enquiries made throughout india published in 1913 a note on the Utilization of Bamboo for the manufacture of Paper-pulp. The yield per arcs from bamboo is larger than that or grasses into pulp has been estimated to yield a product ebeaper than imported unbleached sprace sulphite and umbleached shall grass pulp In 1916 Mr. Dhurwa Sumanas published a pamph int. Dendrocalamne Strictus Bamboo of the let, Dendrocalamne Strictus Bamboo of the Daoge, as the result of investigations carried on in Banada State.

In a paper read before the Royal Society of Arts in 1921 Mr Raitt gave an answer to the question What India can do to fill the gap in the world a shortage of paper?" He said that be thought it was 'a modest estimate said that be thought it was "a modest estimate to say that from beamboo, taking only that which is available under 'possible' manufacturing conditions, Burma, Bengal and South West India could produce ten million tons of pulp per annum, and Assam from Savannah grasses three million India could therefore produce pulp for the whole world "

puly not he whose wong. The leading Indian paper grass for the last thirty years in has been the bhalt, bhabar, or sabal grass of Northern India. It is a perenorder of the paper of the last thirty years and Rajmahal to Nepal and Garhwal The Calcutta mills draw their supplies from Sahlbgani, Chota Nagpur and the Nepal Teral The quantity annually exported from Sahlbgani is between three to four lakes of maunda; no the control of the control of the control of the control of the control of the said to commone The cutting in these districts is said to commence in October when the plants are six or seven feet high Babai grass yields from 86 8 to 45 9 per cent of blacknot celliniose A report by Mr. S. Fenrson, Porest Economist, Dehra Dun, on the use of elephant grasses in Assam was issued in 1919. The most important species of grass found in this areas in which investigation of grass found in the areas in which investigation has been made are Khagra. (Saccharum sacreng) with patches of Nal (Phragmales barka) on the more awangy ground. Hand samples of the above grasses were sent to England to be tosted on a laboratory scale, while several tons were sent to an Indian paper mill to be made into paper.

The results were satisfactory and proved that a The results were satisfactory and proved that a very fair quality of paper can be produced from these grasses at a relatively low price. Resall samples of such paper can be obtained by persona interested in these grasses from the Forest Rec-nomist, Forest Recearch Institute, Dehrs. Dun, who can also supply further details

## The Press.

Engthsh in Beegal. In 1773 was passed the Engulating Act oreating the Governor-General-sing and the Supreme Court in Bengal and the Supreme Court in Bengal and cade, the first newspaper was started in Cal-cutta by an Englishman in January 1750 Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single nows almost measured by the life of a single nows paper. The management of the life of a single nows paper of the state of the life of the single nows paper. The state of the life of the single now period of British supremay is not much longer having commenced at Plassey, only twenty three years earlier Bombay nodwood Cal cutta closely, and Madras did not lag much behind in 1780 the first Bombay newspaper appeared, The Bombay Courier, a paper now represented by The Times of India will be advented to the press may be said to have followed the British occupation of the latand such later than was the case in Calcutta. In Calcutta the English were on sufferance hefor-lessey, int in Bombay they were absolute masters after 1665, and it is somewhat strangt than no sufferance who were than to be suffered to the press they were absolute masters after 1665, and it is somewhat strangt than no suffered to the press which have thought or that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of The Heraid.

The first newspaper was called The Bengal Gazette which is better known from the name Gassiz which is better known from the name of its founder as Hicky Secretic or Journal Hicky like most phocears had to auffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of molibiling gross scandal, and he and his journal shappeared from public view in 1782. Several did not frottantally copy the had example. The Indian Gassia had a career of over half a contury, when in 1833 it was merged into the Beergest Harkers, which came into existence only a little later, and both are now represented by The Indian Edwin March 1840. No ever has a contury when the same that we have the same though the the were amaginated in 1860. No ever has a Baspaid Gassias of 1780 and one of these, The Reducts Gassias, started in February 1784, under Basqui Gasstis of 1780 and one of these, The Calcutts Gasstis, started in February 1784, under the avowed patronage of Government, flour lakes still as the official gazette of the Bongai

In 1821 a syndicate of European merchants In 1831 a syndicate of European merchants and mificults commenced the publication of John Bull in the Best, a daily paper which was nitended to reflect Tory opinion in India and set an example to the Press generally in India and set an example to the Press generally in matter of moderation and restraint. The name of this journal was athreed to The Englishmen by the Simonus Stocqueier in 1884.

The newspaper Press in India is an essent vigorous control Government objected to tially English institution and was introduced news of apparently the most trivial obstacler soon after the task inf organising the admi-affecting its servate. From 1791 to 1790 nitration was sectionally taken in hand by the English in Bengal. in 1773 was passed the out trial and on abort notice, whilst average Regulating Art creating the Governor-General-step and the Supreme Court in Bengal and At the commencement of the rule of Weilsely as one commencement of the rule of Weikeley flovernment promulgated strungent rules for the public press and instituted an official consor to whom everything was to be submitted before publication, the penalty for off-nding against these rules to be immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the consorship and substituted milder rules

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to jots the ranks of journalism, which had till then been considered a low profession. Silk Buckingham, one of the shiest and best known of Angio-Indian journalists of those days availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who tem porarily occapied Hastings place, he was de-ported under rules specially peased. Bot Lord Amberst and still more Lord William Lord Amneret and sout more Lord William Beatinck were persons of broad snd liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced; though Lord Clare who was Governou of Bombay from 1831 Clare who was dovernor of Bombay from 1831 to 1835 once strongly but in valuinged the latter to enforce them Metcalle who encoded for a brief period Bootinck, removed even these regulations, and brought about what is called the omanopation of the press in India in 1833, which was the boginning of a new ore in the history of the Indian press Among papers that came into being, was the Bombay Twace which was started towards the office of 383-by the Bodding merchants of the Other Years of India 278 Bombay Guestle to the Years of India 278 Bombay Guestle founded in 1791 caseed publication in 1914.

founded in 1791 ceased publication in 1914. The liberal spirit in which Lord Hastinghad begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of the Native or Indian Press. The five newspaper in any Indian hanguage was the Senacker Derpear Stated by the famous Sersagnors 1818 in Bengall, and it received encounagement from Hastings who allowed it to alreu la's through the post office at one-fourth the benefit from the state of the state of the state of the state of the state of the state of the state of the state of the press of the state of the press that in the state of the press that in the state over 450 papers.

From its commencement the press was from 1525 to the Mattley the press spread justices whether by the authorities, who is other cities like Delih, Agra, fewallor, and put serious restraints upon its independence were Labore, whereas framerly it was obliefly and pursued a policy of discouragement and confined to the Precisioney towas, Durties

she Mutiny its freedom had to be temperarily controlled by the Gagging Act which Canning of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free.

which the press was once more tree. On India passing to the Crown in 1858, an ora of prosperity and progress opened for the whole country in which the press participated There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small. The number of the former did not show a great rise in the next generation but the rise

infecence and also obsculation was attributery. Famous journalities like Robert Ruisht, James Maclean and Hurris Mookey! flourished in this presention. The Oleif and Millery Genetic was originally published in Simia as a wesity paper, the first isros being dated June Elect. the most famous paper in Northern India was the Mojaseitie, originally published at Meernt, but atterwards at Agra and them as Ambala. After a lively existence for a few years in Simia the Civil and Millery Genetic acquired and incomporated the Mojaseities acquired and incomporated the Mojaseities from Millery Genetic acquired and incomporated the Mojaseities from Millery Genetic acquired and incomporated the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseities of the Mojaseiti

## INDIAN PRESS LAW

Before 1885 all printing of books and papers was subject to licence by the Governor-General in Council, and the Koences were issued or refused at the discretion of Government. Act XI of 1885 repeated the old Eseguisticus and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1867 by the present present and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the printer and the p affecting the Press until 1878 when the Verna cular Press Act was passed That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally efacted in 1870, and by the introduction into the Penal Code of section 183A and into the Oriminal Procedure Code of section 193 There were a certain number of presecutions mader those sections in pto 1807, but the dissemination of section 1804 and into the Oriminal Procedure Code of section 180 There were a certain number of presecutions mader those sections in pto 1807, but the dissemination of the section of the penal of the penal of the section of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the penal of the in 1882 From that date until 1907 Government

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discus aton

The Act deals, not only with inoltements The Act deals, not only with indicements to murder and act of violence, but also with other specified classes of problems that allow the solders or sallows from their allegiance or duty, to bring into hatred or contempt the British Government, any Native Frince, or any section of His Majesty's subjects in India, or to inimidate public servants or private indivi-

The different sections of the Act have is view (1) Control over presses and means of publication, (iii) control over publishers of assergapers, (iii) control over the importation take British India and the transmission by the post to edifficiently objects the editor of the papers, books, or other documents wherever count. The different sections of the Act have in

Repeal of Presa Legialation—By the anton of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which are the control of the Wide powers that it gave Finally, after the Control of the Wide powers that it gave Finally, after the Control of the Wide powers that it gave Finally, after the Control of the Wide powers that it gave the Finally, after the Control of the Wide Press of the Control of the Wide Press of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the more than once contenting Local Governments, as Committee was appointed in February 1921 after a debate in the Legislative Amembly, to examine the Press and Registration of Books Act, 1807, and the Indian Press Act, 1910, and report what modifications were required in the existing law That Committee made an un-animous report in July 1921, recommending

(1) The Press Act should be repealed (2) The Newspapers Incitements to Offenous Act should be repealed

(3) The Press and Registration of Books Act and the Post Office Act should be amended (3) The Frees and Registration of Books Asiand the Peat Office Act should be amended where necessary to meet the conclusion noted the property of the conclusion noted to be active to the same be insertible on every issue of a newspaper and the editor about be subject to the same likelities as the printer and problem, as regards criminal and civil responsibilities (b) any person registering under the Press and Registration of Books Act should be a major as Convenient about rather than the control of the press of the convenient about rather than the convenient about rather than the convenient about rather than the convenient about rather than the convenient about rather than the convenient and challenge the settern of such document, is which case the local Government ordering the confusation should be asked upon to prove the confusation should be called upon to prove the press of the confusion and Postal officers being empowered to seize softitions littlers. # Banking.

An event of great importance in the history of Indian banking was the formation on the 27th January 1921 of the Imperial Bank of India by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras.

The idea of a Central Banking establishmeot for British India was mooted as early as 1836, and was the aubject of a minute by Mr James and was the amject of a minute of mr. James Wilson, when Finauce Member, in 1869 Again, in 1867 Mr. Dickson, the well-known Secretary of the Bank of Bengal, submitted detailed pre-posals for an amalgamation of the three Presi-dency Banks. On various later consions the matter was brought forward without result and it was discussed by the Chemberlain Commission Is was cuscussed by the Commortain Commando on Indian Finance and Currency in 1913. The present scheme which has come to fruition was however the result of a respectament on the part of the Banks themselves as a result of the part of the Banks themselves as a result of the part of the desirability of strengthening and extending the Banking system in India.

The Presidency Banks —The history of the Presidency Banks in their relationship with Government falls into three well defined stages vovernment falls into three well defined riages Frice to 1302 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second panels was from 1562 to 1876 to 1802 the Banks was from 1564 to 1876 to 1802 the Banks was from 1564 to 1876 to 1802 the business of the 1876 to 1876 to 1876 to 1876 to 1876 though by their agreements of that year they were authorized to transacts the nare "unserner." were authorised to transact the paper currence business as agents of Government. As com-pensation for the loss of their right of issue, they were given the use of the Government balances the Presidency towns and at their branches. The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unchanged. In 1866 the agreements ware relead and the paper currency business was removed from their control and placed under the direct management of Government. The third period dates from the Presidency Banks

This system continued with only minor modifications until 1920 During the war, however, the policy was deliberately adopted of reducing the amount of the balances held in the Reserve Treasuries and leaving much larger balances with the Headquarters of the Presidency Banks in order to assist the money market

The imperial Bank — Under the Imperial Bank of India Act (XIVII of 1920), the control of the Bank is entrusted to a Central Board of Governors with Local Boards at Calegian Bombay and Madras and such other places the Central Board, with the previous sanction of the Governor-General in Council may deter mine The Central Board of Governors consists

- (a) Managing Governors not exceeding two in number, appointed by the Governor-General in Council on re-
- commendation by the Central Board,
  (b) the Presidents, Vice-Presidents and
  Secretaries of the Local Boards,
  (c) the Conscioler of the Currency, or other
  officer nominated by the Governor-
- General in Council, and
  (c) net more than four non-officials, nominated by the Governor-General in Council

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board.

The Controller of the Currency and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not to vote under the agreement with Government. The Governor-General in Council is entitled to leave instructions to the Bank in respect of any matter which in his opinion vitally affects his financial policy or the safety of the Government balances, and if the Controller of the Currency or such other officer of Government as may be nominated by the Governor-General in Council to be a Governor of the there in the content of the presidency Panis content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the conten Central Board shall give notice in writing to

Claim of Bankman — The Impuria Bankman Lord and televas the Problemer Bankman Lord and televas the Problemer Bankman Lord and the Communication of the Communication of the Communication of the Communication of the Communication of the Communication of the Empire of the Bank's business London Office and the borrowing of many in England for the purpose of the Bank's business noon the security of assets of the Bank, but not the needing and received the Communication of the Presidency Bank and the Communication of the Presidency Bank and the Secretary of State, and this agreement, which was signed on the 27th January 1921 and is for a period if ten years determinable thereafter by either party with one year's notice, provides, sizer Alas, for the following important matters —

(1) All the general banking business of the Government of India is to be

- (2) The Bank will hold all the Treass Balances at Headquarters and at its branches. This involves the its branches. This involves the abolition of the Reserve Treasury s ystem
- (3) Within five years the Bank undertakes to open 100 new branches of which the Government of India may determine the location of one in four The branches and agencies of the three Presidency Banks prior of the three Fresidency Hanns press to the date of smalgamation number-ed 69, including the Colombo branch of the Bank of Madras The Bank of Bengal had nn branches prior to the proposal to transfer dever-ment business to the Bank is 1881-65. but no less than 18 branches were established before 1868.
- (4) The management of the Public Debt will continue to be conducted by the Bank for specified remuneration

## Exchange Banks' Investments.

Turning now to the question of the investment of the Banks' resources, so far as it conoerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India

The financing of the import trade originated The financing of the import trade originated and is carried through however for the most part by Branches outside India, the Indian Branches' have in the missions consisting principal and the second of the bills and the second of the bills and the second of the bills are with information as to the means and standing of the drawees of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned the Branches are more immediately concerned the Branches are more immediately concerned to the Branches are more immediately concerned to the Branches are more immediately concerned to the Branches are more immediately concerned to the Branches and the world the best of the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the Branches and the B be dealt with the Banks would under ordinary sircumstances require to utilise a very large proportion of their resources in carrying through the business. They are able however by a system of rediscount in London to limit the system of rediscount in London to limit the employment of their own recovers to a comparatively small figure in relation to the business through the changes they actually put through. No definite information can be scoured as to the extent information can be scoured as to the extent to which rediscounting in London is corried to which rediscounting in London is corried as but the following figures appearing in the field during the continuous states dated fits December 1983 of This has been brought about by the acquisition the undernoted Banks will give some idea of this;

LEADLIST OF BILLS OF BECHARGE RE-DES-COURTED AND STILL CURRENT

Chartered Bank of India, Australia	6,833,000
Rastern Bank, Ld.	487,000
Hongkong and Shanghai Banking Corporation	5,100,000
Mercantile Bank of India, Ld.	2,461,000
National Bank of India, Ld	3,678,000
P & O Banking Corporation, Ld.	12,958,000

The above figures do not of course relate to re-discounts of Indian bills slone, as the Banks operate in other parts of the world also, but it may safely be interred that bills drawn in india form a very large proportion of the whole,

\$1.517.00n

The bills against exports are largely drawn at three months sight and may either be "clean" three months sight and may either ne coest."

or be accompanied by the documents relating to the goods in respect of which they are drawn Most of them are drawn on well known firms Most of them are drawn on well known firms at home or against credit opened by Banks of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the cont Banks are able to secure the return of their money in about 16 or 17 days instead of having to wait for three months which would be the case if they were unable to rediscount. It must not be assumed however that all bills are rediscounted as soon as they reach London as at times it suits the Banks to hold up the bills fu anticipation of a fall in the London discount rate while on occasions also the Banks prefer to hold the bills on their own account as an investment until materity

The Banks place themselves in funds in India for the purpose of purchasing export bills in a variety of ways of wideh the following are the principal -

- (1) Proceeds of import bills as they mature.
- (2) Sale of drafts and telegraphic trans-fers payable in London and elsewhere out of India.
- (8) Purchase of Council Bills and Telegraphic Transfers payable in India from
- (4) Imports of bar gold and silver bullion.
- ) Imports of sovereigns from London, Egypt or Australia.

The remaining business transacted by the Banks in India is of the usual sature and need

The following is a statement of the position of the various Exchange Banks carrying on business in India as at 51st December 1925 -

## JOINT STOCK BANKS.

Previous to 1006 there were few Bankt of the acceptable operating in Indica and such as the second of the class of the second of the class of the second of the class of the second of the class of the second of the class of the second of the class of the second of the class of the second of the class of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the se were then in existence were of comparatively insali importance and had their business con fined to a very restricted area. The framework of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of t After that time there was a period atteam of new floations, and although many of the rew Companies countined themselves to legitimate beauling beateness, on the other hand a very large beauling beateness, on the other hand a very large and can hardly be properly classed as Sanhis. These Banks made very great strides during the first few years of their existence, but it was generally suspected in well informed circles that the beateness of many of the Banks was that the beateness of many of the Banks was that the beateness of many of the Banks was the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of the strictless of

It was a matter of no great surprise to many people when it became known that some of the Banks were in difficulties.

Since those events of ten years ago, confidence has been largely restored Bus in April 1928 the Allance Bank of Simla inspended payment and is now in voluntary liquidation. Ibs effect of the failure of this old established Bank might have been disastrous but for the prompt sortion of the Imperial Bank which dealt with the situation in other association with the contract that the core association with the contract that the proper with the contract that the proper with the contract that the proper with the contract that the proper with the contract that the proper with the contract that the proper with the contract that the proper with the property of the smounts due to them. A bank of was averted and a critical to them A panio was a verted and a critical period was passed through with little difficulty

During 1923 the Tata Industrial Bank, which was established in 1918, was merged in the Central Bank of India

The following shows the position of the better known existing Banks as it appears in the latest available Balance Sheets —

## INDIAN PRIVATE BANKERS AND SEROFFS.

Indias private Bankers and Shroffs Sourshed point that the assistance of the Banks is called in Indias long before Joint Stock Banks were severed to the first of the Banks of the Banks is called in Indias long before Joint Stock Banks were severed to the Banks of the Banks of the Stock of the Banks of the Stock of the Banks of the Stock of the Banks of the Stock of the Banks of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of the Stock of t real service to the business community and of very great sasistance to Banks in India. Under present conditions the Banks in India can never present conditions the Banks in India can never tope to be able to get into sufficiently close touch with the affairs of the wast trading community in India to enable them to grant accommodation to more than a few of these traders firet, and it is in his expacity as middlemans of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state thing after the following manner A shop-keeper in the bassar, with limited means of his keeper in the bassar, with limited means of his own, finds that, after using all list own money, he still requires any list 25,000 to stock his shop and the latter after very carvell inquiries as to the abspiceper's position grants the accom-modation, if he is satisfied that the business is mate The business, as a rule, is arranged terrough a hounder britter, and in the case retried to the latter may probably approach about ten shrofts and secure accommodation from them to the extent of Rs. 2,500 esc.). A hoondee menally drawn at a currency of about 2 months is almost invariably taken by the shrofts in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to no doubt that this is done to a very considerable meet out of their own money, and it is at this extent.

of the shroff and the strength of the drawer. The extent to which any one shroff may grand accommodation in the basar is therefore which he had been supported by the strength of the strength of the shroft may think it advantage to place on his transactions, and (2) the extent to place on his transactions, and (2) the extent to place on his transactions, and (2) the extent to place on his transactions, and (2) the extent to place on his transactions, and (2) the place of his place of the place of the shroft had been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also been also they grant accommodation, and past experience has shown that the class of business above referred to is one of the safest the Banks can engage in

The rates charged by the shroffs are usually The rates oharged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and most necessary of the rates are the rates and the rates are the rates and the rates are the rates and the rates are the rates and the rates of the rates are the rates are the rates are the rates of discount, or 14 % is a fair average rate charged in Bombay to a first class borrower Rates in Caloutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay

The shroffs who engage in the class of busine above described are principally Marwarles and Multanis having their Head Offices for the most part in Bikanir and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in ex-change business throughout India, but there is

## THE BANK BATE

Formerly sech Presidency Bank fixed its a rule at a slightly higher rate Ordinarily own Bank Rate, and the rates were not uniform. Such advances or discounts are granted at from Row the Inperial Bank Rate she rate for the open she was a such as the rate fixed represents the rate fixed by the Banks on demand locans soon from the Banks rate of the second she was a special sound of the second she was a special sound of the second she was a special sound of the second she was a such as the second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second she was a second s

## Life Insurance.

an early date

There are no publications from which a complete statistical survey of the varience because of insurance work in India as be penditure stronged 2D per cent in the case be penditure stronged 2D per cent in the case in got Lite Assurance Companies doing best loss of Lite Assurance Companies doing best loss to British India. "Published by the Gov enment of India, (1924, gives mach information in regard to the Lite Assurance Companies when the Companies and the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Companies of the Comp

The oldest of the incluse companies were stabilistic in Endeas court for years ago Bornbay has none older than the Bombay Mctrasi, the Oriental and the Bombay Widows Mctrasi, the Oriental and the Bombay Widows Penason Fund which were established about 50 years ago Life Assurance seems not to have been started in Bengai until much later, and it was not until 1000 that many Companies were established either in that Presidency or chewhere in India. The year 1919 was marked by the formation of several new companies, more particularly in Bombay

In his introductory note to the official publication already mentioned, Mr H. G W Meikle, Actuary to the Government of India, dealing with the year 1922-23, says —

The total amount of paid-up capital of the Indian companies was lucressed slightly dur-ing the year and is now nearly 56 lakhs, 18 lakhs of which has already been expended in preliminary and organization expenses and 6 j is khs of the balance has been carmarked to meet deficite disclosed at the time of the actuarial valuations of assets and liabilities

The total sums assured remaining in force at The total sums assured remaining in force at the end of the year 1928 under ordinary life assurance policies issued by Indian companies is 40 ecores. The new sums assured during the year were over 52 crores. This new business is larger than in any previous year and is nearly more than three times as large as in 1918.

The everage rate of annual premium payable under the spillets issued by ricidian companies is nearly 5; per cent of the sum assured. The corresponding rate deduced from the returns to the British Board of Trade is lower, the difference being parity due to the fact that endow ment assurances constitute a larger proportion of the positionis smuch y landan than by British

Expenses.—Although the expense ratio of the companies as a whole shows a slight improvement yet there are unfortunately many companies which still conduct their business on remove which sold conduct their business on rubously extravagant lines. This is mainly the case with companies established after 1905 at the time of the Swadeshi boom.

The expense ratios of each different company show that although a few of the old companies have undestrably high expenses ratios and a have undesirably high expenses ratios and a item of those established since 1905 have come of the Life Act and not to the Provident Insurance in mentality small ratios yet it is mainly amongst the death of norrivance of any one life, it under successful to the companies established in scene Rs 500 of to receive premiums which it the past 30 years more than half are spanding the aggregate exceed Rs 185 in any one year over 45 per cent of their premium income where the period for which the premiums are lat this connection it may be pointed out that payable is unlimited or which exceed Rs 25 in the Insurance Companies ERR studgedler where such paried is limited 11

of industrial assumance business the cross thould be met by the director failing which the company had to be wound up. Although the company had to be wound up. Although the honly passed into law in September 1923, i should receive the most serious consideratio of extravagantly managed companies especial as fresh legislation dealing with imagence companies at to be undertaken in this country a

Actuarial Examinations.—It will be of interest to those who are destrous of quality actuaries, London, has for the last few year opened contres in Bombay and Calcutta for holding its annual examinations. The examinations are usually beld in April each year Can dilates who what to set for the examinations are usually set of the examinations are usually set of the contractions are usually set of the contractions are usually set of the examinations are usually set. required to give notice in writing to the Assis tant Secretary of the Institute, Staple Ian Hal Holborn, W C I, at least two months being the date of examination specifying the particular Examination for which they desire to enter and the centre at which they propose to present themselves

Actuarial Valuations — Of the 52 existing indian companies 37 have submitted the result of actuarial valuation of their assets and liabilities. The majority have undergone valuation more than once, and altogether 31 valuation reports have been submitted by the con tion reports have been submitted by the com-panies now existing. In the case of 26 companies the result of the latest valuations dis-closed a surplus. In 4 cases the defict wal covered by the paid op capital, thus proving solvency but precluding the pyment of eithe house or dividend. In the remaining 7 cases it became necessary sither to call up more capita or after the policy contracts. Thus only it companies out of a total of 52 have not under gone any actuarial valuation hour of these transact business which is not readily susceptible of actuarial valuation and the remaining 11 have not yet reached the stage of having s valuation

Provident Insurance Societies - Although several of the Indian Life Assurance companies several of the Indian Life Assurance companies (cruterly in existence may deservedly have had very undesirable reputations, it must be remembered that a great deal of discredit has been brought on the better class of such companies owing to the existence of a large number of Provident Scoleties whose unsound method have been dealt with in previous issues of thes returns. The essential difference between a Life Assurance Company and a Provident in an analysis of the companies of the second of the companies of the second of the companies of the second of the companies of the second of the companies of the second of the companies of the second of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of the companies of

societies in existence in index of the Provident Insurance Society type. Now 31 only remain, 7 of which are proprietary and the rest mutual The total paid up capital of the proprietary societies is only about Ra 35,000. The latest societies is only about Hz 30,000 The latest cocounts received from the societies indicate following list shows the Indiau companies — The tast their total annual income is about 2 lakhs extraces in the several provinces of India and their total funds amount to little over 4 arranged according to the year in which they tasks. Thirteen of these societies either do were founded.

as may happen in the case of a dividing society, ordinary life assurance business, or work on the the sum assured payable at death is not fixed dividing plan with a minimum guarantee, one is but may in certain contingencies exceed Rs. 500, whose society is subject to the Life Act. The fact of either the sum assured or the premiums as with case that the sum assured or the premium as with case that the sum assured or the premium as with case the sum assured or the product and the sum as the sum assured or the product and the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the sum as the Nine of the Provident Insurance Societies transact other classes of business, mostly marriage

This Company has, with effect from June 1922, merged in the Royal London Mutual Insurance Society

† The Indian life insurance business of these companies is transferred to the Sun Life of Canada.

# The Railways.

The history of Judian Railways very closely scenared cancilon to the building of lines reflects the financial reinstitudes of the country. Not for some time after the establishment of Railways in England was their construction in India contemplated, and then to test their applicability to Raistern conditions three experimental lines were sanctioned in 1845. These were from Calcutta to Raniszani (120 miles), the Raist Indian Railways. Bombay to Kaiyra (the Raist Indian Railways, Bombay to Kaiyra (the Raist Indian Railways, Bombay to Kaiyra (the Raist Indian Railways) building on the great stocked the stocked of the Raist Indian Railway building on a serious scale dates from Lord Dailbousie's great mignate of 1858, wherein, after dwelling apon the great social, political and commercial advantages of connecting the chief offices by vill, the Southern Markin (1880), and the Assessment of the Southern Markin (1880), and the Assessment of 1888, wherein, after dwelling non the great social, political and commercial advantages of connecting the chief cities by rails suggested a great scheme oi truth lines linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies with each other and linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the Fresidencies and linking the Fresidencie

The main principle in the formation of these The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition on which investors would come forward. This guarantee was fire per cent coupled with the research of all the land required, to return the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met interest charges were calculated at 25% of the rupon that the contract which is the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contrac we ment too fixed terms at the close of twenty have years and the Government were to exert also close control over expenditure and work has the close control over expenditure and work in The early results were disappointing by Whilst the Railways greatly increased the sefficiency of the saministation, the wholity of the troops, the trade of the country, and the movement of the population, they failed to under the southern movement of the population, they failed to make recities continue to the control of the population, they failed to the land the seed of the firm that the control of the population, they failed to the land the seed of the firm the control of the population, they failed to the land the seed of the firm the control of the population to the proposed and to the land the seed of the firm the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the c

prompts Great Britain and Russis to the very of war, necessitated the concertion of on outposts at Quetta and Chaman with the ma-liarnal and Bohn Passe were snormous costly, it is said that they might have bee ballasted with rupees, the long tunnel und the Khojak Pass added largely to this nece-sary, but unprofitable, outlay

should guarantee of \$ per cent with a share of surplus pecolist, or rebete up to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to the full to was substituted an increase in the rate of gran-antes from 5 to \$\frac{1}{2}\$ per each and of rebete from \$\frac{1}{2}\$ to 5 per cent with equal division of surplus profits over 5 per each in both cases At last the requirements of the market were met, and there was for a time stood a mild boom in feeder railway construction and the stock of all the sound companies promoted at a sub-stantial premium Conditions changed after the war and the Accord to Committee so far from approving of this system, considered that the amalgamation the number of existing companies and that it should only be in cases where the State cannot or will not provide adequate funds that private enterprise in this direction ould be encouraged

The existing Branch Line Companies have ceased for some time to raise additional capital for capital requirements. They have either ubtained overdrafts from various Banks for this purpose at heavy rates of interest or issued dabentures at special rates of interest (usually dabentures at special rates of interest (usually about 7 per cent) or in several cases asked for money to be advanced to them by the Hallway Board Bo far, therefore, from reducing the amount that the Government of India have to raise in the open market, they are at present locreasing that amount. It is proposed, therefore, to come to some arrangement with locus asthorites advantage on constructed of their which we said of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of the construction of account of the administrative advantages which they are likely to conter or for the development of a particular area, can be arranged

## Rallway Profits Commence

Meantime a much more important change was in progress The gradual sconomic de-velopment of the country vastly increased the traffic, both passenger and goods The falling in of the original contracts showed Goy

monacon, the rallway revenue must fluctuate, there was un reason to anticipate a further deficit, but the net rallway gain decreased to \$3,757,000 in 1930-21 and there was as actual loss of \$0,182,000 in 1930-193 as a trend to see that the second of \$1,825,000 in 1931-21 and the was considered in 1921, this loss was changed into a gain of \$813,000 in 1922-28 and this was further increased to a gain of \$4,273,000 in 1923-34 Frevided that the present rallway policy is not influenced too much by political considerations the net rallway gain about continue to improve

## Contracts Revised

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were contracts under which the guaranteed lines were constructed. The five per cost, dividend, guaranteed at 222 per rupes and the half-yearly settlements made these companies a drale on the State at a time when their stock was at a high premium The first contract to fall in was the East Indian, the great line connecting Calcutta with Delhi and the North-ern provinces When the contract tapsed, the Government excelled their right of par the Government excelsed their right of par-chasing the lice, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sluking rund for the redemption of capital. The rail-way thus became a State line, but it was re-leased to the Company which actually work it. Under these owe conditions the East to year eoded 100° after meeting all charges, including the payments on account of the terminable annuity by means of which the purchase of the line was made, and interest on all capital octlay subsequent to the date of purchase, a clear profit of nearly tem mil was in progress. The gradual scontains driver telephrane of the country vasily increased in the traffic, both passenger and groots. The containing the property of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the coun

## Improving Open Lines.

Improving Open Lines.

These changes induced a corresponding change in Indian Railway policy Up to 1900 the great work had been the provision of trunk ince. But with the completion of the Magda-Muttra line, providing an atternative broad gauge route from Bombay to Delbi through Rastors Raiputans, the trunk system was virtually complete. A direct broad gauge route from Bombay to 6 find is broad gauge route from Bombay to Sind is meeded, but obisity for strategic purposes. The poor commercial prospects of the line and the opposition of the Rao of british to any in the background. There does not exist any intrough rail connection between India and Burma, although saversi routes have been surjected the mountainous sharacter of the Durina, actioning severs; routes have Dees surveyed the mountainous character of the region to be traversed, and the casy means of communication with Burme by sea, rob this scheme of any living importance Further Survey work was undertaken between 1914 and this scheme of any living importance. Further the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the c

#### Government Control.

Government Control.

As the original contract carried a definite discovernment guarantee of interest, it was more consury for Government to exercise strong supervision and control over the expenditure during construction, and over management adding construction, and over management and expenditure after the lines were open for the state of the purposes a state of Construction of the purposes a state of Construction of the purposes as state of Construction of the Construction of the purposes as state of Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of the Construction of th

the existing system abould be replace by a Ballway Board, consisting of a Chairm and two members with a Secretary T Board was formally constituted in March 190 The Board is outside, but subcritizate to t Government of India in which it is represent by the Department of Commerce and I custry It prepares the railway programme or penditure and considers the greater question of policy and economy affecting all the line its administrative duties include the constru Ha administrative quites inclode the consist tion of new lines by State agency, the carryin out of new works on open tines, the improvement of railway management with rega-both to economy and public convenience, it arrangements for through traffe, the settl ment of disputes netween blues, the conf-tand promotion of the staff on State lines, as and promotion of the star on State lines, at the general supervision over the working at expenditure of the Company since. Two min-changes have taken place since the concist tion of the Rallway Board. In 1908, t meet the complaint that the Board we subjected to excessive control by the D partment of Commerce and Iodustry, the power partment of Commerce and Iodustry, the power of the Charman were increased and he was given the status of a Secretary to Government with the right of independent access to the Viceroy, he usually sits in the Imperial Legistative Council as the representative of the Rai way interest. In 1912 in consequence of companies of the accessive interference of the Secretary of the Charman of the accessive interference of the Secretary of the Charman of the accessive interference of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the Secretary of the S was undertaken by Lord Incheape to recondi-differences. Various changes were introduce during the years 1912-1930 such as the modi-faction of the rule that the President and neen bers of the Ballway Board should all be mes to large experience in the working of railways du-to the importance of financial and commercia considerations in connection with the contro-of Indian Ballway policy. This decision was however, revised in 1920 and an additiona appointment of Financial Advisor to the Ballway Board created instead. The question of the maximum of the control of the control and a revised organisation which is described later was introduced from 1st April 1924. Management.

The Ballways management,
The Ballways managed by Companies have Boards of Directors in London They are represented in India by an Agent, who has under him either a department organisation motive and Carriage and Wagon Superintendent, Controller of Stores and Chief Anditor or a divisional organisation with a Chief Operating Superintendent, Chief Traffic Manager, Chief Register, Chief Mechanical Engineer, Controller of Stores and Chief Anditor. The state Ballways are similarly organised.

concected with the Exiputana lines and Kathia order to resist the influence of cyclones. But in 1870, when the State system was adopted it was decided to find a more economical gauge, for the open lines had cost £17,000 a mile. After much deliberation, the metre gange of 8 feet 3 inches was adopted, because at that time the lies of adopting the metric system of rough the lies of adopting the metric system for local state of the lines of the lines in the lines of the lines in the lines of the lines in the lines of the lines in the lines of the lines in the lines of the lines in the lines of the lines in the lines of the lines in the lines of the lines of the lines in the lines of the lines of the lines of the lines in the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the lines of the li

consultated into a permanent body in 1903 they were built very light. But the traffic under the title of the Indian Railway Confer space association it is under the direct control of the railways, it selects a President from the members, and it has done much to the broad gauge. So, except in the ludes useful work. The standard gauge for India is five rest markers are stratege attraction demands six inches When construction was started feature in the arroad gauge shool was strong, and it was a great metre gauge system north of the deaster thought advisable to have a broad gauge in consocied with the Alpittans lines and Kabla.

The following statement brings out the more important features of the operation of Indian

capital at charge. Similar agures for the milways oward by the State are -

R. Total capital at charge 6,88,84,24,000 27.078 Total route mileage Return on capital outlay

After providing for interest, annuity and other similar charges the working of the State owned railways resulted in a net gain of Ra. 6,41,26,000 as compared with a net gain of Re. 12,099,000 in the previous year. This result was largely due to reductions in working expenses, the percentage on gross carnings having dropped from 69 09 per cent. to 63 5 per cent.

Railway Board Reorganised.—The machinery by which the Government of India controls the railways of the country has been frequently under review in the past. The basis of the system which was appeareded in April 1924 was evolved in 1904 as a result of the investigations of Mr Robertson and the Railway Board was established in the following Some of the difficulties involved in the year found of a controlling atthority for the railways of India may be realised from a study of tha Notes on the Relation of the Govern-ment to Railways in India printed as an appendix to the Railway Administration report incise notes bring out the great diversity of conditions prevailing which involve the Ballway Department in the exercise of the functions of

(a) the directly controlling anthority of the three State worked systems aggregating 9,028

(b) the representative of the predominant ming parener in systems aggregating 22,949

(c) the guarantor of many of the smaller companies, and (d) the statutory authority over all railways in India

Moreover in all questions relating to railways or extra municipal tramways in which Provincial Governments are concerned, the Railway Department is called upon to watch the interests of the Central Government and is frequently asked to advise the Local Governments. Its duties do not end there The inture development of rallways deponds largely on the Government of India and the Rallway Department is therefore called upon to plan out schemes of develor ment, to investigate and survey new lines and to arrange for snancing their construction The statement of the varied responsibilities of the statement of the varied responsibilities of the foverment of India in regard to rulesy might be awtended almost statement of the property of the statement of the property of the property of that may and do arise owing to the very consi-derable railway subleage in Indian States. In the exercise of all these functions the Railway Department is a Department of the Govern-ment of India, its policy must be in accord with the policy of the Government as a whole and avery decision must be made with that consideration in mind The evolution of a satisfactory anthonity for the administration of these varied functions has proved extremely difficult and the question was one of those referred to the

Railway Committee (1920-21) presided over by Sir William Asworth who expressed the sman-moss opinion that material changes were rece-sary in the constitution of the Railway Board Amongst their recommendations they advised the early appointment of a Chief Commissioner of Railways whose first duty should be to pre pere a definits scheme for the reorganisation of the Railway Department and Mr. C. D. M. Hindley formerly Agent of the Rast Indian Rallway and Chairman of the Calcutta Port Trust was appointed Chief Commi sioner on November 1st, 1922

The principal constitutional change involved In this appointment is that the Chief commission or who takes the place of the President of the Ballway Board is solely responsible—under the Government of India—for arriving at decisions on technical matters and for advising the Go vernment of India on matters of railway policy and is not, as was the President subject to be ont voted and over-ruled by his colleagues on the Board | I he detailed re-organisation of the Raifway Board in accordance with the Chief Commissioners proposals required careful consideration but one of the most important of his recommendations namely the appointment of a cular urgency and the Secretary of State s sanothat urgency and the besteary of blaces as no-tion was therefore obtained to the appointment of Mr G G Sim, C.I.E., I C S, who joined the Board on April 1st 19-2 While in the person of the Chief Engineer the Railway Board has always had available the technical advice of a senior Civil Engineer in Mechanical Engineering questions it has had to depend on outside assistance. The disadvantages of this arrange ment have become increasingly evident and it was therefore decided with effect from No vember 1 t, 1922 to create the new appoint ment of Chief Mechanical Engineer with the Bailway Board

In the new organisation adopted from the in the new organisation adopted from the tot of April 1972, the Bosen's consists of a Chief Commissioner, a Financial Commissioner and two Members, one of whose desis more parti-cularly with traffic and seablishment questions while the other deals with technical questions relating to civil and mechanical engineering Under the members are four Directors for

(1) Traffic.
(2) Mechanical Engineering
(3) Civil Engineering
(4) Establishment These Directors are executive officers and

heads of branches and have the power to decide questions which do not affect the policy of the

Working under the Directors are Deputy Directors of Traffic, Stores, Projects, Way and Works and Betablishment and an Assistant Director, Technical in charge of the Drawing Branch In addition a Deputy Director in charge of statistics has been appointed

The Deputy Directors are immediately in charge of branches dealing with definite phases of the working. The Traffic Branch deals with of the working The Traffic Branch deals with both the operating and commercial aides of traffic working, the Stores Branch deals mainly with the calling for tenders and placing of orders for all classes of rolling stock and generally with the supply of stores and materials. In

will not be deemed to have searned for purposes of division until such deficiency has been made good. From the contribution so fixed will be deducted the loss in working, and the interest on capital expenditure on strategic lines.

- (2) Any surplus profits that exist after payment of these charges shall be available for the rallway administration to be utilized in
  - (a) forming reserves for
- (f) equalising dividends, that is to say, for securing the payment of the percentage contribution to the general revenues in lean years, (4) depredation.
- (iii) writing down and writing off capital, (b) the improvement of services rendered to the public.
  - (c) the reduction of rates.
- (4) The railway administration shall entitled, subject to such conditions as may be prescribed by the Government of India, to borrow temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings ont of the revenue budgets of subsequent years
- (6) In accordance with present practice the figures of gross receipts and expenditure of railways will be included in the Budget Statement The proposed expenditure will, as at present, be placed before the Legislative Assem-bly in the form of a demand for grants and on a separate day of days among the days allotted for the discussion of the demands for grants the Momber is charge of the Railways will grants the houses in charge of the manways was make a general statement on railway accounts and working any reductions in the domand for grants for railways resulting from the votes of the Legislative Assembly will not enure to general revenues, s.a., will not have the effect of increasing the fixed contribution for the year
- (6) The Railway Department will place the estimate of railway expenditure before the Cen-stral Advisory Council on some date prior to the date for the discussion of the demand for grants for rallways.

When introducing this resolution the Hon'ble Member for Commerce stated that it had been represented to him that there was a general aling in the House that before the House was results in the request that better the proposals it should be allowed to refer them to a committee of the Home. He further stated that he had no objection to this course provided that the committee met rapidly This was agreed to and members were appointed

The committee met twice and considered the resolution but was not able within the time allowed to existing heaf rilly as to the effect of the proposals in the resolution on the control of the Assembly over railway finance and policy and as to the amount and form of contribution. and as to the amount and form of controction to be paid by the railways to general reveaues. Is the objections, the committee recommend of that the sensideration of the recolorition be adjourned till the actiums seeding to allow the committee fruither time for examination. Gov-ernments railed no objection to this program! and it was ignored to by the Assembly.

The resolution was further examined by the Standing Plannes Committee in Represent and as a result of the view expressed by the committee and in this Assembly certain modification of the time assembly on the standard section of the time agreed to by the Assembly on Reptambler 50th, 1924 and accepted by Government differed from the original resolution that the yearly con tribution had been placed at 1 per cent, instead of 5 fifth per cent on the capital at charge and if the surplus remaining after this payment to the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard per the standard pe and of the excess over 8 orores were to be trans-ferred to the Ballway Reserve and the remaining and was to accrue to General Revenues. At the same time a Standing Finance Committee for Ballways was to be constituted to examine the estimate of railways expenditure and the the estimate of railways expenditure and the demand for grants the programme revenue expenditure being shown under a depreciation fund. This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and II members elected by the Legislative Assembly from that body This would be in addition to the Central Advi sory Conneil which will include the Members of sory Connell which will include the Members of the Standing Finance Committee and certain other influid and non-official members from the Committee and the Committee and the Committee are not be subject to perjudic revision but to be provisionally tried for at least 8 years. They would, however, only hold good as long as the E. I. Railway and the G. I. P. Ballway and existing State Managed Railways remain under State management and if any contract for the transfer of any of the in any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrange-ments in this resolution.

The Assembly in an addendum recommended that the railway services and the Bailway Board ahould be rapidly Indianted and that the stores for the State Managed Railways should be perchased through the organisation of the Indian Stores Department.

Re-organisation problems.—The growing complexity of railway administration in India and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various rallways to revise their organizations. The general direction in which this re-organiza-tion is being considered is that of consolidation tion la being considered is that of consolidation into one department of the operating or transportation work of the relivary, including the proportion work of the relivary, including the proportion of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the constraint of the cons

(s) the separation of the commercial and operative duties of the Trame Department,

(b) the separation of the mechanical and running drites of the Locometre Department (c) the fusion of the operative drites of the Traffic Department with the running dation of the Locomotive Department.

Under the new organization there is now-(1) a Chief Transportation Superintendent. In change of all opening functions,

- (2) a Chief Traffic Manager in charge of the commercial side of the railway,
- (3) a Chief Mechanical Regimeer in charge of the design and construction of engines and of all repairs and renewals of engines carried out in the central workshops

This organisation is more or less similar to the divisional organisation found on most American Essivays with the exception that the Engineering Department still works on a departmental basis.

A somewhat similar organisation was introduced on the North-Western Railway from 1st October 1924, except that it follows rather the organisation in force on the South Africa Railways where the railways are divided into a number of areas or divisions such under once the railways are divided into a number of areas or divisions such under our officers in charge of definite phases of the working. The question of introducing a similar organisation on the Rasi Indian, Oodh and Rohllthund, and Rastorn Bengal Railways is under consideration

under consideration
Revision of Railway statistics.—A Committee consisting of one officer from the Traffice Department and one from the Audit Department of the North Western Railway was appointed in October 122 to suggest afternation of the North Western Railway was appointed in October 122 to suggest afternation of the Committee of the North Western Railway was a fur the Railway bear of the Railway Board and to bring them into line with present up-to date practice. For many years after the first nilways were opened, such statistics as were photomoder were poned to statistics as were produced to the statistics of the statistics were also prepared to some extent for trade purposes. It was only when comparisons between different railway systems came to be a matter of interest that statistics and examination of these figures were directed primarily towards and even then the tabulation and examination of acciention methods of railway working in or acciention methods of railway working in the statistics of the statistics of a railway working in the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of the statistics of

The existing statistics are based on the report of a Committee which as in 1880 to revise the form of the statistics. Considerable changes have been introduced since thea, and certain individual railway administrations have made considerable progress in the introductions of considerable progress in the introductions of the considerable progress in the interduction of Committee which sat in 1921 critiched the figures prepared and used for the purpose of the Ballway Board as being out of date and not in conformity with present-day practice.

The main changes recommended by the Committee of 1922 and accepted by the Railway Board are

- The introduction of monthly statistics in addition to the yearly statistics at present furnished to the Railway Board
- (2) The electification of railways under three classes for statistical purposes.

The former change will ensure the supply of up-to-date information of the working of milways to the Railway Board and will seable railways to compare their months of the seable railways to compare their months of the seable railways to compare their months of the seable railways to the country of the seable railways of the necessity for compling the detailed statistics which larger railways have to prepare

Revised Statistics were introduced from las Cotober 1983 on all railways and arendy their value has been proved as not only on railways belte to compare their results with those obtained by other railways but the Railway Board is in possession of up-to-date figures of working of all railways. Stating from April 1994 the complete monthly statistics of all deal Railways have been published on the lines of the monthly statistics of all deals facilities where the complete monthly statistics of all deals facilities that the complete monthly statistics of all deals facilities for Railways have been published to the lines of the monthly statisments laused by the uninistry of Transport for Railways and on sale to the public.

The outlay during the year 1933-24 was Ra. 21 32 crores, of which Rs. 19 71 crores represented expenditure incurred on State-owned lines.

Capital Programme —The Government of India has decided definitely to provide the sum of Rs 150 crores for expenditure on the India has decided definitely to provide the sum of Re 150 crows for expanditure on the rehabilitation of railways during the quinquen sum of Re 150 crows for expanditure on the rehabilitation of railways during the quinquen gramme of works on which that sum was based was prepared in 1921 at a time when prices of materials were still high and unstable. Moreover the position of the general Revenues of India smount, charges lie to revenue expenditure, which the supplied to revenue expenditure, which the supplied to the full amount, charges lie to revenue expenditure, which the supplied to the quinquenthum and many of the larger work were therefore in the preliminary stages explain why less than 3-dris of the annual quots of the Re. 150 crores were actually expended. The original programme provided for a general increase in facilities in the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of to justify the proposed expenditure In March 1923 the report of the Inchespe Committee to justify the proposed expenditure In March 182 the proposed expenditure In March 182 the proposed expenditure In March 182 the proposed expension of the March 182 the proposed expension that Committees recommended that, except in the case of commitments already entered upon, so further capital expenditure should be incurred on commitments already enhead to provide proposed to the proposed to the proposed expension of the proposed expension of the proposed expension of the proposed expension of the control of the proposed expension of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the

during 1923-24 and at the same time the recommendations of the Incheape Committee that the total earnings of all railways only were considered by the Central Advisory Council laws the motorned the policy proposed as likely to be of value to India as a whole.

\*\*Repaired\*\* and the total council is a whole.

who endorsed the polley proposed as likely to be of value to India as a whole.

Trade syriaw — The earnings of railways are local expendent on the general property of the country which in the case of India is most easily of the country which in the case of India is most easily measured by the agricultural positions and the returns of foreign trade. Indiged by the unual orderist, there was on the whole a small improvements in the trade of the country as while there expendently for each class for the 4 years, prevent in the trade of the country as while there

NATION SAURS

In spite of an increase in the traffic dealt with there was a saving of Ea. 490 cross of which Ea 1.66 cross was due to less expenditure under programme revenus and so cannot be considered as a true saving as it was due to deferred maintenance. The true saving can then be taken as Ea 2 32 crores of which the majority or Ea 1.40 crores is found in the Locomotive Department due to decreased consumption of foreign coal and improved efficiency of working. There were also earlings englished the coase of the Traffic Department ment in a large reduction in the amount paid as compensation for goods damaged or lost

Open Mileage—The total route mileage on March 51st, 1924 was 38,038 52 made up of--5 -6" gauge 18 640 85 miles Metre guage 15 659 21

Under the new classification adopted for statistical purposes, this mileage is divided bet ween the three classes of railways as follows— 84 761 65 Miles = 91 5 per cent Class I Class II 1,868 06 , - 4 8 Class III 1 408 81 Class I includes all the 5 6'gauge milesge 14,158 87 or about 90 per cent of the metre gauge and 19 62-48 or 52 5 per cent of the

DATTOW GAUGES

During the year 1923 2: 480 12 miles of new lines were opened for public traffic Of this milesge 422 68 miles belong to Class I, and 7 64 miles to Class I, rathways

Additions to Equipment, Statements Ro-V.—Statement of Requipment—and Ro IX— Statement of not additions to Equipment— summarise the equipment and the not additions to equipment during 1923 24 on Indian Ball Ways Statements Ros 10, 11, 32 and 33 give this information in more detail for individual

It will be seen that on Class I railways there were additions of 158 and 65 Broad and Metre gauge Locomotives bringing the respective totals up to 5,564 and 2 715

In the case of passenger carriages on Class I railways not additions of 287 to the stock of broad gauge vehicles brought the total up to 10 091 and aimiliar figures for the metre gauge were ust additions 127 and total 7,577 The following table shows total figures of seating accommodation under the four classes

α	lass I Rail	Number of seats in passenger carriages						
	WAYE	lst	2nd	Inter	Third			
5	6"	21 802	40,724	48,837	567,828			
8	3}*	10 089	13,261	9,547	821,242			

The State-owned 27 078 00 miles or about 72 per cent and directly managed 9 178 55 railway were 4,650 covered and 1,888 open miles or about 24 per cent of the total metre gange Wagons

etc. etc.

Without guing into datalin beyond the scope of this report, it is impossible to connect these figures with the number of icomotives and farre concrete sleepers.

As second enquiry is being made into the properties of the cort of sparre parts for repair represents payments for fo b deliveries at foreign ports of coping within at the close of the year may have been still at see or under erection in India. In the case of wagno contracts too trye position is completed at heart of the case of wagno contracts too trye position is completed at heart of the case of wagno contracts too trye position is completed at heart of the case of wagno contracts too trye position is completed at heart of the case of wagno contracts too trye was a conditional progress was made during the methods as in India to make advance payments for raw material when received by the contractors.

Progressive Policy —Considerable progress was made during 1924 in investigating new methods and adopting improved ideas. For example, the Railway Board have decided to recommend the adoption of a centre buffer coupler to all railways and railways have been asked to experiment with transition devices in order to evolve a satisfactory transition gear during the transition period

The first Mallet engine for use on the broad gauge was received in India for service on the Quetta District of the N W Railway The engine is a 2-6-6-8 articulated compound type fitted with superheater and the tractive effort at as the same time a Garrett engine which is another apocial type of articulated engine habeen ordered and expected to arrive during 1994.98 These transfer of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of 1924-25 These two engines will be tried on the same section and it will then be possible to decide which is the best type of engine for use on heavy

A comprehensive enquiry was carried during the year into the resources of supply of timber alsopers is India and Burms and the develop-ment of such resources. Owing to the increas-ing difficulty of obtaining a sufficient supply of suitable hard wood sleepers and to the rise suitable hard wood sleepers and to the rise but the sand companies for which the Gort in the price of sleepers it became necessary to consider the possibility of opening up new The figures of receipts and expressibility for great areas of substituting new varieties of ways with which the Gortrament are directly indigenous tumber, suitably treated in concentry, concentry, to more down a follows.

(1) reduction of staff, (2) improved methods of operation, (3) reduction in stores balances,

(4) increased use of scrap materials
(5) economy in the use of stores and employment of cheaper materials where possible etc.

British Empire Exhibition —The exhibits from Indian Railways occupied a space of over 4 000 square feet in the Indian pavilion and all the more important railways sent exhibits which were placed in three courts. The outer boundary of two courts was designed in the Meghal style of architect while that of the third court style of architect while that of the third course was in the Dravidian Temple style as more representative of the railways in the south of india. Generally speaking the exhibits consisted of models of various classes of stock, stations, bridges, wason forries general offices and included an exhibit illustrating the development of transportation in Southern India. Considerable interest was shown in these contribute byte the first time and many "sinform reached by railways in India.

Financial Results of Working -The total gross earnings of all railways in India during the gross earnings of all railways in incide during the year 1923 24 amounted to Rs 107 80 errores as compared with 105 65 errores in 1923 28 Those figures, however include railways owned by Indian

Traffic receipts from Government Railways Government share of surplus profits from subsidised of		n thousands) 94,65,52 28,64
	Total	94,89,16
Working Expenses	Ra 61,06,28

Interet on Government debt	17 58,64	
Interest on Capital contributed by Companies	3,09,94	
Annuities in purchase of railways	4 69 62	
Sinking Funds	47,75	
Tand and subsidy to Companies	5,40	
Macellaneous	4,80	
	Total charges	\$8,30,50
	Het cain	6.58.57

3

After mosting all interest and manning charges Government therefore received a net profit of 750 cores as against a profit of 125 cores in 1923-63. On the capital at charge of the State lines the net receipts, that is the gross receipts seless the working expenses, have in recent years given the following returns—

	Per cent
913-14	5 01
921-22	2 64
922-28	4 88
928-24	5 24

Up to date figures of the results of working of other countries are not available, but the following table compares the latest available figures of average receipts per ton mile of those countries which have published statistics of working later than 1919—

Receipts per ton mile Pies

7 29° 19 8 9 79 46 08 United States of America 1928 United Kingdom 1923 South Africa Switnerland 1921

United States of America France—State Lines only All Lines English Rallways South African Ballways Argentine Ballways Canadian Ballways

India

South Australia 1921-22 Canadian Bailways 1923 8 44 8 11 India 1923 24

\* Corrected at \$ 4 40 mmE 1

In the case of receipts per passenger mile the figures for United States of America and India are as follows -

United States of America, 1922 19 64 piec. India, 1923 24

while in England the present fare charged per mile third class is 18 pics

From the above it will be seen that railway transportation of reight in India is probably the cheapest in the world and still more so in the case of passenger trains

An examination of the latest available figures of operating ratios of foreign countries brings out results not unfavourable to Indian Rail WAYS

Year Operating Ratio 77 97 per cent 1923 1922 115 1922 1928 1922-28 1921 22 1928 77 1 74 34 to 85 20 86 28 69 09 .. .. .. \*\* ,, 1922 28 1928 24 68 50

Value of Relivary Materials Purchased —The value of materials purchased by Indian rallways in 1933 24 (excluding coal occ, stone bricks line, ballast, etc.) showed a decrease of Rs 3 80 errors as compared with the value of materials purchased in 1923-23.

	Value of imported materials

Engiway Collieries — Considerable progress
was made in the acquisition and development of railway collisates during 1923-24 and the
Secretary of State's sanction to the acquisition
of the following collisates was received Aspala, on railways — no cost of railways collisates was received Aspala, on railways. — The cost of railways consumed

eery favourably with the market price and in the interesting of shamp transportation the policy of railway owned collieries has been fully juncticed \$40 res Railmaces — Purther steps were taken during 1952 24 to reduce the stores balances on railways and in this connection a conference of Controllers of Stores and Audit Officers was called and the steps to be taken were discussed with them and the Agents of Class I Bailways As a result of these discussions Class! Railways As a result of todes uncountry it was decided among other things that existing stocks should be written down to current market rates surplus stock should be disposed of large stocks of stores obtained by local purchase shookd not be maintained and addi-tional grants should be given to enable rallways to utilise materials in stock for programme revenue works

Number of Staff -The total number of Number of Staff—The total number of staff—The total number of staff—The total number in staff year 1923 24 was 727093 as compared with 749 680 for the previous year. This is a decrease of 22 587 in number in spite of an increase in mil suc of 430 12 miles of the 727 093 nursem in mit age of 439 12 miles of the 727 098 employes 6 642 were Europeans 11 509 Anglo Indians and 708 942 Indians Similar figura for 1913 14 were Europeans 7 986 Anglo Indians 10 487 and Indians 614 882 which make up a total of 633 305

The position regardle g the more extended em ployment of Indians in the higher grades of rail way service was reviewed in counider able detailin the Administration Report for 1921 auge ceasing the Administration Aeportion 1921
22 Since then the public interest in this question has been maintained finding voice in the press and by interpeliations in the Legislature The Government of India bave throughout maintained the attitude that every reasonable means should be adopted to increase the number of Indians in the bigher grades in so far as such increase is consistent with efficiency and

to be taken to improve the facilities for training Ladians was proposed by Mr H L. Cole and each earlier of the Courts Advisory Council in July 1923 it was arranged that an officer should be placed on special duty to make offine recommendations in regard to the measures recommendations in regard to the measures result of the work done by this officer the Eadway Board were in a position to place before the Central Advisory Council their proposals in February 1924 and after considering their views the Ballway Board decided to proceed with the scheme at once so far as the State Eadway were concerned and the whole question was also consure the active co-operators of Company managed railways managed rallways

The aubject divides itself into two main parts -

(1) The method of recruitment to be adopted in future for appointment to the officer and ser subordinate grades and for providing the neces-sary facilities for training either before or after recruitment

(2) The means to be provided for training in their current duties the existing subordinate staff of all classes

It is proposed to start a Central Transporta-tion School in the United Provinces and const derable progress with this scheme has been made during 1924

Patalities and Injuries — During 1923 24 there was an increase of 78 in the number of persons killed and a decrease of 22 in the number of persons injured as compared with the figures of 1922 23. This increase of 78 was wholly due to an increase in the number of persons other due to an increase in the number of persons canar than passengers—rallway servants killed. The following table shows the numbers killed and injured separately under passengers, rallway ser yants and others for 1933 24 as compared with

	Killed		Injured.	
<del></del>	1922 23	1928 24	1922 28	1933 24
A Passengers— (1) Accidents to trains rolling stock permanent way etc	30	63	154	214
(2) Accidents caused by the movement of vehicles osed exclusively on railways (3) Accidents on Railway premises not due to	364	800	1 170	1 088
Train accidents or to the movement of vehi	11	9	- 44	200
B Servants—  (1) Accidents to trains rolling stock permanent way etc	80	21	125	874
(2) Accidents caused by the movement of vehicles used exclusively on railways (3) Accidents on Railway premises not due to	345	355	671	585
Train accidents or to the movement of vehicles	47	41	554	\$61
Others— (1) Accidents to trains rolling stock permanent- way etc	17	65	24	39
(2) Accidents caused by the movement of vehicles	1,890	1 945	712	678
(3) Accidente on Railway premises not due to Train accidents or to the movement of ve- hicles		19	15	88
Total	3,740	8,818	8,460	8,441

Of the total number of persons killed I,607 were trespassers on the line and 345 committed autoids. Thus I,850 or over 65 per cont of the persons killed on rallway premises were for causes over which the railways have no control

Local Advisory Committees -By July 1924 Local Advisory Committees had been formed on all Class I State Bellways with the exception of the B N By where this question is still under consideration A wide range of subjects was discussed at these meetings and particular attention was paid to each subjects as improve-ment of facilities for inter and third class passengers, locreased facilities for merchants, timings of trains and running of through carriages etc.

Compensation for loss and damage to goods in transit —A great improvement was made during 1923-24 in reducing the amount paid in compensation for loss and damage to padd in compensation for loss and unuser or goods in transit, the total reduction on Class I Railways being Ha 42 lakhs The full effect of the measures taken on railways such as the reorganisation of the Watch and Ward Staff has not yet had time to take place and a further improvement is expected during the

next year

lative Assembly in March 1932, a Committee was appointed to revise the existing risk no forms. The recommendations of this Committee, received in September 1932, involve considerable changes in the form of risk not siming chiefly at imposing on the reliways it onns of proof in cases where losses appeared it be prime facts due to misconduct of railway staff After obtaining the views of Loci Governments, Railway Administrations and Chambers of Commerce on these recommends. tions, the revised forms were referred to the legal advisers of Government. Revised rise note forms A B D G and H have been hand and have been notified as coming into force from 1st October 1924

Conditions of 3rd Class Travel -The desirability of improving the conditions of trave of third class passengers has been constantly referred to in the press and in the Legislature and considerable progress was made during 1923-24 in providing extra facilities of which details have been given in the Assembly from time to time and in the report by the Railway Board for 1928-24 I kwas found that the know ledge of local conditions possessed by Local Advisory Committees was most useful in beining ext year

Railway Administrations to find out when
As a result of a resolution adopted in the Legisfacilities were required

#### THE CHIEF RAILWAYS IN INDIA

The Assam-Bengal Railway, which is constructed oo the metre gauge, starts from Chittageng and runs through Surms Valley across the North Cachar Hills into Assam It is worked under a limited guarantee by a company

The Indian States.
The principal Indian States.
The principal Indian State Railways are the Nizam a constructed by a company under a grammitee from the Hydersbad State, the Kathlawar system of railways, constructed by subscriptions, among the several Ohiefs in Kathlawar, the Jodpur Bikaner Railway, constructed by the Jodipur and Bikaner Chiefs, the system of railways in the Punjab, construct ed by the Pathia Jind Maler Kotia, and Kashmir Chiefa and the railways in Mysore, constructed by the Mysore State.

#### PROGRAMME OF FUTURE CONSTRUCTION

As a result of the decision to spend part of the as result of the decision to spend part of the Bs 150 croves sanctioned by the Assembly on the construction of new lines promising an adequate return the Railway Board have been angaged during 1028 24 in investigating the prospects of auto projected railways Future railway construction fails into 4 maks groups

The development of railways in —
(1) South India
(2) The Coal field area
(3) Burma

and (4) The rest of India

For many years it has been recognised that there was need for considerable railway extends atom in the Madras Presidency end after careful lawes(gations it has been settled that certain projects, of which the following are the more important should be undertaken and completed as early as possible —

#### (1) Villupuram 1 richinopoly Chord

This line will form an alternative ronte between Madras and Trichinopoly and will afford such relief to the existing line as will defer the necessity of doubling it for many years The new chord will be 100 miles in length and will open up and develop new and populous

#### (2) Shoronur Nulambur Radicay

This extension on the 5 6° gauge will run through the Moplah country and is one of the most important measures necessary for the reconstruction of Malabar The line will be 41 miles in length

#### (8) Virudupatts Tenkası Raslway

This line will also open up new country and help to relieve congestion on the main line It will be 76 miles in length

As regards the coal field area investigation As regards the cost field area investigation has proved that good cost in large areas is avail able in the area lying between the East Indian and Bengal Magpur Railways running weekward from the Jheris Cost fields as far as Ested in the Oentral Provinces It is accordingly proposed to provide the following lines to serve as outliefs towards the north and west of India —

(a) Deltongani to Hutar (b) Hutar to Heba (d) Hutar to Anuppur 17 miles

A large amount of railway construction is at present in progress in Burma and when this is completed large stretches of new country will be opened up The most important of them are probably -

Pyinmana—Ts nngd wing yi Moulmein—Ye

Alon-Sainglyin

Beg yi-Yeu

As regards the remainder of India probably As regards the remainder of their probably the most important lines projected are a line joining Obittagong and Alyab and the construc-tion of the Balpur Parvathoram section of the Ralpur Vizianagram Rallway with which is linked the development of Visiagapatam as a major port

The proposed Raipur Pervatipuram Railway 2501 miles in length would traverse near its centre the largest remaining area of India which is devoid of railway communication The main is devoid of railway communication. The main traffic expected to travel over this line is manganese ore which is at present despatched from Central Provinces to Calcutta and Bombay. The second item of traffic of which the export is expected to develop via Vixiagapatam is cotton

Electrification of Railways.—Work on the electrification of the Bombay Suhurban and local services of the Great Indian Peninsula and the Bombay, Baroda and Central India Bailways is in progress In the case of the G.I.P Railway it is proposed to electrify the following sections

Thana Kalyan 12 41 miles Harbour Branch and Mahim Chord 9 49 miles

Victoria Terminus to Thana 21 miles The Harbour Branch from Victoria Terminus to Kuria was opened for traffic in February,

The Harbour Branch and Mahim Chord will provide for an entirely new passenger traffic which is expected as a result of the development scheme for the city of Bombay

The introduction of electric traction **-111** allow of all main line trains between Kalyan and Victoria Terminus being haused by electric engines and the question of extending the electric services to Igatpuri and Poona is now under investigation.

In the case of the B. B. & G. J. Ballway is in Ballway electrification will be obtained from the proposed to electrify the local services observees classric Gate and Borrell, a distance of 31 miles. Fower for this scheme and for the G I. P. Companies and considerable savings by a reduced to the contract of the scheme and for the G I. P.

#### INDIA AND CEYLON.

The possibility of connecting India and Ceying the whole way from Rameswaram to Mannar has been reported on from time to time eince 1895 various schemes having been enggested.

The South Indian Railway having been extended to Dhanushkodi, the southernmost point of Bancewaram Island, and the Ceylon Gov-ernment Ballway to Talaimannar, on Mannar Island, two points distant from each other about 21 miles across a narrow and shallow strait, the project has again been investigated with the idea of connecting these two terminal stations by a railway constructed on a solid embankment raised on the sand bank known as ' Adam's Bridge", to supersede the ferry steamer service which has been established between these two points.

between these two points.

In 1918, a detailed survey was made by the South Indian Ballway Company and a project has now been prepared. This project contemplates the construction of a causeway from Inhamahhodi Point on the Indian elde to Talai mannar Point on the Ceylon side, a length of 20 65 miles of which ? 19 will be upon the dry land of the various lands, and 12 86 will be in water. The sections on dry land will consist of low banks of sund higher the contemplation of the various lands, and 12 86 will be in water. The sections on dry land will consist of the various lands, and 12 86 will be in water the sections on dry land will consist of the various lands, and 12 86 will be in water than the section of the content of the lands of the water lands will be carried on a causeway which it is proposed to construct in the lollowing way. A double row of reinforced concrete piles, pitched at 10 feet centres and having their inner faces of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of 14 feet apart, will first be driven into the sand. These piles will then be braced together longi-tudinally with light concrete arches and chains and transversely with concrete sectors and online and transversely with concrete ties a truts and chains. Behind the piles sisbe of reinforced concrete will be alipped in to position the bottom slabs being sunk well into the sand of the sea bottom. Lastly, the apace enclosed by the slabs will be filled in with sand.

The top of the concrete work will be carried to six feet above high water level, and the raise will be laid at that level. The sinking of the plies and slabe will be done by mean of water jets. This causeway, it is expected, will cause the suspended sand brought up by the currents, to settle on cilber side bringing about rapid scoretion and eventually making one big island of Rameswaram island and Mannar Island.

If this method of construction is adopted, it is estimated that the total cost of the causeway and works at the two terminal points, viz — Dhanushkodi and Talaimannar will be approximately 111 lakhs.

#### Indo-Burma Connection.

The raids of the Emden in the Bay of Bengal in 1914, and the temporary interruption of communications between India and Burma, atimulated the demand for a direct rallway connection between India and Burma. Govern-

ment accepted the position and appointed Mr Richards, M. Inst. O.E., to be the engineer-in-charge of the curveys to determine the best ronte for a railway from India to Burma. coast route appears to be the favoured one. This coast routs appears to be the favoured one. This would start from Chittagong, which is she terminus and head-quarters of the Assamabengal Raijway and a seaport for the produce of Assam. The route runs southwards through the Chittagong district, a land of rettile rios field intersected by big rivers and tiddis creeks and it crosses the inde-Burnas frontler, 48 miles from the town of Unitagong For about the town of Unitagong For about the town of Unitagong For about the town of Chittagong For about the town of the town of Unitagong For about the town of the town of Unitagong For about the town of the town of Unitagong For about the town of the Akyab doits. These include the Kalidan river which drains 4,700 miles of country and even at a distance of about 80 miles from its mouth is more than half a mile miles from its mouth is more than half a mile About 260 miles from Chittagong the wide About 200 miles from Chitiageng the railway would run into the region of magnows awamps which frings the seasonat north and out into the mangrows awamps like ribs from the backbone Innumerable apurs of the Arrakan Yome bave to be crossed Yomas is a mountain ridge which extends from Ose Regrain northwards until ti loses itself in a mass of tangled hills east of Akyab and Chittageng, At its southern end the height of the ridge is insignificant but it has peaks as bigh as 4,000 feet before it reaches the skittude of Bandway and further north it rises much higher. It is a and further north it rises much nigher. It is a formidable obstacle to railway communication between India and Burms. This routs is cetimated to cost about 27,000,000 and would have to be supplemented by branch lines as Akyab where there is at present a considerable rice trans, and the cost of this would have to be added to the £7,000,000 already referred to
The other routes examined have been the

Hinkong Valley route and the Manipur route which were surveyed by the late Mr B. A. Way many years ago The Manipur route is said mated to cost about 25,000,000 as it has to erose three main ranges of bills with summit levels of 2,600, 3 600 and 8,500 feet long. Attoacher there would be about four miles of tunnelling through the three main ridges and through other hills and more than 100 miles of expensive undulating railway with grades as steep as 1 in 50 and 11,000 feet of aggregate rise and fall. The Hukong valley route seems to be the cheapest one as it is estimated to cost £3,500 000 This one as it is estimated to cost 23,00000 Tml line is only about 284 miles long and it presents fewer engineering difficulties than either the Coast or the Manipur route One bundred and fitty miles of this route lie in open country and fifty miles of this route lie in open sountry capable of cultivation though at present it is only very thinly populated. Only one range of Mile has to be crossed and this can be negotiated with a summit tunnel of 5,000 feet long at a height of 2,000 feet. There are less than firty miles of very beavy work and only about 4,500 ft, aggregate of rise and fall.

Main results of working of all Indian Raliways treated as one system.

(c) F O B value at Indian Ports

(b) Export values,

(c) Excludes the value of 982 tons

The feature which stands out most promisely in a survey of the mineral industries of India is the fact that until recent years little has been done to develop those minerals which are essential to modern metallurgical and she mical industries, while most striking progress mical industries, while most striking progress which products are obtained suitable for export or for consumption in the country by what may conveniently be called direct processes in this respect India of to-day stands in contrast to the India of a century ago The European Pourice acid and sikell and sided by low see relights and increased facilities for internal distribution by the spreading network of rail ways has been enabled to stamp out in all but manufactures of alone fourishing native manufactures of alone fourishing native manufactures of alone the various alkaling the seed and from and seriously be ourtain the export trade in nitre and borax. The reaction against that invasion is of recent date. The high quality of the 1 rative made from the early anticipation of the processes now employed in and the artistle products in copper and brass gave the sountry a prominent position in the source of nitre India held a position of poculiar political importance until less than forty years found a mong kis by products cheaper and more effective compounds for the manufactur of explosives

Coal Committee appointed—The Government of India announced in 1924 the appoint of India announced in 1924 the appoint outputs (1) generally was to measure are to be taken by the Government, the coal trade, the railways and by the ports whether singly or in combination, to atimulate the export of authable coal from Calcutta to Indian and foreign ports, (2) in particular whether effective measures can two in parasoniar wasting enective measures can be taken for pooling and grading Indian coal for export and for bunkering and how the cost of such measures should be met

The Government quotes coal import figures tection

which show the competition from which the Indian coal industry is now suffering, not as much in the Indian market as in oversee markets such as Colombo and Singapore While the Government holds that the oversees market could not be recovered by the protection of the Indian Market, it regards it, nevertheless, as pos sible that the measures necessary to recove the overseas market would be sufficient with ont further protection to enable Indian coa to meet competition in the home market

The committee consists of President, Mr F Noyce, I OS Members Mr F C Legge, the Chief Minley Engineer of the Railway Board, Mr S C Staart Williams, a Director of the Wagner Interchange, Mr A A F Bray, the Chairman of the Calcutta For Truck, Mr W C Bauerice, Chairman of the Indian Mining Association, Sir Bajendra Nath Muterjee, Vice Association of the Indian Mining Federation and the Hon J W A Bellof Messrs Mackinnon & Mackensie, Calcutta, Secretary, Mr H P V Townend, ICB

The committee assembled in October Its recommendations will necessarily infinence the Tariff Board's investigation into the question whether the Indian coal trade is in need of pro

#### IRON ORE.

away from the great all what traces of the Butus, Genges and Brahmapours in which size heaps are not found. The primitive iron as leiter finds no difficulty in obtaining a mileient amplies of ore from deposit that no European iromaster would regard as worth bis serious consideration Early attempts to introduce European processes for the manufacture of pig iron and steel were recorded to 1830 in the South Arcot District. Since that date various other attempts have been made but none proved a snocess before that now in operation near Barakar in Bengal The site of the Barakar Iron-Works was originally chosen on account of the proximity of both coal and ore snpplies. The outcrop of iron stone shales between the coal bearing Barakar and Ranigani stages stretches cast and west from the works, and for many years the clay ironstone nodules obtainable from this form atton formed the only supply of ore used in the blast furnaces. Recently magnetite and hema-tic have been obtained from the Manbhum and Singhbhum districts, and the production from the last named district has largely replaced the supplies of ore hitherto obtained near the iron works. The Bengal Iron and Steel Com iron works The Bengal Iron and Breel Com pany, Limited, have now given up the use of

Bengal and Bibas and Orleas are the only pro- | Marchblum has led to the discovery of someoress vinces in India in which from ore is mined for additional deposits of tron-ore, the extension of smelting by European methods. Iron smelt-ing, however, was at one time a widespread in- distinct in Orlean, as total distance of some 40 dustry in India and there is hardly a district miles in a S. S. W. direction. At Panstra Burs, away from the great alluvial tracks of the Indias, a portion of Noton Burr, the deposit has been which has been traced into a soninar and points States in Crissa, a total distance of some 40 miles in a S. W. direction. At Pansira Burs, a portue a of Noto Burn, the deposit has been opened in a dow teeds the Barskar frouwork Burn rises to over 2,500 feet above see level, the low ground on the west side being at about 1,100 feet above sea-level. The upper most 400 to 450 feet of this bill has now been opened np, and the workings indicate the exist ence of a deposit about a quarter of a mile long, ence of a deposit about a quarter of a mile long, perhaps 40n feet thick and proved on the dip for about 500 feet. The ore body appears to be interhedded with the Dharwar slates, from which it is separated by banded hematite-jaspers. The interhedded is high grade micacous becausite, often istartized at the outcome Consecution to the interior of the deposit show that the other control of the deposit show that the other control of the consecution of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the oxactly reproduced in the iron-one deposits of Gos and Rathaghti. The Tata Iron and Siesel Company at Bakchi possesses slightly richer and purer ore bodies in the Raipur dis-trict, applies of ore are at present urawn from the depolite in Mayurchian. The ore-deposits have all been found to take the form of roughly leotleniar leads or bodies of hematite, with iron works The Bengal Iron and Steel Com leoticular leads or bodies of hematits, with pany, Larkted, have now given up the use of small proportions of magnetics, in close secover obtained from the neighbourhood of Bara leads of the proportion of the neighbourhood of Bara leads of the proportion of the neighbourhood of Bara leads of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of the proportion of th

The production of iron-ore increased by 29 6 per cent, str. from 625,274 tons in 1923 to 654,364 tons in 1923 to 654,364 tons in 1923 to 654,364 tons and 1923 to 654,364 tons against Mayurbhan in the following table represents the production by the Tata Iron and Sked Company Ltd., although the raisings amounted to 507 256 cons, the total ore despatched from Mayurbhan in the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the const 804,884 tons in 1923. The figure shown against Mayurbhan in the following table represents the production by the Tatal Iron and Steel Company produced 1921,135 tons of pig fron, 151,097 tons of steel-Ltd, although the raising amounted to 507,285 along the production of the production of the steel Company produced to 1921, which could not be despected over production being taken from the balance of raising in the year previous to 1923, which could not be despeated over the production of the steel Company to 1923, which could not be despeated over the production in Singham is a steel Company on memore of turning out the production in Singham is now the steel Company commenced turning out and Steel Company being responsible for \$4,000 during 1923 amounted to 77,980 tons.

MANGANESE ORE This industry commenced some thirty years ago by quarrying the deposits of the Yisagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900, when the riches deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Yisacopatam miles. India now factorized supports occur in the control of the provinces occur in the Central Provinces Midral Central India, and Mysoreimportant department in the another important department in the latter the latter supply coming from the Central Frevinces. The uses to which the ore is put are somewhat varied. The peroxide is used by glass manufacturers to destroy the green colour in glass making, and it is also used in porcelain painting and glating for the brown colour in glass making, and it is also used in porcelain painting and glating for the brown colour in glass making, and it is also used in the manufacture. Since 1904, when the latter manufacture is since 1904, when the total output was 160,190 toon, the progress of the industry has been remarkable owing to the high prices prevailing. In 1906 production reached \$47,527 from. It is following year it was more these again (rose to 903,281) trusted to the control of the fall in prices the output contracted to 64,875 froms, but it almost regained its former position in 1910 when the vinces, Madras Central India, and Mysore

production rose to 800,007 tons In 1911 is fell to 670,390 tons. In 1916 the output was 655,304 tons varied to be at Indian Forts at £1,487,025. The over raised in the Contral Promosis is of a very high grad, ranging from 60 to 54 per oant of the metal, and in consequence of the fine fluctuative is a high country tax of treight over 500 miles of railway, besides the shipment charges to Europe and America Indian States.

shipment charges to Europe and America The output in 1923 was 695 655 tons valued at £2,215,984 f o b Indian Ports, Exports of Manganess-ore from British Indian ports during 1923

#### PETROLEUM.

Petroleum is found in Indis in two distinct area is by far the most important, and the most areas—one on the east, which indondes Assam, successful oil fields are found in the Irrawaddy Burms, and the islands off the Arakan coast valley. Yonangyzanug is the oldest and most This belt extends to the productive oil fields of developed of these fields Native wells have Samatra, Jara, and Bonno. The other area been as work bere for new 100 years, and in is on the west, and indudes the Funjab and 1886, prior to the annexation of Upper Burms, Baltohistan, the same bett of oil-bearing rocks the output is estimated to have averaged over being continued beyond the boarders of British 3 million galions a year. Drilling was begun India to Pecils Of these two the eastern in 1887. The Yeansangyst field yielded a very

the apply of perceions before 1891, in free defiling mass started by the Europe phase among the oil neider of the Europe phase among the oil neider of india. Petroleum was struck at the end of 1901, and in 1903 and 1908 the production of this field was 48 million galons, were obtained. In 1907 and 1908 the production of this field was 48 million galons, and after a rail to 311 million galons. Several of the islands off the Arakan coasts are known to contain oil deposits hun their value is uncertain. About 29,000 gallons would be several of the islands off the Arakan coasts are obtained from the eastern Bannigo Island near Akyab, and about 37,000 gallons from Ramm Islands in the Kyathypu district during production for that year being 18,320 gallons which increased to nearly a million galons in 1912. The existence of oil in Assam has been income for pany years and an oil spring was struck near Makum in 1897. Nothing more, year np till 1909 progress was alow. Shee that year the annual production has been between 25 and 4 million galons.

On the west, oil spriogs have been known for many years to exist in the Rawaipindi and other districts in the Punjab In Bainchistan geological conditions are adverse, and though some small oil spriogs bave heen discovered attempts to develop them have not hitherty.

been successful

Output in 1923 —The statistics of petroleum shew that it is becoming more and more difficult to maintain the output of India (Indeeding to maintain the output of India (Indeeding 1921, which amounted to well over 3004 million gallons During 1923 the total production amounted to nearly 2944 million gallons sagainst USA (India 1924), or this decrease the two largest fields of Burma Yenangyaung and Singu were mostly responsible

The Yenaogyat field is rapidly dying, and its boon abandoned but yield is now less than that from Thayetmyo already been started

The utilization of the shallow oil sands of the Yeanayawag field which were shut off during the competitive rush for the richer deep anda, continues several remunerative wells are now being worked at dopths a little above or below 400 feet. The electrification of this field has extended itself and more than 700 wells are now being either pumped or drilled, by electric The Judo Burms Questield, by electric The Judo Burms Questield, and layer the properties of the Yeanayanng field

During the year active prospecting was contioued in the Punjah, Assam and Burma, hy a variety of oil interests

In the Funjab the oil industry entered on a new phase with the completion at Rawalphul, and the opening in February 1923, of the refnery ereited by the Attock Oil Company to deal with the prediction of the Palack of the capacity of 65,000 gallons of crude oil, but the average throughput has not yet reached the maximum The test wells in the Dhilan and Gabbir areas reached the depths of 2,600 feet and 1,700 feet respectively without which are been abandoned but a fresh test at Dhillan has already been started

Quantity and value of Petroleum recduced in India during 1922 and 1923

to 64.068.627 gallons

Amber, Graphite and Mica,—Amber is found in very small quantities in Rurma, the output for 1928 being 47 over valued at E. 13,750
Graphite is found in small quantities in various applaces but little progress has been made in mining except in Travance. The total output in 1921 was 25 tons. India has for many years been the leading producer of mica turning out more than half of the world's supply in 1914, owing to the war, the output was only \$8,180 owns compared with 43,560 owns in 1913 owing to necessary restrictions with regard to the export of mics, the output fall off condiderably in the year 1915, but embedgement demand in the United Kingdom for the best grade of ruhy mice led to a consi-derable increase in production during the follow

There was an increase of about 1,980 cwts in the declared out-put of mica in 1928 above that of the previous year But the entput figures are incomplete, and a better idea of the else of the industry is obtained from the export figures. The exports of mica during 1928 amounted, in fact, to more than double the amounted, in fact, to more than double the declared output, equalling 33,296 owts, valued at Rs 80,76 522 (£ 533,458), this figure is not far ebort of double that for the previous year 1932, which was 43,145 owts, valued at Rs 57,85,2456 (£ 385,633) It will be noticed however, that the average price of the mice fell from Rs 184 (£ 8 9) to Rs 97 (£ 6 5) per cwt

Tin, Copper, Silver and Lend.—The only persistent attempt to mine tin is in Burms The output was for some time insignificant but rose in 1913 to 118 tone valued at £46 000 which fell to £38,000 in 1914 In 1923 Burna yielded 1996 tons. Copper is found in Southern yielded 1990 tona. Copper is round in convertal fadia, in Rajputana, and at various places along the outer llimalavas, but the ore is smilted for the metal alone, no attempt being made to ntilize the by-products. The only Lead mine of any importance being worked in the Indian Empire is that of Fawdwin, where a very large body of high-grade lead-sine-silver ore has now been blocked out. For many years the smelting operations of the Company were directed to recovering lead and silver from the slags left by the old Chinese miners. Those sales, however, are now practically exhausted, and the mine has reached a stage of development at which a steady output of ore is assured in 1922 the output was 46,000 tone vained at Rs 1,68,18,111

Silver is obtained as a by-product in the smelting of the lead zinc ores of Bawdwin. The total output in 1923 was 4,848,939 oz. vained at Ba 1,0L15,985

Imports of Merosine Oil amounted in 1923; Mandaley-Lashio Branck of the Burma railways mandasy-leafald Henois of the Surma railways, by a narrow gauge line 51 miles long, the lines meeting as Maahpwe, which is showt 644 miles from Eangoon. They were worked for many centuries by the Chinese for silver, and hav long been known to constain sinc ove, until recently, however, no serious attempt appear to have been made to market the ore for its sinc to have been made to market the ore for its sinc io have been made to market the ore for its zim values. In 1907 the present undertaking was started by the Burma Mines, 14d, with the idea of recovering the lead from the old slag heaps left by the Chinese, estimated at 125,000 to 160,000 tons, and later to work the deposit Smelting operations on those slags were first out to the countried out at Mandiasy, but later the works were transferred to Namin, about 13 miles on the narrow-gauge railway below the mines on the narrow-gauge railway The deposits, which comprise an area of about 2,500 acres, have now been taken over by the Burma Corporation, Ltd., and one is being worked

Gem Stenes —The only precious and semi-precious stones at present mined in India are the diamond, ruby, sapphyre, spinel, tourmaine, garnet, rock-crystal, agate, comekan, jadelte and amber Amber has aiready been referred to, of the rest only the tuby, sapphire and jadelte atkain any considerable value in produc-tion and the export of the latter has declined owing to the disturbances in China, which is the chief purchaser of Burnese Medicle The the chief purchaser of Burnese 1922 to the the chief purchaser of Burnese 1922 are a receptionally value bis ruby of nearly 23 carata was found of rare size and quality

Wolfress.—Owing to the outlined depression in the wolfram market, Tungston ore is now where it course their as a constituent of mired concentrates. The production of wolfram decreased slightly from 943 tom valued at Re 3,75,532 (625,085) during 1923 to 972 tons valued 4, 470,932 (521,979) in 1923 The decrease in output was, however, accompanied by a considerable increase in total value, amounting to £6,944

Radio-active Minerals.—The General Report of the Director of the Geological Survey of India for 1918 includes a brief report by B. C. Burton on an occurrence of pitchblende at mice mines near Singar, Gaya district Bengal. The pitchblende occurs as rounded at mixe mines near singar, Gaya district, Bengal. The pitchleind cours as rounded sodules in a pegmatite that is intrusted mice schists. Other minerals occurring in the pegmatite are mice, tripite, linenite, tour-maine, and uranium celler, whitish colum-bite, strong, and terbernice have also been the common of the column of the column to be the common of the column. to be the commonest.

Zinc — A monograph on aino ores issued by the imperial institute in 1917 says that drung the pass fitty years aino ores have drung the pass fitty years aino ores have drung the pass fitty years and ores have drung the pass fitty years and ores have drung the pass fitty years and year and year of the production was recorded until 1913. # Stock Exchanges.

There are about 446 Share and Stock Brokers in Resembay They carry on business in the Brokers' Hall, bought in 1898 from the funds of the Share and Stock Brokers' Association formed to facilitate the negotiations and the sale and purchase of Joint Stock securities promoted throughout the Presidency of Both asy Their powers are defined by yillies and regulations framed by the Board of Directions of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Contro

At first the admittance fee for a broker was Ra, 5 which was gradually related to Ra 7,000. The fee for the Broker's card has increased and it was recently sold by public auction for Ra, 21,900. The rules of the Association were revised in Cotober 1916 and from the New Year the purchaser or snares has to pay the stamp and transfer fee inclead of the seller. There are two classes of Rachange Brokers, Renopeans and Indians, the latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Latter being the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans are the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans are the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renopeans and Indians, the Renope

macanage, nur in the street chiefde the fiall In November 1917 a second Stock Exchange was opened in Bombay, with its beadquarts in Apollo Steres, known as the Bombay Stock to an end in 1921, when it was merged in the older body, it was revived in 1922 but complaint was made that it did very little. If eny business

Committee of Enquiry—In 1923 the Government of Bombay appointed a Committee to enquire into the constitution, government, cus tous, practices, rules, regulations and methods of business of the Native Share and Stock Broker' Association of Bombay and to investigate any such complaints of the public and to make any such enquiries with reference to any of the aloresaid matters or any other matter apportain ing to the aloresaid conscioution as the Committee to protect the investing public against the interested of irregular control of business to formulate such definite proposale for the future contribution, outrol, direction and regulation of the aforesaid Association as the Committee may deem proper

The Committee issued a report early in 1924 aigned by all the members save one who appeu dod a minority report. The majority report made several important recommendations for reform, notably one aimed at the prevention of legitimate complaints against the brokers on client the complaints against the brokers on year, adopted the minority report which leaves the constitution and practice of the Exchange very little modified.

For many years the Calentta Share Market Rs. 3,000 v

business quarter and was under no control except that of established market custom in 1908 the Calcutts Stock Exchange Association was formed, a building was lessed in New China Bazar Street now called Royal in New China Bazar Street now called Royal in New China Bazar Street now called Royal was formed, and the cristing trade customs was formed, and the cristing trade customs was formed and the cristing trade customs for the Stock Exchange is hy vote of the Stock Exchange is hy vote of the Committee, and the entraince for is at present all prior that of most other Block Exchange since there are no actionment days, delivery is due to be second day after the contract is passed and sales of securities are effected for the most and the contract of the Stock Exchange is that there are no "Johbern" in the Calcutts market. The Deelers whit take their place, more or less, are not compelled to quote a huper's and a seller's rate and are quote a huper's and a seller's rate and are quote huper and a seller's rate and are quote huper and a seller's rate and are quote huper and a seller's rate and are quote huper and a seller's rate and are quote huper and a seller's rate and are quote huper and a seller's rate and are quote huper and a seller's rate and are quote huper and a seller's rate and are with Broker and competing with Broker.

There are about 150 members, besides outside brokers, the former consisting of Burupean, Jewish, Marwari, and Bengalee firms. Directors Thare is a Board of arbitration
Theory is an admittance membership continued
Es 100 The original 100 members were
elected by the first Directors and each of the
working members have deposited a security of
Es. 3,000 which is held by the Stock Exchange
Committee

# Chambers of Commerce.

Modern commerce in India was hullt up by take the necessary steps to get the Association merchants from the west and was for a long registered and to enrol members and carry on time entirely in their hands Chambers of work. The Congress also approved of the draft commerce and numerous kindred Associ time entirely in their hands Chamhers of Commerce and numerous kindred Associations were formed by them for its protection and assistance But Indians have in recent years, taken a large and growing part in this commercial life. The extent of their parties pation wartes greatly in different parts of flush according to the natural proclivities and against of different races Bombay, for instance, has led the way in the industrial and commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial commercial comme elai regeneration of the new India, while Bengal, very active in other fields of activity, laga behind in this one Arising from these cir-cumstances we find Chambers of Commerce cumstances we find Chambers of Commerce in Bombay, Karachi, Calentta, Madras and other important centres, with a membership both Burpeau and Duldin but alongside these have sprung up in recent years certain Asso-ciations, such as the Bombay Indian Merchanta Chamber and Bureau, of which the membership is exclusively Indian. These different classes of bodies are in no sense hostile to one arother and constantly work in association

The Londoff Chamber of Commerce in 1912 The Londoff Chamber of Commerce in 1912 realising the increasing attention demanded by the economic development of India, took steps to form an East India Soction of their organization. The Indian Chamber work harmoniquely with this body, but are in no sense affiliated to it, now it there at present the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the c any inclination on their part to enter into each color relationship, because it is generally felt that the Indian Chambers can themselves achieve their objects better and more affectively than a London body could of for them, and on various occasions the London Chamber, or the East India Section of it have shown themselves out of tonth with what seemed locally to immediate requirements in particular matter,

A new movement was started in 1913 by the Hon Sir Fasulbhoy Curimbhoy Ihra him, a leading millowner and philic citizen, of Bombay, which alms at effecting great improvement in strengthening Indian com-mercial organization Sir Fasulbhoy soriginal. plan was for the formation of an Indian Com priorial Congress The proposal met with approval in all parts of India. The scheme was delayed by the outbreak of war hut afterwards the first Congress was held in the 1915 Christmas she mrs congress was need in the lattle cartaining holiday season in the Town Hall, Rombay The list of members of the Reception Committee showed that all the important commercial associations of Bombay were prepared to cooperate actively

The Congress was attended by several hundred delegates from all parts of India. Mr. (now the Hon. 1900) and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and the Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1900 and Hon. 1 slected a Provincial Committee empowered to

The following are the principal paragraphs of a Memorandum of Association of the new Associated Chamber as approved by the Con-

- I. The name of the Chamber will be "THE ASSOCIATED INDIAN CHAMBER OF COMMERCE "
- The Registered Office of the Chamber will be in Bombay
- III The objects for which the Chamber is
  - (a) To discuss and consider questions concerning and affecting trade, com merce, manufactures, and the shipping interest, at meeting of delegates from Indian Chambers of Commerce and Commercial Associations or Bodies and to collect and disseminate information from time to time on matters affecting the common interests of such Chambers or Associations or Bodies and the commercial, manufacturing and ship ping interests of the country

#### Special Work

One of the most important functions per-formed by the Chamber is that of arbitration in commercial disputes Eules for this have been in existence for many years and have worked most satisfactorily The decisions worked most same group and decisioning are in all cases given by competent artitrators appointed by the General Committee of the Chamber and the system avoids the great expense of resort to the Law Courts.

A special department of the Bombay Chamber is Statistical Department, which prepares a large amount of statistical returns connected a large amount of statistical returns connected with the trade of the port and of great importance to the conduct of commerce. The department consists of fourteen Indian clirks who, by the authority of Government,

Cartoms authorities. They compute an installation in connection with the trade of the port, in both export and import divisions, which it is desirable to record No other Chamber in India does similar work.

The Bombay Chamber publishes a Daily Arri-The nombay Chamber publishes a Daily Arti-val Batum which shows the receipts into Bombay of cotton, wheat and seede, and a Daily Trade Return which deals with trade by see and a bows in great detail imports of various kinds of merchandles and of treasure, while the same return contains particulars of the movements of merchant vessels

The Chamber publishes twice a week detailed reports known as Import and Export mani-tests, which give particulars of the cargo carried by each eteamer to and from Bombay

Three statements are issued once a month of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the con ton and searies crows, printed and dyed goods, anoy clob of various descriptions, woolens, yarns, metals, kerosine oil, cost, angime dyes, sugar, matches, wines and other sundry goods. The third statement is beaded, "Movements of Piece Goods and Yarn by Rail," and show the despatches of imported and local manufactured. tured piece-goods and yarn from Bombay to other centres of trade served by the railways

The "Weekly Retorn" issued by the Chamber shows clearances of a large number of important destinations of merchandise A cetum of 'Current quotations' is issued once a week on the day of the departure of the Rnglish mail, and shows the rates of exchange for Bank and Mercantile Bills on England and Paris, and a large quantity of general banking and trade information

The annual reports of the Chamber are embetantial tomes in which the whole of the affairs of the Chamber and the trade of the

anairs of the Chamber and the tisse of the port during the past year are reviewed. The Chamber has also a Measurement De-partment with a staff of 18, whose business is that of actual measurement of exports in the docks before loading in steamers Certificates are issued by these officers with the authority of the Chamber to shippers and ship agents or one commoer to amppers and amp agents as to the measurement of cotton and other goods in bales or packages. The measurement are nathendance on the quays whenever there are goods to be measured and during the busy season are on duty early and late. The certificates granted show the following details—

- (a) the date, hoor and place of measurement,
- b) the name of the chipper, (c) the name of the vessel,
- (d) the port of destination ,
- (e) the number and description of packages. (f) the marks,
- (g) the measurement, and, in the case of goods shipped by boats. (A) the registered number of the boat;
- (i) the name of the tindal.

#### DEPARTMENT OF COMMERCIAL INTELLIGENCE.

The Department of Statistics was reabsorbed into the Department of Commercial Intelligence to the Department of Commercial Intelligence with the Commercial Intelligence of the Commercial Intelligence of the Commercial Intelligence of the Director-General It embraces two distinct classes of work (a) the collection and dissemination of information connected with dissemination of information connected with overseas trade which may be of use to Indian firms, and (b) the complication and publication of All-India statistics. The latter are published in a series of volumes of which the most important are the ass-borne Trade Accounts, monthly and annual, Statistical Absolute, Agricultural Statistics (in two volumes), and the Review of Trade. The Department of Trade Trade Accounts are the several programment of the Policy of the Company of Trade Trade Trade Trade (in the Trade Trade) of Trade Trade (in the Trade Trade) of Trade (in the Trade Trade) in the Trade (in the Trade Trade) in the Trade (in the Trade Trade) in the Trade (in the Trade Trade) in the Trade (in the Trade Trade) in the Trade (in the Trade Trade) in the Trade (in the Trade Trade) in the Trade (in the Trade Trade) in the Trade (in the Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Trade Tr in foreign countries which affect Indian interests, (b) notices of tenders called for by Government departments and public bodies, (c) crop reports and forecasts, (d) Government orders, communiques and other notifications affecting trade, (s) ques and other notifications affecting trade, (a) analysis of Iodian trade statistics, (I) market reports, prices and trade movements of the state state and imports, (a) trade enquires for securing trade introductions, (A) aummaries of the leading features of consular and other trade reports, and (i) abstract of the prosecting of the various Chambers of Commerce in the commerce of the processing of the various Chambers of Commerce in the commerce of the process. India

The Department also administers the Com-The Department and administers the community MERCHAL LIBRARY AND EMADING ROOM located at No 1, Council House Street, Calcutta This was at first a small departmental library used for the purpose of answering enquiries, but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate libraries attached to the Departments of Commercial Intelligence, Statistics, and Patents and Designs, and the resultant Commercial Library and Reading Room was placed under the adminstrative control of the Director General. It has now been expanded into a first-class tech nical library containing over 9,000 volumes as well as Indian and foreign statistical publications, and 200 technical and commercial journals and market reports Ordinarily books are consulted in the Library, but they are also available on loan upon deposit of value

The Department works in close co-operation with Directors of Industries and other Governwith Directors of inquatries and other covern-ment Departments in India, with the Indian Trade Commissioner in London, with His Majesty's Trade Commissioner in India and the Dominions, and with Consular Officers in various parts of the world And the yearly increase in its correspondence shows that it is steadily being used more and more both by firms in India and by overseas firms interested in Indian exports

#### THE BRITISH TRADE COMMISSIONER SERVICE IN INDIA

The Department has nothing to do with the remission of trade. It means to make unnoutess. The Department has nothing to do
with the regulation of trade. It passes no mea
cures and makes no restrictive or regulative
orders, Briefly, the policy on which it is base
is the policy of assistance without interference

The Department of Overseas Trade maintains a network of trained and experienced Commercial Intelligence officers throughout the world, who forward a constant enpply of commercial information to London and provide local assist-ance in the promotion of British economic interance in the promotion of Perical Scotlands inter-cits. Those overseas officers who are stationed in the British Empire are members of the Trade Commissioner Service while Foreign countries are served by the Commercial Diplomatic Ser-vice forming part of the British Diplomatic Missions and by the Consular Service tions: Trace Commissioners were appointed to India Mr. W D M Clarke was posted to the Calcutta office and Major E W Clarke opened an office in Bombay at Exchange Bulding, Sprott Road, Ballard Estate The territory is now divided between the Calcutta and Bombey posts and this development allows the Senior Officer to travel almost continuously to any part of India which may call for his attention and to devote his time to some of the broader politico economic problems which are becoming so im portant in view of the changing political condi-

Functions of Commissioner —The primary duty of the British Trade Commissioner com prises the collection of information in regard to prace the collection of information in regard to opportunities that may arise within his territory for securing and developing trade by Reitz for securing and developing trade by Reitz United Kimpdom and other parts of the British Empire He is, therefore, enjoined carefully to watch and report from time to time to the Board of Trude and the Governments of the Domiatons concerned on all matterns affecting the trade,

industry and commerce of his area His general functions are to maintain cordial relations with the governing authorities of his area, to enter into personal relations with the Chambers of Commerce, Trade Associations, and similar bodies, and with the principal representative importers and local manufacturers , to visit the importers and local manufacturers, to visit the principal commercial contres, to report upon foreign competition, on financial and trad-to make an annual general report on the condi-tions and prospects of trade in his area, and to furnish special reports and monographs on particular questions which are likely to be of interest to British manufacturers and "sporters He is also expected to supply a regular flow of commercial information of all kinds to his department, to maintain an active correspondence with firms in the United Kingdom or the Domi nions who wish to extend their trade with his area, and to give all possible assistance to the representatives of British firms who may visit his territory

Every effort is made by His Majesty's Trade Commissioners to keep in touch with British representatives and agents in India The offices are equipped with a complete range of directo ries and reference books of all kinds and informs tion is available with regard to such matters as tion is available with regard to since macters at tariff conditions, port dues and charges through out the world, etc. A library consisting of over 1,000 catalogues of the leading British manu facturing engineers is maintained in Calcutta and firms desiring information with regard to specific manufacturers of particular machinery or pro-cesses are invited either to call personally or to forward their requirements in writing it is forward their requirements in writing it is hoped that local importers and buyers will cooperate by making a more extended use of the information available in the offices and by bringing to the attention of the British Trade Commissioners any cases where the interests of exporters from the United Kingdom or the Dominions may be adversely affected by foreign competition or otherwise

For many years British traders have deplored the fact that there have not been available

officials with commercial experience who could help them in volcing their difficulties and in meeting foreign competition. As a rule these complaints eulogized the Consuls of other countries and invited the attention of Government to their many virtues In response to this agitation the greatest care has been taken by the British Government to select, as their trade officers overseas, men of sound commercial training and experience who have acquired some training and experience with have abduled some reputation in their respective apheres, and a comprehensive and businessific organization has been hullt np at the Department of Overseas Trade, London, to deal with the information sent home It now rests with the British mercantile community, both at home and also over-seas, to co-operate freely and frankly with the Trade Commissioners and to recomize the work they are doing in the Imperial interest by assisting them with such information and particulars with regard to foreign competing goods conditions of frado etc, as they are able to afford H M S TRADE COMMISSIONERS IN INDIA.

#### INDIAN COTTON DUTIES ACT

The origin of this fiscal measure dates back ( to 1894 when the embarrassment caused to the finances of India by the fall in exchange drove the Government of India to the necessity of adopting measures to increase their sources of revenue Among those measures was the re-imposition of the Customs Tariff which had been in force prior to 1882 subject, however, to this in lonce prior to 1888 subject, however, to this difference that cotten yarms and Inbries, which had formerly been subjected to an import duties actions a state of the partial re-importion of import duties had been recommended by the Herscheil Commission which, in reporting in 1897 on the currency question, had favoured this method of adding to the revenue as being the lessel likely to excite opposition In point of fact, however, this recommendation which was carried into effect in the Indian Tariff Act of March 1894 saws the to very marked opposition. In sup-port of their polocy the Government appealed to the Resolutions passed in 1877 and resultrated in 1879 by the House of Commons, the first of the to this measure, though it failed to secure

which had condemned the levy of import duties on cotton fabrics imported into India as "being contrary to sound commercial policy," while the latter called upon the Government of India the latter called upon the Government of India to effect "the complete shollton of these duties as being unjust alike to the Indian consumer and to the English producer". It was, how-ever, an open secret that the decision to exclude from the list of dutable articles cotton yams and labeles was not the decision of the Govern-and the first of the decision of the Govern-ter of the constant of the decision of the Govern-ter of the constant of the decision of the Govern-ter of the constant of the decision of the Govern-ter of the constant of the decision of the Govern-ter of the constant of the decision of the Govern-ter of the constant of the decision of the Govern-ter of the constant of the decision of the Govern-ter of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant of the constant ment of India but that of the Secretary of State it is was pertinently pointed out that the witness of trade in cotton good and the trade in cotton good and the state of the secretary of the secretary of the secretary of the exemption of these important commodities when practically every single other commodity was being subjected to an import duty coold not be insufficient in sentre as sound fixed measure,

its rejection in the Legislative Council, was strong enough to induce the Scoretary of State strong enough to induce the Scoretary of State of representations of the Government of India and of Indian public opinion. His Majestry Government eventually agreed to the re-imposition of import duties on cotton yams and abrice provided that it could be above that such a measure was necessitated by the position of Indian finances, and that it was combined with an Excise duty which would deprive the import tax of any protective character Accordingly in December 1894, consequent on the further deteriniation in the financial position, two bills determination in the financial posterior, two bills were introduced in the Legislative Conneil. The first of these sobjected outcom years and fabrics to the general import duty of 5 per cent of values. The second imposed an Excise duty on all cottom years of 20 s and above yes duced by Mills in British India. In introducing this latter Bill the them Finance Minister, Bir James Westland, was careful to explain that the policy underlying its provisions had been imposed on the Government of India by the Secretary of State in pursuance of the Re-solution of the Hnuse of Commons quoted above The provisions of this particular Bill are of little interest. From the first it was recognised names. From the first it was recognised that they were unpractical, Lancasthre and Indian spinners disagreed as to the point as years from the Breise Duty Practical difficulties were pointed oot by Indian spinners as the impossibility of spinning proclessly to a particular count. From the Lancashire point or view it was contended that the Bill offered facilities for evasion while it was admitted that under the system adopted in the Bill, the taxa-tion of Indian and Lancashire products was unt being carried nut nu a similar basis.

Act of 1896 -The Act was in fact doomed to be short-lived, and in December 1895 the Gov ernment of India were compelled to reconsider the whole position and to introduce an entirely new measure which became law in January 1896 as the Indian Cotton Duties Act II of 1896 This measure proceeded from two conclusions, namely, that no attempt should be made to obtain any duty from yarns whether imported or locally manufactured, and that an equal rate of duty should be applied to all woven goods whether imported nr nf Indian origin With whether imported in in Indian origin with the object of conciliating the opposition, the rate of daty was fixed at 5 per cent. as opposed of per cent. The main provisions of the Act provided that the assessment for the purpose of collecting the Excise duty should be based on returns submitted by the milli-owners, and chair provision should be made for a rebate in teat provision should be made for a relate in the case of woven goods exported out of India. No control beyond a requirement that statis-ical returns should be furnished was attempted in respect of spinning mills. On the other hand certain concessions in the master of import duty ou Mill stores were made by executive order so as to piace Indian Mills on a footing more or less equal to their Laxonabire competitors.

transient character; as for instance that the Indian indicatry was then in a state of continu-ed depression and that it had been hard lit, particularly in respect of its export trade, by the currency legislation, and by the uncer-tainty as to the fiscal policy of Government. Its some quartars objection was offered to the ox emption of yarn, which it was shown, would place this Indian hand was wing industry at an adplace the indian hand wearing industry ac an accurate with the Indian power wearing industry. Bot the hostility to this measure, as also to the earlier measures already described, clearly proceeded from the feeling that the policy of the Government of India and of the Secretary of State had been dictated by Lancashire, and that the action of Lancashire was due not so much to the fact that there was any real com muon to the fact that there was any real com-petition between Indian and Mannchester goods but to a desire to handicap the ludian industry whose progress was aircady causing measiness to Lameakire interacts. It was argued that the imports from Lancabire were practically all of the higher counts, which, for cifmaten and cither reasons, indian mills could mit produce cither reasons, indian mills could mit produce that in any case the advantage to the Indian millowner of the import duty was inconsiderable millower of the import duty was inconsiderable and was counterbalanced by certain draw backs, arising from the inferiority of Indian tabout, which could not be reveroome, and that this advantage, such as it was, could scarcely be said to have a protective characted, in view of the higher cost of initial equipment in the case of an Indian mill which has to import its case of an indian mill which has to impute the machinery, and of working expense course-quent ou the scarcity of skulled labour and on the uccessity of importing stores required in the production of cloth Finally, from the stand point of the consumer very severe criticism was point of the consumer very severe crucips was directed against the reduction, in favour in imported cotton goods, of the general rate in duty from 5 per cent to 3½ per cent, on the ground that the effect if the legislation would relieve the richer classes who were consumers of the flarer Manchester Tabrics and Impose new taxation on the poorer classes whose requirements were met by the Indian milk.

Later Factors in the Situation -Since Later Factors in the Situation—Since the passing of this measure into law the Policy of the Government of India in this respect has frequently been the solvient of attack in the press and in the Legislatures in India while it has also formed the subject of continued representations by the industrial interest affected and political organizations in more recent years the agitation in favour of the abolition of the Excelse duties was revived by the growth of the Extrase duties was revived by the growth in England of a strong body of public chinion in opposition to the policy of Free Trade. Advantage was taken of this new phase in England economic thought to press on behalf of India the ecospitance of a policy of Protection—now adopted by the Government of India in the iorm of discriminating use of the current necessarily high important tariff for fostering indian industries—and the removal of the Excels duties was claimed by the opponents of this measure as a necessary occulary of the application to the British English English of the principles associated with the name of Mr Chambergal associated with the name of Mr Chambergal coact the position of those who are to oppose the committee of the principles associated with the name of mr Chambergal coact the position of those who are to oppose the committee of the position of these who are to oppose the committee of the principles of the position of these who are to oppose the committee of the position of the work of the position of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the principles of the pri form of discriminating use of the current neces-Criticisms of the Measure.—It is not associated with the same of Mr. Chambershapen to do more then summarise the articisms with this measure was received is india. Nech of the operation was been on growth of the opposition was been on growth of a competition which this measure was received is india. Nech of the opposition was been on growth of a competition which have to face in

China as well as in India from the Japanese in dustry The Japanese market was lost to India in the early years of this century More recently, however, Japan has entered as a competitor with India into the China merket, while within the last few years it has pushed its advantage as against the Indian millower in the Indian market itself. The Government of India have poblicly declared their view of this development to be that it needs careful watching

Policy of 1917 —The policy of Government tewards the Cotton Duties underwent a further development in 1917 In the hudget of that year provision was made for interest and sinking fund charges on £ 100 millions, the contribution of India towards the cost of the war This demanded in addition to the natural increase in the revenues fresh taxation to the extent of £ 3 millions per annum. Amongst the expedients adopted to produce this revenue was the raising of the import duty on cotton goods from Siper cent to 72 per cent which is the general tariff rate. At the same time the cotton excise duty was fixed to remain at the provious figure of \$5 per cent thus giving the indigenous industry a slight protection to the extent of a per cent. The question of the abolition of 4 per cons. The question of the accusation to the Excise entirely had to be dismissed from consideration in view of the demands upon the exchedure, as it was estimated to produce in 1917-18 \$ 320,000 By means of the increase in the tariff on Cotton Duties the Finance Member estimated to produce an additional \$1 million are annum. The proposal was Mamber estimated to produce an additional £ 1 million per annum. The proposal was received with immense satisfaction in India as a step towards the righting of what is almost everywhere regarded as a reverse economic wrong It aroused very vehement protests in Lancashire where the cotton industry organised is political vote and brought great presure to bear upon the Becretary of State to withdraw the measure Mr Austen Chamberian, the then Secretary of State for India, stood firm and with the Government as his back refused cann escretary of State for India, stood firm and with the Government at his back returned and with the Government at his back returned had laken up in supporting the Government of India in this matter. There were anxious moments in the House of Commons when the Labour Farty Joining with the Irish Nationalists and the Lancabilire vote mobilised its labour Farty Joining with the Irish Nationalists and the Lancabilire vote mobilised its heatitude of Mr. Asquith and his following was obscure in the end Mr. Asquith gave has support to the Government policy on the understanding that this, in common with a support to the Government policy on the understanding that this, in common with a first many of the control of the support, the Bill was carried through the House of Commons by a large majority. The policy laid down in 1917 has been maintained The Excise Duty remains stationary at 8½ per cent for purely revenue been subjected to the same tariff on other imports in all variations of the Customs duties. (See Customs Tariff).

The Pressat Posities — The question has

Evoice and both the annual Budgets and the right of unofficial members to move Resolutions have afforded opportunities for pressing the popular view upon Government During the life of the first Assembly—1921-1928 inclusive—the position was still dominated by the manacial difficulties of Government and the necessity for utilising every possible source of income for meeting successive deficits. Representatives of the cotton manufacturing industry continued their agitation nevertheless, but they received no sympathy from the House et large attitude of profficial members other than those from Bombay, who are in close contact with the industry in its main centres, is by no means friendly to the millowners. The agricultural membere, particularly, remember how Bombay raised cloth prices during and efter the Great War and have not forgiven the millowners the huge profits that they then mede Debates in the House on varione questions have also on up nouse on varione questions have also on several occasions shown the existence on the unofficial benches of a considerable body of members standing for the purely consumers' point of the end these resent the suggestion of abolishing the Excise Dniv without also reducing the import daty because to do so would be to give the whole advantage into the millowners pockets, prices heing governed by the cost of Imports

The Government of India's attitude is primarily governed by a declaration by Lord Hardinge, when Viceroy, that the excise duty should for the present remein at its actual figure and an assprance given that it would be abolilished as soon as financial considerations permit."
But over the obligation thus expressed there lies another, which concerns the financial contri-butions now annually made by the Provinces to (entral Revenues These amount to approxi-mately nine erores When the amounts were fixed, in councilion with the introduction of the new constitution and the consequent sepalation of Centrel and Provincial finances, the contributions were clearly marked as a tempocontributions were clearly morked as a temporary necessity. From that day to this the Provinces, struggling with financial exigencies of their own, have chamonred for their early diminution and rapid extinction and the Government. nution and rapid extinction and the Government of Indya have formally and repeatedly given assurances that the first disposable surplines assurances that the first disposable surplines direction. The old controversy of Laucashite errgus Bombay over the cotton excise having vanished and the matter having thus been reduced to purely fiscal grounds, Government also indicate their preference for easing the Provincial finances, rather than for remitting make remission a present to the millowners

The " nationalist " element which dominates the unofficial benches in the second Assembly been subjected to the same tariff as other imports in all variations of the Outcome function and the Customs duties. (See Customs Tariff).

The Present Position —The question has requested the set your with all these arguments, and the tires has necessary one when its vote will finally decide the requestion bear one when its vote will finally decide the requestion bear one when its vote will finally decide the matter Government last year had a surplus frequently come under disconsional to the reduce the set of the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to the reduced to higher figure by the exercise of his mation but as it amounted only to a plous prerogative There appears a practical certainty appreciation of opinion and as the avoidance of of another surplus in the con ing a division freed any member from the onligation Budget. The Assembly last Septem her debated of registering his name on one side of the question uncollicit Resolution recommending the abo-tion of the other that fart cannot be accepted. lition of the excise Government opposed on economic grounds and the debate reflected the differences of opinion already indicated The

as final

Government suggested during this last debate auterences of opinion already indicated The Promoters of the Resolution urged the House to late choice between reducing Provincial accept it not on economic grounds but on poli Contributions and abeliahing the Excise Duty tical nationalist once talking much of past might he left for te Ho se when a decision on economic liphatics and of the need to foster Indian industries When the question was put it had impossible to reseast what the voke of the Government did not claim a division The House would be if that question were left to its Beschittion was thou declared carried by acci.

#### THE INDIAN COTTON COMMITTEE

A resolution is anod by the Government of India in September 1917 announced the spointment of a Committee to examine the possibilities of increasing the critication of the possibilities of increasing the critication of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control resommendations in regard to the staff required and the organization necessary for the develop ment of the cultivation of long stapled cotton in tracts which they considered suitable for that purpose

The Committee consisted of the following — Mr J MacKenna C I E | C S Agricultural Adviser to the Government of India President MY N N Wadla ClE Ex Clairman Bombay MY N Wadia Ol E EX Claiman Bombay Mill Owner Association Mr F Holgidmon Member of the Council of the Brian Oxton Executive Engineer Punjah Mr G S Henderson, Imperial Agriculturat, and Mr W Roberts Princips, Lysinor Agricultural College Mombers, Err F Noye I CE S Scoretary.

A full summary of the Report of the Committee, appeared on page 291 594 of the Indian Year Book 1922. The Committee in their report conclude that, so far as separate figures are radiable, of the 4 728 000 bales of cotton produced by India in a normal season 728,000 all within the Lancashire definition of long staple output and an additional 478 000 bales within the Bombay definition

They emphasize that, of the methods by which an improvement in the quality and an increase in the outsturn of Indian outen can be secured, botanical work is the most important. The Report points out that the outsturn of classed covictor to the are in India is only 85.

wvation of long stapic cotton under lirigation in the cotton growing Provinces of North India—the Punjab the North West Frontier Provinces the United Provinces and Sind—are examined in creat detail in the Report

One of the main problems dealt with hy the Committee is that of securing to the culti vation an adequate price for the pure or superior varieties of oution grown as the outcome of the recommendations in the first part. With this object they make comprehensive recom. mendations They also make important recom mendations Incy and make important revolu-mendations in regard to the improvement of outron forecasts. The Committee suggest not only the better organization of the Agricultural Department h t also of the Cotton Trade by the establishment h is Central Cotton Trade by the teriatrainers in it amo of the cotton irrade by the critable mere in a Control Trade Amore and the Cotton Trade Amore and the Cotton Trade Amore and the Cotton Amoriation which, as far as the control of the cotton trade is concerned would take the place of the seven distinct hodies representing different branches of the trade which were in extricted a title time the Report was written Planity, the Committee make proving the Cotton Committee and the Cotton Committee to which all connected with cotton whether agriculturally or commercially, could able to turn to for advoce or assistance They recommended that the Committee should love in the Cotton Committee to which all connected with the Cotton Committee to which all connected with Cotton whether agriculturally or commercially, could able to turn to for advoce or assistance in the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which all connected with the Cotton Committee to which the Cotton Committee the Cotton Committee to which the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Committee the Cotton Com on coston from the six Shat cotton growing Provinces, the Director-General of Commercial Intelligence, and the Director of Statistics The remaining members, with the exception of a representative of the Co-operative Department, who might be either an official or a non-official. should they said represent Chambers of Com-merce and similar bodies and would also include a representative of Lancashire The tractions of the Committee would be almost entirely advisey but its advice would carry very great weight.

The proposal to reorganise the Bombay Cotton Trade in one efficient organisation, to be called the East India Cotton Association, at first failed through the jealousy of the small speculative element, resentful of any form of control, but was eventually brought into being, with the assent of all parties, in 1922

The first meeting of the Central Committee recommended in the Report was held in July 1921, who it assembled in Bombay, and it has since accomplished much constructive work It has advised the Government of India regard ing the preparation of legislation for the restric-tion of cotton transport, the regulation of gins and presses and the compulsory rendering of cotton statistics Legislation in regard to the first was introduced in the Central Legislature in September, 1922, and referred to a joint Select Committee of hoth its liquess. It has since been passed into law, subject to the local appli cation of the measure by Provincial Governments, and the Provinces have where desirable followed by action on their part A Bill for the

checking of a buses and collection of statistics in glus and presses was submitted in the Legislative Assembly by the Government of India and September, but was met with opposition by representatives of the glus and presses with the result that the House insisted on carrying a

delaying motion that the Bill be circulated for public option! Octon Committee has placed to the Committee has placed to the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Consumption in detail. Several provinces have now taken tentative sette n in regard to the 1917 Committee s recommendations that concern

The Committee is specially devoting its atten-tion to tests of new cottons for the Agricultural Department, research work in relation to the measurable characters of cotton and their spinning value and a study of the intrinsic spinning value of Indian cottons. As regards the first and last it has urged the need for the establishment of a t-chnological research establishment in Bombay As regards the second it has made special representation to the Government of India

Provision for technological research and for the other activities recommended by the Committee will require money and to raise this the Committee has recommended the levy of a cess of four annax a hale on the commercial cotton crop (excluding domestic consumption) which is estimated to produce Rs 8 lakhs a year

# The Textile Industry.

India has been the home of the cetton trade from the earliest times. Its cetton, neuwaras white so of, was well known to the guessian and its cloth was familiar to the West in the days of the overland route The name Calloo comes from the fine wown goods of Callout, and the products of the Dacca handlooms are still reconstituted as the finest muslims human

They received an immense stimulus during the American Civil War, when the close blockade from the earliest times. Its cotton, known as white wook, was well known to the succleate white wook, was well known to the succleate and its cloth was familiar to the West in the days of the overland route. The name Calicon in the firm woven goods of Calicut, and the products of the Bacca handloons are still remarkable as the finest mulline human still can produce Indian Cotton.

The exports of Indian cotton began to assume importance with the opening of the sea routs. desired outburst of speculation known as the total estimated outburst was 5,075 000 bales of "Share Marks," and when the surrender of Lee 400 Bts. which ramajos the same as in the re-opened the Southers Ports widespread ruin late year. # The Jute Industry.

Considering its present dissensions, the jute industry of Bengal is of very recent origin. The first jute mill in Bengal was attack at Blahra in 1855, and the first power-loom was introduced in 1859. The original outtorn was 8 tons per day. In 1909 it had grown in the property of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contro for some years in the least India Marme sorrice. He quitted this service while still a young
man, and engaged in commercial pursuits
to Ceylon, where he was successful later
on he turned his attention to Bengal, and
arriving in Caloutta about 1835 he got into
tonch with the management of the paper
were being tired with country grasses and fine
plants to improve the quality or obeapen the
manufacture of paper. This seems to have
suggested to Acland the manufacture of rhea,
and in 1854 he proceeded to England, with a
view to obtaining machinery and capital in
order to manufacture, goods from that material
where Mr. John Kerr, of Dongsa Foundry,
suggested to him the importing of machinery
into Bengal "where the jute comes from and
apin it there." This suggestion bore fruit,
for shortly afterwards Acland placed orders
with Kerr for a few systems of preparing and
apinning machinery, and returned to India
the same year accompanied by his two sons
sist him in erecting and operating the first
term mill in Beneral This as has beep estated. and a few Dundee mechanics who were to as sist him in erecting and operating the first jute mill in Benzal. This, as has been stated, was at Rishra, the site of the present Welling ton mills, near Serampore and here, in 1856, the first machine spun jute yarms were made As not infrequently happens the ploneer got truy little ont of his venture. After several ups and downs the Aciand interest to the Rishra mill ceased in 1867, and the company which Aciand had formed in 1854 was wound np in 1868.

Power looms.—The pioneer's example was rollowed by Mr George Renderson of that silk and firm, and in 1859 the Borneo Jute Co was launched under his auspices. To this company is due the credit of introducing the power-loom for jute obta Unhampered by the financial difficulties which had hurdened by the financial difficulties which had hurdened progress, doubling their sollow of the pioness of the company of the company of the company of the capital twice over in 1872 the mills were turned into a limited liability company, the present "Barnegore Jude Mann facturing Co, I.d." Four other mills followed ha succession—Gouripore, Seraigungs, and India Jute Mills.

"From 1866 to 1878," writes Mr David Wallace in "The Romance of Juta," "the ave mile excepting the Risbra mill simply coined money and hrought the total of the looms in to 1,320°. To limitarize the pre perity of the industry at this period we make the dividence paid by the Barnago Company. On the working of their first bycar a 15 per cent interin dividend was delared, which seemed to instify the enormoust of the control of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country of the country

In 1872-73 three now companies were floate locally—the Fort Gloster, Budge Budge an Sibpore, and two Homo companies, the Chamdany and Samugger, all of which commence operatione in 1874. In 1874-8 sight other mills were launched—the Howrah, Orient (now Unlon), Adatto (now Scorab). The Indian Jute Hills Association now J Campbell Forester, M.L.o., J R Miller one of the most important, if not the most and D A Wylic. important of the bodies affailed to the Bengal Effects of the War —The official review Chamber of Commerce, was started under the following circumstances —In 1886 the existing mills, finding that, in spite of the constant opening up of new markets, working results were not tavourable, came to an agreement, with the late 8 E J Clarke, Secretary to the with the late 8 E J Clarke, Scoretary to the Chamber of Commerce, as trustee, to work short time The only mills which stood out of this arrangement were the Hooghly and Scraigunge The first agreement, for six monits dating from 15th Fehruary 1886, was subsequently remewed at intervals without a break for 2 w years np to Fehruary 15, 1891. The state of the market at the time of the renewals dictated the extent of the short time, which varied throughout the five years be tween 4 days a week, 9 days a fortnight and 5 days a week Besides short time, 10 per cent of the sacking looms were shut down for a short period in 1890 An important feature of this agreement was a mutual undertaking by the parties not to increase their spinning ny the parases not to increase their spinning power during the currency of the agreement, ouly a few exceptions being made in the case of a few exceptions being made in the case of a few amomplete new mills.

The present officials of the Association are

The present omeias of the Association are —
Charman — Mir R. N. Rand, M.L.C.

\*\*Members of Committee — Mr C G Cooper,

M.L.C., Mr J Sime, Mr J W A Simpson and

Mr D J Lockie

mr D J Leckies — With the introduction of the electric light into the mills in 1806, the working day was mcreased to 15 hours, Satur days included, which involved an additional days included, which involved an additional amount of cleaning and repairing work on Sundays In order to minimise this Sundays In order to minimise this Sundays work and give them a free Sunday, an agita tion was to to put 1897 by the Mill European of the Sundays of the Sundays of the Sundays of the Sundays of the Sundays The local Govern ment took the matter up, but their action went no further than applying moral sunsion, backed by a somewhat hair-barted threat The Mill Association held meetings to consider Ine MH Association held meetings to consider the question and the members were practi-cally agreed as to the utility of early closing on Saturdays, but, more sec, could not trust themselves to carry it out without legislation Unfortunately the Government of India re fused to sanction the passing of a Resolution by the provincial Government under the Factory Act and the matter was dropped. Only a year or two ago the Jute Mills Association in des Only a year pair hrought ont an American husiness expert, Mr J H Parks, to advise them on the possi hility of forming a jute trust with a view to exercising some control over the production and price of jute Mr Parks came, and wrote a report which the Association promptly pigeou-holed because the slump was over and the demand was so prodigious that there was no need to worry about the price of inte

most and D A Wylle.

Sengal Effects of the War — The official review of the Trade of India in 1916-17 says — The of the Trade of India in 1916-17 says —The value of the exports of raw jute increased in 1916-17 hy nearly Rs 66 lakhs to Rs 1,629 lakhs The quantity exported, however, was less than in the preceding year The estimated yield of the crop was 12 per cent above that of the previous year, etc. 1,460,000 tons or 8,540,000 bales Owing to the lack of tonnage and other abnormal chromatances brought 10 per cent, below that of the previous year Of the consumers the United Kingdom and Italy took less, while the United States, France Italy took less, while the United States, France (mainly ma Dunkirk), Bussia (vis Vladivostok) and Brazil took greater quantities There were, of course, no exports to enemy countries which took more than 27 per cent in the five years ending 1918-14, the pre-war year The increase in the vaine accompanied by a decrease in the volume of exports was due to the very in the volume of exports was due to the very high range of prices during the months of September, October, November and December Towards the close of the year under review prices ateadily declined and have since gone atili lower

Just Manufactures —The value of the exports now approximates to Rs 42 crores In spite of the war with its attendant difficulties In spice of the war wish is a becomes in the many of freight and finance, the exports of guany cloth showed an increase of Rs. 241 lakes of which Rs. 163 lakhs were due to higher prices and Rs. 78 lakhs to an increase in the volume of exports There were also an increase of Ba 118 iakhs in the value of gunny bags exported The number of bags shipped in-creased while the weight decreased, sand hags for war purposes being lighter than the ordinary hags for transporting grain Exports to Australia in 1916 17 were a record The United Kingdom with Australia took more than half of the number of hags exported while the United States took more than half of the quantity of cloth exported There were 74 mills at work throughout the

year with 41,292 looms and 868,839 spindles The number of persons employed was 285,881 There were no difficulties as regards the supply of labour

of labour The number of gunny bags shipped from Calcutta during 1922 23 declaned from 36 million hags, but the velne increased from Ra 13,87 iskint to Ra 15,82 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskint to Ra 15,87 iskin respectively

Hemp and Jute Substitutes.

Experiments have been made during the last few years by the Agricultural Department of the Government of India with the Deccas hemp plant (Hibisous cannabinus), which yields a fibre an amount one pure of jute

An Amountain, styled the Calentta Jute

The members are the variety is to be grown on a number of several parts of local and an accordance when the properties of the first properties of the first properties.

Committee — Mr. Go. Morgan, M.L.A., Caleft, long of an accomplosmally seen, Mambers:—Morgan D. King, G. C. Moon, light colour, well cleaned, and of good strangts. Is was valued at \$18 per ton with Bimilpasam, jute at \$13 los, and Bengal first mark jute at \$17 per ton. Decoan hemp has been grown cairty extensively in Bombay, the Central Frovinces, and Madras, where it is used for ropes and cordage and also for the manufacture of a coarse sackhoid. A valuable feature of the plant is its suitability for cutif vation in such parts of indica are not quitable for jute.

Price to the war, the United Eingdom's requirements of beinp were mainly supplied by the following countries in order of importance—the Philippine Islands, New Zeeland, India, Russis, Italy and Germany The opiniou appears to be held that the effect of the war will be to counter very considerable changes in the character of the fibre market. There will probably be labour difficulties, it is thought, in the prepa

ration of the hemp crops of Russia and Hungary, and it is not unlikely that the world will look to countries such as India for the supply of fibres which may be used as substitutes for the Burn pean varieties of hemp. There can be no doubt that one of the early effects of the war, was in concerned, values were persistently depredicted during the first six months of 1914 owing to large stocks held, but the closure of the Russian hemp market on the outbreak of war resulted in a marked furprovement in values, and there was a keen demand and a considerable rise in price Exports from Calculta during 1922 23 miles of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of the Calculation of th

#### THE WOOL INDUSTRY

Wool exported from India consists not only of wool grown in India itself, but of imports from foreign sources, these latter conting into India both by land and by sea Imports by land and the sea Imports by the conting the India both by land and by sea Imports in grantify from Fersia also comes by land, while the main imports are from Afghaelstan, Central Asia, Tibet and Nepal. Quotta, Shikar put, Amritsar and Multan are the main collecting sentress for wool received by land from Afghaelstan and Foreia, whence it is almost a support overseased to Larachi for subsequent

imports and Exports.—A considerable amount of wool is imported annually from Tibet and, in normal year, from Afghapitan Total imports of raw and manufactured wool in 1923 24 were valued at Rs 284 laths, the exports in the same year totalled in value Rs 400 laths.

Production in India —The production of wool in India is estimated at 60 million his the estimate being arrived at from the a valiable figures of the number of sheep in the country and their estimated yield per faceo, the average quantity of wool yielded per sheep per annum being taken at only 2 lbs.

All Indian wools are classed in the grade of carpet weels, and it is correct to say of perhaps tully half the breeds of sheep found on the plains of India that they yield a kind of half rather than of wool. They are reared shelfy on account of the mutton, and the freece has been generally proposed, and they have been account of the mutton, and the freece has been generally proposed, as could fact, the Indian plains sheep approximate more nearly to the sheep Short remarks in his manual on Indian cattle and sheep, particularly with respect to the Madras type, that they "resemble a greyhoud with Indian (the display of the good of form, the foot light, the limits bony, wides fath and the tail short."

Mill mentifacture. The number of woolies mills at work in British indis in 1903 was three, with an authorised capital of Ba. \$2,50,000, and employing \$3,800 spindles and \$24 iooms. The number of persons employed is the indistry then was 2,50¢, and the quantity of woolies goods produced \$1,45,000 Ba. At

the end of 1917 the number of mills had risen to fire, with an authorised capital of Rs. 255,50,000 employing 39,000 spindles and 1,55 looms. The weight of goods perduced them was 9,744,284 lbs, and the number of persons employed 7,924. With regard 12 indian States, there was one mill in Mysore in 1903 with a capital of Rs. 6,000,000, employing 1,450 produced was 1,180,000 lbs, and the number of persons employed 297. In 1907 there was still only the one mill working in an Indian State—the authorised capital had been increased to Rs. 15,00,000, the quantity of goods produced to 1,724,987 lbs., and the number of persons employed to 863. Three of the mills cools, the remainder mannfacturing lankeds only. The cristence of these mills in Indian proved of great service to Government in the meeting of war requirements, and they were all employed to their fullest capacity is upplying army demands for greatonal delta, serges, putties, fisancials, blankeds and booley. The one the full requirements of the army, and consequently their supplies had to be supplemented by large imports from bome extend the work of the series of the work of the work of the series. The bulk of the wood used by the Indian mills is indian wool, although it is supplemented to some extend by the importation of merinos and coose-broke from Anstralis for the mills and the tirely in India issue!

a high price

Bibliography —Notes on woolin India, By

A. H. Blyer and J. K. Mohta, (Gové Press,
Caloutéa) (1919).

In the early days of the East India Company he Indian Silk trade prospered greatly, and various sub-tropical races of the Silkworm were introduced. But the trade declined for the following reasons.

In the asymmeonth and eighteemth centuries India's chief competitor in the slik trade was the Levant Company Snoosaful efforts, however, were made to acclimate in Europe one or two races of a temperate worm, procured from China and Japan When sericulture from China and Japan When sericulture is a superstant of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contr

All enbesquent experience seems to have established the belief that the plains of India, or at all events of Bengal, are never likely to produce sitk that could compete with this new industry. On the lower hills of Northern India, on the other hand a fair amount of success has been attained with this (to India) new worse, because the seem of the lower hand a fair amount of success has been establined with this (to India) new worse, in Manipur, it would appear probable that Bombyz word, possibly obtained from China, has been reared for eccuries. The caprice of fashion has, from time to time, powerfully modified the Indian slik trade. The appeal properties of the korah silk were formerly much appreciated but the demand for them has now appreciated but the demand for them has now defective systems of rearng and of hand recling and waving, accounts largely for the present depression in the mulberry silk trade of India.

Witherry feeding wurms—Sir George Wat Hates that in no other country does the necessity extet so presengly as in India to treat the embject of silk and the silk industries under two socilous, see, Bombycidae, the domesticated or mulberry feeding silk worms, and Satmidiae the wild or non mulberry feeding worms In India the mulberry worm (Bombyx Mori) has been systematically reared for many contaries, perate tracte of India various forms of Merus abes, the mulberry of the European silk-producing countries), are grown specially as food for the silkworm. This is the case in many parts of the plains of Northern India, Bainchistan, Afghanistan, Kashmir, and along the Himakaya at aittindes np to 11,000 feet. The other species even more largely grown for the other species were more largely grown for this at most common mulberry of Bengal and Assem as also of the Nilgiri hills.

India has three well-known purely indigenous dikworms, the taser, the ways and the evil The first is widely dierributed on the lower hills, more especially three of the great central table second is confued to Asam and Eastern Subsecond is confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to the confued to

difficult to reel that it is nearly always carded and spun—an art which was practised in the Khasi Hills of Assam long before it was thought of in Kurope

Experiments and results.—Numerous experiments have been made with a view to be supported by the support of the control of other experies are agreed that one of the causes of the decine of the silk industry in India has been the prevalence of diseases and parasites among the worms, the most prevalent disease being pebrics. It is not the prevalent disease among the worms, the most prevalent disease among the worms, the most prevalent diseases among the worms. It is not prevalent diseases soon as the fight against pebrics and ôther diseases of the worms is taken np vigorously by the producers of seed and the reactes of the occome will be obtained by reading various races, pure and cross breed.

In Kashmir and Mysore satisfactory results have been obtained in the former State sericulture has been fostered on approved European principles with lailan refling machinery, seed being imported annually on a large scale in 1897 in Mysore Mr Tata, after seate to Japan for a Superintender's and trained operatives. The Mysore antiborities have made a grant of Es 3,000 a year to the Tata farm in return for instruction given to the people of Mysore in Japanese methods or growing the mulberry and rearing the insects. The products countries from Madras The work or the southern form Madras. The work or the countries from Madras The work or inspection of the Mysore in Japanese methods or growing the part of Mysore in Japanese methods or growing the countries from Madras. The work or inspection of the Salvation Army is also notworthy in various parts of India. They have furnished experis, and subsidized several silk schools. The draft prospectus has been issued of a silk arm and concurrence of the Salvation Army. The Lieutentender of the Punjah of workers and the expenses is the control of the Punjah as permitted the celood to be called after his name, and the Punjah Government made a grant of Es 2,000 towards the expenses is the punjah Government made a grant of Es 2,000 towards the expenses is the punjah Government made a grant of the punjah Government seperiments with a view to establish a multi voitine hybrid of European may be euromed up as follows: the only recipredictive method of dealing with the problem is to work up gradually to a point at which the whole of the seed coopen necessary for the province will be subject to reverse.

In 1915 there was issued by the Agricultural Research Institute, Pusa, a Bullatia (No. 43 of 1916)sentitled "First Report on the Experiments carried out at Pusa to improve the Mulberry SIIK Industry" In a short Prefatory soils Mr. Bein brigge Fletcher (Impersil Entomoen in the eagles wor to me a superior multi-volunt race of the Mulberry Silkworm which would not degenerate and which would yield silk better both in quality and outturn than that supplied by the multivoltine races which are reared at

present.

Central Narseries.—The report of the Agricultural Department, Bengal, for the year seding June 30, 1913, gives an account of a scheme which has been deviced with the object the scheme is gradually to establish throughout the silk districts a sufficient number of central numbers of the scheme is gradually to establish throughout the silk districts a sufficient number of central numbers of which is a sufficient number of central province to be supplied under Government supervision. It is believed that this is the they roblem. A number of the existing smaller the problem. A number of the existing smaller numeries were closed during 1913 and others are being converted into enlarged and improved

logist) explains that the object of the Bulletin | Bengal type of reeling machine, superior thread is to place on record some of the more important can be obtained, the cost of the extra apparatus experiments which were commenced at Phus is merelyumminal (fiver or six name aper machine) in the year 1910 and have since been carried whilst the suitability of the machine for cottage can in the cade-avour to far a naperior multivotine | workers is maintained By steinjou to such simple points as the stifling and storage of cocoons and the temperature and quality of the water used in the reeling pans, great improve ments can be effected in most silk centres in Bengal and other districts

Exports of Silk —As a result of the war the trade has showed in some degree signs of revival from its decadent condition, both as regards its volume and value The value of exports during 1915 16 improved by Rs 12 lakhs to Rs 27 lakhs, of which raw silk accounted for Rs 24 lakhs In 1916-17 the total exports rose to Rs. 542 lakhs. In 1922-23 exports of raw slik amounted to Rs. 38 lakhs and of silk manufactures to approximately Rs 21 lakhs

imperial Silk Specialist.—At the end of 1915 it was decided that the first step to be taken to revive the slik industry should be the are nong converted into enlarged and improved in the control quarter with rearring houses complete entry in the control quarter with rearring houses complete the control quarter who, after the utilizates encoses of the scheme depends in a single of the conditions not only in largely on the willingness of the rearres to pay India but in other silk producing bounding, an adequate price for gure seed.

A pamphiet was published in 1915, by Mr M Signature of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control o

# Indigo.

Indigo dyes are obtained from the Indigofera, | Indigo dyes are obtained trous are imagener, a genus of Leguminosae which comprises some 300 species, distributed throughout the tropical and warm temperate regions of the globe, and warm temperate regions of the globe, and warm temperate regions of the globe, and warm temperate regions of the globe, and warm temperate regions of the globe, and warm temperate regions of the globe. and warm temperate regions of the globe, India having about 40 Western India may be described as the beadquarters of the species, be described as the beauquarters of the species, to far as India is concerned, 25 being peculiar to that Presidency On the eastern side of India, in Bihar, Bengal, Assam and Burms, there is a marked decrease in the number of species but a visible increase in the provalence of those that are met with.

There is evidence that when Europeans first began to export the dye from India, it was procured from the Western Presidency and shipped from Surat. It was carried by the Portuguese to Lisbon and sold by them to the

In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had been given np-partly on account of the high duties imposed upon it and partly because sugar and coffee were found to be more profitable the industry was revived in India, and, as one of the many surprises of the industry, the province of Brugal was selected for this revival It had no scouer been organised, however, than tronbles next arose in Bengal itself through tronties next array in Dougas town shows, misunderstandings between the planters, their cultivators and the Government, which may be said to have culminated in Lord Macaulay's famous Memorandum of 1887. This led to famous Memorandum of 1887 ramous memoratum of 1887 This is a to another migration of the industry from Lower and Eastern Bengal to Tribut and the United Provinces Here the troubles of the industry did not end, for the researches of the chemical isboratories of Germany threatened the very existence of any natural vegetable dye. They Portinguese to Lisbon and sold by them to the dyers of Molland, and it was the desire to shorzories of Germany threatement the very obtain a more ample supply of dye staff that led to the formation of the Durch East Hodis are killed the maddar dye of Europe, then the too the formation is the Durch East Hodis are thilled the maddar dye of Europe, then the too to ledge in 17th century Europe was ledge, or the contrary Europe was ledge, in the total to ledge in 17th century Europe was ledge, intent on the complete annihilation to the complete of the transfer of the material dye Opinions differ on many indistry, but it was competition to note an opinion of the complete of the present violastingle, meantime insign from other sources than Isalis that led to the first destine of the localism indige industry and abstation admittedly like in the path of cheaper production both in entityation and Bill was manufacture. These issues are being vigorously faced and some progress has been been compilabled, but the ribure of the industry can scarcely help being described as of great more table. The issues is not the advantage of savely of natural errors synthetic indigo. (See water of connection it may be noted that increases avoid the connection it may be noted that increases in the price of coal in Raishand, due to ishown difficulties, have greatly strengthened the position of natural indigo. In the price of coal in Raishand, one to ishown difficulties, have greatly strengthened the position of natural indigo. In the price of the indigo in the price of the indigo in the price of the connected was needed. The natural indigo industry was considered from three points of view—sgriouitural, research and commercial The agricultural robustness is dee of the question is fully discussed by Mr and Mrs Howard of Puss io Bulletins Nos 51 and 54 of the Agricultural Research Institute Other September of the institute of the section of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of th

Bill was passed in the Imperial Legislative Council in 1918 It provides for a cess on indigo exported from India for the scientific investigation of the methods of unitivation and manufacture of indigo, the proceed of the cess being received and expended by Government

Decline of the Industry—Since synthesis indigo was put apon the market, in 1897, the natural indigo industry of India has declined very rapidly, apart from alight recoveries in 1900-07 and 1911-2, the decline continued without a break until the revival due to the Impossibility of obtaining artificial dyes in amidicine quantities during the war

The total area under Indigo in 1925 is estimated at 185,400 acres, which is 37 per cent below the finally revised area of 5023. The total yield of dye is estimated at 58,100 cwts (53,000 factory manufa.") as against \$6,500 cwt (60,800 factory manufa). #### OILS AND OIL CAKES.

in 1922-23 uncounted to 1177,000 tone valued at Ea. 27,52 islahs, showing an increase of 60 per cent. In quantity and 57 per cent in value compared with the previous yea.

A pamphiet on the subject recently published by the Commercial intelligence Department points out that it is both communically and industrially unsound for india to export her oil seeds instead of manufacturing the oils and oil cakes in India. It allows other countries to reap the manufacturers profits and at the same time deprives Indian agriculture of the great poten-tial wealth, as cattle-tood and manure, on tained in the oil cakes. An immense quantity of oil is, as a matter of fact, already manufac or on it, as a matter of nec, arready manufactured in this country by more or less crude processes. Village oil mills worked by bullocks and presses worked by hand exist in all parts of the country and anpply most of the local demand for oil. There has also been a great increase in recent years in the number of oil mills worked by steam or other mechanical power These crush all the commoner oil seeds and development has been especially marked in the case of mustard oil, castor oil and ground nut oil. In spite of all this there has been a per ceptible diminution in the export of oil from espitate diminuted in the export of th from indis, particularly of cocoants oil and illusced oil, and an increase in the export of oil scots, which is particularly marked in the case of copra and groundants. The attaction created by the War has naturally led to too much discus

sion of the possibility of developing on a large scale the existing oil milling industry in India There are three difficulties with which any preposal to develop in India an oil milling

The production of oil-seeds—rape, mustard, industry on a great scale is faced. In the first liassed, seesmum, and ground-nut—was settmat blace, there exist high protective starffs in oil in 180-21 at 2,78,200 tous of which \$48,000 tous, or 19 per cent were exported. Exports from India of the raw material rather than the in 1812-23 mounted to 177,000 tous, waterd maintactured product Secondly, there is a irom India of the raw material rather than the manufactured product Secondly, there is a better market for the oil cake in Europe than in India and the freight on oil seeds is itsea than the freight on cake Thirdly, it is much easier and iese expensive to transport oil while this has been the position in the European markets, Indian made oils, other than coccannt oil, have made enough feedway in Eastern markets to suggest the possibility of a development.

The problem of finding a market for oil cakes is equally important. The value of oil cakes is much better appreciated in Europe than in India. The Indian cultivator is preindiced against the use of machine made cake as a cattle food or as manure because he considers that it contains less oil and therefore less nourishment than the village-made cake He is therefore nawilling to bay it except at a reduced price. His prejudices on this point have no justification in fact since experts are agreed that mill cake is a better food for cattle than village made cake Even when the mill cake contains less oil than the village cake, there is rtill more oil in the cake than cattle can digest The excess of oil in the viringe where it exists, is a drawback and not an advantage to the use of the cake as food A considerable amount of demonstration work has been done by the Agricultural Departments of Government in order to remove the culti-vator's prejudices and there is said now to be an increasing demand for most classes of mill cake.

<sup>.</sup> Including shipments from the State of Travancore

<sup>(</sup>a) Tes consigned from British India to Ceyion is almost entirely transhipped at Colombo to other countries and does not, therefore, appear in the Ceyion Customs Returns as imports inte-Ceyion.

<sup>(</sup>b) Exchasive of the exports from the North West Frontier Province for the months, July 1923 to February 1926, for which returns have not been received.

<sup>†</sup> Includes Mesopotamia.

## Coffee.

The history of the introduction of coffee into India is very obscure. Most writers agree into India is very obscure. Most writers agree that it was brought to Mysore some two cen turies ago by a Mahommedan pligrim named Baba Budan who on his return from Mecca brought seven seeds with him. This tradition is a universally believed in by the inhabitants of the greater part of South India, that there seems every chance of its being founded on fact. About the beginning of the 19th century of the seems of the greater part of the seems of the greater part of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the seems of the se become a cotton mill a coffee plantation and a rum distillery Some of the coffee trees planted in fulfilment of that charter are supposed to be still alive and about the same time coffee was successfully grown in the Botanic Gardens Calcutta but the industry of coffee planting nowhere found an abiding place on the plains of India but migrated to the hills of South India, in Mysore more especially and thus into the very region where tradition affirms it had been introduced two centuries previously

The first systematic plantation was appa The first systematic plantation was apparently Mr. Cannon a near Chikmugiur This was established in 1830 it is supposed however that the Wynad at a slightly extiler date and that Mr. Cockburn s Shevaroy plantation bears the same date as Mr. Cannon s. In 1840 Mr. Glesson form of a plantation at Manantoddy and in 1840 plantations were organised on the Nigiti bilis.

The Position of the Industry - The number of reporting plantations in the read control of the Industry - The number of reporting plantations in the read control of the Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Industry - The Ind represents a net increase of 4 382 acres over the total area (127 272 acres) under coffee for 1921 22 total area (127 272 acres) under cultivation in the pear 1922 28 was therefore 131 656 acres or an increase of 5 per cent over that of the preceding year Of this total area, Mysore accounted for 52 per cent Coorg 24 per cent Mediras 22 per cent and Cochin and Travancer together 2

Bengal is the chief tobacco growing Paymers, but little or no sheared growing Paymers, and there is assanisationed there. The chief tobacco is assanisationed there The chief tobacco is assanisationed there. The chief tobacco is assanisationed there are not produced in the chief tobacco in Britain India is always or some 160,000 acres in the indian States are near Dindiguit in the Radras Predictaers. facturing tobacco These were often repeated, and gradually the industry became identified are near Dindigut in the Madras Presidency, are near Dindigu in the Madras Presidency, bloogh, owns to the imposition of heavy import duties on the foreign leaf used as a copie wrapper, some digar factores have been moved to the French territory of Profitcherry. The question of improving the quality of Indian tobscope has rood-root agreement to the Dindian tobscope has rood-root agreement of the Bonacla become of the Service Warnell and the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to the Dindian to of the Dotanical section of the Agricultural Research Institute, Fuss, and three Memolis have been published recording the results of investigations in that direction. The imme-diate problems the section of the imme-diate problems to be a section of the part of the been made in the past to introduce into India the best varieties of digarette to beacc from America, but the results have been disappoint-ing. It is now hoped to build up by hydridiza-tion new kinds of the section process in addition conditions of growth, which possess in addition the qualities necessary to obtain a better price

Area under Cultivation—The cultivation of tobacco is very widespread in Burma. The two main varieties are called Burmose tobacco. In the Burmese tobacco there are two main varieties. issurace concord there are two main varieties "Aymetegy", the large leaved variety and "Saymetegyin, a smaller-leaved variety with pointed leaves The former yields a neavier crop, but the latter gives better quality. There is always a great demand on the market for both the Hawan and the Burma tobacon.

are some 100,000 acres in the Indian States. The outstarn varles, according to the attention given to the crop, from 2001b to as numb as 3,000 lb of curel leaf per acro. The long-stablished Indian theory has been that the crop is suited only to small holdings, as it requires considerable attention and filteral manning But these latter conditions, as the history of the Assam ice industry shows, are not seconstrily to have the probabilities in organized production. The prescribilities in organized production. The probabilities in consense cuttivation in annal holdings was current when Sritish influence was established. In India, whereas the outlivition of the own. In India, whereas the outstation of tea owes its introduction entirely to British enterprise. The great bulk of the tobacce grown in the country disappears in local consumption, but the axport trade is developing

Export Trade—In the last three fiscal years the imports into the United Kingdam from India have risen from 1,677,000 ib. to 3,577,000lb The trade continues to advance. 19.37 (ACCOUNT IN E TRADE CONTINUES IO ANY PRINCE, and in the first five mouths of the fineal year 1923-24 the shipments to England reached close upon 800,000th, as compared with 600,000th in the corresponding period of isset year and 425,000th in the first five mouths or the previous year

Since the duty in England is charged by weight and not by value, India, as an exporter of crop, but the latter gives better quality. There weight and not by value, India, as an expect crow of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of the post of

The form of cocsine chiefly used in India is I uswspapers, books, toys and piece-goods and Cocsine Hydrochloride. This sait forms light in tranks which have secret compartments shining crystais, with a bitteriah taste, and is The retail trade in the towns is very causingly seimble in half its weight of water The akkaloid cocsine—of which this is a sail—is obtained actual retailers, there is a whole army of water from the dried leaves of the Erythroxylom Cocsine—of words in Bollvis, Peru, Java, Barrial Existes and Police Officials and give the alarm and other parts of South America The leaves are when a rail is contemplated. During the War, and the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of th is said to be very effectual in keeping people awake In Indie the Coca plant seems never awake In Indie the Coca plant seems never to have been outlytated on a commercial scale of that been grown caperimentally them could be the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial scale of the commercial yet been placed on its cuitivation

Spread of the habit —The occaine traffo in India which seems to be reaching alarming proportion in spite of legislation and exict proventive measures is of comparatively recent growth, though it is impossible to estimate how widespread it was in 1903 when the Bombay High Court for the first time decided that cocaine was a drug included within the definition occaine was a drug included within the definition of an intoxicating drug in the Bombay Abkari Act. Since that date the litegal sale of occaine in India has largely increased and the various provincial Exclass Reports bear witness to the spread of the "Cocaine habit." The consumers of the drug, which is notoriously harmful, are to be found in all classes of isoelety and in Barma to be round in all classes of society and in Burria even school children are reported to he its victims, but in India as in Farts the drug in mosely used by proefitives or by men as an aphrodistac. The habit has apread chiefly to those classes which are prohibited by religion or caste rules from partaking of liquor and the well-known Indian historicating drugs.

Imports from Europe.—Cocaine and its alied drugs are not manufactured in India, but are imported Most of the drug which is singgled into India, comes from Germany and bears the mark of the well known house of K Merck, the mark of the well known house of E Merck, Darmstadt This firm issues cocalie in flat packets of various since ranging from 1 to 3 onness which are easily packed away with other articles and greatly favour the methods of smugglers. Owing to its strength and punty cocaline eaters prefer this brand to any other in the market. Cocaline is also being imported in the market. into India from Japan and America The League of Nations has only recently imposed some restrictions on the export of Cocsine but

lities and the resumption of trade most of the seignres were made from European assumen chicity fielding The cocaine was chicity of German origin. The original marks on the packets and phish are usually destroyed so that the name of the manufacturing firm may not be found out. In 1922-23 The largest solver of cocalne made by the Exclae Department in the Bombav Presidency was one of 10,500 grains while in 1923 24, a selzure of 24,000 grains was offected In October 1924 the Excise Depart ment made a seizure of 46,500 grains in a single CARE

cace Price—The amount setsed is either given to Hospitals in India or destroyed. It is no longer possible to buy contain from any hetel nut seller as it was ten years ago, but scores extent, in Bombay High profits ensure the continuence of the trade the years and the continuence of the trade At present the largish quotation warfeed rough 16 of 25 histograms of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the profits of the chemists in India varies from Ha 23 to Ha 30 per onne. Since the trade with Austria and Germany has rovived, the wholesale illicit dealers have put down their proces for wholesale transactions to from Ha 50 to Rs 30 per onne. # The Opium Trade.

Two descriptions of optum must be distinguished Respect optum which is manufactured from poppy grown in the United Provinces, and Maker optum which is almost entirely produced in occupian Makirs Blates in Central ladia and Rapsteana.

Central ladia and Rapsteana.

Bengal Opium —Cultivation of poppy is only permitted under licease to whom advances are made by Government free of interest is required to sell the whole of free of interest is required to sell the whole of his production to the Uplan Factory at Chalpur at a rate fixed by Government, area licensed for cultivation has in recent years beer much reduced as a consequence of the agreement between the Government of India and the Chinese Government, and is now metroded to the United Forwarces. The restructed to the United Provinces are the following are the figures of the area under cultivation and of production in 1917-18 Blighas cultivated, 331 216 Gross produce in Manude, 32,321 nnmber of chests manufactured, 25 146 At the Factory two classes of opium are manu-

(1) Provision opium intended for export to forekm countries This opium is made up in balls or cakes, each weighing 3 5 lbe, 70 cakes weighing 1403 lhe heing packed in a ohect (1) Provision

(2) "Excise" oplum intended for consump (z) excise opium intended for consump troin in Fittish India. This is made up in enhic packets, each weighing one seer, 60 packets being packed in one chest. It is of higher consistency than "provision" opium.

Provision" optum is sold by public auction in Calcutts, the quantity to be sold being fixed by Government Tills quantity has been reduced in recent years in accordance with the agreement with China, the figures being 15,40 cheets in 1911 and 6,700 cheets in 1912 Exports to China have been stopped altogether since 1918

Malwa Opium —The poppy from which Malwa opium is manufactured is grown chiefly in the Native States of Indore, Gwallor, Bhops Jaors, Dhar, Rutlam, Mowar and Kotah The British Government has no concern with the cultivation of the poppy, or the manufacture of the opium but it used to regulate, before exports to Chms were stopped, the import of Malwa opium into, and the transport through, its territories. As the chief market for Malwa opium was Chira, and as the States in which the on the season of the drug on its way to Bombay importation of the drug on its way to Bombay for exportation by see.

ceased since January 1913 and the trade become extinct since 17th December of that year when the last adjument was made Practically the whole of the Malwa optum acrosted from Bombay west to China. There is no market for it in the Straits Settlements. A few chests annually are shipped to Zanziber

Revenue -The revenue derived by the Goverament of India from opium in recent years

Agreement with China -The fluctuations Agreement with Chins—The factuations in the revenue derived from cynim are directly attributable to the irade conditions arising attributable to the irade conditions arising in 1607 being satisfied of the ganulaness of the efforts of the Chinese Government to the efforts of the Chinese Government of the propers the habit of consuming opium in China, the Government of India agreed to co-operate by gradually restricting the amount of opium exported from India to China or opinin exponent was concluded by which the total quantity of opinin exported from India was to be reduced annually by 5,100 chests from au assumed standard of 67,000 chests. Under a further agreement, signed in May 1911, the cessation of the trade was to be accelerated on evidence being shown of the suppression of the native production of oplum in China, and in accordance with this agreement a further limitation was placed on exports to Chinese ports. The reduction of exports led to an increase in the price of the drug in China and a correspond-ing rise in the price obtained in India at the suction sales For some considerable time, however, in 1912 the trade in China was paralyaever, in 1912 to trade in 0 mm was paraya-ed by the imposition by Provincial Governom in defiance of instructions from the Central Government of restrictions on the importation and sale of Indian optum Stocks accumulated rapidity at Shanghal and Hongkong and the position in December 1912 had become so acute for exportation by sea. We statished to distribute the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the st

#### GLASS AND GLASSWARE.

The total value of the glass and glassware imported into India in 1928-28 amounted to Ra 250 lakhs compared with Rs 222 lakhs in the previous year. The imports of glassware in India are showing an apward tendency, they being in 1918-14 over Rs 190 lakhs in value, £s, over the quinquen nail average of Rs 151 lakh Austrick Hungary. nial average of E. 161 lakhs Austria Hungary and Germany before the outbreak of the war exported bangles, beads, bottles, funnels, chimpers and globes, etc., to the value of B. 116 lakhs in 1918 14. The value of average imports from the eremy countries during the five pre-war years was He 52 lakhs or about 57 the Indian market, imports from Japan increased to 71% from 8%, the pre-war average culticd Kingdom increased her shipments of sheet and plate glass, which before 1914 came largely from Belgium 1apan, however, could largely from Belgium Japan, however, could not meet the Indian demand, and hence renewed and pioneer efforts were made in India to satisfy the needs of the Indian consumer After the war imports from what was the Dual Monar chy quickly revived

Manufacture of Glass in India —Glass was manufactured in India in contories before furnity and Pluny makes mention of "Indian result of recent archeological explorations, a number of small crude glass vessels have been discovered indicative of the very primitive stage of the Industry But no further traces of the control of the control of the control of the control of the control is a cortain that by the sixteent control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of century it was an established Industry producing mainly bengles and small bottles. The quality of the material was inferior and the articles turned out were rough. Beyond this stage turned ont were rough. Beyond this stage the industry had not progressed until the nine ties of the last century. Mannitature of giant in India on modern European lines dates from the contract of the last of the last of the last of the last of the last of the last of the last of the last of the last of the hear a number of concerns have been started, a number of them have falled, while some are still clining to life owing to war conditions. They mainly devote themselves to the manufac-ture of bangies and isampare side by side with bottle-making on a small scale. This, therefore, defined classes of the Industry in it as weent defined classes of the Industry in its present stage, (!) indigenous Cottage Industry and (ii) the modern Factory Industry

(i) The indigenous Cottage Industry which is represented in all parts of the country, but has its chief centres in Firosabad District of U P, and Belgaum District, in the South, is mainly and Belgamu District, in the South, is mainly concerned with the mannecture of cheep bagies made from "glass cakes or blocks and bangles, etc. (5) Faulty of sufficient made in larger Factories. The industry is at present it as flourishing state and supplies nearly one-third of the Indian demand for bangles to the improvement or swe in some cases for machine the concern in the beginning of new glashy has been improved by the discovery of new glashy has been improved by the discovery of new glashy processes and for the precent special causes that contributed to the failure of

the turnover in this line has gone up to 20 ir kha of rupees a year. But these bangles have now to face a very hard competition from Japan whose "allky" hangles are outsing the old type Indian oues

(ii) The modern Factory type of organisation of this Industry is just in its intancy at present the cristing Factories either stop at producing glass cakes for bangle as in Froxabad or simple than of lampwares and bottles With the kind of lampwares and bounds with machinery in existing state of knowledge and machinery in India they can neither produce sheet and plate glass, nor do they pretend to manufacture inhoratory or table glass Artistic glassware it out of the question and the private capitalists who have to run their concerns mostly with com-mercial ends do not think it worth their while to mercial ends go not tamk it worth their while to spend money and labour on it. War caused a great decrease in volume—though not so much in value which was much increased—of the imports of the lampware, sto, and in order to meet the Indian demand for them, new Pactories meet the Indian demand for them, new%stories were started and old revived, which produced only cheap and simple kind of lampware and bottles on small scale. The total production of these Indian Glass Works has not been exactly costimated, but it is generally surposed that they were able to meet in these war years nearly half the Indian demand for this kind of glassware There are at present 14 factories engaged in the production of lampware, of which two or three only produce bottles and carboys The chief centres for the former kind are Bombay, Jubbulpore, Allahabad, and Bilhot and Ambals, while bottles are only manufactured at Naini and Lahore, and recently at Calcutta

During the latter years of the war period, a number of Glass Works were opened in the Bombay Presidency and adjoining districts. districts, local manufacture having been stimulated by the cessation of imports of German, American and Belgian giam.

Causes of failure —Records of the earlier ventures have shown that the failures in some cases were due in part at least to preventible causes, prominent among which were (1) Lack of enlightened management (2) Lack of proper commercial basis, as in some cases the proprie tors had a number of other more larger concerns tors had a number of other more larger concerns to fook to \$(3)\$ Bad selection of site A nidsal site for a Glass Factory would be determined by the (e) nearness of quarts and fire-day, (6) nearness of fiel, and (e) by the nearness of market. At least two must be present. In some concerns, two were absent (f) Specializations was lacking, some factories in their initial stages. trying to manufacture three or four different trying to manutacute turns or four querent kinds of jaseware simultaneously like lampware, bottles, and bangles, etc. (5) Fancity of smit-ent fluid capital for initial expenses for machine-or other improvements or swa in some cases for running the concern in the beginning

some of these and hinder the progress of the rest. Chief among them are (1) The Industry is lo its intant stage and hone such failures are but incidental (2) No oxpert guidance in this inet there is a lack of men and good identative (3) Panetty of skilled labour of higher type. The present Indian workmen in table line and blowers are few in number and illiterate They, therefore, master the situation and are unamend able to management. (4) Heavy cost of good fuel, the works osually being situated where good sand and quartz can be obtained, and consequently, in most cases, at a great distance from the coal-fields (5) To a certain extent competition from Japan and other European

Alkali used is almost entirely of English manufacture being Carbonate of Soda 98 99% manufacture being Carbonate of Soda 98 99%, coossily successful."

in a powdered form This Alkali has almost to some state of the various Alkaline stom Report (Appendix), Indian Munitions Rarths formerly employed by the Gissa Bangle Board, Industrial Handbook, etc. "Notes on manufactures as the latter cannot be used in Gissa Mauriacture" By O B Fox. with the imported article. These points must be carefully noted for future guidance. The Industry developed considerably under

war conditions, but in peace times, in this transition stage, immediate efforts must be made lu the direction of what the Indian Industrial Commission say in their Report (Appendix E) vis "The Glass Industry, even in its sim-plest form is highly technical and can be effici plost form is highly technical and can be efficiently carried on only by scientifically trained managers and expet workmen. The present stage has been reached by importing men, only stage has been reached by importing men, only cations, from Europe and Japan, and by sending Indian students abroad to plek up what knowledge they can. The glass indostry is a closed trade and its secreta are carefully guarded, so that the latter method has not proved compared to the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of

#### WILD BIRDS' PLUMAGE

The Bill for prohibiting the importation into England of wild birds plumage, which was introduced into Parliament in 1913, was the occasion of a fierce controversy on the nature occasion of a fierce coolcovery on the nature of the plumage traffe Organised opposition to the fill, attends successful in preventing it from becoming law, failed to convince the public that the plumage trade was not one of great cruelty. The onterversy windness where the public that the plumage trade was not one of great cruelty. The conversy windness will be the public that the public trade was actived at between the two parties. The most important clause in the agreement stipulates that within four months of the Bill becoming law an Advisory Committee shall be appointed by the Board of Trade This Committee will counts of an independent chartman. two expert ornithologists, three representatives of the feather trade, and four other independent members The fauction of this Committee will members The function of this Committee will be to advise the Board of Trade as to additions be to anyme the Board of Trace as to additions to and removals from the existing schedule (ostrice and elder duck) of birds whose plumage may be imported The passing of the Plumage Bill will thus place England abreset of the United States and of her own daughter Dominious in States and of ner own daugnter Dominions in the suppression of a barbarous industry, as all legitimate methods of broading birds for their plumage will be safeguarded as definite exceptions under the Plumage Bill

Primage birds.—The birds most killed on account of their biumage in India see paddy birds. egreat, kingishers, besteads, imggfowt, phessants, paroquets, peafowt, hoopoes and rollers. Egreats and rollers (popularly hown as Bine Jays) are perhaps the birds which have been most extendively killed in the past, and of these, egrets have attracted the greatest attraction. Then are three species may be also in the large, families and titled greater in india the Large, families and titled greater in the large, families and titled greater the continuance of the breeding season a dorsal train of fasthers, which elongates and becomes "families and early the composed" or site acquested that is to say, the barbs are separate and distinct from each other,

thus forming the ornamental plume or algrette for which these birds are much sought after and ruthlessly destroyed. Thirty years ago the express with the state of the state of the strength ince 1896 the export trade has steadily diminished But, though legitimate exports have been stopped, the trade is a lucrative as to lead to many attempts at mugging. Within nave been stopped, the trade is so heretage as to lead to many attempts at sungging. Within a recent period of 12 months the Bombay Preventive Department, for example, selzed egret plumes worth Es 2,10 047 in India and 244,000 plumes worth 38 2,10 047 in india and 244,000 in London The rupee value represents the sum which the exporters paid to those who took the fathors from the birds, so the lone to the trade was considerable. In addition, penalties warping from Rs. 5,000 to Rs. 10,000 each and amounting altogether to Rs. 59,175 each and amounting altogether to Rs. 59,175 each summer to a transfer to the castless concerned was attentioned to arrord the castless concerned to a street the castless concerned. were inflicted on the tell merchants concerned in attempting to export the feathers. A case was reported from Rangson in 1910 of a man being found in possession of 22 the of egret feathers valued at Rs. 65,000. Although frequently denied, there seems very fittle reason to the work of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason of the reason egreta have been ancessfully bred in captic vity by the flaberfolk in the province of Blnd Bot whether such birds can be bred without crucity, and if so whether the export of their plumage could be legalised without encouraging barbaries in other areas of the peninsuls, is a question which can only be decided as a result of a searching and exhaustive bedieded as result of a searching and exhaustive

inquiry

Legislation—Indian legislation on the
subject will be studied with interest by those
who have followed the course of legislation on
the subject of the control legislation on
the subject of the control legislation on
the subject of the control legislation on
the subject of the control legislation
that the control legislation of the

make rules prohibiting under pessatics the sale
or possession of with birds recently killed or
taken during their breeding seasons, and the
lasportation into any municipal or cantonnessis
area of the plumage of any with birds during
area of the plumage of any with birds during

those seasons, and local governments were empowered to apply these provisions to animals other than birds

Afterwards, in 1902, action was taken under the Sea Customs Act to prohibit the exportation of the skins and feathers of birds, except feathers of cetriches and skins and feathers of particles and skins and feathers exported form fide as specimens illustrative of natural history Act VIII of 1912 goes much further than the previous law It schedules a list of wild birds and animals to which the Act is to apply orris and animals to which the Act is to apply in the first instance, enables local governments to extend this list, empowers local governments to extend in close times." preanmably during the breeding seasons, in the whole of their territories or in specified areas, for wild birds and animals to which the Act applies, and imposes penalties for the capture, sale, and purchase of hirds and animals in contravention

of the "close time" regulations, and for the sale, purchase and possession of piumage taken from birds during the close time. There le power to grant exemptions in the interests or scientific research, and three are asyings for the explure or killing by any person of a wild almost large the companion of the companion of the animal in the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the companion of the compan person, and for the capture or killing of any wild bird or animal in bong fide defence of property

One defect in the law may be noticed When an exporter is discovered, the Customs Department can on a magistrate's warrant have his house searched and selse the feathers found there to produce as evidence that he is engaged in the trade But they have to return the feathers and can only take possession of them if they are discovered presently in course of export

#### HIDES, SKINS AND LEATHER

India's local manufactures of skins and leather have steadily increased in recent years Previous nave steamy increased in reactive the tothe outbreak of war, the trade in raw hides in this country was good, there was a large demand for hides, and price ruided bigh. While in the continental markets stocke were bigh owing to overtrading in the previous year, the United States had a shortage which was estimated at approximately two million pieces On the declaration of war, the trade which had up till then been brisk was seriously dislo had nptill then been firsk was seriously dislo cated Exports to enemy countries especially to the great emporium of Indian hidee, Ham burg, were stopped, and exporters had to find new markets for the raw inasterial. The raw hide business of India, it is well known, has hitherto been largely, it not quite entirely in the hands of German firms or firmeof German in the hands of derman firms of armed cernam origin Germany has had the largest share of India's raw hides In the four months before the ontbreak of war she took 39 per cent of the total exports in 1912 13 she took 32 per cent and in 1913-14, 35 per cent Raw hidee were exported to Trieste in consi derable quantities whence they were taken to coranic quantumoe whence they were taken to formany or Austria In the four months before the ontbreak of war 15 per cent of India's exports passed through Trieste, in 1913-14 the percentage was 21

Exports.—The exports in raw and tanned hides and skins in 1923-24 amounted in value to Re lakhs 12 98 compared with 10,76 lakhs in

are on that account participated in by a com-paratively small community. The traffic is subject to considerable fluctuations concomitant with the vicus index of the seasons. In famine years for instance the exports of untanned hides rise to an abnormal figure. The traffic is also peculiarly affected by the difficulty of ohtaining capital and by the religious objection which assigns it to a position of degradation and neglect it has thus become a monopoly within a restricted community and suffers from the loss of competition and popular interest and favour

and ravour Ko large industry bas changed more rapidly and completely than that of leather By the chrome process for example, superior than the completely than the chrome process for example, superior than the chrome completely control of the chrome control of the chrome chrome changes and goat skins in eix to eight bours, and these operand constitute formerly took thirty daye or as much as eighteen months of these obtaines the native than the chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chrome chr hut in spite of general backwardness the leather produced by some of the tanneries, especially those under European management, is in certain respects equal to the best imported articles. But since the outbreak of war pro-cress has been more rapid and considerable quantities of special forms of chrome leather, for which Indian hides are particularly suit-able, have found a ready market in London

to Ra lakis 12 98 sempared with 10,76 lakis in the previous year. About 40 per cent of the opports went to the U K 24 per cent to the U S 4. and 11 per cent to Germany
Conditions of the Trade—The trade in hides and skings and the craft in its cather industry was the lack of organism that an analysis of the craft in the sather industry was the lack of organism to the craft in its cather industry was the lack of organism to the craft in its cather industry was the lack of organism to all the craft in the cather industry was first taken in September 1919, when a Bill was intecdued in the Imperial Islamondam or of low cases linking and cather industry in turther to amond the Indias

Tariff Act, 1894 The effect of this Bill was officially described as follows "It is to impose an export duty of 18 per seet to a hides and silne as exported to other and silne exported to other parts of the Empire, and there tanned I is object is to ensure that our hides and atms shall be converted into fully tunned leadher or articles so leather so far as possible in India and failing this in other parts are always and the shall be converted into the parts of the same of the same than the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the same of the sam raw state for manufacture in foreign countries Sir George Barnes who was in charge of the sir deorge Dance who was id charge of the Bill and described the tanning industry as one of the most promising Indian industries ex-plained that "the present position is that we have in India at the present time some hundreds of tanneries for the tanning of hides, a large number of which have come into existence in order to satisfy military requirements during the war We have in fact the foundations of a the war We have in fact the foundations of a noursaming tanning industry, but there is reason to fear that it may tend to dwindle and disappear with the diminution of military requirements, it some other support is not given. We want to keep this industry allve, and we believe that loss and the case protection in the shape of a 15 per cent. export duty is justifiable and ought to be affective it is clearly just also that the same measure of protection without the extended of the case of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contr

to the tanners of skins whose business, as I have already stated, was injured by the neces-atics of the war Though Indian tanneries have enormously increased in number during he past three years, they can only deal with a comparatively small proportion of the raw bides and skins which India produces, and it is to the advantage of India and the security of the Empire generally that this large surplus abould, so far as possible, be tanned within the Empire, and with this end in view the Bill proposes a 10 per cent rebate in respect of hides and skins exported to any place within the Empire I should add that it is proposed to limit by notification the benefit of this rebate to hides and skins actually tanned within the Empire and sums accusaly tanned within the Empire and Indian hides and skins re exported from an Empire port for the purpose of being tanned abroad will not be entitled to any-rebata."

#### TRADE MARKS.

TRADE MARKS.

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calontia, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tarift, the Customs state was strengthened of the first of the present tarift, the Customs state was strengthened of the first of the present tarift, the Customs state was strengthened to be made at the same time for the purposes of the Merchandise Marks Act. The Act was intended originally to prevent the franducture sais of goods bearing raise trade marks or false of the 20,774 detentions ordered in the same that ploes-goods about the grant state of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contr

### Customs Tariff.

purposes and not for the protection of Indian industries But the tariff has been modified purposes and not for the protection of Indian Customs Officer on sufficient came being shown, industries But the tariff has been modified in any case determines, provided further that with a view to admitting free or at favourable the Chief Customs Officer shall not extend the rates articles, the cheap import of which was considered necessary in the interests of the country Thus certain raw materials, manures agricultural implements and dairy appliances are admitted free Machinery, printing ma terials, etc are assessed at 21 per cent and iron and steel railway material and ships at 10 per cent High duties are imposed on tohacco liquors and matches

Re-Imports - Articles of foreign production on which import duty has been once paid, if subsequently exported, are on re import exempted from duty on the following condi tlons -

- The Collector of Customs must be satisfied-
- (1) of the identity of the articles .
- (2) that no drawback of duty was paid on their export,
- (3) that the ownership has not changed between the time of re export and subse quent re import .
- (4) that they are private personal property re-imported for personal use, not mer chandle for sale,
- (5) that not more than three years have passed since they were ro exported

Duty is, however, charged on the cost of repairs done to the articles while abroad which should be declared by the person re importing the articles in a form which will he supplied to him at the time of re importation

To facilitate identification on re importation an export certificate giving the necessary par tioulars should be obtained from the Customs Department at the time of shipment of the articles which should be tendered for examin ation

This concession of free entry on re importa-tion is not extended for the benefit of Companies or Corporate Bodles

Drawbacks—When any goods, capable of bung easily identified which have been imported by sea into any Customs port from any foreign port, and upon which duties of Customs have been paid on importation, are re exported by sea from such Customs port to any foreign port, or as provisions or stores for use on board a ship proceeding to a foreign port, seven-eights of such duties shall, except as otherwise hereinafter provided, be repaid as drawback

Provided that, in every such case, the goods be identified to the satisfaction of the Customs Collector at such Customs port and that the re-export be made within two years from the date of importation, as shown by the records of the Custom House, or within such extended

General Import duties are levied for fiscal | term as the Chief Customs Anthority, or Chief term to a period exceeding 3 years

> When any goods, having been charged with Import duty at one Customs port and thence exported to another are re exported by sea as aforesaid drawback shall be allowed on such goods as if they had been so re exported from the former port

> Provided that In every such case, the goods be identified to the satisfaction of the Officer In Charge of the Custom House at the port of final expertation and that such final experta-tion be made within three years from the date on which they were first imported into British

> No drawback shall be allowed unless the claim to receive such drawback be made and established at the time of re export

> No such payment of drawback shall be made until the vessel carrying the goods has put out to see or unless payment be demanded within six months from the date of entry for ship ment

> Every person, or his duly authorised agent, claiming drawback on any goods duly export ed, shall make and subscribe a declaration that cu, small make and subserice a detairston that such goods have been actually exported, and have not heen re landed and are not intended to be re landed at any Customs port and that such person was at the time of cutry outwards and shipment, and continues to be, entitled to drawback thereon

Merchandise Marks - Importers into India especially from countries other than the United Kingdom, would do well to make themselves acquainted with the law and regulations relat ing to merchandise marks In Appendix II will be found the principal provisions of the Indian Merchandise Marks Act, 1889 and con nected Acts and the notifications issued there under The following summary of the regula tions in force does not claim to be exhaustive For those seeking more complete information a ference is suggested to the Merchandise Marks Manual which is published under the anthority of the Government of India and ob-tainable of all agents for the sale of Indian Government publications

Infringements or offences may be classified conveniently under four heads —

- Connterfelt trade marks .
- Trade descriptions that are false in res pect of the country of origin ,
- Trade descriptions that are false in other respects. and
- Lengths not properly stamped on piece-

Onder Government of India Notification No. 1428, dated 17th November 1923, Jule Rags such as are used for paper making are exempt from payment of expert duty provided that the Constons Collector is satisfied that they are useless for any purpose to which cloth or repe is ordinarily put

The broad characteristics of the trade of India are hamiliar to readen of the ladian New Book India agricultural country and the high prices of imports relatively to Book India agricultural country and the high prices of imports relatively to upon agriculture for their means of livelihood Consequently the prosperity of the land is largely determined by the character of the south west monscon raths An area which overy year grown larger is protected by Irrigative and the relative trade of the south west monscon raths An area which overy year grown larger is protected by Irrigative and the relative trade of the south west monscon raths can be related by the character of the south west monscon raths An area which over year grown larger is protected by Irrigative and the relative trade of the south west monscon raths and the relative trade of the south west monscon raths and the relative trade of the south west monscon raths and the relative trade of the south was the south west monscon raths and the relative trade of the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south was the south with the increased resisting power of the people and the growth of the manufacturing industry is expected to make the population immine to the shock of such famines as those of 1896 97 1899 1900 and 19 8-19 Bnt many of the irrigation works such as tanks and wells depend on the rains for their replenishment Con-sequently the rains mainly determine the export trade and the consequent purchasing power of the poople Another feature that arises from these conditions is that the imports are chiefly manufactured goods and the exports produce

The main conclusions to be drawn from the The main conclusions to be drawn from the trade statistics of the last official year are in dicated in the annual Review of the Trade of India by Mr. C G Freke Director General of Commercial Intelligence from which the following distals are maning drawn in the post of 192 25 marked a place of the trade of the post of 192 25 marked a place last received the contraction of the post of 192 25 marked a place last received the contraction of the post of 192 25 marked a place last received the contraction of the post of 192 25 marked a place last received the contraction of the post of 192 25 marked a place last received the contraction of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the post of 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received the 192 25 marked a place last received

The improvement in trade which characterized the previous year was maintained and there was steady development on sound and healthy lines towards more stable economic conditions lines towards more stable economic conditions, A study of trade movements in 1923 25 seems to 1923 and a study of trade movements in 1923 25 seems to 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 and 1925 a most of India s staple exports are low and this latter figure represents a low estimate of the quantity of her goods which humanity must buy if current standards of living are to be maintained The final liquidation of secumn lated stocks of imports was practically com-pleted and another good monecon gave India for third year of good crops in succession

exports All over the world countries which are primarily agricultural are suffering from this difference between the werage increase corresponding average increase; the prices of raw materials And in 1983 24 India paid 90 per cent more than in 1983 14 for her imports while she received only 45 per cent more than in 1981 14 for her imports while she received only 45 per cent more than in 1981 14 for her apports Thag reparations problem remained unsolved through out the year and in the spring of 1923 the occupation of the Ruhr disorganised economic and political conditions throughout Europe For the first half of the year the low wages paid to German workers combined with the steady depreciation of her currency enabled Germany to undersell her competitors in nearly Germany to undersell her competitors in nearly all markets of the world but towards the close of the year the steady strengthening of the demand of her workers to be paid on a gold basis weakened her competition to some extent At the same time the German mark gradually At the same time the German mark gradually passed ont of practical economics. And the krench franc had a perflously rapid downfall during the later months of the year but it was fortunately steadled and brought up again just at its close India s tire best individual customers are the United Kingdom Japan and the United States of America and the wholesale price levels in those countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple during the America Countries were relatively asple countries were relatively asple during the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively aspectively asple of the Countries were relatively asple of the Countries were relatively asple of the Countries were relatively asp

wholesale price levels in these countries were clastively stable during the years | feature of Exporis — The most strike status of Indian trade as a shot was that are year of of the previous year while imports decreased by 5 crores. The large increase in the former has to be discounted to some extent as 27 crores of it is attributable to raw cotton of which there were large cryotic at high prices on account of the shortest of the American crop,

The following figures have been compiled to show the values of imports and exports of merchandise on the basis of declared values in 1913 14 These statistics are necessarily approximate but they are sufficiently accurate to afford a reliable measure of the conrse of trade

(In crores of Rapeea)

	1913 14	1919 20	1920 21	1921 22	1922 23	1928 24
Imports Exports	188 244	101 198	142 172	124 182	138 214	120 240
Total trade in merchandise excinding re exports	427	299	314	808	352	360

They illustrate the extent to which Indian | goods The total value of the import trade trade is returning to its pre war dimensions especially on the exports side. And it has always to be borne in mind that in 1913-14 trade was distinctly better than the pre-war

goods the total value in the import trade excluding oction piece goods decreased by 2 per cent from Es 174 crores to Es 171 coross The quantity of sugar all sorts including molesceand confectionery imported fell by 5 per cent from 504 000 toos to 478 000 tone while cens from 304 500 tons to 475 000 fone while the value remained almost stationary at Rs 154 crores Machinery and millwork decreased in valua from Rs 23 crores to Rs 19 crores normal to import side cotton piece goods fell in quantity by 107 million yards to 148 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to 150 million to u quantity with a fall of 8 per cent in value which amounted to nearly Rs 18 crores The value of the imports of hardware decreased from Rs 6 crores to Rs 44 crores while motor cars improved from Rs 12 crores while motor cars improved from Rs 12 crores while motor cars improved from Rs 12 crores while motor cars imported from Rs 3 crores to Rs 12 crores to Rs 8 st crores. The quantity of all sarine and aniline dwes imported increased by 25 million 18 to 19 million 18 to that their value stood at Rs 22 crores which approximated closely to the previous year a figure In linguous five quantity increased with a small decrease in value imports of raw cotton increased was a fall in cotton twict and years from Rs 69 crores to nearly Rs 8 crores

On the Emport side raw cotton increased from Rs 71 to Rs 98, crores and the total value of raw cotton and cotton manufactures exported increased by Rs 25; crores to Rs 110; cross to Rs 10; cross to Rs 10; cross to Rs 10; cross to Rs 10; cross to Rs 20; crores to Rs 20; crores from Rs 22; crores to Rs 20; crores from Rs 22; crores to Rs 20; crores from Rs 22; crores to Rs 20; crores from Rs 22; crores to Rs 20; crores from Rs 22; crores to Rs 20; crores from Rs 22; crores to Rs 20; crores from Rs 22; crores from the and free manufactures shipped for Rs 10; crores to Rs 22; million tons while their value showed an increased in quantity by 81; 000 tons o 22; million tons while their value showed small decrease of Rs 14 skbr and amounted o Rs 34; crores Exporte of wheat ebowed large increase and amounted to 63; 600 tons aligned at Rs 10; crores to Rs 20; crores to Rs 21; crores The total value of laseds exported again increased in the year distribution of Rs 11; crores The total value of laseds exported again increased in the year distribution of the Rs 11; crores The total value of laseds exported again increased in the year distribution of the Rs 11; crores The total value of laseds exported again increased in the year distribution of the Rs 21; crores to easily Rs 30.

The Balance of Trade in merchandise in vont of india reached the record figure of a 145 crores which was partly liquidated by illion imports gold to the value of Re 29 cres and silver to the net value of Re 39 cres by the sale of council bills purchase India of sterling and sales of gold in India ainst sterling payments

#### Imports of Herchandise.

Cotton Manafactures—Another year of high prices had the effect of checking the recovery in demand for cotton manufactures which was anticipated after a prolonged period of agricultural prosperity. The prices of me cotton in America dominate the worker was one of high and widely finctuating prices. The prices of middling American at New Orleans was in the neighbourhood of 28 cents per lb both at the opening and at the close of the year. But it varied between 12 cents in July and dig const in Decomposition of 28 cents per lb both at the opening and at the close of the year. But it varied between 12 cents in July and dig const in Decomposition of 28 cents per lb both at the opening and at the close of the year. But it varied between takion that the American cotton crop would prove of eufficient size to bring about reasonable level of values but the damage that the price of the monsoon was clear and the speciming of Octobly abandoned and prices moved accordingly. As a sunal Indian brying was slack dill the character of the monsoon was clear and even when the rains had proved to be good no large orders were placed until September October and by the Section of the monsoon was clear and even when the rains had proved to be good no large orders were placed until September October and by the decrease and there would have been as trong cold weather demand but for the damping effect of a very considerable nersee in prices. The year closed with stock low and a feeling that there would be a strong demand as soon the more reasonable quotations for the manufacture of products.

The imports of cotton manufactures were valued at Ra 67½ crores as compared with Rs 70 crores in 1922 23 and Ra 57 crores in 1921 22. The decrease was in cotton twist and yarn and grey piece goods while white and coloured goods increased

The value of the Imports represented 29; per cent of the total Import trade in 1982 24 as compared with 30 per cent in 1922 28 and 21 per cent in 1921 22 Ihe chief descriptions of Imports during the last three years and the pre war year were as follows—

Imports of Cotte n manufactures	191314 (pre war	1921 22	1922 23	192 ; 24
det and yarn	Rs (lakhs) 4 16	Rs (lakhs) 11 51	Rs. (lakhs) 9 26	Rs (lakha) 7 94
os goods— Frey (nubleached) White (bleached) coloured printed or dyed ents of all descriptions	26 46 14 29 17 86 54	22 65 12 67 7 59 26	30 44 15 01 12 80 46	23 06 15 44 17 69 65

Silk—Raw and Manufactured—Phere was a fall of 20 per cent both in the quantity and value of raw silk imported. The importe amounted to 1 365 000 lbs valued at Rs 1 19 lakhs as compared with 18 29 000 lbs and Rs 1 58 iakhs in 1922 29 As in the preceding year 93 per cent of the imports came from China and Hongkong and the remainder mainly from Slam and Japan Imports by overland routes from Western China Siam and the Shan States amounted to 669 000 lbs valued at Hs 93 lakhs as compared with 583 632 lbs and Rs 77 lakhs in 1922 23 Silk yarn noils and warps increased to 987 000 lbs valued at Rs 71 lakes from

yards while the value of the imports increased slightly by one per cent to Rs 2 30 lakhs Over 98 per cent of the total quantity came as usnai from the Far East (China Hongkong and

Japan) Metals and Manufactures thereof -The total quantity of metals and manufactures thereof imported during 1923 24 Increased to 303 000 tons from 801 300 tons in 1922 23 but the value showed a decrease by a crore of Enpess to Bs 241 crores Iron and steel represented Rs 13 crores of this total and occupied the third place in order of importance among imports as in the preceding year. If we include under this heading machinery and millwork railway when and additionable to the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control o to 987 000 lbs. valued at Rs 71 lakins from \$87 000 lbs. valued at Rs 71 lakins from \$87 000 lbs. and Rs 62 lakins inte preceding the heading manhinery and milliower railway part and the United Kingdom A half of the total quantity under this head came from Italy and \$1 per cent from Japan 8ll prices from Japan 8ll piece-goods, the most important description of manufactured silk imported, decreased cliently dislocated this German steel industry in quantity by nearly 2 per cent to 14,987,000 and also materially reduced the steel ontput

of France and Luxemburg, owing in the curtail ment of fuel supplies And continental supplies of fron and steel hardly became an appreciable factor in world a cupplies again until the last quarter of that year and their amplies to India were consequently much restricted in the year under review The United States also con aiderably curtailed her exports owing to a etrong home demand for industrial developmenta The United Kingdom where the industry suffered from a disastroussium pin 1921 regained in 1923 her position as the chief exporting country An important factor in this recovery was that prices were remarkably steady through out the year And even when continental anppliers were able to underquote British suppliers certainty and promptness of delivery gave the letter a district advantage The United Kingdom output of 3 700 000 tons of steel in 1921 was the smallest recorded for over a quarter of a century and represented a decline of 5 300 000 trms on the previous year In 1922 the output advanced to nearly 6 million tons end In 1923 to 8; million tons as against 7 million tons in the pre war year

Machinery and Miliwork — As in the two preceding years machinery and miliwork main tained its position as second to cotton mann tamen its position as second to cotton main factures in India's import trade in 1923 24. There has been a steady feduction in the value of importations eince the boom year 1921 22. The total imports of machinery and printing presses during 1923 24 were valued at 18 20. crores as compared with Rs 24 crores in 1922 28 Rs 85 crores in 1921 22 and Rs 24 crores in 1920 21

Railway Plant and Rolling Stock —Imports under this head on private and Govern ment accounts combined were valued at Rs 14 crores (Rs 11 72 lakhs private and Rs 2 28 lakhs Government) as compared with Rs 18 76 lakhs (Rs 11 06 lakhs privete and Rs 2 70 lakhs Government) in 1922 23 and Rs 21 86 lakhs (Rs 18 91 lakhs private and Rs 2 95 lakhs (overnment) in 1921 22

Motor Vehicles -Notwithstanding an import duty of thirty per cent there was a remarkable increase in the imports of motor cars which numbered 7 984 as compared with 4 323 in 1922 28 and 2 895 in 1921 22 With the exception of the two ahnormal years immediately after the close of the war this representative largest importation on record. The total recorded values elso increased by 48 per cent to Bs 2 05 lakes The expansion was due partly to increased imports of small light cars but more particularly was it due to drastic price onttings mainly on the part of the United King dom and Continental manufacturers Of the total imports 41 per cent came from Canada 36 per cent from the United States 13 per cent from the United Kingdom The average

dom is noticeable Bengal had 36 per cent of the trade, Bombay 29 per cent, Madras 14 per cent and Burma 13 per cent

Sugar —Sugar held fourth place in India s import trade in 1928 24 as in the preceding year the total value of all kinds of sugar including molassee and confectionery imported heing Rs 154 crores Cotton manufactures ranked Rs 10¢ crores cotton manuscrurer ranger first as usnai with Rs 67¢ crores and they were followed by machinery and millwork lacinding helting (Rs 20 crores) and fron and steel (Rs 18 crores) The imports of eugar refined and unrefined excluding molassee and confectionery decreased in quantity by 7 per cent to 411 500 tons and the value stood at Hs 14 78 lakhs as against Rs 14 85 lakhs in at his 14 to taking as against the 17 year during 1922 23. High prices ruling in Java during the latter balf of the year restricted business but the bulk of the imports arrived during Angust to October when prices were low Java continued to be the main course of enpply and accounted for nearly 90 per cent of the total quantity imported as compared with 84 per cent in 1922 23 Imports therefrom fincluding in 1822 23 Imports therefore (heroting consignments from the Straits Settlements which are forwarding agents of Java sugar) fell slightly from 37 700 tons in 1922 23 to 371 200 tons This quantity was distributed as follows—Bengal 165 500 tons of 43 per 38 per cent from the United States 13 per cent Bombay 99 600 tons or 27 per cent cent from the United States 13 per cent Bombay 99 600 tons or 24 per cent gent from the United Kingdom The average (Karachi 87 900 tons or 24 per cent Buffan declared value of can imported from Canada was 30 000 tons or 5 per cent Baffan 9 100 tons Bs 1963 (Bs 1982) as compared with Es 3 424 mr 2 per cent of the total Mauritius sugar. (33 3169) for each part run the United States mostly imported into Bombay dwindled to 1,300 and Ra + 511 (Ra 7 312) from the United King tons as compared with 31 400 tons a year ago—dom the values par unit in the preceding year like reduction being due to the diversion of the being abown in brackets. The relative fall in sugar to the United Kington as a result of the the average cost of cars from the United King the values are considered to its

Mineral Olis - Mineral oils imported into applied \$ 500 tons valued at Rs \$24 lakhs, as ladds from foreign cownities are comprised compared with \$ 200 tons and Rs 10 lakhs in The imports of petrol from ahroad ex localization of the result of the solid coming coastwise from Burna The total quantity of foreign many of the result of the solid coming coastwise from Burna The total quantity of foreign many of the result of the solid coming coastwise from Burna The total quantity of foreign many of the result of the solid coming the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of the solid companies of The imports of petrol from ahroad are insignificant the bulk of this oil coming coastwise from Burma The total quantity of foreign mineral oil imported in the year under review in-creased to 169 million gallons from 133 million oressed to 169 million gallons from 138 million gallons in the preceding year. The horresse was almost equally contributed by kerosene and fine ill. Nearly 69 million gallons of kerosene uit (bulk oil 62 million gallons and case oil 7 million gallons to the million gallons and case oil 7 million gallons in the water of the million gallons in the water of the million gallons in the water of the million gallons and the million gallons in the water of the million gallons in the water of the million gallons and 6 million gallons in the water of the million gallons in the water of the million gallons in the water of the water of the million gallons in the water of the water of the million gallons the sertage autus! imports during the five prewar years

The importations of fuel oil into India to meet the growing demands of rallways steamships and industrial plant have steadily risen from 34 million galions in 1919 20 48 millions in 1920 21 58 millions in 1921 22 621 millions in 1922 23 to a record figure uf 801 millions imports from Persia which is the largest supplier amounted Persia which is the largest supplier amounted to 60 million gallons or nearly 75 per cent of the total quantity imported as compared with about 51 million gallons in each of the two proceding years. Birmes supplies 1155 million gallons while the imports from the Straits Settlements fell from 6 million gallons submitted and batching old decreased to 16 million gallons submit of 174 lake from 18 gallons valued at Es 174 lake from 18 33. The United Settles supplied 11 million gallons and the remainder came mostly from Sorpeo (8) and the remainder came mostly from Sorpeo (8) and the remainder came mostly from Sorpeo (8) and the remainder came mostly from Sorpeo (8). and the remainder came mostly from Borneo (8 million gallons) and the United Lingdom (14 million gallons) and the United kingdom (14 million gallons) imports of petrol from abroad were as stated shove insignificant being only 2 700 gallons while the imports into India proper of petrol and other motor spirit from Burma amounted to 144 million gallons as compared with 154 million gallons as compared with 154 million gallons in 1222 23 and 17 million gallons in

Paper and Pasteboard -- Under paper the revival of trade recorded in the previous year continued and increases were recorded in all the major headings. The quantity of paper and pasteboard imported increased by 15 per cent from 60 200 tons to 69 700 tons. In respect of value there was a decline uf 3 per cent from Rs 2 79 lakhs to Rs 2 71 lakhs uwing particul ariy to the lower prices of German paper although nearly all prices showed an essier tendency

Printing paper was imported to the extent uf 19 900 tons as confugred with 19 300 tons in the 19 900 cons as compared with 19 3 says cons in the preceding year wile the value decreased to the Base 804 is six in userly Ha. 90 lakhs Beng News pintuling paper which was specified also separately from April 1923 accounted in 10 600 tons valued at Ba. 83 lakhs as for 10 600 tons valued at Ba. 83 lakhs as A nodiceable leature was the increase in the 10 profest of pruling paper from termany which year imported of pruling paper from termany which year

and 1 100 tons respectivel last year The Netherlands increased her supplies from 660 to 900 tons while there were reduce i imports from Belgium and Japan The United States of America has almost disappeared from the trade ampples from that cunnty amounting tu 15 tons only as compared with 44 tons Iu 1922 23 and 204 tons in 1921 22

Provisiona - This comprehensive head covers Provisions—This comprehensive near covered as large variety of strictles of which the principal are (in order of importance) canned and bottled provisions farinaceous and patent foods milk condensed bisents and cakes bacon and haves concurred suscents and cares becon and harms cheese jams and jellies pickles and states coros and chocolate isinglass butter ghee lard and wheger The total value of imported provisions increased slightly from Es 2.77 lakbs in 1922.23 to Es 2.80 lakbs in 1922.24

Canned and bottled provisions increased in quantity from 100 000 cwts to 107 000 cwts but decreased in value from Rs 75 lakhs to Rs 70 lakhs of which the United Kingdom sup plied Rs 35 lakhs and the United States of Ame rica Rs 4 lakhs The share of Australia fell to Rs 11 lakhs Prices declined in sympathy with reduced prices in the United Kingdom the main source of supply

Liquors—The total of liquors imported increased in quantity but decreased in value owing particularly to cheaper continental beer and spirits The total imports were 7000000 gallons as compared with 400 000 gallons in 1922 28 an increase of 8 per cent while the value amounted to Ra 8 144 lakis while the value should be a 28 lakha or 8 per cent. Ale and beer braud gin spirit present in drugs fliqueurs and wines showed increases while there were noticeable decreases in rum whisky and perfumed spirits

Salt -The duty on salt manufactured in India was raised from Rs 1 4 to Rs 2-8 per maund on the 1st March 1928 The fact that the enhanced rate was to be in furce for one year after which the question of its continuance wunid be considered again necessarily limited clearances to the immediate requirements for clearances to the immediate requirements for consumption and there was a corresponding reduction also in imports The imports ut salt from shoud shuwed a decrease of 12 per cent in quantity from \$42 000 tons to 475 000 tons while the value fell by 35 per cent from Rs 199 lakhs to Rs 110 lakhs Foreign state was as usual imported almost entirely into Bengal and Burms the former importing 419 000 tuns or 88 per cent of the total quantity and the latter 55 300 tons ur over 11 per cent as compared with 484,000 toms and 57,800 toms respectively in the preceding Dyeing and Tanning Substances—Synthetic dyes increased in quantity by 18 point from 14 million is to 16 million in 5 not in from 18 2.4 million in 5 not in value by only 2 per cent from 18 2.4 million is 2 million in 5 million in 5 million in 5 million in 5 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million in 6 million preceding year on account of the reduced prices of German supplies The average declared value of alizarine dyes was Rs 0 18 1 per ib as in 1922 23, while in the case of aniline dyes it fell to Rs. 1 14-0, as compared with Rs 2 5-0 in 1922-28 Noticeable feature were the lu 1922-28 Noticeable feature were the increases in the imports of British Alizarine dves from 878,000 lbs to 2,431 000 lbs and of German and me dyes from 6,726,000 lbs to 8 531 000 lbs Germany almost regained her 551 000 lbs Germany almost regamen ner pre-war importance as a supplier, although the value of her imports fell from Es 184 to Es 181 lakhs British supplies advanced from Es 20 to Es 27 lakhs and those from Netherlands probably in translat from Germany from Es 20 to Es 27 lakhs and those from the Estate of the Estate of the Estate of the Estate ments also increased from Es 20 to Es 11 lakhs

Glass and Glassware -The value of glass and glassware imported decreased to Rs 2,46 lakhs from Rs 2,60 lakhs in 1922 23 Japan maintained her lead in this trade with Rs 81 maintained her lead in this trade with Es \*il iskhs and was followed by Germany (Es 43 lskhs). Csechoslovakis (Es 42 lskhs) the United Kingdom (Es 28 lskhs), and Beiglum (Es 24 lskhs) with the exception of bangles all the principal descriptions specified showed decreases in value Imports of hangles from Ispan and Csechoslovakia increased More beads and false pearls also came from Japan and Esty the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company of the Company o large increase in the imports of a cheap class of phials from Japan Germany also sent more bottles and phials than in 1922 28 There were decreases in the imports of funnels, gloves and glass parts of lamps from Germany and Japan, of sheet and plate glass from Belgium. and of tableware from Japan

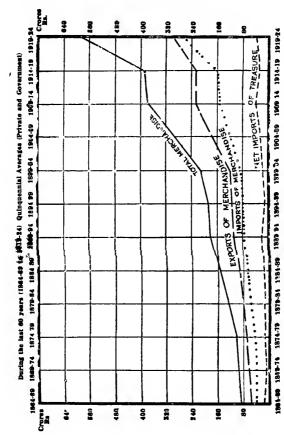

Tobacco - I'he activity of the Indian oigarette manufacturing industry was reflected in tho figures of imports of unmanufactured tobacco and digarettes. There was a remarkable morease in unmanufactured tobacco from 1,228 000 lbs , valued at Rs 17 lakhs, to 4,557,000lbs valued valued at 126 17 lastins, to 2,007,000,000 values at Rs 48; lastin together with a decrease in eigenetics from 4,087,000 lbs valued at Rs 1,57 lastins in 1923 24. These figures inclined imports of eigenetics by postal packets which were not separately specified prior to A pril, 1922. The contraction of the postal packets which were not separately specified prior to A pril, 1922. The United States of America seut 3,889,000 lbs of unmanufactured tobacco, as compared with 708,000 ibs in 1922-23 Nearly 97 per cent. of the 100,000 to in 10225. Nearly 97 profess of the control of the United Kingdom, as compared with 94 per cent to the United Kingdom, as compared with 94 per cent in the preceding year. The imports of American and Rgyptian signertes decreased. These games suggest that the high rate of import duty 113,000 tons valued at Rz 1,106 lakins, to

of 75 per cent, has stimulated the manufacture of of 75 per cent, has stimulated the manufacture of Indian eigenties from imported tobecoo. Cigars were in greater demand with lower prices, the importar ising from 25,600 lbs valued at nearly Ra. 2 laths to 27,200 lbs valued at Rs. 13 laths Tobacco for pipes and eigareties decreased to 279,200 lbs worth Rs. 174 laths, from 309,900 lbs and Rs. 20 laths in 1922 23

Precious Stones and Pearls unset —The value of precious stones imported in the year under review decreased from Rs 1,32 lakhs to Rs 89 lakhs, of which over Rs 85 lakhs consisted of diamonds This was largely due to a falling in prices, owing parity to speculation and parity genuine slackness of demand. The chief supplier of diamonds was as usual, Belgium which as counted for Ra 45 lakhs. The United Kingdorn ent Ra 24 lakhs of precious stones, Bergium Rs 46lakhs, and France Rs 10 lakhs, as compar ed with Rs 85 lakhs, Rs 77 lakhs and Rs. 8 cawin ha so takins, hs 77 lakins and ha cakhs, respectively in the preceding year Fearisuset were valued at Rs 91 lakhs, as compared with Rs 94 lakhs in 1922 23. The imports were, as neual, mostly from the Rahrein Islands and Maskat, which together supplied Rs 864 lakhs worth as compared with Rs 79 lakhs in 1922-23.

Coal—The imports of foreign coal showed a further decrease to 592,000 tons, as compared with 882,000 tons in the preceding year. The most 882,000 tons in the preceding year. The most noticeable feature was the decrease in the supplies from the United kingdom which fell from 497,000 to 79,000 tons a decrease of 418,000 tons This was partly set off by increases of 20,000 tons from the Union of South Africa, of 135,000 tons from Portuguese East Africa, and of 87,000 tons from Australia Imports from Japan dropped from 83,000 tons in 1921 22 and 88,000 tons in 1922 23 to 700 tons in 1923 24

Matches — Imports of matches were steady at 11 million gross, although the value decreased from Rs 1,62 lakhs to Rs 1 46 lakhs Nearly 9 million gross worth Rs 1,18 lakhs were salety matches, of which 52 per cent came from Japan and 44 per cent from 8weden Other kinds of matches amounted to 24 milion gross, of which Sweden supplied 56 per cent and Japan 89 per cent The interesting feature of the trade was the large increase in the imports of Swedish matches, which in the imports of swedish matches, which amounted to over 5 million gross a compared with 2½ million gross in 1922 28, while the strivate of Japanese matches dropped from 8 million gross to 5½ million gross. The share of Japan in the total quantity of matches imported was 48 per cent and of 8 weden 45 per cent as compared with 74 and 22 per cent, respec tively, in the preceding year Imports from Norway and Csechoslovakis increased in quanti-ty but showed decreases in value The high import duty was the direct canse of a new Japan Import duty was the circutance of a new sagar ese trade in spints complete in every way except for the head, and empty boxes. So that the only manufacturing processes applied to these goods in India were the dipplug and the paoling With effect from 1st March, 1924, a high specific daty has also been imposed on undipped splints, veneers for match boxes, and empty boxes, which came in formally at an ad calorse import duty

Not -Imports and Exports include both private and Government transaction.

amounted to 223,500 bales only) Japan was as hitherto, india a best customer and took one of general depression in the Lancashire apin uning industry, particularly in the section axing with 1,621,000 bales or 48 per cent, in 1622-23 American coston. The section of the spinning and 1,722,000 bales or 68 per cent, in 1622-23 american coston axing with 1,621,000 bales or 68 per cent, in 1622-23 better. The uncertainty of the position was intensified by the character of the American coston season. With practically are conducted as a fine cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost of the cost o there seemed every hope of a large crop, but see ceeding condition reports steadily diminished this hope and the crop eventually ginned was only 12,675 thousand bales (400 lbs ) excluding only 12,670 enusuant uses (100 its), vacuuming illuters The Egyptian crop decreased to 1,447 000 bales from 1 659,000 hales in 1922 and 1,076 000 bales in 1921. The Indian crop in 1923 24, in spite of an increased area of 6 per cent was estimated at 5.074 000 bales, the same figure as in 1922 23, as against 4,485,000 bales in 1921 22

On May 11th lt had dropped to 14 18d had was just over 16 00d by the end of that month from 17 28d half way through June a gradual decline took place and on the 1st of Angust 13 40d the lowest point of the year was recorded From that date over 2d per lb was added before the beginning of September and nearly 3d more during the course of that month whilst in Novem ber the price wavraised another 4d from 17 73d to 21 72d A set back in early December reduced to 21 722 4 set beck in ewry 7000mber reduced the quotation to 18 584 but through bullish activities the month closed at 21 084 only 1d per lb less than the highest point of the year Prices then took a downward turn and reached 16 484 on 28th March 1924. The tern of prices in the Bombay market responded generally to the price movements of American cotton Broach cotton at Bombay was quoted at Ba S27 per candy (784 lbs) at the heginning of April, and with small fluctuations prices tended to weaken during the first few months of the year, the lowest quotations of the year Bz 444f being recorded In Angust, when monsoon prospects were good Prices then began to move upwards and there was a sharp rive by the end of November when the highest quotation Rs 715 was reached Subsequently prices fell and Rs 545 was the quotation on 28th March, 1924

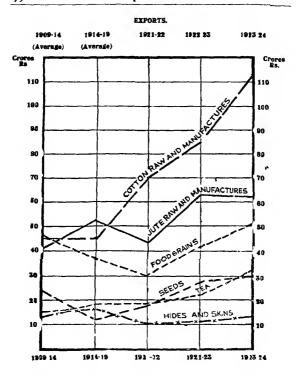

Indian mill consumption was reduced by two ullistrikes in Ahmedabad and Bombay respecti vely and by a period of poor demand for varn and cloth Export was brisk, the high prices of American cotton leading to an increased demand American cotton leading to an increased demand for the cheaper Indian product Export from India during the year rose to 4,764,000 hales as compared with 3,863,000 hales in 1921 22 The value, on account of the Ligh range on prices rose by 39 per cent from Re 71 crores to Re 98 crores and represented 28 per cent of the gran total value of 41 Indian merchandise capported during the year, as compared with 24 per cent | 1250,000 tons to 1,470,000 tons, in the value in the preceding year. Stocks of nusoid cotton of the exports showed s fall of one per cent from 18 Bornhay on 31st August 1923 were only Es 65 correct to Es 62 correct. The following 367,000 bales as compared to 985 000 in the attachment shows the quagitities exported proceding year (on 31st August, 1924, stocks) during 1913 14 and the last three years—

and 1,700,000 bases or sw per cent, in 1ws1 as., Cotten grars — The production of yarn in the Indian mills during the year was the low set on millson be as compared with 70c millson he in 1922 2x, 693 millson ibs in 1921-1922, and 683 millson ibs in 1931-18 In the early part of the year Indian yarns found dismelves numble to compete with the cheaper Japaness yarns and the resulting fall in demand led to an accumulation of stocks The disastrons earthquake in Japan in September was the direct cause of a brisker demand which had the effect of a considerable reduction in stocks and a temporary rise in prices. Therefore owing to the abnormal rise in the price of raw oction business became difficult and trade at the end of the year was in a depressed state. The mill strikes at Bombay and Ahmedabad in January February, were not unmixed evils, as they enabled mill owners to clear their stocks Demand however was elack and there was no improvement in prices

Cotten Piece goods —The previous year's depression in the Indian cotton mill industry continued through the first half of the year under review Prices were reduced but in the absence of demand stocks still accumulated There was a short-lived hut valuable spurt in clearances during November and the first balf of December which helped the mills to clear stocks and to put through a certain number of forward contracts Thereafter, as in the case of imported goods, prices rose owing to the great increase in the cost of the raw material, and demand fell away There is little direct competition between Manchester goods and Indian goods, but competi tion of Japanese piece-goods with the latter is sovere And it is significant that in 1923 24 imports from Japan reached the high figure of 123 million yards as compared with 108 million yards in 1922-23 and 90 million yards in 1921-22 The earthquake at the end of September gave The earthquage at the end of september gave a temporary set-back to Japanese supplies, and this was a factor which assisted the strengthening of demand for Indian goods from the end of October onwards. But the set-back was only temporary, as the Japanese outton milk had not been working full time and the reduction

had not been working full time and the reduction in spindings was partly offers at once by an incre aso in working bours of 1932 at a spin aboved in increase in weight, but this was accompanied by a slight decreas-in value. The total weight of raw and manufac-tured jute shipped increased by 12; per cent from 1250,000 tons, int the value of the exports showed a fall of one per cent from

	1918-14	1921 22	1929-23	1923-24
Jute (in thousand tons) Bags (in millions) Cloth (in million yards)	768 369 1,061	468 387 1,121	578 844 1,954	414 1,349

Baw jute showed an increase in quantity of was estimated at 275 million lbs. in 1923, as 14 per cent over 1922 23 but the figures were compared with 312 million lbs in 1923 and 274 still it spercent below those of 1913 13 But its million lbs in 1921 Assam contributed 63 per satisfactory to note that the number of bass and the yardage of cloth exported were both and the presence of the contributed for the state of the total Morthers and the yardage of cloth exported were both and decreating assemple per cent and Southers the preceding year or the pre war year.

Tea -The total production of tea in India | the past 18 years -

It will be observed from the above statements that the bulk of India a production is exported abroad but local consumption is also reported to be steadily increasing

During the last three years as Compared with Averages of the pre-war and war periods (Private and Government)

Peedgrains and Flour —In 1923-24, the and 20 per cent in value The detailed expert of goodgrains and fidur amounted to during the last three years as compared with the last three years as compared with the last three years as compared with the last three years are didn't in the following table —

	Pre-war average	1921-22	1922-23	1928-24
	Tona (000)	Tons (000	Tons( 000)	Tons (000
Rice not in the busk	2,398 42	1,366 89	2,068 37	2,177 80
Wheat ,, flour Pulse Barloy	1,808 55 291 227	81 64 80 10	220 50 147 16	688 67 276 169
Jowar and bajra Maiso Other sorts	41 49	6 2 5	16 29 1	16 87 1
TOTAL TORS (000)	4,411	1,653	2,598	8,429
VALUE Rs (lakhs)	4,581	2,999	4,248	5,087

The important crops are rice and wheat Sixty-four per cent of the total quantity of grain, pulse and four exported consisted of rice, 20 per cent wheat and wheat-four, 8 per cent pulse including beans, grain, lentils, etc., and 5 per cent berley

Wheat — Wheat is a cold-weather crop and consequently any year's exports are principally of the previous year's crop The casp of 1922-23 was estimated at pearly 10 million tons on an area of 804 million seres and showed a small increase over the estimated production (9.8 million tons) of 1921 22. The following table shows the figures of production and exports of wheat in the last four years and the pre-war year 1918-14 -

Total production of wheat and total exports by set to foreign countries

	Production	Exports.
018-14 020 21 021-02 028-28 028-24	Tona (1,000) 8,867 6,706 9,850 9,952 9,754	Tons (1,000) 1,202 288 81 220 638

Two expellent wheat-harvests in aucoession had filled local granaries and there was couse used allered total granaries and there was could a questly a fair surplus for export. Shipments increased markedly from \$20,000 tons valued at Rs 5,41 lakhs to 688,000 tons valued at Rs 9,11 lakhs in 1927-24.

four being cotton, jute, raw and manufac-tured, foodgrains and tea. The total exports showed an increase of nearly 7 per cent showed an increase of nearly 7 per coat in quantity and 9 per cent in value and amounted to 1,255,000 tons, valued at Rs 29,82 https: as compared with 1,17,000 tons and Rs 27,85 lakhs in 1922 23. Ninoty five per cent, of the total quantity of oblectde exported consisted of lineed (29 4 per cent), rapseed (28 8 per cent, groundants (20 per cent), octoor seed, 12 per cent, and castor seed (6 8 per cent, of the oblect of per cent, octoor seed of the oblect of per cent, octoor seed of the oblect of per cent, octoor seed oversite of the oblect of per cent, octoor seed marketed in the following year

Hides and Skins -The exports of raw his mings and Skins—The exports have and akins increased by 7 per cent in quastria and 21 per cent in value from 45,700 tons value at Rs 5,71 lakhs in 1922-22 to 48,900 tons value at Rs 6,93 lakhs in 1923-24. The chief Mann note was the increased exportation of raw l note was the moreased exportation of rew hake due to two nextors, stronger Continental darkand particularly from Germany and Haly, and, the reduction in the export duty. Of now halise Germany took 9,60,000 valued at B.s. vi, ladded and M.y. 4,60,000 valued at B.s. vi, ladded and M.y. 4,60,000 valued at B.s. vi, ladded and M.y. 4,60,000 valued at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi, ladded at B.s. vi quently a fair surplin for export failp-make increased markedly from 280,000 tons to valued at Ra 5,44 lakhs to 588,000 tons valued valued at Ra 5,44 lakhs to 588,000 tons valued at Ra 9,11 lakhi in 1927-24.

8 Officends.—Seeds ranked fifth in order on importance in Indic's export study, but he first tenned within the Empire, to an ad-importance in Indic's export study is the first tenned within the Empire, to an ad-

#### WIRELESS TELEGRAPHY.

At the commencement of the year there were all coast stations for communication with ships and twelve inland stations together with the stations in the Bay of Engal, maintained by the Department of Poots and Telegraphs in the latter part of 1921 and beginning in 1921 by the question of bringing to the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the commence of the

private purposes under license Owing to the necessity for curtaining all unproductive expendil ture, the send of 1922 saw the destinate postponement of the development of the linear scheme and consequently it is unlikely that any Feeter of the financial situation and the instruction stations will be erected in the near future

Progress Delayed —The Department of Posts and Telegraphs now keeps only the Coast stations fully open The Iniand stations have been piaced on a basis which enables their rainable plant to be kept in working order but they parform so services. This together with the parform on services are the cognitive with the progress of the control of the progress of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the control of the contro small or entirely unproductive stations will result in considerable saving, a portion of which it is proposed to use annually to bring the stations up to date Therefore no improvement in the general radio service will be apparent for some time. In the meanwhile the high for some time. In the meanwhile the high speed service between Rangoon and Madras is nearing completion which should considerably improve the telegraph facilities between these places and prove remunerative. The improvement of critique stations referred to consists in putting immodern radio plant and providing that the stations are operated from the local that the stations are operated from the local telegraph offices. If a pair of stations can be so treated each year the main links of the Inland service should be complete in about five years

Long Distance —A great deal of valuable experimental work has been carried valuable experimental work has been carried oot and considerable improvement in working, especially as regards long distance reception and the reduction of stmospheric effects has resulted An experimental service from England was given a good trial during the year and this has now developed into a regular service for a short period sech day at 7% of the existing cable rates. From this we should obtain experiment with the work of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the content of the cont Imperial station is being designed

Very little progress has been made as regards the Indian station for the Imperial scheme, but signs are not weating that a long delayed decision will shortly be arrived at The position of India in respect to other radio stations in the world demands the most efficient station if all the traffic which will be on offer is to be accepted and dealt with on a commercial basis.

Broadcasting —Proposals to permit Broadcasting by private enterprise have been worked caging by private cheepings have been worked out and are now only awaiting the settlement of some minor details before being formally presented to Government. There is no question that india will offer very great possibilities to a properly organised bloadcasting service not only for entervalument and educational purposes but also for business purposes, i.s., broadcasting quotations, business news, etc

It was intended to proceed with the erection of a Government radio school at Karachi to take

of Government and private students mu-periorce be continued in the temporary premise-During the year the school has been fairly well occupied with training students for the Depart ment, Army and also a few from Indian States

The question of the organisation of State owned radio sets in the States in India has been considered and will probably be settled this year. In the meanwhile some of the States are pur chasing small sets, mostly for telephony

Private Agency —A large number of licenses have been granted to private persons in British India for the erection of sets and this British incle for the erection or sets and this form of radio work should steadily developmore especially as the manufacture and scale of apparatus in India by private enterprise is it contemplation. There is no doubt that the majority of parts for small radio sets could be more cheaply manufactured in this country than they can be imported and further such a industry would find the right kind of skiller labour already in India

Prospects --Finally, the development o radio by Government has been almost entirel restricted for the reasons given above, but the development by private enterprise has been encouraged and it is to this source that Indi must look in the immediate future for interns radio communication. There are three mos promising lines of development, vis -

(a) Brection of small sets either for speech or morse in districts where no laud lines exist and to link such districts with the existing landlines In this connection it may be remarked that modern small radio sets are capable of using either morse or speech at will and if used to appeach can be operated by the ordinary desi-telephone instrument in daily use all over India

#### (b) Broadcasting

(c) The use of radio as a substitue for land line to form the trunk telephone route between two ofties which already have telephone facilities

All of these will open up a new industry which if properly festered would very soon extent its sales outsides the limits of India

In the meanwhile a great deal of work ha In the meanwhile a great deal of work in been done both arregards legislature and general organization to clear the ground, with the resul-that Government is in the position to exercise the completest control over radio development while at the same time being able, became of it powers, to fester gives enterprise to the fullo possible extensi.

## The Indian National Congress.

For a complete history of the movement re-presented by the Indian National Congress the resider is referred to earlier editions of The Indian Year Book. The Congress was founded in 1885 by Mr Alian Octavian Rume, a retired member of the Indian Civil Service, and it has the large easier in Bombey at Christman to held the large easier in Bombey at Christman of the year, the fundamental principles of the Congress were taid down to be -

Firstly, the fusion into one national whole of all the different aid discordant elements that constitute the population of

Secondly, the gradual regeneration, along all lines, mental, moral, social and poli-tical of the nation thus evolved, and

Thirdly the consolidation of union between England and India by securing the mod! fication of such of the conditions as may be unjust or injurious to the latter country

With these objects in view the Congress pur With these objects in view the Congress pursued an uneventrul career until 1907. It un doubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political gravances, and in providing a training ground for Indian politicians. But in 1907 the Extransita, chiefly of the Decean and the Central Provinces, who had for some time chaled under the control of the other control of the other consention. the control of the older generation, succeeded

in wrecking the Surat session of the Congress and produced a split which had long been seen to be imminent. The senior members of the Congress therefore re-crystallised its crued a definite terms. They laid down that—

"The objects of the Indian Nations Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self governing mambers of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, foreigning public spirit and developing and organising the intellectual moral economic and industrial resources of the country.

For some years following 1907 efforts were made to heal the split and these were without avail until 1916 when a re united Congress metast Lucknow under the preddecey of Babu Ambica Charan Musumdar of Faridpur in Rengal. But the union then effected was purely superfield, the difference between the Moderates and the Exthe distribute betwee the Moderates and the Ex-tremists was fundamental, the Extremists cap-tured the machinery of the Congress and from the period of the special session held at Oskimita in September 1930 the Congress passed entirely under the domination of Mr. Gandhi.

#### THE NON-CO-OPERATION MOVEMENT

It was in 1920 that if Gandhi, who bad only talling a non-violent atmosphere under exciting in the previous year unsuccessfully started his conditions. He suspended his proposed civil Passive Resistance-traggies as a protest squarts the Rowlatt Act, conceived his idea of non experience of the proposed of the protest against the British policy towards to be a protest against the British policy towards to be a protest against the British policy towards to be a protest against the British policy towards the formula unity and knaddar Soon after, was later on added to its first object, namely the punishment of officials in the Funish Matrial solutioned to official proposed the protest of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of the start of th was later on added to its first object, namely the punishment of officials in the Punish Martial IAw regime and the securing of Swars for India. Mr Gandhi and Mr Shaukat Al were able in 1920 to get the Calcutta Special Congress (See 1928 and 1924 editions) India no recommend the security of Swars for India mr Gandhi and Mr Shaukat Al were able in 1920 to get the Calcutta Special Congress (See 1928 and 1924 editions) India non-volent non-volent non-volent mono-volent mon

sentenced to undergo imprisonment for six years (See 1923 and 1924 editions)

#### THE CONGRESS IN 1924.

of a serious form in the xerowin Jall was in Bengal under this organization and the control of Bondon Jim Regulation III or 1818 they effected several modiately, the No-Changers revived their arrests including a few Swarajists Mr C B hupes of fighting the Swarajists at no finish in Das at once set the cry that the Government the meanwhile the Swarajists in the Assembly in Bengal fiching the growing power of the and in the C P and Bengal provincial commiss, warnisks got the ordinance promingated only minaged to get the respective hundreds review of the suppress the Swarajist movement. It This precoded by their related to sate of since an interest in suppress in Surginist movement with the This, precoded by their related to sate of since in the correct speak to the their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their their isvited Messri C. R. Das and Motilal Nchru | Mr. Gaudhi agreed to sus send the non-co opera the Swarajist leaders to discuss the political itou novement and to recognise the Swarajists situation Political India was in a total head as the cordited representatives of the Congress and was induling in speculations of all sorts of legislative bodies while in ritina the over the Conneil entry question. After nearity swarajists agreed to his spinning transhise its weeks discussion in May 1924 Mr (andahl) which liad down; Jovoly sards of hand spin yarm in a statement to the Pressedefinitely dissociated; every manth as the subscription to Congress himself from the Council Programme and the membrahy maist aid the four amons a vera as Starajist obstructive policy while the Veranijat decided iy it has jur congress loaders in a separate statement defended their loaders in a separate statement defended their policy Public controversy again centred round the Osnod question. #### The Bongal Ordinance

and wrote in his paper to the effect that people the warring olements in the country

The Congress had an eventtni career in 1924 | mulgated an Ordinance in order to check the fir, Gandhi, who had an attack of appendicitis farces of the growing revolutionary movement of a serious form in the Yerowda Jali was in Bengal Under this Ordinance and under refersed by the Government of Bombay Im- | Beguistion III or 1818 they effected several

#### Bombay Conference

This (out rence was succeeded by another at Bombay in November 1924 Its object was to cure a united platform of all parties once more After the Anmedabad meeting, Mr t-undit under the Congress flag The Conference after realised the serious differences in the country a prolonged discussion passed a resolution cona prolonged discussion passed a resolution con-demning the Bengal Ordinance, but would not who were the first to vote with him were the last of the principle subject namely, the securing to fullow him. The serious state of communal of unity of all parties the Conference controlled. characterise it as directed against the Swarnlists. to fullow him. In serious parts of india added to itself by appointing a countries to consense constant of the full added to itself by appointing a countrie of more than the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the full and the Mr Nchiu and a host of others representing dif In the meanwhile, the Government of Beugal ferent parties took part in the Conference with the manction of the Government of Beugal ferent parties took part in the Conference with the manction of the Government pro besides Mr Oandb

#### THE BELGAUM CONGRESS.

The Congress which met at Belganin during, Congress at his instance endorsed the Bengal Christmas weak under Mr Gandhi s presidency | Part and changed its franchise in 2 000 yards was a tame sfair. It was the only Congress, lot charks yarn every month as above referred however, which concluded within 24 hours of its opening. Just prior to the Congress meeting its of the non-openation movement, been Mr Gandhi succeeded in cultating the No-Theorem of the non-openation movement, been Mr Gandhi succeeded in the standard of the non-openation movement, been far the congress of the congress as a designed it and strend the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the congress of the Programed by the Congress DRE are samen less shed Nehrin in the year mass it was successful and the strength of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State of the State

## The National Liberal Federation.

The definite breach between the moderate and extremist elements in the Congress at its precial session in Bombay in August 1918 (edde dispension in Bombay in August 1918 (edde dispension in Bombay in August 1918) (edde dispension in Bombay in August 1918) (edde dispension in Bombay in 1918, 318 Surendranath Bauerjee headers in held its first assuou in Bombay in 1918, 318 Surendranath Bauerjee however, was the reply given by the President of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of the National Congress of t B P Paranippe, ex Minister of Education to the Government of Bombay Dr Paranippe s pre sidential address was an carnest plea for the con tinnance of the methods of Mehta and Gokhale in their political pursuits The President condemned the non-co-operation movement and expressed the opinion that unity between Liberals and the Gandhi Party was impossible of achievement in view of the fundamental differences in outlook

The Conference passed about twenty resolutions tonching a variety of subjecte. The resolution placing on record Mr Montegus services to india and expressing the sorrow of the Con ference at his premature death took precedence

A resolution demanded complete provincial antonomy and the introduction of partial respon sibility in the Central Government

The financial condition of provincial Govern menta formed the subject of another resolution, which was in corporated with another condemn ing the Lee Commission's recommendations the acceptance of which by Ris Majesty s Govern ment it characterised as 'ntter disregard of Indian opinion

On the lines of the All Parties Conference resolution, the Federation condemned the Bengal Ordinance

Subjects Committee of the Federation to the invitation of Mr Gadhi for the unity of all parties Though the subject the unity of all parties Though the subject resolution itself clearly set forth the conditions under which alone the Liberals were ready to coalese with the Congressmen The resolution stated that the Liberal Party, in view of strong anvictions they hold as to what is in the best Interests of Indias political and national progress, could only join the Congress if that body definitely declares that it stands for Dominion Self Government to be attained by constitutional methods

The Liberal Party are for the abandonment of The Liboral Party are for the abandonment of the non co-operation movement and of all the projects of mass civil disobedience. They can not content to the agreement reached between Mr Gandhi on one side and Mr Das and Mr Nebru on the other that the Swaral Party members of the Logislative Assembly and Councils should be the accredited spokeness and representatives of the Congress in the Legislatures, nor can they agree to the Congress decisions on charkha varn franchise and khaddar

Hasdar II as is evident, the Congress does not agree to these proposals, the Liberal Party will propose as the nazt best thing that there should be co-operation between the different political parties upon those matters in which there is agreement.
The Lihersi members of the committee of the All Parties Conference are to advocate the views steted above.

## The Moslem League.

The All India Moslem League came into Government, the protection of political and being in 1906 ont of the universal desire among other rights of Mussalmans and to place their

## The Khilafat Committee

The Central Khilafat Committee owed its obtaining of Swars and the 'righting of the origin to the reticence shown by the All India | Punjab wrongs'' Congress Committee in 1920 to the question of the Khilafat and Non co-operation Messrs of the khilafat and Non co-operation Messry Gandhi and Shautak Ali started this organi attom with the second of the started the organical state of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the secon noted prominent indian publicate supported the first state of the state of the the indian Meshame being description of the Indian Meshame being description of the Indian Meshame being description of the Indian Meshame being description of the Indian India at light to steps the Highlan to help them is accurring their rights from rates, the Madras Khilaits Conference being the chairmannahip of Mr Shaukat All Meshame the chairmannahip of Mr Shaukat All Meshame the chairmannahip of Mr Shaukat All Meshame the comparation and appeared to the country for highest and appeared to the country for highest made at the disposal, was able to draft in high state of the Chairmanna was accepted by that the large funds at the disposal, was able to draft in the Stack, as or oritingors and walcomed the properties of the Chairmanna was accepted by that body levels and the support of the support of Ring Single Spirit into policies added to it, namely the resolutions passed by the Congress in 1920 when the non-co-oper-side profit of the control of the Spirit and the support of the support of the support of the support of the support of the support of the resolutions of the support of the support of the resolutions of the support of the resolutions of the support of the resolutions of the support of the resolutions of the support of the resolutions of the support of the resolutions of the support of the resolutions of the support of the resolutions of the support of the resolutions passed by the Congress.

With the deposition of the Khalifa last year by the Kemaliste and the revival of the Moslem League, the Committee's activities have been considerably restricted Recently the Committee sent a deputation to Neid to intervene and settle the dispute between the warring elements. Though the Government of India were willing to permit a deputation of the Com mittee to Turkey, the Turkish Government did not quite like an idea which had consequently

## The Indian Legislature.

The Indian Logisisture was called together times times during 1924, the first meeting being in his annual statement to the Assembly and in Delhi during February and March, the second in Hom Mr. McWatter, Finance Secretary, in Shina in May June and the third in Simla in I almalian locally presenting the Budget in the in September The Delhi meeting was the Council of State, showed that the past year annual Budget Seedon, the May meeting was the Council of State, showed that the past year annual Budget Seedon, the May meeting was had been one of steady, though sometimes specially summoned for the consideration and dischit, trade, favourable to India on the passage of an official Steel Industry (Protection) balance "The volume of both imperts and Bill and that of September was the manial antimum apports continued to aryand and thage was meeting. An innovation was made in arranging every prospect that the value balance of the date for the condition of the years Sealons, tracel in lavour of India would almost reach as Sill and that of september was the tental attrium-meeting. An innovation was made in straighing the date for the conclusion of the year s feesion, groperly so-called Hitterio, the Legislative Seation has been terminated by prorogation at the end of the Budget meeting, so that it has been co-terminous with the official financial, year. This involved the State opening of the year. This involved the state opening to met new Session when the Legislature again met in Simia. But Simia is not so convenient for the purpose at Delhi. It does not equally lend itself to a display of ceremonial suitable to the occasion. His Excellency the Vicerry, there fore, decided that in 1924 and in future proroga. fore, declared that in 1924 and in turner protoga-tion should take place at the end of the artium meeting in Simia, so that the Delhi Spring meeting should be opened with formality, its final sitting being merely adjourned

nasi sitting being merosy adjourned. The change produced a curious effect in sonaeoskon with the Presidentahip of the Legislavive Assembly The Constitution provides that for the first four years under the Constitution and 1019 the President shall be nobmated by the Governor-General and that thereafter the President shall be elected by the Hose, but President shall be elected by the Hose, but the fourth year of its life expires the nominated by the Hose of the life expires the nominated by the Hose of the senion. The four years appear on February 1935. The speciation hitherto has been that four Frederick Whyte, have the procession as the end of the procession of the senior that the procession is the end of the procession of the senior procession as the end of the procession of the senior procession as the end of the procession of the senior procession as the end of the procession of the senior procession as the end of the senior procession will be the senior procession will be the senior procession will be the procession of the end of the contract of the senior procession will be the senior procession will be the senior procession of the end of the contract of the senior procession will be the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior procession of the senior pr ments will mean lit Frederick's retention of incentioning of 1928 Unofficial members of the beginning of 1928 Unofficial members of the beginning of 1928 Unofficial Breellency hot to summon the Dath's Section of 1925 until 19th February, so that the fourth year of the Constitution will expire before the Assembly meets This House could thereupon as once proceed to elect its own President the International Confession of the University of the late of the Constitution of Duringer for surfmission to the International Confession of the Confession of the late of the Confession of Duringer for surfmission to the Legislature usually makes the summoning the Degenerore totally makes the summoning of a meeting before the end of January imperative and it is remi-officially announced that the legislature will be called together about 19th January 1925 How the matter will revelope cannot at the time of writing be forecast.

#### The Annual Budget.

The Amenua Students is usually presented in larky of Post Office Cash Certificates. A prominent feature of the Finance Member's of last March Compilation have not used the students of the students have been under the state the state the state the state the state the state the state the state that the state that the state transpose day is undestrable and in 1874, of the state transpose, it was hid before both House as had been met by various marched but with the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state o

record "

On the revenue side of the Budget Customs receipts showed at 40 48 crores, against an were 14 crores under certification where 14 crores under cestimate, but working expenses were 1 408 crores down, so that act receipts were 58 lakeh solten than the estimate Optum revenue was 38 lakeh np on the estimate Optum revenue was 38 lakeh np on the estimate Driverset, Currency and Minocilancous there was a construction of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract of the contract an improvement or 148 lakes on the Senissates, a largely owing to high prices for abort money in London, and mader Salt, despite the doubling of the Salt Duty, the total revenue was 84 everse, or 8 crores less than the estimate, this result, the Finance Hamber explained being due not to smaller consumption (an autrante that was challenged) but for mannature of the consumption of the consumption (and the consumption that was challenged) but for mannature that was challenged) but for mannature of the consumption (and the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the consumption of the c entrance that was challenged) but to manneuvres in the trade following, first, anticipation of the raising of the duty and, second, anticipation of its reduction by the Irgislature on the present Budget.

On the expenditure side, the Budget showed a saving of 74 lakin owing to the favoursable rate of the year's uppe loan, a saving of 80 lakin under sinking fund and a non-recurrent receipt of 41 lakin from the depocal of emporary milliary lines Adjustments for those and establish details left a defect of 88 lakha

Further, there was a windfall of about 31 FUTTHER, LINCE WER & WHITEH IN ADJUST AS millions sterling, profits from the control of enemy ships in the war The exact amount was only settled in 1923-84, in negotiation with His Majesty's Government. The Finance Member proposed to credit 2,44 lakks of this to the current year and to reserve the rest for special expenditure in 1924-25

The Budget showed the general financial position to be better than a year previously. The floating debt in the hands of the public in the form of Treasury Bills had been reduced from 25 croces to about 2 croces. A large re-From 22 stores to about 2 ordes A large re-serve had been bulk np during the year against steeling requirements. There appeared no need for a sterling lean, nor for a higger regree bean than twenty crores. A striking feature of the financial situation was the continued purps larky of Post Office Cash Certificates.

Railway stores for State lines worked by companies had been beld by the Bombay High Court to be State stores and therefore not ilable Court to be state stores and toerefore not the late to import duty. An appeal had gone to the late to import duty. An appeal had gone to the reference to the railway companies and would lore a source to the railway companies and would lore a source of income in future It was proposed to introduce legislation to make all Gov roment Stores subject to Customs Duty. Provincial Government being refunded through a special assignment whatever they thus had to pay for their own imports

Exchange for the enging year, for Government remittances, the Budget took at 1 4 f

Military expenditure for 1924 25 would, with this basis of exchange calculation, amount to 58% crores, i.e., 63 lakes less than the figure assumed by the Retrenchment Committee 3 19 crores less than the original Budget figure for 1923-24 and 14 crores less than the revised catimate

For 1924-25 the total expenditure of Government, with exchange at this rate, and eliminating rallway transactions, as legislation to separate railway frameworking, as registrion to separate railway finance from general finance was pending, was shown in the new estimates at 104 57 crores. Revenue on the existing basis of taxation was estimated at 107 93 crores, including a contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution of the contribution tion of 4 27 from railways, which were expected to pay this to general revennes after the introduc tion of the financial separation scheme Customs were taken at 45 03 crores, including payments on Government stores, income tax at 18 22 crores, a reduction of 85 lakes owing to depression in the Bombay cotton mill industry

Various methods were suggested for dealing with the surplus of 3 86 crores thus anticipated Government proposed some minor reductions in customs and excise duties, including the reduction of the excise duty on motor spirit to 41 annas per gallon The Finance Member reminded the House that so long as the Provin ofal Contributions remained as a present they interposed 9 crores of obligations between the Central Government and general reduction of taxation On the other hand, there was or taxation on the other hand, there was gener'd desire for the reduction of the Sait Tax, which was raised from Rs 14-0 to Rs 28-0 a manud in the preceding Budget To reduce the Sait Tax to Rs 2 per manud would demand 182 crores ont of the amplies

and avoidance every year for five years, after which period the working of the arrangement again give us a small strokes II, however, might be re-examined and continued or revited were to reduce the sait tax to Es 1-40-9 at twas also aunounced that Government were mand, we have an initial deficiency of \$15 considering the organisation of a Provincial forest to face in 1933-86 The receipts in Loan Fund for similarly placing the manage ment of horowing by the Provincial Government desires would at once replenish their depleted on a scientific besis perily because we give the dealers six months' credit. For the first five months of 1924-25 we shall in any case be collecting some revenue at the rate of Rs 2-8-0 a maund A reduction to Rs 1 4 0 in the 1924-25 Budget would not therefore have its full effect on our figures till 1926 26 "

> Government left the choice between a Rs 2 dovernment left the choice between a Bs 2 and a Bs 1 4-0 Sait Tax to the Assembly, but pointed out that if we reduce the Sait Tax to Bs 1 4-0 Vast Tax the proclaiming to the Provinces that in thor in 1924 25 nor in 1925-25 can we offer them any certain prospect of relief We are at the same time postposing indefinitely the date at which we can forece any reasonable possibility of reducing other concross taxes or Increasing our expenditure on beneficial services "

Government therefore proposed to dispose of the surplus by applying 1 82 crores to reduction of Sait Tax to Bs 2 and 1 50 crores to reduction of Provincia! Contributions

The two days' general debate with which the discussion of the Budget began and indeed the whole discussion lasting several days, produced practically no criticism of the Govern ment proposals, or of Government financial etwardahip, on merits, and were completely overshadowed by the efforts of the Swarajists to utilise the occasion to advance their aim to overtnrn the Constitution The Swarajist leader early in the session referred to the accusa tion that his party were wreckers and destroyers and replied to it that yes, they were out to destroy things of evil and rightly or wrongly they regarded the recent political reforms as a thing of evil

The political combat began in the earliest ctages of the session The recent general election had resulted in Swarajists entering the Assembly to the number of about 45, linetesd of staying ontside as they formerly did Their leader in the House was Fundit Motilal Nehru and under him an aggressive member of the party and leader of the left wing of it was Mr V J Patel Other new members of the House who either belonged to the party or use mouse wan either belonged to the party or voted with them on ortical divisions were Sir Purshotamdas Thakurdas, representing the Bombay Indian Merchante' Chamber Mr Mahomed All Jinnah, Mr NO Kelkar, Lala Hans Rai, and Pundit Madan Mohan Malaviya would domaid 18 crores ont of the arriplus at the onset of the session the House contained and to reduce it to its former level of Es 1 4-0 a large number of "Independent" members, bould require 3 82 crores, or practically the behalf of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of t

manship of Mr Jinnah Their aim was to managing of Mr Jiniah Their all was to gain, power through organisation and their leanings were towards the extremists rather than towards the Constitutional party This situation specifity resulted in the development of a so-called Nationalist party, which consisted of the Swarylists and Mr Jiniah s Independents, and existed to enable the two component parties to work together within the House Every member of it had to sign terms of membership These bound members to vote is the House according to the decisions of a two thirds majority of the Nationalist party. The effect was to place the Independent members votca and influence at the disposal of the Swaraiista

HE the Vicercy opened the session in Sialo on 31st January In his opening address he reviowed cheerfully the progress of ovente in which India is interested outside India and, turning to Home affairs, specially dwelt upon the political situation and in particular the revolutionary movement in Bengal Ot the latter, he said, of its conspiracios to assussinate. public servants and of its association with in England and the arrive of a Labour Ministry in office placed upon his freedom But he pointed out that each of the recent Governments ponned out that each of the recent Governments in England, of whatever political complexion, had accepted the Reforms in Iadia se the rock foundation of Britash policy in India—"The cardinal policy of the reforms remains the same for all it is the policy of the British mition and not of any party of the Printing and the same of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the printing of the those reforms I have seen the first courses of the edifice of parliamentary institutions and traditions and I stand pledged to carry the future must largely depend upon the people of India and the actions of the Legislature

'There is now a spirit in Indis, if I am to credit all I read, which is bent upon destruction credit all I read, which is bent upon destruction of the Edorms unless it immediately statins that which it is impossible for any British that which it is impossible for any British combine action of the programment. We have provided the constitution of the property of the constitution of the effected by legitlmust and pescent unethods save with the assent of the British Parliament, that is, the British Parliament, that is, the British people I gather that there is a disposition the reforms and thus cause Parliament to act Moham Malaviya were among the most promit contrary to their deafer and better judgment to the British Parliament would difference between us is mainly as to whether emphatically repudiate and reject them Associated the price of the price of the price of the promit of the price of the promit of the price of the promit of the price of the promit of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of the price of t

#### Constitution Makers

First place on the first day for unofficial resolutions was won in the ballot by Diwan Bahadur T Rangschariar, Deputy President of the House, and a prominent member of the Nationalist party, for a resolution running, "This Assembly recommends to the Governor-"In Assembly recommends to the Governor-General in Council that he be pleased to take at a very early date the necessary staps (including if necessary procuring the appoint-ment of a Royal Commission) for revising the ment of a Moyal Commission) for feviling the Government of India Act so as to secure for India a full self governing Dominion status within the British Empire and Provincial Autonomy in the Provinces' The Hon Sir Malcolm Halley, Home Member, opposing the motion, showed that it did not accord with the Government of India Act in so far as immediate grant of Dominion status was different from the goal of responsible govern ment as laid down in the Act, and that this aew demand was inconsistent with the com paratively recent pronouncement of leading members on the unofficial side of the House, while it also a pudlated the specific provision communant agencies outside India Government and realisation of the lettel should be by succra sinker designs to advasce on their way to results that no process of law can reterr to the difficulties of the situation of the succession of the succession of the succession of the succession of the situation of which the political stantion. His Excellency pointed to the handicap which the change of Government in England not the arrival of a Labour Minter of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the succession of the su that realisation of the ideal should be by succes or the indian states, communal panouses, the protection of minorities and the problem of defence But, he said, Government were propared to institute an investigation of com-plaints against the working of the reforms scheme in practice, to assess the causes and to consider remedies 'We claim that this must precede any general inquiry into the policy and scheme of the Act, or general advance within the Act itself."

Pundit Motiisi Nehru moved the following amendment to the motion. That the following be substituted for the original resolution. This Assembly recommends to the Governor General in Councilto take steps to have the Government of India Act revised with a view to establish (ull responsible government in Iadia and for the said purpose (a) to summon at an early date a representative round table conference to recommend with dne regard to the protection of the rights and interests of important minorities the scheme of a constitution for India and (b) after deselving the central Legislature to place the said scheme for approval before n newly elected Indiaa Legislature for its approval and submit the same to the British Parliament to be embodled in a Statute" The Pundit condemned the present Government of Iadia Act from preamble to end He offered Govern Act from proamble to end He offered Govern ment the co-operation of his party if Govern-ment would give them what they wanted to the saturation and the saturation and the saturation is saturated as the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation and the saturation an lines on which they were willing for the inquiry to proceed

In the end the Swarziist amendment was carried on a division by 76 votes to 48

The fight was continued over the Budget, when the President said that in deference to the wishes of a large number of members he would on the first demand for appropriation of innds allow the discussion to go beyond the strict limits of the vote Pundit Motilal Nehru proceeded to move the rejection of the first demand, which was for the necessary grant for the Customs Department, and declared for the day

The Independent members of the Nationality party were much chagrined that by virtue of their signature of the party conditions Fundit Mottial Nebru had been able to carry them into his lobby for the rejection of several appropriations when they had only intended to throw out the first as a matter of protest When, therefore, the naxt day's business began the Swarnjust loader stated that having "established did not shink it necessary to continue the previous day's procedure Mr Jinnah, agreeing with this, declared that his triends had no intention of joining in elvil disobedience, or revolution, or non-payment of taxes. Never The Independent members of the Nationalist one to involution of joining in our descriptions or revolution, or non-payment of taxes. Never theless when, after the remaining appropriations had been passed in the absence of the Swarzists and almost without amendment, the Finance Bill was presented and the Finance Bill was presented and the Finance Member mound for the consideration Purch Medical Mil was presented and the lineace Member moved for its consideration Pundit Madan Mohan Malaviya in a speech lasting nearly three hi ms urged the House to reject the motion. Sir Malcolm Halley powerfully enjoined the House not to commit such an act

from Madras, strongly condemned the omission of the provision for the reduction of Provincial or the provision for the reduction of Provincial Contributions It was finally passed there without amendment and without a division It then became law on endorsement by the Governor-General

#### Constitutional Balance

The attitude of the Swarajists and their The attitude of the Namanana and the friends during the rest of the Dalhi seysion while in the main dictated by their aim to wrest power from the Executive Government and take Dossession of it for the Assembly The first possession of it for the Assembly The first move in this direction was made at the expanse for the Customs Department, and declared that he did so on the general ground of refusing for votes money because of the general greatest provincial autonomy, the House carrying a to votes money because of the general greatest motion recommending that all important ques against the entire administration. After a top the provincial success of the general greatest provincial greatest and the greatest of the foreign of the greatest of the foreign of the greatest of the foreign of the greatest of the foreign of the greatest of the foreign of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest of the greatest o Ramachandra Rao moved a recommendation that in all long term contracts for the working of State railways or conveyance of mails a condition should be inserted making the contract dependent for validity noon a resolution by the Indian Legislature The Hon Mr. Chat-terles, Member for Industries and Labour, pointed out that this was an attempt to make the Executive responsible to the Legislature in a way that had no parallel except in England, where it existed for historical reasons and had where R existed for historical reasons and had been orthicated on the ground of economy. The been of the second of economy. The second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the second of the the full powers of the Government of India in the suberce of work and not an advisory body. The House accordingly adopted a unofficial amendment to the resolution making it a recom-mentation for the appointment of an advisory committee of unofficials.

enjoised the House not to commit such an act of irresponsibility. The Swardist leader registed strongly exporting Pandis Maistrys and on a division consideration of the Bill was refused by go votes to 7.

The Constitution enables the Governor-General aboved the Rouse that if Government the House Maintenance of the Bill to the pan over the place of the Bill to the place of the Bill to the place of the Bill to the Bill to the place of the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to the Bill to t

steps that ignored the rights of other communities or ran counter to good citizenship. The the or ran counter to good citizenship. The to inquire into incidence of taxation The Houseadopted an amended resolution containing sholltion of the Cotton Excise Duty was the a general recommendation for a community almost of the Cotton Excess Duty was the a general recommendation for a communitie almost of another resolution but discussion of it of inquiry consisting of official and nnofficial was despite the opposition of Government, members Savier Kartar Singh the same adjourned after a speech by an official membed day moved for the Immediate succonditional pointing out that to sholish the Excise Duty release of Sardar Kharak Singh cent to jail sould deprive the handloom wave of the in connection with political activities lies light protection against mill competition that accused may had refused to d fend himself he now euroys. There was a long discussion before the court in winch he was summent | or store purchase polity and methods, and a or to appeal against his convector 11 | 18 | 18 | Inhabers of Commerce and recommending Basan then moved for the similar release of the institution of a system of rupe touches dealing that the convector by his III, and the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of the convector of t release of Sardar Kharak Singh sent to juli would deprive the handloom weaver of the in connection with political activities. The light protection against mill competition that establishment of his proposed parallel sovernme t could not be achieved by peaceful means ! coura not be additived by peaceful means? would, take to guorilla warfar, preaching kill them wherever you can and was now still high locates he had, been by a maghtrate found guilty of attempting to corrupt a warder. The motion was carruct liner followed a long debate on a motion by Mr. V.J. Patel for the removal of restrictions in the way of the the removal of restrictions in the way of the return of Mr B G Hornman to Ludia and this also was passed Mr Amarnath Dutt moved for the immediate repeal of Bongal Regulat ou III of 1818 to which was added by amondment a demand for the regal of the Criminal Law Amendment Act and other r pressive laws and regulations still on the statute book The Home Momber in resolutily opposing the motion defended it is is by Government of exceptional preventive less it ton quoting the Rowlatt Committee's findings as to the methods of revolutionary conspirators in India methods of revolutionary conspirators in India and arguing that there was no other remedy for this kind of crime Government must he said decline to repeal the powers they had because they could not feel that they had behind them a Legi lature willing to take the responsibility for special measures in case of need. The motion was carried by 68 Votes to 44

#### General Subjects

Mr Rangachariar moved recommendations that the Chief Justice of a High Court must be a barrister, advocate or pleader and that three fourths of the judges of a High Court should have similar qualifications, but on it being explained that this subject was under examination he withdrew his motion Mr Kahir-nd Din moved a resolution prescribing special representation of Moslems in the Legisla tures and Public Services hat as a result of

opposing the resultation in assured the House and passed dealt with the problem of Indian and the Sike late documents were not oversase with the Indian Colonics Committee opposed to the reforming elemant among the and with tariff protection for Indian-mined Sikes but in the name of the public at large were coal. An unofficial motion for an inquiry into bound to require the Sikhs to realise that their the economic conditions of the people drew reforms should be iffected otherwise than by from Government, an announcement that Government intended to appoint a committee a committee appointed to examine the terms of the proposed new arrangement

#### Government Bills.

The official legislative programme for the session was lighter than usual It was for the session was lighter than usual a was for the most part not of high general public interest and its principal measures concerned the improvement of the morality law to bring it linto line with recent conventions or resolutions of the International Convention for the suppres sion of the traffic in women and children

#### Protection of Steel

A session of the Indian I egislature specially called to consider legislation for the protection of the Indian Steel Industry on lines recommended by the In han lariff Board commenced in Shaha on 27th May 1924 No unometal bills or resolutions were included in the programme hat un addition to the Steel Industry (rotection) Bill Government included in it (I rotection) Bir Government Inclined in it the Indian (Specified Instruments) Stamp Bill the Iolian Soliters Litigation (Amandment) Illi b to d'which were finally passed by both Houses—and a resulution to give effect to a recommendation of the lariff Board for the ren wall of the Import duty on sulphar Tho publication of the Report of the Royal Com-mission on the Superior Civil Services in India in May created an unofficial demand for an opportunity to discuss an unofficial resolution on the subject and this Government conceded

The Hon Sir Charles Innes Member of Government for Commerce and Railways, Introduced on 27th May a Bill for the fostering and dovolopment of the Indian steel industry hy increasing the import duties leviable en certain iron and steel articles and by enabling hountles to be granted to manufacturers in British India on certain such articles The tures and Public Services hat as a result of British India on certain such articless. The discussions in the lobby the dobate upon it fill was for three jears only; is until list was adjourned sens due. Government scopted Warch 1927, and provided for the amendment a motion by Mr Ventsarpatitaju for the of the schoule of the ludian Irafi Act, 1884, appointment of a committee to consider steps containing the list of articles lishly to improve and expand the Indian Territorial due; it added a sub-section to section. Force and to remove racial distinctions from 3 of the Act providing that if after such the non regular military forces, including the inquiry as he thought necessary the 6-c. I. A. F. Other unofficial resolutions moved vernor-General in Council was assisted that

articles of any class liable to duty under Part Mi W S J Wilson representing the Assovill of the Second Schedule of the Indian Tariff clated Chambers of Commerce, protested that Act, 1894, were being imported into British India at such a price as was likely to render ineffective the protection intended to be offered by such duty to similar articles manufactured in India, he might, by notification in the Gasette of India, increase such duty to such extent as he thought necessary. The Bill further provided for the payment, on the estificate of an officer authorised by Government in this behalf and subject to certain specified conditions, of bounties varying from Rs 20 to Rs 32 per ton on steel rails and fish plates manufac tured in India It also enabled the Governor General in Council under two conditions speci fled in the Bill and with power to prescribe other conditions subject to which and the manner in which they might be paid in each of the financial years commencing from 1st April 1924 1st April 1925, and 1st April 1926 to pay by way oi hounties upon iron or steel wagons such sum not exceeding Rs 7 lakhs in any one financis year as he thought fit Sir Charles Innes in introducing the Bill ack

nowledged the great care and supartiality which the I wiff Board had brought to hear upon india was represented by the single firm of the fata Iron and Steel Company lead to a con troversy over the affairs of that one company the speech was chiefly explanatory inthe than an argument for the adoption of protection an, much of it was devoted to tracing back the details of the Bill to recommendations by the Larid Board As &t the period tions by the Larid Board. As to the period of the life of the measure, it is obviously undeatrable and indeed wrong, said fill r that lead in the large said which experience may show very shortly to be unnuteasarily high and we are quite satisfied that in three years time the whole one-dien that is of the amount of protection will have to be investigation of a protection will have to be investigated amount of protection will have to be investigated. hand it takes five years for a man embarking for the first tune on the manufac ture of steel to produce steel and therefore thro of stell to produce section direction.

It he duties are guaranteed only for three years they do not offer much attraction for new firms to come in 'sir Charles claimed that Gevernment had breated as a whole the scheme put forward by the Tarliff Board and asked the house to accept it as such, for, he pointed out, they had not merely to consider the question of the steel industry but also to take into account the interests of millions of consumers I think (concluded the Commerce Member) we all agree in this the steel industry in India collapses In this the steel industry in India collapses In the the steel industry in India collapses In the the steel industry in India collapses In the the indiate the Tariff Board have held the balance in the most careful manner between the interests of the industry on the one hand and the interests of the consumer on the other

and the interests of the consumer on the other prahmatics scheme from the Tariff Board imparial manner. It gives the minimum of protection which is required by the industry We have embodied those proposals of the Laufff Board in this Bill and I sak the House I avourably to consider that Bill.

the Bill had been introduced in undur heste and that protection should take the form of bountles rather than tariff manipulation The Bill he said, would inflict rank injustics upon Burms and upon all sxtremitics of Indis, the Karachl and Intlcorin

Pandit Madan Mohan Malavlys argued that no cystem should be adopted which would onable the manufacturer competing from a distance to transfer his manufacturing activi tles to India and that to pass a bill without sufficient safeguards against that would be a

The Hon the Financo Member of Covern ment roplied that the doctrine of discriminat ing protection through the import thriff having been accepted it would be difficult to improve upon the method chosen by the Fariff Board He pointed out that Industrial development in India must depend on parellel developments in other fields and in particular on the financial aide If the dengers of foreign capital wer to be avoided every him, possible must be done to increase the creation of new orillol a very intricate task and appealed to the Honse in India We count usefully regard pro-not to let the fact that the steel industry in tection as an end in itself Protection is one of the many means for (reating that many slded India which we have in view and therefore in commending this Bill to the Assemily I would like to add to it this request that II those who are interested in the furtherance of Indian Industry should turn their minds at the same time to the other directions in which progress is required progress in bankung progress in education specially technical education and the other directions which are necessary to create the men who ere to take part in creating the industry which this Bill is destined to establish firmly on its fue

> Mr Chaman Lal a Swarajist described the Bill as directly in the interests of the cal italists against the masses Mr Houga Iyer also a Swans list said Swans line at the nationalist thou of industries by a metional comment and this he advocated Mi V J Patril a leader of a wing of the Swamplets in the As sembly, argued that this was a most opportune time to take over the lota (ompany and run It as a national concern and as an alternative he suggested that the Company after receiving, protection should be asked to hand over to the State any profits above 5 per cent

The Bill was on the motion of Mr Neogy referred to a lect Committee consisting of the Hon S aries Innes the Hon Sir Basil Blackett Pu. dft Motlial Achru, Mr Wilscu, Pandit Madan Mohan Malaviya, Mr V J Patel Mr Beplu Chandra Pai Diwan Bahadur Patel MT JEPM CHARGE AND A BARGUE RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RAMACHART RA

Suggestions made in Select Committee in-Suggestions made in Select Committee in-cluded those of nationalisation, option to pur chase, profit-sharing, control by the Govern-ment and Legislature, the conditioning of pro-tection by the obligation to make certain con cessions to workers. The comparative advant ages of hountles and tariffs for protection were also debated. In the end the Bill emerged from the Committee with its provision for the special protection of tin plate struck ont but otherwise with only verbai alterations

The House again discussed the measure on 2nd June, when the debate was reopened hy Dr Datta moving, with the support of the free traders in the Honse, that the Bill he circulated for opinion, a step which, if adopted, would have shelved the Bill The motion was rejected by 51 votes to 21 the majority con sisting of 26 official and 25 nuofficial members Other free trade amendments were moved by Mr V J Patel and Mr Fleming in favour, respectively, of the exemption of steel being imported nuder contract by the Bombay Muni cipality and into Burms and both were rejected

The main discussion was on an ameudment by Mr Patel providing for the restriction of the protection afforded by the Ast to concerns in which "at least two thirds of the capital invested in the husiness is Indian Finally Government promised to appoint a Committee of official and unofficial members of the Legislature to examine the problem of the inflow of overseas capital and the following new clause was inserted in the Bill -

was inserted in the Bill—
"Notwithstanding anything contained in section 8 or section 4, no bounty in respect of steel rails, fish-plates or wagons shell be pay able to or on behelf of any company, firm or other person not already engaged at the com mencement of this Act in the husiness of manu facturing any one or other such articles, unless such company, firm or person provides is cilities to the satisfaction of the Governor General in Council for the technical training of Indians in the manufacturing processes involved in the business and in the case of a company unless-

- (a) it has been formed and registered under the Iudian Companies Act, 1913, and
- (b) it has a share capital the amount of which is expressed in the memoran dum of association in rupces, and
- (c) such proportion of the directors as the Governor General in Council has hy general or special order prescribed in this behalf consists of Indians

The Select Committee's exclusion of tinpiate from benefit under the Bill was overridden A rural members amendment to omit from the schedule of increased import daties a num ber of implements chiefly used on rallway and other engineering works was carried in the

The Conneil of State passed the Bill without amendment, its only opponent in the npper Chamber being the Hon Mr J W A Bell, representing the Bengal Chamber of Commerce

few munths later The Tariff Board were then commissioned to inquire into complaints that as a result of the maincompanies that as a result of the major that chance of high rupes exchange (at about 1s 6d) and of a heavy drop in the sterling prices of Continental steel the Protection Bill was largely ineffective. The Board found the complaint justified and recommended a substantial increase of protection through in the raising of the import duties, a method which they said they felt bound to specify since they were according to their intepretation of their terms of reference prevented from recommending hountles instead Government accepted the main finding of the Board hat decided to give the necessary additional protection by hounties Their chief reason for this decision was that the original Bill had divided the means of protection hetween increased import daties and hountles in proportions designed to balance the revenue from the former against the cost of the latter and that the revenue In question promised to be so large during the whole year as to provide not only for the houstles prescribed in the Bill hut for the additional ones required to give effect to the Board's indement in Isvour of Increased protection The orders accordingly passed by Government affect the current financial year only ]

The ufficial resolution for the removal of the import duty on sulphur, on the ground that sulphur was a raw material for various indus tries, was accepted

#### The Public Services

Sir Sivaswamy Iyer moved in regard to the Royal Commission on the Superior Civil Services a resolution declaring that the House would not he in a position to discuss the report till the September session and that to take action upon the report without waiting for discussion by it then would be resented in India The Hon the Leader of the House expressed his willingness to accept a resolution substantially in the terms of that moved and said, 'I am prepared to give on behalf of the Government of India and also of the Secretary of State a picage that no decision on any ques-tion of principle or policy shall be arrived at till this House has had an opportunity in the September session of examining the matter Pundit Madan Mohan Malaviya moved an amendment to the resolution to the effect that the proposais in the report ought to be exa mined simultaneously with the demand poil once engineering works was carried in the indied simultaneously with the demand poil belief that the utonsist in question were only teal put forward in the Assembly in February, are the passed amid unofficial to the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the property of the proper pened discussion of the Report

The Indian Legislature met in Simla on 3rd September for its Antumn session, at which the principal husiness was consideration of the senting the Bengal Chamber of Commerce [The provision in the Rill for the re-cxa printation of the amount of protection stage last on the table the observations made given in case its desired effect was not by the Provincia Governments on this Respective at tablet was hought into president and the decade was opened in the Legislative

- "(1) That the following recommendations of the Royal Commission on the Superior Civil Services in India he in principle approved
  - (s) that while the existing evstem of appoint ment and control of the All India Ser vices should, in present conditions he maintained in reserved fields, the follow ing services operating in transferred fields namely, the Indian Iducational Service, the Indian Agricultural Service the Indian Votermary Service the Bulki ings and Roads Branch of the Inclin Gervice of Engineers in those provinces in which the two branches have been separated and the Indian Forest Service in Bombay and Barma, should, so tar as inture recruits are concurred he appointed and controlled by Local Go vernments.
  - (b) that recruitment of Indians for the Ser vices in reserved fields should he increased as recommended .
  - (c) that, having particular regard to recommendation (a) early steps he taken to constitute the Public Services Commis sion contemplated by section 960 of the Government of India Act and to enact such legislation as may he necessary,
- (2) That pay passage concessions and pendions be granted to the officers of the Su perior Civil Services in India approximately on the soale recommended , and
- (3) That the recommendations of the Royal Commission regarding the constitution of the Provincial Medical Services in Governors Previnces be accepted in principle anhject to
  - (a) the employment in the Provinces of an adequate military reserve,
  - (b) the provision of adequate medical atten
  - (s) the further consideration of the conditions necessary to secure an adequate number of British medical recruite for the needs of the Army

The Hon the Leader of the House pointed ont that this debate was taking place in se cordance with the pledge given by Government cortaines with the preuge given by soveriment that before orders were passed on the Report the Indian Legislature should be given an opportunity of expressing its opinion on the recommendations. He proceeded to appeal to the Rouse not to hold in the belance against the memhers of the Public Services complaints that might be laid against Government on grounds of policy and showed that in every country nine-tentils of the government must boantry innecessars of the government must be carried on by the Services, who form the arms of Government He showed that the Royal Commission a proposals for the inture

Assembly on 10th September, when the Leader pointed to the drastic nature of the recommendations "If the proposals of the Commission This Assembly recommends to the Governor sion are given effect to there will, I estimate eventually remain in the All India Service only some 1,800 Estim Officers, including the doctors of the military reserve. If we confine our consideration to the two security services the I C 5 and the Indian Police Servicethe number of posts which will eventually be hell by Europeans on the proposals of the Commission is less than 900 Sir Alexander Middlinan devoted the latter part of his speech to the finencial proposals of the Report and impressed upon the House with a wealth of facts and arguments in support of the pressing need to give members of the Services economic reilef

Pundit Motilal Nehru immediately afterwards rose and moved a long and compli-ented amendment the crux of which la) in an carly paragraph stating that all questions early paragraph stating that an questions affecting the Civil bervices are inseparably connected with and entirely dependent upon the larger question of the grant of responsible Government to India and cannot he entertained and estimated by dealt with unless and until the resolution of this House on Responsible Government accepted on 18th February 1924, is substantially complied with 'The amendment demanded the stoppage of further recritment for the Services in England under the existing rules, the establishment of a Public Services Commission in India with functions determined on the recommendations of a com-mittee of the Jegusture Assembly and the transfer of the Dowers of appointment and control of the Services from the Secretary of State to the Government of Ingla and the Stato to the doverment of Ingle and the Local flowerments, and powers to be exercised under is wat to be passed by the Indlas and Local Inguistance regulating the Public Services in Indla, the index of the recruiment, then conditions of the recruiment, the conditions of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the condition of the con the provision of adequate medical attent dance for British Officers in the Civil Services and their families, and imposing of fresh burdens on the already overhurdened finances of the country, view of the financial relief that would follow the stoppage of recruitment outside India was prepared to consider the alleged grievances of present members of the Services and for that purposes recommended the Government to take steps to have a Committee elected by the House

> The debate extended over three days, the unofficial epeaches generally following political lines rather than the merits of the Report and eventually the amendment was adopted, the first part by 68 votes to 46 and the remainder without a division being challenged by Government

The Home Secretary moved in the Council of State on 15th September the same resolu tion in reference to the Lee Report as the Home Member moved in the Assembly on an earlier date Sir Devi Prasad Sarvadhikary Boysi Commission s proposal for the intere Home Member moved in the Assessment of the Services were based on the estitle date Sir Devi Prasad Sarvadhikary orinciple that the Services should be controlled immediately followed and moved an amend-interest of the controlled immediately followed and moved an amend-interest of the controlled that the controlled commends to the state of the controlled that is be substituted in the controlled that is be the controlled that is be the controlled that is be the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the controlled that is the State for India that pending the inquiries about reforms and action that may be taken thereomeric it is not cestrable to give effect to the recommendations of the Lee Commission He supported his opposition to the immediate adoption of the report by arguments on financial and political grounds and by the contention that delay would have no ill affect at any rate There followed a long debate in which Sir Mahomed Shaft H E the Commander-in Chief (General Birdwood) and Sirdar Charanjit made powerful speeches against the amendment and Messis Karandikar Veda mortland Nates n and Padshah Saheb strongly supported it The amendment was thrown out and Mr Karandikar groved another recom mending the reference of the Report to a Committee of both Houses of the Indian Legisla ture, and to await its report before taking action. This also was rejected and as the day was at an end the House adjourned

Naxt morning Mr Khapardo moved an amendment stipulating that every all India Service in both reserved and transferred fields should so far ae future recruits are concorned he appointed and controlled by Local Govern ments and that recruitment for these services should be so conducted as to produce within snow or so conducted as to produce within ten years a proportion of Indians to I uropeans in the ratio of 75 to 25 ger cent für Deep Prasad moved as an amendment of it the addition of a recommendation that all recruitment in England for the various scritics be at present stopped. The debate again listed several honrs and a large nun ler of unofficial members participated in it Finally all uncommente were rejected by such preponderance of noes that their movers did not chall ove divisions of the Honse upon them and the Government proposition was then carried

#### Other Business

The Legislature during its autumn dealt with a considerable amount of general business including numerous Bills Among the latter the following were of most importance and were dealt with as industed

The land Customs Bill was passed through all stages by both Houses The cristing law authorised Government to collect import duties at seaports only and the new reasure was to enable them to collect it also at land frontlers a development nicessitated by the larga amount of trade coming in across the Siam frontier in order to escape the new blab

The Imperial Bank of Indla (Amendment) Bill regulating assistance by the bank to other Council of State banks was passed finally by both Houses

The Cetton Ginning and Pressing Factories Bill, for dealing with malpractices in such factories was ordered by the Assembly to be circulated for opinions

The Indian Post Office (Amandment) Bill was passed by both Houses It authorises the lost office to sacction the use of letter stamping machines by mercantile houses and

The Indian Criminal Law (Amendment) Bill was passed by both Houses It affords addi-tional protection for persons under 18 years

There was an important discussion in the Council of State on a Resolution moved Sir Maoecku Dadabboy recommending Govern ment to introduce legislation providing for the annual provision of funds for the avoidance annual provision of lines for the avenuance or reduction of public deht. This was designed to give effect to the proposals made in the direction indicated by the Finance Member in bis Budget speech a few months previously. Government objected to legislation on the lines suggested on the ground that it was too carly to adopt permonent messures and stated that they proposed shortly to issue orders for five years instead of legislation so as to serve the Jurpose of the Resolution but permit the policy followed to be reviewed after a compara-(lvely short period

A long and eleborate Government Besolu-A long and eleborate Government Besont-tion which has been on the tapts for some years for the separation of railway finance trom general finance was laid hefore the Assembly big on rejort by Select Committee and was the subject of prolonged debate in which business considerations were mixed with the long the subject of the Swarsjust It was flunily adopted

Unofficial Resolutions adopted in the Assem lly were one for the ebolition of cotton excise duties end one for the suspension of the latter being con then industry committee the latter being con demned on the ground that it should be preduties end one for the suspension of the Taxaccded by a general condenie inquiry The Assembly in March voted the Budget grant for the laxation liquiry in the ourrent year, but there appeared since then to bave grown in the classes comingoing the electorate a feer that they would suffer from a revision of the incidence of taxation

Supplementary Budget Grants were passed The Assembly adopted despite carnest protests by the Home Member an unofficial Bill for the repeal of Part II (Part I already will, so regulate the Mahomi lan illgrim triffic having been repeated on Government initiative) by sea for Jeddah for the hal was referred to of the Criminal Law Amendment Act, and reported upon by Select Committee of the with the unpowers Government proclamation of Assembly associations whom they consider dangerous to be lilegal The lill was not moved in the

Both Houses were prorogned

## Central Government Committees

[The following are details regarding various Committees appointed by the Government of India and the institutes of which is of current importance.]

'4 The Committee will report to the Governor General in Council

The Committee assembled in Simia on August 4th, when there were placed before its quantity of written memorands submitted in response to the Government simitation reports by the Provincial Governments on the working of the Reform Scheme in their areas and a Memorandum prepared by a Departmental Committee.

randum prepared by a Departmental Committee of the Government of India dealing with technical matters arising ander the Govern ment of India Act. The Committee striptister for a fow days and thin in public for the examination of the Government of India I existent the end of August when owing to the autumn assession of the Government of India I existent carring September it adjourned till mid October Some further witnesses were then heard and a further adjournment was made till late in November. The Committee them researched more completed in the second week in December.

The report has not yet been published but it is understood that the Committee divided the majority eigning a report in secondary with the terms of reference and a 4 honort consisting of Sur Tej Bahadar Sapru Vir Sivaswamy Iyer Mr Junnah and Dr Paranjiye refusing to sign that it it its reported adopting one of their own b 3 d on the wider considerations claborat d in the ordeness of several of the witnesses.

Publication of the report is not expected to be long delayed but action no no it may suffer postponement through reference of it to the Provincial Governments for their of mions

The committee was a pointed as a result of a demand put forward in the legislative. Assembly hy the 'swarapists in Lebruary 1924 in secondary with their joiltheap programme and supperted by some of the Liberal party members on the nonoficial benches and by the Independents members who declined to be bound by any of the regular party programment for the resolution embodying the demand below corried. Funds and the demand of the committee the resolution embodying the demand below of the committee the resolution of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of the committee of

This Assembly recommends to the Governor General in Council to take steps to have the Government of India Act revised with a view to establish full responsible government in India and for the said purpose

(a) to summon at an early date a representative Round Table Conference to recommend with due regard to the protection of the rights and interests of important minorities the scheme

and interests of important minorities the scheme of a constitution for India and (b) atter dissolving the Central Legislature to place the said scheme before a newly elected Indian Legislature for its approval and submit the same to the British Parliament to be embodied in a Statute

#### EXTERNAL CAPITAL COMMITTEE

Several unofficial members of the Legislative announced in September, its personnel being as Assembly, during the discussion of the Indian follows Steel (Protection) Bill, at the Simia session of The I the Legislature in May and June, 1924, expressed hostility to the protection to be afforded by the measure, et the expense of the Indian taxpayer being heneficial to industries conducted in India with foreign capital Demands were made by them for the exclusion of industries so capitalised from the operation of the henefits assured by the measure and the prejudice was shown to extend to any industry so organised in India The Commerce Member of Govern ment, the Hon Sir Charles Innes replied with a promise to appoint a Committee of members of Government and the Legislature to consider the question of the flow of capital into India from external sources

The appointment of the Committee was by the middle of January

The Hon Sir Basil Blackett, RCB, Finance Memher of the Governor-General's Execu

live Connell, (Chairman)
The Hon Sir Charles Innea, K C.S.I., C I B.,
Member of the Governor General a Execus

tive Conneil for Commerce and Railways The Hon Mesers J W A Bell and G A he Hon Mesers J W A Bell and G A Natesen and the Hon Dr Dwarksnath

natesan and the Hon Dr Dwarkanath Mitter, elected by the Council of State Mr W S J Wilson, Sir P S Sivaswam, Iyer, KOSI, OIE Pundit Madan Mohan Mahaviya and Mr V J Patel, elected by the Legislative Assembly

The Committee held preliminary meetings during the September session of the Legislature and issued an elaborate questionnaire from Delhi in November replies to this to be returned

## AUXILIÂRY AND TERRITORIAL FORCE COMMITTEE

The Legislative Assembly on 5th February | 1924 after a long debate initiated by an un | official member adopted the following resolu-tion moved by Pundit Madan Mohen Malaviya and assented to by H E the Commander in Chief in helialf of Government —"This Assembly recommends to the Governor General in Conneil that a Committee including members of the Legislature be immediately appointed to investigate and report what stops should be taken to improve and expand the Indian Territorial borce so as to constitute it an efficient second line of reserve to the regular army and also to remove all racial distinctions in the constitution of the non regular military forces in India, including the Auxiliary Force

Government accordingly appointed a com mittee with the collowing terms of reference -

To consider and report what steps should be taken-

- so as to constitute it an efficient second line to the regular army
- To expand the Indian Territorial Force so as to constitute it an efficient second line to the regular army . To remove racial distinctions in the
- constitution of the non regular military forces Including the Anxillary Force

The composition of the Committee was as

Lieut Genl Bir John Shea, KOB, KOM G D 50 , Adjutant General in India (Chair man.

Sir P S Sivaswamy Iyer, KCSL, CIW, Dr R P Paranipve, D Sc , JP Dr Zia-ud Din Ahmad, D Sc , CIF, M L C

Dr S K Mullick, CBR, MB

Capt Ajab Khan CBE, IOM, M.L.A Mr H Calvert, 108, MIA

Ilent Col H A J Gldney, M L A Ilent Col G E Ilewhollin, VD. ADG Capt Sural Singh Bahadur, I Q M

Colonel J C Freeland Deputy Directors Auxiliary and Territorial Forces, Army Head quarters, was appointed Secretary

Dr Zia ad Din being unable to serve on the Committee throughout its deliberations, owing to his absence in Enrope, Dr Hyder, D.Sc., To improve the Indian Territorial Force 01 8, M.L.A , was appointed in his place

The Committee held preliminary meetings in Simla on 19th and 11th June, to settle the pro-cedure to he adopted in pursuing their in They then adjourned till late August quiries but as two members were then still engaged npon the Reforms Inquiry Committee a fur ther adjournment till Newmber was made The Committee met in Delhi on 10th November and sat daily till 22nd of that month, hy when they completed their investigations. They then adjourned till the end of January, with the intention of meeting then for the consideration and adoption of their report, which was pub lished in February

#### TAXATION INQUIRY COMMITTEE

The question of instituting a scientific loquity into the system of Indian taxation has recently attracted considerable attention in India and has on more than one occasion been India and has on more than one occasion been discussed in the Indian Lexislature. The first annual conference of Provincial Finance Members with the Finance Department of the Government of India, hell in Aovemier 1923 agreed to the destrability of such an inquiry and to the general lines on which it should Proceed and the Government of India accord Proceed and the Government of India accord Proceed and the Government of India accord ing'y in May 1924, issued a Resolution an nouncing the formation of the following Committee for the purpose -

Sir Charles Todhunter KCSI, 108 till resently Finance Member of the Lxecutive Council of the Governor of Madiss (Chair

Sir Percy Thompson KRE, Deputy Chairman of the Board of Inland Revenue in England Sir Bliny Chand Mahtah, GCIF GOSI, ION Maharajadhijaji, Bahadur of Buid

wan, and Dr R P Paranipye, Professor of Ferguson College, Poons

Dr L K Hyder, Professor of Feonomics at Aligarh University, was subsequently added to strengthen the expert side of the Com mittee, and

The Hon Sirdar Jogendra Singh Vember of the Conneil of State vas added to strongthen the representation of agricul tural interests a discussion in this direction having been raised by him in the Council of State after the first annonucement of personnel

Mr W B Brett 1 CS, was appointed secre terv

The following were notified to be the terms of reference to the Committee -

- (1) To examine the manner in which the harden of taxation is distributed at present between the different charges of the population,
- (2) To consider whether the whole scheme of taxation-(entral Provincial and Local-is equitable and in accordance with economic principles and if not in what respects it is defective.
- (3) To report on the suitability o alterna tive sources of taxation,
- for the imposition, assessment and collection of taxes old and new.
- (5) To prepare rough estimates of the financial effects of the proposals

Government in their Resolution announcing the institution of the inquiry stated, 'The motive for the appointment of the Committee is not any need for meeting additional expenditure or any intention to increase the total amount raised by taxation in India. The necessity for the inquiry arises largely from the effect produced by the war on the general level of prices and of expenditure and consequently on the incidence of taxation in its existing forms.

The problems arising therefrom are common to many countries, but in India the changes which have been made since the war in the relations between the central and provincial Governments and the development of self government formsh special reasons for a study of the subject of taxation in general and for the examination of alternative sources from which to raise the money to meet the expenditure which has necessarily to be incurred by the various taxing authorities at the present time"

The intention of Government to appoint the Committee was announced in the Council of State on 4th February 1924 when the proposal was subjected to useful criticism and some hon members on the unofficial benches urged Govern members on the unfamiliar cenductured system ment also or alternatively to institute a general coolonic inquiry. An thomicial resolution for the suspension of the Inquiry was moved in the Legislative Assembly in September, six months after the House had passed the Budget. vote for the first year a expenses of the Inquiry and four months after the Chairman of the committee had in association with Sir Percy Thom; son, initiated its actos! work by inquiries in Enrope its supporters demanded instead of this inquiry a general economic inquiry Government pointed out that the latter would take many years to complete on useful lines and would almost certainly have to be conducted by Provincial Governments while the Taxa-tion Inquiry was an immediate need for immediate purposes The resolution was immediate purposes nevertheless carried

The second annual conference between Provincial Finance Members and the Finance Department of the Government of India took place in Delhi in November and information was. after its conclusion published to the effect that as a result of a discussion at the Conference in conjunction with Sir Charles Todhunter Figure Member of the Covernment of India has secured general approval of a suggestion tive sources of taxation,
to issue to the Taxation Inquiry Committee a

4) To advise as to the machinery required further direction that they should consider and recommend lines on which an economic inquiry, following their own inquiry, might be instituted

> The Committee was at the end of the year on tour in the conrec of its investigations

#### INDIAN BAR COMMITTEE

A Committee was constituted by the Govorn ment of India on 7th December 1928, to examine and report on—

(1) the proposals made from time to time for constituting an Indian bar, whether on an all India or a Provincial

basis, with particular reference to the constitution statutory recognition, constitution statutory recognition, functions and authority of a Bar Council or Bar Councils and their position vis a-vis Higb Conrts, mendations

The constitution of the Committee was as

Sir E M. des C Chamier, Kt., Barrister-at-law, Legal Adviser and Schietter to the Secretary of State and late Chief Justice of the High Conrt of Judiesture at Patna (President)

The Hon. Mr Justice V M Coutts Trotter, Barrister at law, Judge of the High Court,

The Hoa Mr Justice Dinshah Fardunji Mulla, LL B, Additional Judge of the High Court, Rombay

Mr S R Das, Barrister-at-law, Advocate-General, Benual

Mr H P.Duval. I e.S., Secretary to the Government of Bengal, and Superintendeut and Remembrancer of Legal Affairs, Bengal,

Colouel Sir Henry Stanyon, Kt., C.L.E., V.D. Barrister-at-law Rao Bahadur Tiruvenkata Bangachariar,

Vakil High Court, Madras

Mr Sitaram Sunderrao Pat Government Pleader, Bombay Patker, LLB,

Mr M M Chatterji, President of the Incor-porated Law Society, Calcutta Mr J H Wise, 108, was appointed Secre-

terv Rai Behadur Babu Lalit Mohan Banarji, M.A., LLB., Government Advocate, Allaha-bad, was later appointed member of the Committee in place of Mr Justice Mulla, who communicated his inability to serve

Previous proposais for the formation of an Indian Bar were embodied in a resolution meved in the Legislative Assembly by Munchi Iswar Sarao on 24th February 1921 These were sub-mitted to the criticism of sasciations and individuals throughout India and the opinions expressed ou them, showing wide divergence of views, were before the Committee The President of the Committee also, before a meeting of its members, issued a questionnaire desiing with the subject of its investigations. The Committee took a large amount of evidence orally and otherwise

The Committee presented a unanimous report—subject to certain unsutes of dissent—in February 1924 It included sweeping recommendations for the removal of distinctions between different classes of practitioners in the High Courts, but announced that as regards the com-

(2) the extent to which it may be desirable to remove existing distinctions enforced by statute or practice between best and the process of the second world generally and the division permission or a change of the existing

system.

As regards the orestion of an Indian Bar, the Committee reporter. "We have had fittle difficulty in coming to the conclusion that it is not practicable to set up an all-India Bar in the sense of a body of legal pracetisness admitted to practise and controlled by one santral authoritable to the sense of a body of legal pracetisness admitted to practise and controlled by one santral authoritable and the santral authoritable in the santral indian Bar has proved affractive to some minds as being in accordance with what is called the sational inevenent. But it is not possible to have an alk-India Bar in any reed such that the santral indiance is to be throughout india a single type of advocate possessed of the name cust of the Country It might perhaps be possible to secure uniformity in the three Presidencies but our inquiries in the different places which we visited have antended us that observant this world not be possible. The tendency is for we vigted have security in that the water that would not be possible. The tendency is for the Presidencies and Provinces to develop on their own lines, education is more advanced in some than in others and the same degree of proficiency eaunot at present be attained or insisted on throughout India."

The Committee point out that ne institution corresponding to an all-India Council with definite powers of control is to be found in any other part of the Empire They further say—

"While we are of opinion that the establishment of the stablishment of the stablishment of the stablishment of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the stable of the all the High Courts would at present be able to

all the High Courts would at present be able to make the best use of the powers which witnesses have suggested should be conterred open them in favour of wholly independent for Councils in India with final disciplinary authority have done so in ignorance of the fact that they are advocating an institution which is aimcst without parallel in the Empire or the United States of America."

The Committee for the present recommend the establishment of statutory Bar Councils, appointed in ways they detail and invested with powers that they suggest, at Calcutta, Madras, Bombay, Allahabad, Patus and Rangoon and that provision be made for setting up others at Lahore, Nagpur, Karachi and Lucknow when experience has been gained of the working of the Councils at the other centres indicated

Courts, but announced that as regards the com-pulsory dual system of advocates and attorneys report for information and public atticken before er valits in existence in the High Courts of forming their own final concinsions.

#### COAL INDUSTRY COMMITTEE.

The Legislative Amembly on 18th March 1934, on South African coal imported into India after considerable debate adopted a resolution. The recommendation was based on the need to moved by a Bengal uncofficial member recom- protect the Indian coal mining industry. The mending the imposition of a countervalling duty librarapeat of India decided by refer to the

Tariff Board for investigation the question whether the Indian coal trade is in need of protection either against coal from South Africa or against imports of overseas coal generally and if so whether, having regard to all tho interests con concerned, protection should be

Imports of coal into India are relatively small and are steadily diminishing in quantity The average production of coal in India during the three years preceding the adoption of the Assembly resolution was about 19 million tone per annum and imports during the same period
were respectively (in thousande of tons) 1,489,
862 and 592 Returns for the succeeding months continued to show a decline in imports of Indian coal overseas simultaneously con The statistics indicate that the com potition from which the Indian coal industry is suffering is not so much in its home market as in overseas markets, such as Colombo and Singapore, The Government of India, therefore, decided to appoint an expert committee representative of the interests concerned, to consider this side of the matter and they did so on 20th September 1924, with the following terms of reference -

#### ' To inquire and report-

(1) generally what measures can be taken by Government, by the coal trade, by the railways and by the ports, whether (2) in particular, whether effective messares can be taken for the pooling and grading of Indian coal for export and for hunkering and how the cost of such measures should be met."

The Committee is composed as follows —

Mr F Noyce, 0.51, 0 BE, 10.8 (President)
The Chief Mining Engineer to the Railway Board

Mr F C Legge, CBE,, Director of Wagon Interchange

Mr S C Stuart-Williams, Chairman, Calcutta Port Trust

Mr A A F Bray, Chairman, Indian Mining Association Mr W C Bannerice, Vice-Chairman, Indian

Mining Federation

Stralendra Nath Mookerjee, KOIN, KOVO
of Messra Martin & Co, Calentta
The Hon Mr J W A Bell, of Messra
Mackinnon Mackanie & Co, Calentta
Mr H P V Townend, IC, S, being appointed Secretary

Government, in announcing the appointment the Committee, stated 'The recommends of the Committee, stated tions of the Committee will necessarily influence the Tariff Board s investigation of the question whether the Indian coal trade is in need of pro-tection. The Government of India, therefore after consulting the Tariff Board, bave decided to postpone this reference to the Tariff Board until after the Committee has reported

The Committee began its meetings in October and by direction of the Government of India has the range of the continuation, to stimulate and by direction of the Government or manner the export of cuttable coal from conducted its main inquiry in Calentia, subject to talks of inquiry to other ports. Its pro-Calcutta to Indian and foreign Ports, to visits of inquiry to other ports Its I

# A steady "all - the - year - round" sale for these fine Sankey Lines

### SANKEY ALL STEED

The barrow is a distinct ad wrince in Wheelbarrow construction It is substantially built from fine quality steel with reinforced upper edge to provide greater strength where the wear comes. The freme projects beyond that toughened steel wheel and forms a rest for tropms and dumming.

#### ART METAL WARE

We manufacture a wide var ety of beautifully designed and finished Art Metal Ware neluding Match Stands Visses Jardinieres Crumb Trays Ash Trays etc These lines sell well and pay a good profit

Sankey Hollow Ware is famous the world over for its superb quality and reliability. The range includes every description of household utenul in demand to-day.

### SANKEY STAINLESS IRONWARE

The articles contained in the Sankey Stainless. Iron Range are manufactured from an alloy of Iron and Chromium and belong to the rust reinting class known commercially as Stainless or Rustless. This does not mean that the meternal well not extain or rust under any circumstances but simply that it offers a high resistance to these influences and in use retains its brightness untarnished over long periods

Send to-day for full particulars.

### IRRIGATION

marches hand in hand with development—without water the soil remains a barren waste. Canals are extended continually but cannot keep pace with the demands of the ambitious Agriculturist.

The solution of the ever present water question is the installation of deep tube wells capable of irrigating upwards of 200 acres per well.

The Empire Engineering Co., Cawnpore, are fully equipped to bore and install tube wells of the largest size, complete with all necessary pumping plant.

Free expert advice is at your disposal and we shall be pleased to give you quotations and estimates without charge

#### BENNETT, COLEMAN & CO'S PUBLICATIONS

#### WORKS BY

#### C. A. KINCAID, C.V.O., I.C.S.

## Price Re. 1-2. By V.P.P Re. 1-5. The Hindu Gods

HE object of this little work is to supply a want which is widely felt among Europeans resident in India, namely, a simple little guide book, which will help them to tell at a glance to what God a temple is dedicated or what the little brass images on their own and their neighbours' drawing room tables represent

## Price Re. 1-0. By V.P.P. Re. 1-3 OUR PARSEE FRIENDS.

A brothure giving a concise authoritative account of the history, religion and customs of the Parsee race

BENNETT, COLEMAN & Co., Ltd., BOMBAY, CALCUTTA, LONDON,
